

OPKO HEALTH'S BIOREFERENCE LABORATORIES FORMS A STRATEGIC COLLABORATION WITH SOMOS TO IMPROVE HEALTH OUTCOMES OF UNDERSERVED NEW YORKERS

SOMOS, New York City's Largest Multi-Cultural Physician-Led Network Selects BioReference as Preferred Provider for Diagnostic Testing

BioReference to also assist with Patient-Centered Data Analytics to SOMOS Providers

MIAMI, FL. (July 1, 2019) – OPKO Health (NASDAQ: OPK) announced that its subsidiary, BioReference Laboratories, one of the largest clinical laboratories in the United States, has been selected by SOMOS, a physician-led network of more than 2,500 health care providers serving over 700,000 Medicaid beneficiaries in New York City, as its preferred provider of diagnostic testing and to assist with data analytics for its patients. This new collaboration is designed to streamline patient care and offer communication efficiencies between BioReference and the SOMOS network.

SOMOS is New York City's largest multi-cultural physician-led network that serves predominately underserved patient populations. Economic and institutional barriers have historically limited adequate access to healthcare and, as a result, severe disparities exist for patients across these communities. SOMOS works to level the playing field and will leverage its relationship with BioReference to improve patient outcomes among its participants while decreasing the overall cost of care.

"SOMOS is committed to bringing culturally-competent primary and specialty care to historically marginalized communities and this collaboration will equip network providers with the right tools to help improve overall health care for the most vulnerable New Yorkers," said **Dr. Ramon Tallaj, Chairman and Founder of SOMOS**. "We are proud to collaborate with BioReference, a leader in health care technology to continue the State's mission to create a proactive delivery system centered around value-based care that works for everyone regardless of their zip-code and socio-economic status."

Operationally, BioReference will support the SOMOS mission by providing real time and historical laboratory data to aid in patient diagnosis and case management. SOMOS will also leverage The Garage's health platform through a sublicense with BioReference to integrate providers, patients and population health solutions into a knowledge engine for advanced data analytics and centralized care management. The unique structure of this collaboration allows SOMOS to improve diagnosis with real time data to better address patient health needs.

"Our relationship with BioReference is important to advancing the SOMOS mission," said **Dr. Henry Chen, President of SOMOS**. "As the healthcare landscape rapidly evolves, it is critical to create sophisticated communications and testing efficiencies between lab service providers and our network. Enhanced technology provides greater access to aggregated data and informs more rational treatment paradigms for chronic illnesses plaguing underserved communities."

“We have believed in the SOMOS mission since the very beginning and we are proud to empower them with our diagnostic services and innovative technology platform,” said **Adam Fein, Vice President of Population Health at BioReference Laboratories**. “We look forward to a strong, long-term collaboration that will improve the lives of the underserved in New York City, and are delighted to be part of the revolution that is SOMOS.”

About SOMOS

SOMOS is a nonprofit, physician-led network of more than 2,500 health care providers serving over 700,000 Medicaid beneficiaries in New York City, launched in 2015 as part of New York State’s Delivery System Reform Incentive Payment Program (DSRIP). The network includes providers delivering culturally competent care to patients in some of New York City’s most vulnerable populations, particularly Latino, Asian, African-American and immigrant communities throughout the Bronx, Brooklyn, Manhattan and Queens.

About BioReference Laboratories, Inc.

BioReference provides comprehensive testing to physicians, clinics, hospitals, employers, government units, correctional institutions and medical groups. The company is in network with the five largest health plans in the United States, operates a network of 11 laboratory locations, and is backed by a medical staff of more than 160 MD, PhD and other professional level clinicians and scientists. With a leading position in the areas of genetics, women’s health, maternal fetal medicine, oncology and urology, BioReference and its specialty laboratories, GenPath and GeneDx, are advancing the course of modern medicine.
