

GEOHAN CLINCHES RM40.9 MILLION PERSIARAN KLCC CONTRACT

Boosting YTD Contract Wins to more than RM200 Million

KUALA LUMPUR, 21 JULY 2026 – Geohan Corporation Berhad ("Geohan" or the "Company"), an established foundation and geotechnical specialist, is pleased to announce that its wholly-owned subsidiary, Geohan Sdn Bhd has accepted a Letter of Award ("LOA") valued at RM40.9 million from China State Construction Engineering (M) Sdn Bhd.

Pursuant to the LOA, the scope of work mainly encompasses bored pile works, reinforced concrete works and basement wall works for a prestigious mixed development at Persiaran KLCC in Kuala Lumpur which comprises two 65-storey serviced apartment towers with a total of 850 units. The works are slated for completion by early June 2027.

This latest win follows a recent award of the RM28.0 million Xintiandi development project at Genting Permai, where construction has commenced in May 2026. These dual successes maintained Geohan's order book at a comfortable level of approximately RM420 million, spanning across a diversified portfolio of residential, mixed development and infrastructure projects in Peninsular Malaysia. These progressive billings are expected to contribute positively to the Company's earnings until financial year 2027.

Commenting on the contract wins, Geohan Managing Director Lee Kim Seng said, "Amid the very volatile geopolitical landscape, we are honoured to have secured these two contracts with a combined value of RM68.9 million, reaffirming Geohan's position as the preferred geotechnical specialist even in the challenging operating environment. These awards reflect our proven technical capabilities in delivering complex geotechnical solutions across both high-density urban developments and challenging hilly terrains. With these latest wins, our year-to-date contract wins have well exceeded RM200 million. Looking ahead, we remain cautiously optimistic and committed to operational excellence and disciplined execution as we continue to build a sustainable foundation for long-term growth."

About Geohan Corporation Berhad

Geohan Corporation Berhad ("Geohan" or the "Group") is an established foundation and geotechnical engineering specialist in Malaysia. The Group, through its subsidiaries, is principally involved in provision of foundation and geotechnical services, including piling works, earth retaining structural works, sub-structure works, slope stabilisation works and ground improvement works. The operations of the Group and its subsidiaries are supported by its Bukit Beruntung depot, which houses a dedicated machinery fleet as well as in-house repair and maintenance facilities.

Backed by decades of technical expertise and a strong track record, Geohan has worked alongside several public listed conglomerates and companies to deliver safe and reliable foundation and piling works. Some of the landmark projects include Genting Highlands' First World Hotel, Sky Avenue, Genting cable car, as well as national infrastructures such as Klang Valley MRT and East Coast Rail Link, alongside numerous residential and commercial developments.
