IMPSA INTERNATIONAL, INC.
NOTES TO FINANCIAL STATEMENTS
MARCH 31, 2018 AND MARCH 31, 2017

NOTE 1 — GENERAL INFORMATION:

IMPSA International, Inc. is a wholly-owned subsidiary of IMPSA, an Argentine based company. IMPSA International, Inc. acquires material requisitioned by the parent and affiliated companies on a commission basis. The Company also receives a commission from the parent company for sales of equipment manufactured in Argentina and has sales to affiliated companies. The Company is a United States of America corporation whose principal place of business is located in Pittsburgh, Pennsylvania.

NOTE 2 — SIGNIFICANT ACCOUNTING POLICIES:

Statement of Compliance – The financial statements have been prepared in accordance with International Financial Reporting Standards.

Currencies – The financial statements are presented in U.S. dollars, which is the functional currency of the Company. Monetary transactions denominated in foreign currencies are translated at the exchange rate on the transactions date and the resulting exchange differences are recognized in the income statement.

Basis of Preparation – The financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of consideration given in exchange for assets. The principal accounting policies are as follows:

Critical Accounting Judgments and Key Sources of Estimation Uncertainty – In the application of the Company's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgments by management in applying accounting policies and key sources of estimation uncertainty are disclosed in the relevant asset and liability notes to the financial statements.

Financial Instruments – Financial assets consist of cash and cash equivalents and accounts and notes receivable from affiliated companies. Cash and cash equivalents are described in Note 5. Accounts and notes receivable from affiliated companies are recognized at fair value based on amounts exchanged which equates to cost. Financial liabilities consisting of accounts payable and long-term debt are recognized at fair value based on amounts exchanged which equates to cost. Accounts payable are described in Note 7.

Financial assets are assessed for indicators of impairment at each balance sheet date. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been impacted.

For financial assets carried at cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

NOTE 2 — SIGNIFICANT ACCOUNTING POLICIES (CONTINUED):

Concentrations of Credit Risk – Financial instruments potentially subject to concentrations of credit risk consist of receivables. Receivables are due from the parent company and affiliates.

Revenue Recognition – Commission income is recognized at the time that a purchase order is placed for the parent company or affiliates or at the time cash is received for a sale when the Company successfully bids on a project for the parent company or affiliates. Income from sales to affiliated companies is recognized when billed.

Interest income on excess cash deposited is recognized when earned. Interest income on receivables from affiliated companies is accrued on a time basis, by reference to the amount outstanding and the applicable interest rate. Interest income on investments is accrued on a time basis and recognized on an effective yield basis.

Income Taxes – Income tax expense represents the sum of the tax currently payable and deferred tax.

Currently payable income taxes are based on taxable profit for the year. Taxable profit differs from profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates in effect at the balance sheet date.

The carrying amount of the deferred tax benefit is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. The deferred tax benefit is measured at the tax rates that are expected to apply in the period in which the asset is realized, based on tax rates in effect at the balance sheet date. The measurement of the deferred tax benefit reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover the carrying amount of its benefit.

Capital Risk Management – The Company in concert with its parent company manages its capital to ensure that it will be able to continue as a going concern while maximizing the return to its parent company. The capital structure of the Company consists of payables to affiliated companies and equity of the Company (comprising issued capital, reserves and retained earnings). The Company is not subject to any externally imposed capital requirements.

NOTE 3 — RELATED PARTY TRANSACTIONS:
