#### Disclaimer

- This presentation was prepared by Polyram Plastic Industries Ltd. (hereinafter: the "Company" and/or "Polyram") as a general presentation about the Company and is not intended to replace the need to review Polyram's full reports to the Securities Authority and the Tel Aviv Stock Exchange. Including, inter alia, Polyram's periodic reports including the Polyram's periodic report for 2021, second quarter 2022 and immediate reports (hereinafter: "Polyram's Reports") prior to making a decision regarding investment in Polyram's securities.
- The information contained in the presentation does not constitute advice, recommendation, or opinion regarding investment and does not constitute an offer to invest and/or purchase securities of Polyram (and in particular does not constitute an "offer to the public" or "sale to the public" of any kind) and does not replace the independent examination and personal advice according to the unique needs of each investor. Such an offer shall be made only in accordance with the provisions of the law, after obtaining the necessary permits from the Securities Authority and the stock exchange.
- This presentation includes a summary of the issues described in the context in which they are discussed and not the full information available to Polyram in relation to these issues and does not include the full results and financial information of Polyram and the notes to them, and/or Polyram's business plans and/or Polyram's risk factors.
- The presentation includes data on international markets, including growth volumes, penetration rates, sales, statistics, etc. It should be emphasized that this data is based on public data and Polyram's assessments and does not constitute any facts and/or representations.
- This presentation may include forward-looking information as defined in the Securities Law, 1968 (hereinafter: "forward-looking information"), including forecasts, and subjective assessments by Polyram's management as of the date of publication of the presentation, which although Polyram believes are reasonable, which are inherently uncertain, estimates and information regarding future events.
- The forward-looking information is solely aimed at the date to which it relates and is uncertain, unpredictable, and affected by factors beyond the control of Polyram, each of which, or a combination thereof and the realization of which risk factors characterize Polyram's activities, may materially impair results. The activities of Polyram cause the actual results to be materially different from the forward-looking information.
- Except as an undertaking to disclose information as required by the securities laws applicable to Polyram. Polyram does not undertake to update or change any information contained in this presentation in order to reflect events and/or circumstances that will apply after the date of its preparation. It is clarified that Polyram's plans and strategy included in this presentation are correct as of the date of their publication and may and will change in accordance with the decisions of the Company's Board of Directors from time to time.
- Polyram's assessments regarding Polyram's objectives are based, inter alia, on Polyram's assessments regarding trends in the Company's business in particular and trends in the market in which Polyram operates in general, as well as Polyram's management assessments regarding potential and market trends in Israel and international markets as of this report. These assessments may not materialize and/or materialize significantly differently from Polyram's assessments, inter alia, as a result of factors external to Polyram and which are not under control, including, inter alia, changes in the economic situation in Israel and abroad.
- To the extent that there is a conflict between what is stated in this presentation and what is stated in the Company's reports required by law, what is stated in the Company's reports will prevail.

## Polyram – Overview

Polyram is a global solution provider, manufacturer and marketer of advanced functional raw materials for the plastic industry worldwide

Three operating divisions:

- Bondyram
- Engineering Plastics (EP)
- Polytron

Established in 1986

Financial Data (ILS in millions)

	2021	2022
Revenues	907	1,104
Net Income	100	104
EBITDA	166	166

**1,300** products

**Sophisticated** manufacturing processes

**Tailor Made** solutions

Over **800** customers

## The Plastic Industry - Value Chain

# Growth engines of Polyram

Recycling, innovation, and sustainability are the core values of the firm. The company develops sophisticated recycled raw materials to lead the industry in the coming years through its recycling plants in UK, Germany, and Israel.

Polyram has established its presence in the American market by producing thermoplastic compound products in the USA and building a distribution system.

The company aims to develop synergies in the German market, the most industrialized country in Europe, by distributing Polyram products to MCT customers.

**Expanding the market for elastomer products**, particularly thermoplastic rubber produced at MCT, throughout Europe using its subsidiaries and the local market.

Intending to penetrate the field of electric vehicles and charging stations by developing advanced materials for new applications.

