## Bank Hapoalim B.M.

### Update to credit analysis

#### Summary

[Bank Hapoalim B.M.](#) (Bank Hapoalim)'s A2 long-term deposit ratings reflect (1) the bank's baa2 Baseline Credit Assessment (BCA); and (2) three notches of rating uplift from our assessment of a very high likelihood of support from the [Government of Israel](#) (A1 stable), in case of need.

Bank Hapoalim's baa2 standalone BCA reflects the bank's (1) strong deposit-based funding structure and sound liquidity; (2) adequate capitalisation, with a tangible common equity (TCE)/risk-weighted assets (RWAs) ratio of 10.9% as of September 2021, which although it is below similarly-rated international peers it mainly reflects the Bank of Israel's (BoI) conservative risk weights on mortgages; and (3) low levels of problem loans.

At the same time, Bank Hapoalim's BCA also reflects (1) moderate profitability, which is nevertheless supported by ongoing revenue growth and cost discipline; and (2) downside risks from persistent geopolitical events and a significant and growing exposure to the Israeli property market through lending to the real estate sector and residential mortgages.

Exhibit 1

#### Rating Scorecard - Key financial ratios

These are our [Banks Methodology](#) scorecard ratios. Asset Risk and Profitability reflect the weaker of either the latest figure or the three-year and latest figure average. Capital is the latest reported figure. Funding Structure and Liquid Resources reflect the latest fiscal year-end figures.

Source: Moody's Investors Service

## Credit strengths

- » Strong retail deposit-based funding structure and sound liquidity
- » Solid loan quality and contained single-borrower concentrations
- » Very high likelihood of government support, in case of need, underpins the deposit ratings

## Credit challenges

- » Profitability is moderate
- » Geopolitical tensions and large exposure to Israel's property market present tail risks

## Outlook

The stable outlook on the bank's long-term deposit ratings reflects our expectation that the bank's low levels of problem loans and sound funding and liquidity profile balance downside risks from exposure to real estate, while capitalisation remains adequate.

## Factors that could lead to an upgrade

- » Upward pressure on Bank Hapoalim's ratings would originate from a combination of stronger sovereign creditworthiness, as well as, an improvement in the bank's standalone credit profile. This improvement could arise from (1) materially stronger capital buffers; and/or (2) significantly higher sustained profitability without an increase in asset risk.

## Factors that could lead to a downgrade

- » Bank Hapoalim's ratings could face downward pressure if deteriorating operating conditions or a materialisation of the downside risks we refer to in the report lead to material weakening of asset quality.
- » Lower capital levels, an increase in the bank's asset risk profile, or a persistent weakening in the bank's recurring earnings power could also put pressure on the ratings.
- » There could also be negative rating pressure if we consider that the government's willingness or capacity to provide extraordinary support has materially declined.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on [www.moody's.com](http://www.moody's.com) for the most updated credit rating action information and rating history.

## Profile

Bank Hapoalim provides banking and other financial services to households, small businesses, middle-market companies and large corporate customers mainly in Israel. Internationally, Bank Hapoalim's New York branch focuses on providing commercial banking services in North America to local middle-market customers and Israeli companies that are active abroad.

In line with its strategy, Bank Hapoalim has reduced its international private banking activities through the sale or transfer of the customer portfolio of its Swiss subsidiary. At present, there are no remaining customers in the bank's Swiss subsidiary, and the bank is in the process of surrendering its banking license.

The bank stepped up its efforts to sell its entire stake (69.8% as of September 2021) in Bank Pozitif in Turkey, which specialises mainly in corporate banking, while at the same time gradually reducing the credit portfolio of Bank Pozitif. An earlier agreement reached in conjunction with the minority shareholder in February 2021 for the sale of the full stake in Bank Pozitif to a potential buyer was been terminated in September 2021.

Following the divestment by Arison Group of part of its stake in Bank Hapoalim in late 2018, the bank does not have a controlling shareholder.

As of September 2021, Bank Hapoalim had total assets of NIS604.3 billion (\$187.3 billion). Bank Hapoalim was one of the two largest banks in Israel with a market share of 28.5% in terms of total system assets as of June 2021.

