

FOR IMMEDIATE RELEASE

HEXTAR INDUSTRIES BERHAD THIRD QUARTER RESULT 2025 BACKED BY FERTILISERS SEGMENT

Kuala Lumpur, 18 November 2025: HEXTAR INDUSTRIES BERHAD ("HIB" or the "Company") registered a cumulative consolidated revenue of RM782 million, profit before tax ("PBT") of RM17.9 million and profit after tax ("PAT") of RM13.7 million for the financial period ended 30 September 2025.

As compared to preceding quarter, HIB's consolidated revenue for the third quarter ended 30 September 2025 ("3Q2025") marginally improved from RM281 million to RM283 million. Despite higher revenue recorded, the Group reported a lower net profit of RM4.8 million as compared to preceding quarter's net profit of RM6.8 million primarily due to the fixed asset written down value amounting to RM3.2 million.

Commenting on the 3Q2025 results, Mr. Benny Ang, the Group Managing Director said that "Our fertiliser sales remain strong, achieving better profit margins. Accordingly, the Fertiliser segment recorded a higher net profit of approximately RM12 million, compared to RM10 million in the preceding quarter. The current quarter's performance was affected by the RM3.2 million write-down from the disposal of underperforming equipment in our rental division. This is solely an accounting entry with no cash impact and does not affect our operational performance."

HIB's Executive Director Mr Alex Sham further added that "Although the Industrial and Consumer Segment contributes 14% to the Group's revenue, it is poised for continued growth. This will be driven by our engineering solutions and the rapid expansion of Luckin Coffee outlets. Since its establishment earlier this year, the Group has successfully grown this footprint to 53 operating outlets."

About Hextar Industries Berhad ("HIB")

HIB is listed on the Main Market and through its subsidiary companies, is involved in the manufacturing and formulation of bulk blend, mixture and compound fertilisers, trading of various fertilisers as well as providing crop management solutions.
