

PMW INTERNATIONAL SECURES RM11.92 MILLION SPUN PILE ORDER FOR INFRASTRUCTURE PROJECT IN PERAK

*Reinforces Group's growing presence in the West Malaysia
infrastructure and construction segment*

IPOH, PERAK – 25 MAY 2026 – **PMW International Berhad** ("PMW" or the "Company"), an integrated infrastructure solutions provider listed on the ACE Market of Bursa Malaysia, today announced that its wholly-owned subsidiary, **PMW Industries Sdn. Bhd.** ("PISB") has accepted a Purchase Order ("Order") on 8 May 2026 worth approximately RM11.92 million from **SL Virtue Sdn. Bhd.** ("SLV") for the supply of pre-stressed spun concrete piles. This reinforces the growing presence of PMW and its subsidiaries ("PMW Group" or "Group") in the spun pile market in West Malaysia.

Key Highlights of the Order

This Order, with a value of approximately RM11.92 million, involves the supply of spun piles for the infrastructure project comprising the construction of the connecting road from Lebuhraya Meru Raya (FT240) to the Ipoh–Lumut Expressway (FT005) interchange at Jelapang, Perak ("Project").

This Project is strategically located within the Kinta district in Perak and is expected to enhance connectivity between key transportation routes and surrounding economic zones within the Greater Ipoh growth corridor.

The spun piles supplied under the Order are manufactured in accordance with the relevant technical and quality requirements applicable to infrastructure and construction projects in Malaysia, including Jabatan Kerja Raya ("JKR") specifications and standards. This supports the Group's continued participation in critical infrastructure and transportation developments.

FOR IMMEDIATE RELEASE**

Strategic Positioning

This Order marks another significant milestone in PMW Group's ongoing expansion within the construction and infrastructure segment in West Malaysia, particularly in the spun pile market.

The Order is expected to be fulfilled through PMW Group's manufacturing facility in Ipoh, Perak, which commenced spun pile production in mid-2024 as part of the Group's strategic expansion into the infrastructure foundation segment.

Despite being relatively new to the spun pile market in West Malaysia, the facility recorded revenue contribution of approximately RM5.86 million from spun pile operations for the financial year ended 31 December 2025. Following continuous operational enhancement and production optimisation initiatives, the Group has progressively strengthened the factory's production capabilities and utilisation levels to support larger project requirements and future growth opportunities.

PMW's spun piles are manufactured in accordance with the relevant industry and technical standards requirements applicable for infrastructure and construction projects in Malaysia, supporting the Group's participation in projects where deep foundation integrity and structural stability are critical.

PMW International Berhad ("PMW") Statement

Executive Director and Chief Executive Officer of PMW, Mr. Lee Hon Hwa, said:

"This Order reflects the Group's strengthening position in the infrastructure and construction supply chain in West Malaysia. We are encouraged by the growing market acceptance of our spun pile products and our operational capabilities following the ramp-up of our manufacturing facility in Ipoh."

PRESS RELEASE
FOR IMMEDIATE RELEASE

The infrastructure and construction sector in Malaysia continues to present encouraging opportunities, particularly across road, transportation, industrial and utility-related developments. We believe our spun piles will continue to play an important role in supporting these developments due to their efficiency, durability and suitability for large-scale infrastructure applications.

This Order further validates our strategic direction to expand beyond our traditional business segments and accelerate the growth of our construction-related product offerings in West Malaysia.”

Outlook

The Group remains optimistic on the outlook of the infrastructure and construction sector, supported by ongoing development activities and continued implementation of public and private sectors across Malaysia.

Continued infrastructure development initiatives under national development plans are expected to support long-term demand for spun piles and related foundation solutions.

PMW is actively expanding its participation in infrastructure and construction-related projects in West Malaysia, particularly in highways, industrial developments and data centre construction where spun piles are essential structural and geotechnical components.

Moving forward, PMW intends to further strengthen its market presence in the spun pile and infrastructure segment through operational expansion, production optimisation and pursuit of additional infrastructure-related opportunities in West Malaysia.

About PMW International Berhad

PMW International Berhad is an **integrated infrastructure solutions provider** operating across the concrete infrastructure value chain. The Group specialises in the manufacturing of prestressed spun concrete poles and piles, including standard poles, monopoles, decorative poles, spun piles, and square piles, as well as the design and fabrication of moulds and machinery.

With manufacturing facilities in Ipoh, Perak and Kota Kinabalu, Sabah, and an upcoming facility in Tanjung Manis, Sarawak, PMW supports nationwide delivery of large and heavy concrete products. The Group's operations are complemented by related activities in metal products and integrated lighting solutions through its subsidiary, PMW Lighting. Leveraging in-house engineering capabilities, a diversified product portfolio, and a nationwide manufacturing footprint, PMW serves the electricity, telecommunications, infrastructure, and lighting sectors across Malaysia.
