Gilat to Showcase Solutions for Rural Broadband via Satellite at AfricaCom, 2015

Company to also highlight its new X-Architecture, optimized for HTS, along with satellite-based solutions for expanding and upgrading cellular networks

Petah Tikva, Israel, November 10, 2015 -- Gilat Satellite Networks Ltd. (NASDAQ, TASE: GILT), a worldwide leader in satellite networking technology, solutions and services, announced today that it intends to showcase solutions for Rural Broadband via Satellite at AfricaCom 2015, Cape Town Convention Centre, November 17-19, 2015 – Booth D1.

It will also highlight its new X-Architecture, optimized for High-Throughput Satellites (HTS), which enables satellite operators to dynamically support mobility, enterprise, cellular and consumer broadband markets – and different business models – all from a single platform.

“Africa offers a great potential for growth, as satellite communication connects previously isolated communities in the region more efficiently and cost-effectively than before. Gilat is well-placed to drive rural broadband solutions in Africa, and become the best partner to the new HTS providers who plan to deploy their services across the continent”, said Dov Baharav, Gilat’s Interim CEO and Chairman of the Board.

He continued: “Thanks to Gilat’s extensive experience in remote and rural parts of Latin America and Asia, we have seen how beneficial the delivery of broadband internet via satellite can be to the people in those areas. So we know that its impact on the lives of people in remote African locations will be similarly positive. Our revolutionary X-Architecture and SkyEdge II-c family of products, coupled with our NOC operation and overall services, will support a new HTS infrastructure era in Africa.”

At the event, Gilat will also display its satellite-based solutions for expanding and upgrading cellular networks:

- Capricorn, the fastest VSAT on the market, which provides cellular backhaul capabilities of up to 200 Mbps, maximizing handset performance on 3G/LTE networks
- CellEdge, Gilat’s integrated small-cell over-satellite solution, which enables full turnkey deployment of 2G/3G networks in even the most remote regions
- Libra, Gilat’s hybrid satellite-cellular solution, which leverages cellular infrastructure to provide cost-effective rural connectivity

About Gilat

Gilat Satellite Networks Ltd (NASDAQ, TASE: GILT) is a leading provider of products and services for satellite-based broadband communications. Gilat develops and markets a wide range of high-performance satellite ground segment equipment and VSATs, with an increasing focus on the consumer and Ka-band market. In addition, Gilat enables mobile SOTM (Satellite-on-the-Move) solutions providing low-profile antennas, next generation solid-state power amplifiers and modems. Gilat also provides managed network and satellite-based services for rural telephony and Internet access via its subsidiaries in Peru and Colombia.

With over 25 years of experience, and over a million products shipped to more than 90 countries, Gilat has provided enterprises, service providers and operators with efficient and reliable satellite-based connectivity solutions, including cellular backhaul, banking, retail, e-government and rural communication networks. Gilat also enables leading defense, public security and news organizations to implement advanced, on-the-move tactical communications on board their land, air and sea fleets using Gilat's high-performance SOTM solutions. Gilat controlling shareholders are the FIMI Private Equity Funds. For more information, please visit us at www.gilat.com
