Gilat Awarded \$6.75M Contract Extension to Continue the Provision of Internet Connectivity Services to Schools in Colombia

- Extension awarded by Colombian Ministry of Information Technologies and Telecommunications will enable continued broadband service to over 1500 schools -

Petah Tikva, Israel, 11 June 2013 – Gilat Satellite Networks Ltd. (NASDAQ: GILT), a worldwide leader in satellite networking technology, solutions and services, today announced that the Colombian Ministry of Information Technology and Telecommunication (MINTIC) has extended the contract, with the extension valued at approximately \$6.75M. Under the contract, Gilat will continue to provide broadband internet connectivity to over 1500 schools throughout the country's outlying areas.

This contract extends the award originally received by Gilat in December 2011. The project, hosted by the Direccion de Conectividad (formerly "Compartel") and the Ministry's "Fondo de Tecnologías de la Información y las Comunicaciones," is scheduled to finish by early December, 2013, at the end of the current extension.

"We were happy to receive the contract extension to continue providing Internet services to Colombian schools as part of the Ministry's significant efforts to improve education and employment in rural areas," said Danny Fridman, CEO of Gilat Peru and Colombia. "Gilat is proud to be part of improving the quality of education around the world by enabling broadband-enabled classrooms, providing students and teachers with fast, reliable, satellite connectivity."

The network, which utilizes the innovative Sky-Edge II WebEnhance VSAT, will provide over 1500 schools with data rates of up to 2 Mbps located in five separate districts across rural Colombia. The program is part of the Colombian government's ongoing efforts to "bridge the digital divide" and reduce the communications gap in Colombia with increased investment to improve access to advanced communications services in schools.

About Gilat

Gilat Satellite Networks Ltd (NASDAQ, TASE: GILT) is a leading provider of products and services for satellite-based broadband communications. Gilat develops and markets a wide range of high-performance satellite ground segment equipment and VSATs, with an increasing focus on the consumer and Ka-band market. In addition, Gilat enables mobile SOTM (Satellite-on-the-Move) solutions providing low-profile antennas, next generation solid-state power amplifiers and modems. Gilat also provides managed network and satellite-based services for rural telephony and Internet access via its subsidiaries in the United States, Peru and Colombia.

Press Release (cont.)

With over 25 years of experience, and over a million products shipped to more than 85 countries, Gilat has provided enterprises, service providers and operators with efficient and reliable satellite-based connectivity solutions, including cellular backhaul, banking, retail, e-government and rural communication networks. Gilat also enables leading defense, public security and news organizations to implement advanced, on-the-move tactical communications on board their land, air and sea fleets using Gilat's high-performance SOTM solutions.
