PARENT COMPANY ONLY FINANCIAL
STATEMENTS AND INDEPENDENT AUDITORS’
REPORT
DECEMBER 31, 2025 AND 2024

For the convenience of readers and for information purpose only, the auditors’ report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors’ report and financial statements shall prevail.

INDEPENDENT AUDITORS' REPORT

To the Board of Directors and Shareholders of Good Way Technology Co., Ltd

PWCR25000668

Opinion

We have audited the accompanying parent company only balance sheets of Good Way Technology Co., Ltd. as at December 31, 2025 and 2024, and the related parent company only statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the financial statements, including a summary of material accounting policies.

In our opinion, based on our audits and the reports of other auditors (see information disclosed in the *Other Matter* section of our report), the accompanying parent company only financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2025 and 2024, and its financial performance and its cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for opinion

We conducted our audits in accordance with the Regulations Governing Financial Statement Audit and Attestation Engagements of Certified Public Accountants and Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the *Auditors' responsibilities for the audit of the parent company only financial statements* section of our report. We are independent of the Company in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Company's 2025 parent company only financial statements. These matters were addressed in the context of our audit of the parent company only financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key audit matters for the Company's 2025 parent company only financial statements are stated as follows:

Evaluation of inventoriesDescription

Please refer to Note 4(12) for the description of accounting policy on inventory valuation. Please refer to Note 5(2) for accounting estimates and assumption uncertainty in relation to inventory valuation. Please refer to Note 6(5) for details of inventory.

Because of the competition in consumer electronics, which shortens the life cycle of the Company's products, it results in frequent changes in the market prices. The Company applies judgments and estimates in determining the net realisable value of inventories on balance sheet date, adopts an item by-item approach in comparing cost and net realisable value and provisions loss on obsolete and slow-moving inventories when over a certain age.

As the valuation of inventories involve subjective judgments, and the valuation amounts are material, we identified the valuation of inventories as one of the key audit matters.

How our audit addressed the matter:

We performed the following audit procedures in respect of the above key audit matter:

1. Understood the policies of allowance for valuation loss on inventories and confirmed the adoption of the policies on provision of allowance for inventory valuation losses during the reporting period.
2. Performed physical inventory count at the end of period to identify whether there are obsolete, damaged or unsalable inventories.
3. Obtained net realisable value reports of each kind of inventory and checked whether the calculation formulas have been applied consistently. Tested relevant parameters to supporting sale and purchase documents and recalculated the allowance for valuation losses item by item. Also, we calculated the accuracy of valuation model calculation result.
4. Tested the movement of inventory and checked the date of the movement with related supporting documents to ascertain the accuracy of the inventory aging classification and recalculated the valuation allowance loss.

Existence of sales revenue

Description

Please refer to Note 4(28) for accounting policies on recognition of revenue, Note 6(18) for details of sales revenue.

The Company is primarily engaged in the research, development, manufacture and sale of consumer electronics. There were various types of products and innovations, resulting in a change of the major customers, and the sales revenue from the major customers represented a significant proportion, which would have a material effect on the financial statements. Thus, we consider the existence of sales revenue from the major customers a key audit matter.

How our audit addressed the matter:

We performed the following audit procedures in respect of the above key audit matter:

1. Obtained an understanding of the internal controls over sales revenue and included sales transactions from major customers in samples for test of controls.
2. Understood and tested the credit approval process of the major customers. Confirmed that the credit terms have been adequately approved, including identified and verified related information of transaction counterparties.
3. We obtained and verified the sales details and relevant evidences.
4. Sample selected accounts receivable of major customers to obtain the confirmation letter.
5. We obtained and verified the subsequent collection details of accounts receivable and relevant evidences.
6. Obtained the details of sales returns after the balance sheet date and reviewed whether the major customers had significant abnormal sales returns.

Other matter – Reference to report of other independent auditors

We did not audit the financial statements of certain investments accounted for under the equity method which were audited by other auditors. Therefore, our opinion expressed herein, insofar as it relates to the amounts included in respect of these associates, is based solely on the reports of the other auditors. Total assets of these investments accounted for under the equity method amounted to NT\$5,112 thousand, constituting 0.1% of the consolidated total assets as at December 31, 2025, and the operating revenue amounted to NT\$(14,349) thousand, constituting 2.5% of the consolidated total operating revenue for the year then ended.