## Detailed credit considerations

### Solid loan quality and contained single-borrower concentrations; geopolitical tensions and large exposure to Israel's property market present tail risks

Bank Hapoalim's Asset Risk score reflects its solid loan quality, including a low level of problem loans that will be sustained by Israel's strong economic recovery and contained credit losses in the last decade. Our assessment also considers the improved diversification in the bank's loan book following a reduction in single-name concentrations and relatively conservative underwriting. However, a significant and growing exposure to Israel's real estate market through lending and potential geopolitical tensions remain the main downside risks for the bank's asset quality.

Bank Hapoalim's problem loans (impaired loans and loans in arrears of 90 days or more) to gross loans declined to 1.2% as of September 2021 from 1.5% and 1.8% as of the end of 2020 and 2019 respectively (see Exhibit 3), reflecting limited new problem

loan formation and a pick-up in new lending. We expect the bank's loan quality to remain solid supported by Israel's strong economic growth, despite the successive pandemic waves, and rising employment.

Exhibit 3

### Bank Hapoalim's problem loans ratio reverted to pre-pandemic levels

Evolution of problem loans ratio and annualised credit costs

Source: Moody's Investors Service

Following the reopening of the economy, the pick-up in economic activity and a sharp reduction in loans under payment deferral to just 0.7% of the loan book as of September 2021, the bank reversed some of the collective provisions it had booked during 2020. Bank Hapoalim reported provision reversals equivalent to 0.6% of average gross loans in the first nine months of 2021. Credit costs (loan loss provision expenses/average gross loans) had increased to 0.6% in 2020 from 0.4% in 2019, which had included an initial assessment of the impact of the pandemic made by the bank in its full-year 2019 financials, and just 0.1% for the period 2014-2018. More than 80% of the provisions booked in 2020 were collective provisions.

We expect the bank's credit costs to normalise in 2022, but to remain contained given that some additional provisions remain in place to absorb losses. We also expect that the initial application of the US Current Expected Credit Loss (CECL) standard from 2022 will not lead to significant additional impairments on implementation, or higher ongoing provisions, given the significant general provisions required for retail loans under the previous standard.<sup>1</sup>

Benefiting asset risk, Bank Hapoalim's loan book is relatively diversified, including through lower borrower concentration levels, which was an issue in the past. The bank had no exposures exceeding 15% of its capital as of September 2021 and its aggregate exposure (on and off-balance sheet) to 20 borrowers whose individual exposure exceeded NIS1.2 billion as of September 2021 accounted for 7.5% of total credit risk to the public or about 92% of TCE.

Furthermore, residential mortgages accounted for 32% of total loans, while medium and large businesses (including institutional entities) for 36% as of September 2021 (see Exhibit 4). The bank's exposure to small businesses (regulatory definition<sup>2</sup>) and other retail and consumer loans in Israel were 17% and 10% of total gross loans respectively as of September 2021. The bank had been deleveraging from these two segments in recent years in view of their higher risk and resumed a cautious growth in the portfolio in recent quarters.

Exhibit 4

**Bank Hapoalim's loan book is relatively diversified**

Loan book breakdown as of September 2021 (supervisory operating segments)

Source: Bank's financial results

Similarly to other Israeli banks, however, Bank Hapoalim's asset quality remains vulnerable to persistent geopolitical tensions that could compromise business confidence and overall economic activity.

In addition, the bank's asset quality is susceptible to developments in the Israeli property market because of the significant exposure to residential mortgages mentioned above and to the real estate sector. The bank's exposure to the domestic construction and real estate sectors made up a further 20% of total lending as of September 2021 and grew by a high 31% year-over-year because of strong demand. In view of the significant lending growth in these sectors, the Bol requested banks to heighten their monitoring of borrowers, and Bank Hapoalim adjusted its collective provisions in light of the significant growth in the portfolio.

High and rising house prices expose banks to a potential house price correction and banks are also exposed to potentially increased risk in the mortgage book from unexpectedly higher interest rates and a rise in unemployment. For housing loans, risks are mitigated by the low level of household debt, macroprudential measures<sup>3</sup>, which enforce tight underwriting standards, and high capital buffers against mortgages. House prices continue to rise, but a structurally limited supply of new housing units provides price support. We see higher risk in the office and retail space market. Income-generating properties accounted for 28% of the bank's total on- and off-balance sheet exposure to the construction and real estate sectors as of September 2021.

