GILAT PRESS RELEASE

Gilat Awarded Multimillion-Dollar Contract for SATCOM Expansion on Trains in Asia-Pacific

Antennas from Gilat to enable satellite-based internet for passenger trains

Petah Tikva, Israel, February 2, 2023 -- Gilat Satellite Networks Ltd. (Nasdaq: GILT, TASE: GILT), a worldwide leader in satellite networking technology, solutions, and services, announced today that the company was awarded a multimillion-dollar contract for the expansion of satellite communications (SATCOM) capabilities on trains in Asia-Pacific.

Gilat's ER7000 SATCOM On-The-Move antennas were chosen by a leading integrator, for installation on trains to provide continuous internet access to passengers travelling across the Asia-Pacific region.

Throughout the world, Gilat's field-proven ER7000 antennas have been successfully deployed to empower SATCOM On-The-Move applications. They provide reliable, high-performance broadband connectivity for vehicles and rail travel, maximizing throughput with high efficiency in a low-profile system with minimal size and weight. These features make the ER7000 ideally suited for these applications, enabling real-time broadband satellite communications for video, voice, and data transfer.

"For many applications, SATCOM on-the-move is the only choice for reliable, continuous, and quickly deployable broadband connectivity. This project is an excellent example of how Gilat antenna systems can be used to provide better management of complex transportation networks, as well as reliable internet coverage for passengers," said Amir Yafe, VP of Mobility & Global Accounts at Gilat. "We are excited with the prospect of working on more projects like these to be deployed in the future."

About Gilat

Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT) is a leading global provider of satellite-based broadband communications.

With over 30 years of experience, we create and deliver deep technology solutions for satellite, ground and new space connectivity and provide comprehensive end-to-end solutions and services, powered by our innovative technology. We believe in the right of all people to be connected and are united in our resolution to provide communication solutions to all reaches of the world.

Delivering high value solutions, our portfolio is comprised of a cloud-based platform and high performance satellite terminals designed to work in harmony with satellite constellations, including Very High Throughput Satellites (VHTS) and Software-Defined Satellites (SDS) in multiple orbits; high performance Satellite On-the-Move (SOTM) antennas; and highly efficient, high-power Solid State Power Amplifiers (SSPA) and Block Upconverters (BUC).

Gilat's comprehensive solutions support multiple applications with a full portfolio of products to address key applications including broadband access, mobility, cellular backhaul, military, government, and enterprise, all while meeting the most stringent service level requirements.
