Gilat and HISPASAT Enhance VNO Activity

Gilat/HISPASAT Virtual Network Operation program enrolls two new ISPs wishing to provide Internet services via satellite in Spain and Portugal

Petah Tikva, Israel, November 4, 2014 -- Gilat Satellite Networks Ltd. (NASDAQ, TASE: GILT), a worldwide leader in satellite networking technology, solutions and services, announced today that its Virtual Network Operations (VNO) program with Spanish satellite operator HISPASAT has signed on two new ISPs who intend to provide Internet services via satellite in Spain and Portugal.

HISPASAT recently purchased a new SkyEdge II-c hub for its Arganda Teleport in Madrid. "A key reason for the adaptation of Gilat's advanced SkyEdge II-c platform was to better support our growing list of ISPs that require VSAT service for distant areas," remarked Inés Sanz, Head of Customer Engineering at HISPASAT. "A key competitive advantage for ISPs is the ability to provide different services to different market segments. Gilat's flexible service differentiation system enables this important functionality via satellite."

The new ISPs are Euskaltel of the Spanish autonomous community "Basque Country", which previously ordered SkyEdge II-c Customer Premise Equipment (CPE) in a campaign to equip households with Internet access that are not covered by its cable network, and NOS (previously known as ZON Optimus) of Portugal, which placed an initial order for CPE kits for a government-funded project.

"We designed our VNO CPE kit with ISPs in mind," explained Erez Antebi, Gilat's CEO. "The kit delivers better user experience thanks to our acceleration capabilities. It is also 'future-ready' for up to 40Mbps data rates."

About HISPASAT Group

HISPASAT Group is composed of companies with a foothold in Spain as well as in Latin America, where its Brazilian affiliate HISPAMAR sells its services. The Group is a world leader in the distribution and broadcasting of Spanish and Portuguese content, and its satellite fleet is used by important direct-to-home television (DTH) and high-definition television (HDTV) digital platforms.

HISPASAT is one of the world's largest companies in terms of revenue in its sector, and the main communications bridge between Europe and the Americas.

About Gilat

Gilat Satellite Networks Ltd (NASDAQ, TASE: GILT) is a leading provider of products and services for satellite-based broadband communications. Gilat develops and markets a wide range of high-performance satellite ground segment equipment and VSATs, with an increasing focus on the consumer and Ka-band market. In addition, Gilat enables mobile SOTM (Satellite-on-the-Move) solutions providing low-profile antennas, next generation solid-state power amplifiers and modems. Gilat also provides managed network and satellite-based services for rural telephony and Internet access via its subsidiaries in Peru and Colombia.

With over 25 years of experience, and over a million products shipped to more than 85 countries, Gilat has provided enterprises, service providers and operators with efficient and reliable satellite-based connectivity solutions, including cellular backhaul, banking, retail, e-government and rural communication networks. Gilat also enables leading defense, public security and news organizations to implement advanced, on-the-move tactical communications on board their land, air and sea fleets using Gilat's high-performance SOTM solutions.