**Adequate risk-weighted capitalisation, although below global peers, but with a stronger leverage ratio**

We consider Bank Hapoalim's capitalisation to be adequate. Although risk-weighted capital metrics are below global peers, the bank's loss-absorption buffers are supported by conservative regulatory risk-weights, especially on mortgage lending. Over the coming 12-18 months, we expect the bank's capital ratios to remain broadly stable following the gradual resumption of profit distribution. Stable capitalisation will continue to be driven by sufficient internal capital generation against lending growth.

Bank Hapoalim's TCE/RWAs ratio was 10.9% as of September 2021, below that of similarly-rated international peers (see Exhibit 5). However, the Bol maintains a conservative approach to risk-weighting that results in higher loss-absorption buffers than capital ratios show. Israeli banks use the standardised approach to risk-weighting. Mortgages are further risk-weighted according to their loan-to-value, resulting in an average risk weight of over 50% in Israel. This effective mortgage loan risk weight is significantly higher than the risk weights applied by banks in other developed countries that use the internal ratings-based approach and even the 35% weight normally used in the standardised approach.

The bank's TCE-to-total assets ratio was 7.1% as of September 2021, comparing more favorably with international peers. The Basel leverage ratio declined to 6.3% as of September 2021, from 7.6% as of the end of 2019, reflecting large deposit inflows driving growth in cash and placements at the central bank during 2020 and 2021, above the 5.5% minimum regulatory requirement that applied at that time.

Exhibit 5

**Bank Hapoalim's risk-weighted capitalisation is lower than global peers, but leverage is in line with peers driven by conservative risk weights**  
 Risk-weighted capitalisation and leverage of Israeli banks and the global median as of September 2021

Source: Moody's Investors Service

Bank Hapoalim also reported a common equity tier 1 (CET1) ratio of 11.2% as of September 2021, exceeding the 9.2% minimum regulatory requirement and the bank's own internal target of 9.5%. In September, the Bol extended its leniency on lower banks' capital requirements by 1 percentage point until the end of 2021. This leniency was initially provided in March 2020 and reduced Bank Hapoalim's minimum CET1 ratio requirement from 10.3% as of the end of 2019<sup>4</sup>. The Bol also lifted its earlier guidance on suspension of profit distributions, but has asked banks to adopt a [conservative approach on dividends](#), not exceeding 30% of 2020 and 2021 profits. In line with the Bol's recommendation, Bank Hapoalim distributed 30% of 2020 earnings and 22% of 9M 2021 profits. Under the bank's dividend policy, Bank Hapoalim may distribute up to 40% of net profits in each quarter. Bank Hapoalim had previously refrained from dividend distributions from ongoing earnings, with the bank halting ordinary dividend payments from quarterly profit since Q2 2018 while it was being investigated by the US authorities.

### Profitability is moderate, but supported by continued revenue growth and cost control focus

Bank Hapoalim's ongoing profitability is moderate, helped by its strong franchise and large customer base in Israel and the country's robust economic growth potential and population growth that afford new business opportunities. These factors drive strong revenue growth, which coupled with ongoing cost discipline, support [sustainable profitability and the bank's ability to resist growing competition and income headwinds](#).

Competition by providers of financial services in Israel will likely intensify as Israeli authorities continue to implement measures to promote competition and lower the cost of banking services for households and small businesses. A digital-only bank, the first new bank to be licensed in Israel in over four decades, has started official operations this year and a new system facilitating fast and zero-cost switching between banks was launched in September.

Bank Hapoalim's profitability recovered in the first nine months of 2021, with net income accounting for 0.9% of tangible assets, up from 0.4% in 2020, driven by significant loan loss provisioning reversals during the year, as mentioned earlier, and strong revenue growth owing to loan growth and higher CPI, which was negative in 2020. For 2022 we expect these trends to be sustained and provision expenses to remain contained supporting bottom-line profitability.