# Innovation-Recycling-Sustainability + P.

Polyram's field of material recycling is regarded as one of the company's primary growth engines

**Development and marketing of recycled materials** Polyram UK specializes in recycled materials.

Entering to recycling market through the acquisition of MCT-Polyram MCT produces two major products with recycled materials: (1) Polyolefins with minerals and glass fibers (2) Thermoplastic rubber (elastomers).

**Dedicated production lines-**to meet the increasing demand in the field of recycling, dedicated production lines have been established at a factory in UK and a factory in Israel.

Entering into new projects in the automotive industry-In a bid to improve the sustainability of their operations, more automotive manufacturers are making use of recycled material in vehicle interiors.

## Polyram - Milestones

## Strong and Consistent Growth

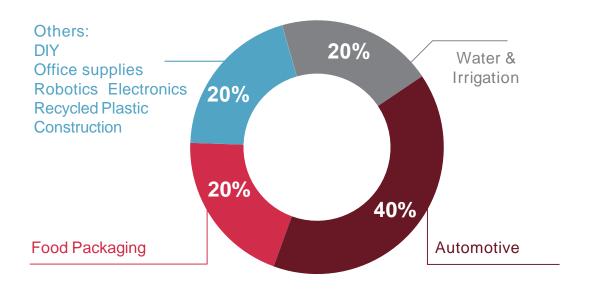

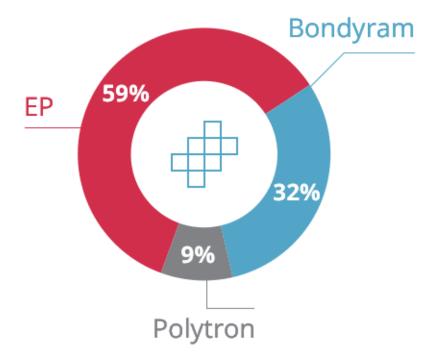

#### Diversification and risk reduction

#### **End Markets**

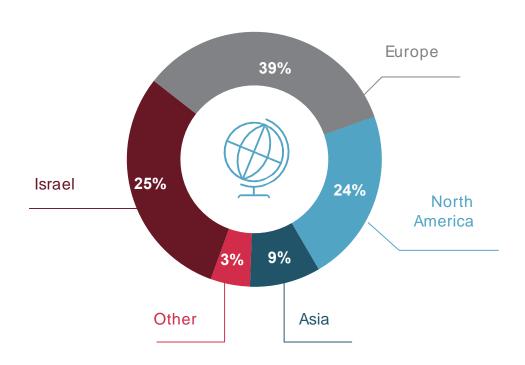

