

Destini Berhad Issues Annual Report 2025 and Audited Financial Statements

Kuala Lumpur, 5 Nov 2025 – Destini Berhad ("Destini" or "the Group"), a leading engineering solutions provider, today announced that the Company has today issued and submitted its Annual Report 2025, which includes the Audited Financial Statements together with the Auditors' and Directors' Reports for the financial year ended 30 June 2025, to Bursa Malaysia Securities Berhad ("Bursa Securities") and its shareholders.

The delay in the issuance of the Annual Report was primarily due to the additional time required to finalise the audit and consolidation process for the Group's newly acquired overseas subsidiaries. With these audit procedures now completed, the Group has finalised its financial statements and successfully released the Annual Report ahead of the expected timeframe. This follows the Company's earlier announcement dated 3 November 2025, which informed that the Annual Report was in its final stages of preparation and was expected to be issued on or before 7 November 2025.

"We are pleased to have issued our Annual Report 2025. The completion reflects our continued commitment to transparency, accountability, and timely communication with our shareholders and stakeholders," said Ismail Mustaffa, Executive Director of Destini Berhad. The Annual Report 2025 is now available for download from the Company's website at www.destinigroup.com and on the Bursa Malaysia website at www.bursamalaysia.com.

Destini remains focused on strengthening its operational foundations, enhancing governance practices, and delivering sustainable value creation for all stakeholders.

About Destini Berhad (“DESTINI”)

DESTINI is a prominent Malaysian integrated engineering solutions provider specializing in mobility, aviation & defence, marine, and energy industries. Its core business areas encompass maintenance, repair, and overhaul (MRO) services for the rail industry, MRO services for military aircraft, supply of equipment to armed forces, manufacturing and maintenance of lifeboats, and provision of marine safety equipment, engineering, procurement, construction, and installation of renewable energy systems. It is also involved in the provision of tubular running services for the energy industry.