Strong competition, low shekel interest rates and a significant deposit surplus will continue to exert pressure on the bank's margins over the next few quarters. The bank's net interest margin declined to 1.7% in the first nine months of 2021 (2020: 1.8%; 2019: 2.1%). However, we expect loan growth to remain strong because of strong housing demand, with record demand for mortgages in Israel in 2020 and 2021, and higher demand for corporate credit, partly offsetting margin pressure. Higher dollar interest rates will also [support margins](#).

The bank's ongoing cost reduction efforts will also continue to support profitability and its capacity to resist revenue headwinds. The bank has operated several voluntary retirement schemes, which reduced its workforce by 15% during the period 2015-2019. During 2020, the bank's headcount declined by a further 4.4%, facilitated by its fifth-consecutive efficiency plan, which will continue to lead

to an additional reduction in headcount, albeit to a lesser extent. The bank is also looking to further streamline its branch network and to consolidate its headquarters. As a result of these initiatives, Bank Hapoalim's efficiency improved in recent years, with operating costs declining to 1.3% of total assets in the first nine months of 2021, compared to over 2.0% before 2017 (see Exhibit 6), while its reported cost-to-income ratio of 54.8% in the first nine months of 2021 was the lowest ever reported.

Exhibit 6

### Bank Hapoalim's has managed its relative cost base down in recent years

Source: Moody's Investors Service

### Strong retail deposit-based funding structure and sound liquidity

Bank Hapoalim benefits from a strong funding profile driven by a large and stable deposit base in Israel. Customer deposits were equivalent to 84% of total assets as of September 2021. The bank's large and growing deposit base comfortably funds its lending activities, supported by the country's strong savings culture. Bank Hapoalim's net-loans-to-deposits ratio was 67% as of September 2021, improved from 81% as of the end of 2019 because of large deposit inflows over the past two years.

Granular household (excluding private banking) and small business deposits accounted for 49% of total deposits as of September 2021. Potentially less stable deposits from institutional investors were 19% of total deposits as of the same date, but foreign deposits were contained at 4% of the total. Generally, both domestic and foreign deposits had remained broadly stable during past systemic shocks in Israel.

Ample deposits drive a low reliance on market funding, with market funds accounting for 5.3% of tangible banking assets as of September 2021, part of which reflects senior issuances<sup>5</sup>. The bank had around NIS19 billion (3% of total assets) of bonds and subordinated notes outstanding as of September 2021. These balances were mainly sourced from the local capital market and allow for better matching of the bank's assets and liabilities maturities. The bank also completed a \$1 billion international Tier 2 issuance in October diversifying its investor base, and the proceeds of the issuance will be allocated to finance eligible green projects.

The bank also maintains sound liquidity, underscored by a conservative investment policy. Liquid banking assets were 40% of tangible banking assets as of September 2021, increasing from 31% at the end of 2019 following the large deposit inflows over the past two years. Bank Hapoalim kept 29% of assets in the form of cash and deposits with banks, and an additional 12% in securities. Bank Hapoalim's securities portfolio primarily consists of investments in Israeli government bonds (61% of total) and, to a lesser extent, US government bonds (24% of total), while only 5% of the securities portfolio were investments in shares. The bank's liquidity coverage ratio was 126% as of September 2021.

### Source of facts and figures cited in this report

Unless noted otherwise, we have sourced data relating to systemwide trends and market shares from the central bank. Bank-specific figures originate from the banks' reports and are based on our own chart of accounts and may be adjusted for analytical purposes. Please refer to [Financial Statement Adjustments in the Analysis of Financial Institutions](#) published on 9 August 2018. We do not use

the Bank of Israel's exchange rates in converting figures from Israeli shekel into US dollars, so US dollar figures may differ from bank reported figures.

## ESG considerations

In line with our general view for the banking sector, Bank Hapoalim has a low exposure to Environmental risks. See our [Environmental](#) risks heatmap for further information. Although Israel is exposed to environmental risk through rising temperatures, drought episodes and water scarcity given its geographical location in a semiarid climate zone, the authorities have taken a number of steps to address these risks, including through seawater desalination and wastewater recycling.

Overall, we believe banks, including Bank Hapoalim, face moderate Social risks, see our [Social](#) risks heatmap. The most relevant social risks for banks arise from the way they interact with their customers. Social risks are particularly high in the area of data security and customer privacy, which is partly mitigated by sizeable technology investments and banks' long track record of handling sensitive client data. Fines and reputational damage because of product mis-selling or other types of misconduct is a further social risk.