#### **Product Lines**

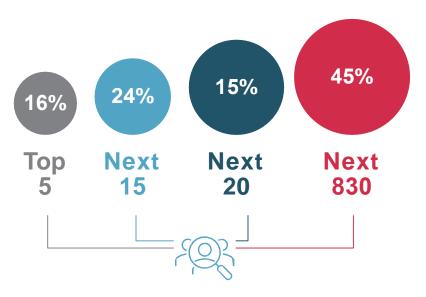

#### Diversification and risk reduction

#### **Geographic Diversification**

#### **Customer Diversification**

Biggest customer < 5% of total revenue

20 of the Biggest customers = only 40% of total revenue

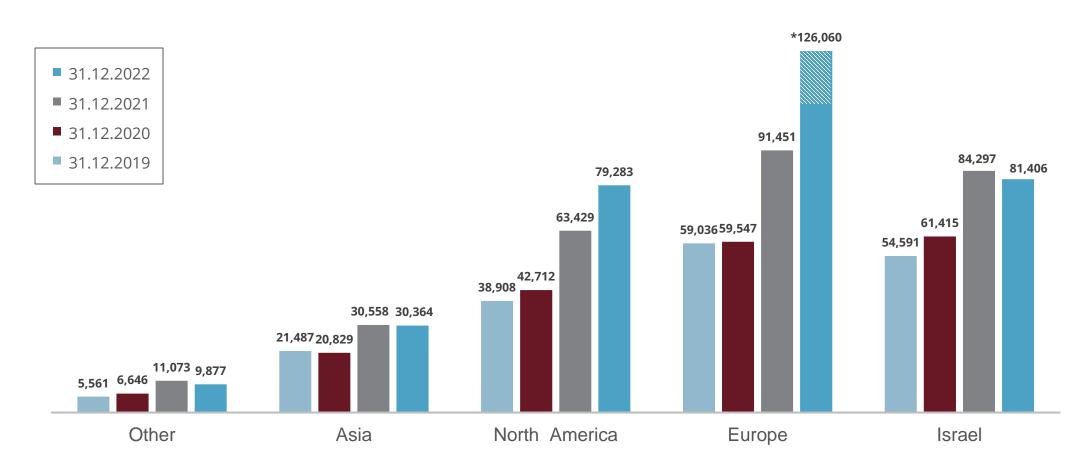

Direct sales to end producers > 87%

98% > Of the company's customers are covered by full credit insurance

#### Diversification and risk reduction

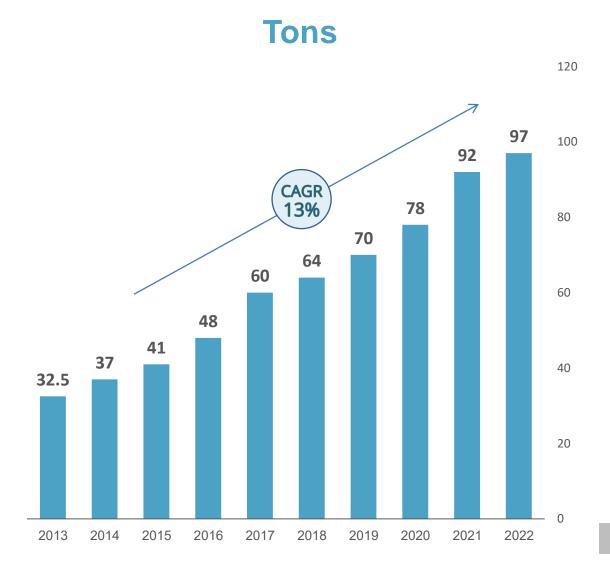

#### Sales by geographic markets K-USD

# Sales - USD (M) & Tons

# Product Lines Product Lines Polyram

\*Bondyram

4Polytron®

Maximum annual production capacity ~\*137,850 Tons

Current available capacity for growth ~70%

In order to meet the anticipated demand in the upcoming years,

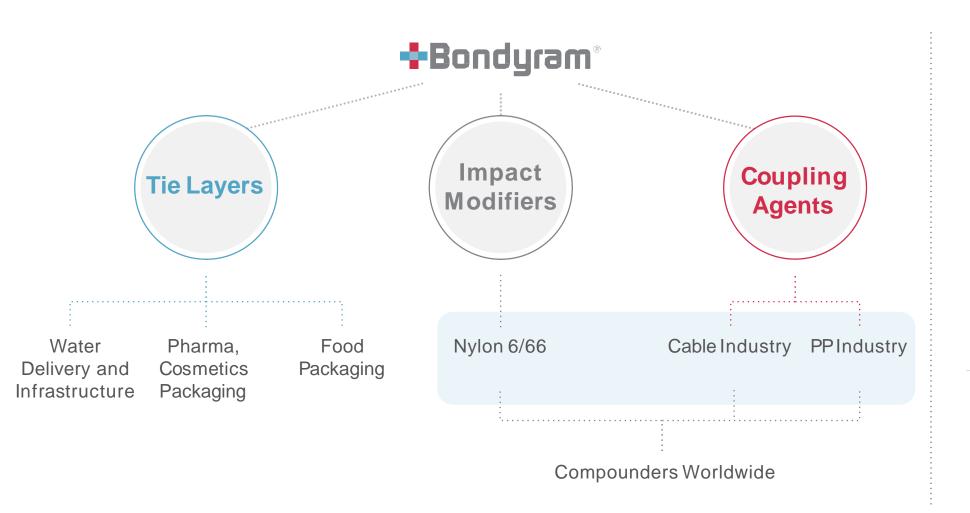

there was an significant investment during **2021-2022** to increase production capacity and operational efficiency.

By the first half of **2023**, **two more production lines will be operational**, resulting in an **increase of approximately 7,000 tons of production capacity**.

