## **Menzies Distribution Implements Real Time Logistics With Magic Software**

*Newspaper distribution system delivers 4 million newspapers accurately and on time*

Houton, The Netherlands (September 6, 2005) - Magic Software Enterprises (NASDAQ: MGIC), a leading provider of state-of-the-art development and integration technology, announced today that Menzies Distribution has successfully rolled out 'Pack by Light', a customized application developed in conjunction with Magic that handles order lines for more than 15,000 customers each night to ensure the successful delivery of more than four million newspapers the following morning.

Pack by Light enables managers at Menzies' thirty depots to react to the night's events, targeting specific routes and resources to ensure delivery times are met and updating paperwork in real time so that final packing notes are one hundred percent accurate. The "Pack by Light" system reacts to minimize any delays caused by problems such as printing press problems, transport or the weather. The alternative is lost newspaper sales for the retailer.

Frank Coyle, IT Director of Menzies Distribution comments, "Working closely with Magic we have created a system that is directly suited to the unique pattern of newspaper distribution in the UK. The flexibility of Magic's technology has enabled us to provide an enhanced service to our retailers. We are already planning to trial 'Pack by Light' to our magazine distribution business in the near future."

Magic's technology provides hi-level Business Process Automation and Monitoring and enables Real Time Logistics. Magic's advanced Rules Engine facilitates the rapid creation and customization of large-scale distributed applications with complex business logic.

Pack by Light not only ensures accuracy and timely delivery, it also cuts down on paperwork with just one set required for delivery and returns; it ensures that each parcel is created to a uniform size and weight, within health and safety guidelines.

Regev Yativ, Managing Director of Magic Software EMEA said, "This successful rollout demonstrates Magic's commitment to providing its customers with technologies such as Real Time Business Automation and Monitoring that address specific business requirements, delivering tangible results in increased customer satisfaction and higher productivity yields. Magic's ability to rapidly customize applications has allowed Menzies to capitalize on their culture of open communication with customers and staff, placing their suggestions at the center of the development to maximize workflow efficiency. All of which makes this collaboration worthy of its instant success."

## About Magic Software Enterprises
