Gilat extends service with Colombian Ministry of Information Technology and Communications throughout 2011

New extension and amended agreements valued at approximately \$21M

Petah Tikva, Israel, 5 January, 2011 – Gilat Satellite Networks Ltd. (Nasdaq: GILT), a worldwide leader in satellite networking technology, solutions and services, today announced that the Ministry of Information Technology and Communications in Colombia, with the National Fund of Development (FONADE), has extended and amended the agreements for the provision of services under the Rural Communitarian Telephony and Telecentros projects for an additional one-year term, through December 31st, 2011. The extended service agreements are valued at approximately \$21 million.

These service agreements are for projects that provide telephony and public data access to remote communities throughout rural Colombia. The current extension of the agreements covers approximately 1600 sites that will be served by Gilat throughout 2011 and includes certain performance indicators and schedules of new installations. The new sites include telephony sites, small community internet access Telecenters known locally as CACI sites, and larger Telecenters. The Telecenters are equipped with telephones, computers, printers, scanners, faxes and webcams all provided by Gilat.

As part of the agreements, the Telecenters' administrators will be qualified by Gilat to conduct computer and internet literacy training for the community members. Gilat will also upgrade over 850 existing CACI sites to increase the download and upload data rates twofold, from 256kbps/64kbps to 512kbps/128kbps, which will allow the users to benefit from applications that are more bandwidth intensive. As part of the agreements, Gilat will also transfer up to 337 existing CACIs from sites where terrestrial coverage is now available, to new remote locations where broadband and telephony infrastructure have not yet existed.

“We are pleased to continue playing a key role in this important initiative of the Colombian Ministry of Information Technology and Communications that enables affordable telephony and Internet access to rural communities throughout the nation with no access to alternative connectivity.” said Amiram Levinberg, Gilat’s CEO and Chairman of the Board.

This latest extension continues Gilat’s engagement with the Colombian Ministry of Information Technology and Communications as announced over recent years:

- In December 2008, Gilat announced the signing of new agreements for earlier projects for the provision of telephony and Internet access services to remote communities;
- In August 2009, Gilat announced the successful deployment of the SkyEdge II broadband satellite communications network at more than 1300 sites as part of the arrangements with the Colombian Ministry of Information Technology and Communications to upgrade service; and

Press Release (cont.)

- In January 2010, Gilat announced that the Ministry of Information Technology and Communications in Colombia extended and amended the service agreements for an additional one-year term, through December 2010.

About Gilat

Gilat Satellite Networks Ltd. is a leading provider of products and professional services for satellite-based broadband communications networks worldwide. Gilat was founded in 1987 and has shipped over 750,000 Very Small Aperture Terminals (VSATs) to more than 85 countries across six continents. Gilat's headquarters is located in Petah Tikva, Israel. The Company has 16 sales and service offices worldwide. Gilat develops and markets an expansive range of broadband satellite solutions including high-performance VSATs under the SkyEdge™ and SkyEdge II brands, low-profile antennas for satcom-on-the-move, under the RaySat Antenna Systems and the StealthRay™ brands and next generation solid-state power amplifiers for mission-critical defense and broadcast satellite communications systems under the Wavestream brand. Gilat's wholly-owned subsidiary, Spacenet Inc., is a leading provider of managed services in North America to the business and government segments. Visit Gilat at www.gilat.com.