## Bondyram

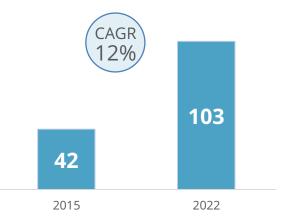

#### **Bondyram Revenues**

\$ in millions(2015-2022)

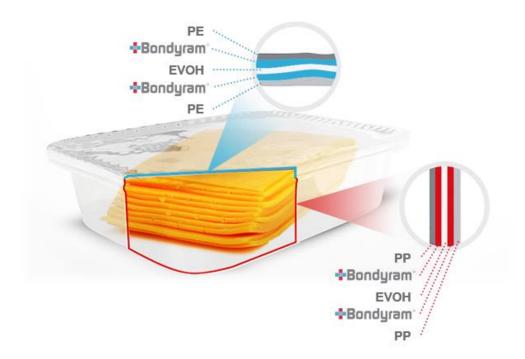

## Tie Layers

different functionalities.

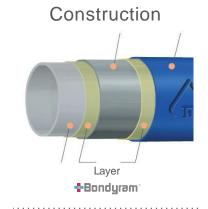

Tie Layers are used in extrusion-based products. It enables integration of several layers with

#### **Products and Applications**

Pharma and Cosmetics

## Tie Layer – one of our Key Growth Engine +Bondyram +Po

Polyram established a new production plant in the US (Greenfield),

dedicated to Tie Layers to serve the North American market

Successful penetration to major customers in the US

Food packaging industry

**Developing new market segments** such as the transportation of liquids for infrastructure and construction activities

**Increasing sales activities in Asia** (China, India, and Southeast Asia)

**5 large key** suppliers supply **80% of the total global market** of Tie Layers

The total global market is estimated at ~\$1.3 billion and still growing

#### Coupling Agents and Impact Modifiers

- Coupling Agents solutions to couple between different polymers and glassfibers
- Impact Modifiers provide compounds with special functionalities

#### **Products and Applications**

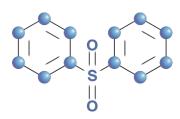

General plastic and wood products

Cables

Compounders (such as Polyram)

# Key Growth Engines

#### **Coupling Agents and Impact Modifiers**

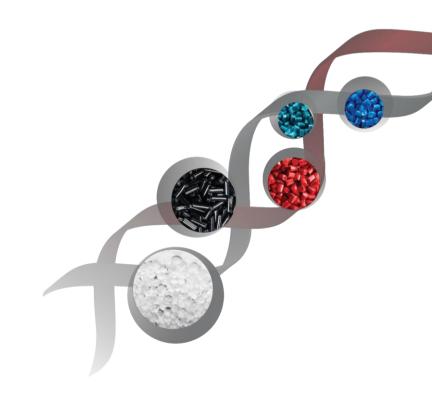

Polyram is a global leader in these product lines

Establishing a plant in the US to provide solutions to the **local market** 

**New products and applications** -A new Product Line for the US market is in final stages of development

Total global market is estimated at ~\$500 million and still growing

After five year development process, Polyram launched an **innovative Impact Modifier in the US market** 

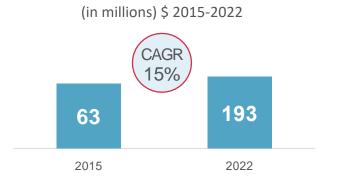

# **Engineering Plastics**

#### **Solutions**

- Polyram develops tailor-made solutions and raw materials for plasticbased applications
- We provide customers with special functional raw materials with unique characteristics such as fire resistance, flexibility, UV resistance, and more
- Q1/2023 Establishment of the first EP production line in the US
- Establishment of 2 production lines in the UK in order to produce prime products for the European market and increase production capacity
- 2022 Additional 3 new production lines in Israel.
- Entering the world of recycling engineering materials at the Israeli site,
   in order to provide solutions to our customers locally and worldwide
- Purchase/Acquisition of MCT plant in Germany-entering the world of thermoplastic rubber
   EP revenues

#### **Products and Applications**

Automotive

Irrigation

Other

**+Bondyram** 

4Polytron

# **Key Growth Engines**

**Geographic expansion** – New geographical markets, fast-growing markets such as South East Asia, and traditional markets such as Germany, North America, and more

**Add-on acquisitions of small/medium size compounders** in Europe and North America (family-owned, active players, etc.)

