Re: Class action against Bezeq

On April 22, 2018, Bezeq received a motion to certify a class action that had been filed against Bezeq on April 17, 2018, in the Tel Aviv District Court.

The motion alleges that Bezeq is in breach of the prohibition prescribed by the Communications Law (Telecommunications and Broadcasting), 5742-1982, on sending advertisements ("**spam**"), *inter alia*, by means of text messages to customers who contact it, which include a link to Bezeq's website. The petitioners estimate the class action amount at approximately NIS 85 million, which is comprised of monetary damage (estimation of damage for the alleged time wasted handling spam messages) and non-monetary damage due to mental anguish, causing a nuisance and so forth.

It should be noted that a similar motion in the same matter (but with respect to a different period of time) and for an estimated aggregate of NIS 52 million was filed in March 2015 in the same court (the "**Previous Motion**") and was certified as a class action on January 9, 2018. Bezeq filed a motion for leave to appeal the decision, which is still pending.

The current certification motion was filed with respect to text messages that were sent by Bezeq after the Previous Motion was filed. Concurrently with the filing of the present motion, the petitioners also filed a motion to consolidate the hearing on the current motion with the proceeding with respect to the Previous Motion.

Bezeq is studying the motions, and it is unable to evaluate the likelihood of success of the motions at the present stage.

Sincerely,
Bezeq Israel Telecommunications Corporation Ltd.

Re: Class action against Pelephone

On April 30, 2018, Bezeq was notified by its subsidiary, Pelephone Communications Ltd. ("**Pelephone**") of a claim together with a class action certification motion filed against Pelephone in the Tel Aviv District Court. The claim is filed primarily on the grounds that the respondent markets and sells its customers repair services [while requiring customers to] commit to unreasonable periods of time and without the possibility in the agreement of canceling the transaction during the commitment period and/or of transferring the service to another cellular device.

The petitioners do not explicitly state the amount of the claim against the respondent, but estimate that the value of the damage caused to each class member by the inability to cancel the repair service until the end of the commitment period is estimated at hundreds of shekels each year for each class member.

Pelephone is studying the claim and the class action certification motion, and neither it and/nor Bezeq is able to evaluate the likelihood of success of the claim at the present stage.

Sincerely,
Bezeq Israel Telecommunications Corporation Ltd.

Re: Class action against Walla

On May 1, 2018, Bezeq was notified by its subsidiary, Walla! Communications Ltd. ("Walla") of a claim together with a class action certification motion filed against it in the Tel Aviv District Court. The claim is filed on grounds that Walla publishes "advertising-related articles" on its site without due disclosure of the fact that reference is made to marketing content. The petitioner further asserts that the publication of marketing content without due disclosure, as alleged, constitutes, among other things, a violation of the Consumer Protection Law, a violation of the Rules of Journalistic Ethics, a tort and unjust enrichment.

The petitioner estimates that the value of the damage caused to class members is NIS 60,000,000.

Walla is studying the claim and the class action certification motion, and neither it and/or Bezeq is able to evaluate the likelihood of success of the claim at the present stage.

Sincerely,
Bezeq Israel Telecommunications Corporation Ltd.