Societal trends are also relevant in a number of areas, such as shifting customer preferences towards digital banking services, increasing information technology cost, ageing population concerns in several countries, impacting demand for financial services or socially driven policy agendas that may translate into regulation that affects banks' revenue base. Specifically in Israel, authorities are taking measures to promote competition in the banking system and to reduce the cost of financial services for households and small business, which will weigh on the banks' profitability.

Further, strict labour laws and strong banking employee unions in Israel limit staffing flexibility and drive up staffing costs. However, the banks have reduced employee posts through successive early retirement plans and have implemented stringent cost control, which has allowed them to mitigate these challenges.

Governance is highly relevant for Bank Hapoalim, as it is to all entities in the banking industry. Corporate governance weaknesses can lead to a deterioration in a company's credit quality, while governance strengths can benefit its credit profile. Governance risks are largely internal rather than externally driven. Corporate governance therefore remains a key credit consideration and requires ongoing monitoring.

For Bank Hapoalim in particular, we note that it had, through its subsidiary in Switzerland, assisted US customers in evading taxes during the period 2002-2014, which indicates past internal control lapses. Because of these activities, in April 2020, the bank entered into a deferred prosecution agreement with US authorities for three years and paid a substantial fine. The bank has also taken significant steps to examine its processes that allowed these actions to take place and to address gaps.

## Support and structural considerations

### Government support considerations

Bank Hapoalim's A2 deposit ratings incorporate three notches of government support uplift from the bank's baa2 Adjusted BCA because of our assessment of a very high likelihood of extraordinary support from the Israeli authorities. This assumption is based on Bank Hapoalim's systemic importance as one of the country's two largest banking groups and the Israeli government's long standing practice of injecting capital into systemically important banks in case of need.

### Counterparty Risk (CR) Assessment

#### Bank Hapoalim's CR Assessment is A1(cr)/P-1(cr)

Prior to government support, the CR Assessment is positioned one notch above the bank's baa2 Adjusted BCA, reflecting our view that its probability of default is lower than that of deposits. Senior obligations represented by the CR Assessment will be more likely preserved to limit contagion, minimise losses and avoid disruption of critical functions. The CR Assessment also benefits from government support uplift, in line with our support assumptions on deposits.

### Counterparty Risk Ratings (CRRs)

#### Bank Hapoalim's CRR is A1/P-1

For jurisdictions with a non-operational resolution regime, such as Israel, the starting point for the CRR is one notch above the bank's Adjusted BCA. The CRRs also benefit from three notches of government support uplift.

## Methodology and scorecard

### About Moody's Bank Scorecard

Our Bank Scorecard is designed to capture, express and explain in summary form our Rating Committee's judgment. When read in conjunction with our research, a fulsome presentation of our judgment is expressed. As a result, the output of our scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

## Endnotes

- [1](#) The new standard is to be implemented from 1 January 2022. The cumulative first-day effect of the change in calculating provisions will be taken against the balance of retained earnings. However, the impact on supervisory capital can be phased in over four years. Banks are allowed to add any decrease from the standard's implementation back to Common Equity Tier 1 capital at a rate of 75% on 1 January of the first year of implementation, 50% in the second year, and 25% in the third year, with full effect from the fourth year. Under the previous standard, Israeli banks were mandated to maintain minimum general loan-loss provisions equivalent to 0.35% of gross loans for outstanding housing loans and 0.75% for non-housing retail loans.
- [2](#) The regulatory definition of small businesses includes those businesses with an annual turnover of up to NIS50 million.
- [3](#) The measures include loan-to-value limits, a monthly repayment cap at 40% of a borrower's month salary and a limit on the variable-rate of interest part of the mortgage.
- [4](#) In November 2020, the authorities also lowered the bank's leverage ratio requirement to 5.5%, from 6% previously
- [5](#) Market funds exclude subordinated debt, according to our definition.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS, ASSESSMENTS AND OTHER OPINIONS AND PUBLISHES ITS PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS, AND PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS OR PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at [www.moody's.com](http://www.moody's.com) under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
