Kazakhstan's ASTEL to deploy Gilat SkyEdge II broadband satellite network for corporate and government agency sites

--New network includes Gilat's dedicated solution for multi-star networks, NetEdge--

Petah Tikva, Israel, April 26, 2010 – Gilat Satellite Networks Ltd. (Nasdaq: GILT) today announced that it is providing a SkyEdge II broadband satellite communications network to its long-standing customer ASTEL, one of Kazakhstan's leading telecommunications operators.

The new network for ASTEL includes two SkyEdge II satellite hub stations and several hundred SkyEdge II Access VSATs, in addition to the recently announced Gilat NetEdge Gateways. The VSAT network will deliver a wide range of interactive data applications, including VoIP, video conferencing and virtual private networks.

NetEdge is a high-performance satellite communications solution, specifically designed to meet the requirements of multi-star private networks for corporations as well as for cellular backhaul applications. Single-hop connectivity is provided, network wide, between the NetEdge components. This enhances the user experience and application performance for all intra-corporation, cellular backhaul and Internet traffic. It also implies significant space-segment savings compared to alternatives.

"Gilat's ability to continually introduce new solutions that meet our evolving needs is the foundation of our long-term business relationship," said ASTEL President Vladimir Breusov. Gilat's advanced SkyEdge II VSAT suite enables us to continue to provide the highest level of customer service while meeting the complex networking requirements of Kazakhstan's enterprises and government agencies. The flexibility of Gilat's solutions will enable us to quickly expand this new network to meet customer demand."

Arie Rozichner, Gilat's regional vice president, Eurasia, said, "We are pleased to have once again been chosen by ASTEL to deliver our high-performance VSAT networks, including the latest addition to the Gilat SkyEdge II portfolio, NetEdge. NetEdge creates new revenue opportunities by extending satellite-based services to small private networks and offers service providers such as ASTEL the best of both worlds – one-hop corporate network connectivity with shared bandwidth for excellent network efficiency. This results in a competitive, high-performance solution with a low total cost of ownership."

Gilat's broadband satellite communications networks have been serving the Kazakhstan market since 1998, helping to improve the quality of life for businesses and citizens in the country's most remote regions. Gilat's VSAT networks provide dependable, high-speed data networking to government agencies, banks and energy companies at thousands of sites

throughout Kazakhstan. The majority of telecom operators in Kazakhstan deploy Gilat satellite equipment.

About Gilat SkyEdge II

Gilat's SkyEdge II is a multi-service platform enabling the delivery of high-quality voice, broadband data and video services for diverse environments including enterprises, rural networks, cellular backhaul and government network applications. SkyEdge II is a standards-based system using DVB-S2 and DVB-RCS. With better efficiencies and full adaptivity for both the inbound and outbound channels, it provides higher performance that serves the growing requirements of end-users. Gilat's diverse portfolio of SkyEdge II VSATs are all supported by a unified platform, offering service providers the most suitable product for their application needs as well as the flexibility to evolve their networks.

About ASTEL

Founded in 1993, ASTEL is a leading telecommunications provider in Kazakhstan with a long history of building successful corporate data and voice transmission networks using advanced technologies. The Company primarily provides telecommunication services through its own data transmission network KazNet. ASTEL is Kazakhstan's largest provider of satellite communications terminals. For 17 years, the Company has expanded its range of services to meet the strict requirements of its customers and through its commitment to quality, ASTEL ensures optimal efficiency of each solution. ASTEL plans to expand its telecommunications activities in central Asian countries such as Tajikistan, Uzbekistan, Kyrgyzstan and Turkmenistan.
