iBOLT Enables Primagas to Optimize Its IT Operations

Leading German power utility integrates solution portfolio with Magic Software

Houten, The Netherlands (March 17, 2005) - Magic Software Enterprises (NASDAQ: MGIC), a leading provider of state-of-the-art development and integration technology, announced today that a leading German power utility, Primagas, has optimized its IT operations with Magic's iBOLT integration tool. Within the scope of the "Sundance" project, the company integrated its best-of-breed solutions with iBOLT to more effectively support its corporate-wide business processes.

The successful results of the Sundance project confirmed Primagas's decision to use EAI as a systematic approach and iBOLT as an integration tool. Following a three-month trial, Primagas began the first stage of their integration solution. This meant coupling their e-procurement system, including existing gas business processes, financial accounting, and output management, all of which now effectively support gas sales, eliminating the need for manual operation within the process.

"iBOLT supports all stages of our integration project, from modelling of business processes through programming implementation, all the way to operations monitoring," said Primagas IT Manager, Joachim Walsdorff. "iBOLT is based on Magic Software's development environment, eDeveloper. This already gives us high integration potential based on its strong platform, and that it is a database-independent operation. We will incorporate iBOLT into all of our systems to link applications and databases to form a single, unified company solution."

Regev Yativ, Managing Director of Magic Software Europe, said, "We are pleased to be partnering with Primagas, Germany's leading power utility. This partnership will strengthen our position in both the consumer and manufacturing arenas, providing Primagas and similar customers, with innovative products that outperform the competition with Magic's innovative technology and unmatched technical support."

About Primagas

Krefeld-based Primagas GmbH, is one of Germany's largest suppliers of liquid gas. Founded in 1950, this major European power utility today sells over 250,000 tons of liquid gas a year. Numerous partnerships involving local installation operations and a field service comprised of more than 260 employees ensure there are no gaps in the company's coverage of its target market. A part of SHVGas, Primagas GmbH has the expertise and infrastructure of Europe's largest vendor of liquid gas behind it. For more information, visit the website at www.primagas.de.