**Penetration into the plastic recycling market** through the UK subsidiary production site

**Development of innovative products** - advanced materials with unique properties

Global supplier for the European and American markets

**Entering the German market and the thermoplastic rubber sector** through the acquisition of MCT and its distribution in Europe and Israel through Polyram's subsidiaries and distributors

The total global market is estimated at ~\$3 billion and growing

# Polyram MCT

#### Belongs to Engineering Plastics Product Line and includes 2 sectors:

- Polyolefins with minerals and glass fibers
- Thermoplastic rubber (elastomer)

The acquisition of MCT is in correlation with Polyram's strategy for expansion in the European market and production in Europe

- Production and distribution in Europe- allows obtaining large projects of polyolefins and Bulk supplies.
- Penetration into the German market by the company's distribution system with Polyram's products.
- **Penetration into the thermoplastic rubber market** through the European subsidiaries and Polyram Israel.
- Potential expedition of the production line.
- Acquisition based on EBITDA ratio X6

#### **Financial results**

3-12/2022	
20,419	Sales
1,038	Operating profit*
950	Profit before tax*
2,138	EBITDA

## Polytron

Confidential

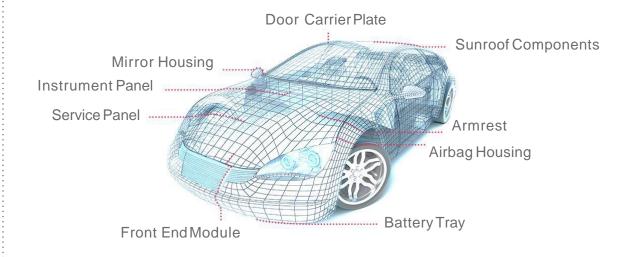

- Polyram is recognized as one of the 10 largest suppliers of long fiber solutions to the global automotive industry
- Polytron products mainly serve the Automotive Industry
- Unique qualities of Polytron based products allow the replacement of metal components with light-weight plastic based solutions
- Key customers of the Polytron products include large OEMs such as VW, BMW, and DAIMLER.
- Polyram has production sites in 3 continents (North America, Israel and China)
- Providing solutions for improving mechanical properties to end products in the automotive industry.
- Entering the electricity cabinets market in the US.
- Q1/2022 Establishing a second production line in the US

#### Polytron revenues (\$ in millions) 2015-2022

# Each new car contains 4-6 kg of long-fiber products

# Key Growth Engines

Geographic expansion - further **penetration to the US market** leveraging newly established plant in the US

Growth with the natural expansion of our large customer base

**Innovation** – development of new long-fiber-based solutions to the automotive industry

Leverage the weight reduction trend in the automotive industry

Maintaining the status of Polyram, as a **leading supplier to the automotive industry**, with global distribution channels on **three continents** 

Polyram **obtains OEMs and Tier 1 certifications** which are a **major barrier** to market development

Polyram is one of the top ten suppliers in the global market

The total global market is estimated at ~\$650 millions and growing

## BS M-ILS

	2021	2022
Total current assets	576	640
Total non-current assets	397	508
Total assets	973	1,148
Total current liabilities	402	365
Total non-current liabilities	131	189
Capital attributed to the owner of the parent company	430	581
Capital attributed to minority interest	10	13
Total liabilities and capital	973	1,148

From the beginning of 2021, **132 M-ILS dividends** were distributed

Net liabilities to EBITDA

1.84X

Current ratio
1.75

#### **SUMMARY**

Technological leadership, customer loyalty and high quality products

Entering the recycling engineering materials world, in the Israeli and UK sites

Industry and geographical distribution (a variety of industries such as: irrigation and water supply, packaging and food, vehicles and automotive, using worldwide production and distribution channels)

Dividend and cash flow policy in correlation with the company's growth

Significant growth engines in the TL and adhesives divisions, the automotive industry and the plant in the US

Powerful platform for mergers and acquisitions

Significant growth potential in all product divisions

Strength and economic resilience

# Thank You