Responsibilities of management and those charged with governance for the parent company only financial statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and for such internal control as management determines is necessary to enable the preparation of parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the Company's financial reporting process.

Auditors' responsibilities for the audit of the parent company only financial statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company

only financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.

5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the disclosures, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the parent company only financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

GOOD WAY TECHNOLOGY CO., LTD.
NOTES TO THE PARENT COMPANY ONLY FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2025 AND 2024
(EXPRESSED IN THOUSANDS OF NEW TAIWAN DOLLARS, EXCEPT AS OTHERWISE
INDICATED)

1. HISTORY AND ORGANISATION

Good Way Technology Co., Ltd (referred herein as the “Company”) was incorporated as a company limited by shares under the provisions of the Company Law of the Republic of China (R.O.C.) in February 4, 1993. The Company was primarily engaged in the manufacture of computers and USB peripherals products, multifunctional docking stations, video and audio converters, wireless peripherals products, Internet of Things application products, design, research and development of software and import and export business of related materials of products.

The Company’ shares are traded in the Taipei Exchange starting from August 26, 2014.

2. The Date of Authorisation for Issuance of the Financial Statements and Procedures for Authorisation

These parent company only financial statements were authorised for issuance by the Board of Directors on March 12, 2026.

3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRS®”) Accounting Standards that came into effect as endorsed by the Financial Supervisory Commission (“FSC”)

New standards, interpretations and amendments endorsed by the FSC and became effective from 2025 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IAS 21, ‘Lack of exchangeability’	January 1, 2025

The above standards and interpretations have no significant impact to the Company’s financial condition and financial performance based on the Company’s assessment.

(2) Effect of new issuances of or amendments to IFRS Accounting Standards as endorsed by the FSC but not yet adopted by the Company

New standards, interpretations and amendments endorsed by the FSC effective from 2026 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 9 and IFRS 7, 'Amendments to the classification and measurement of financial instruments'	January 1, 2026
Amendments to IFRS 9 and IFRS 7, 'Contracts referencing nature-dependent electricity'	January 1, 2026
IFRS 17, 'Insurance contracts'	January 1, 2023
Amendments to IFRS 17, 'Insurance contracts'	January 1, 2023
Amendment to IFRS 17, 'Initial application of IFRS 17 and IFRS 9 – comparative information'	January 1, 2023
Annual Improvements to IFRS Accounting Standards—Volume 11	January 1, 2026

The above standards and interpretations have no significant impact to the Company's financial condition and financial performance based on the Company's assessment.

(3) IFRS Accounting Standards issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRS Accounting Standards as endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	International Accounting Standards Board
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture'	To be determined by International Accounting Standards
IFRS 18, 'Presentation and disclosure in financial statements'	January 1, 2027 (Note)
IFRS 19, 'Subsidiaries without public accountability: disclosures'	January 1, 2027
Amendments to IAS 21, 'Translation to a Hyperinflationary Presentation Currency'	January 1, 2027

Note : The FSC has announced in a press release on September 25, 2025 that public companies will apply IFRS 18 starting from the fiscal year 2028. Additionally, entities can choose to adopt IFRS 18 earlier based on their requirements after the FSC endorses IFRS 18.

Except for the following, the above standards and interpretations have no significant impact to the Company's financial condition and financial performance based on the Company's assessment. The quantitative impact will be disclosed when the assessment is complete.

IFRS 18, 'Presentation and disclosure in financial statements'

IFRS 18, 'Presentation and disclosure in financial statements' replaces IAS 1. The standard introduces a defined structure of the statement of profit or loss, disclosure requirements related to management-

defined performance measures, and enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes.

4. Summary of Material Significant Accounting Policies

The principal accounting policies applied in the preparation of these parent company only financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The parent company only financial statements of the Company have been prepared in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers”.

(2) Basis of preparation

- A. Except for the following items, the parent company only financial statements have been prepared under the historical cost convention:
 - (a) Financial assets or financial liabilities (including derivative instruments) at fair value through profit or loss.
 - (b) Financial assets at fair value through other comprehensive income.
 - (c) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.
- B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations that came into effect as endorsed by the FSC (collectively referred herein as the “IFRSs”) requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 5.

(3) Foreign currency translation

Items included in the financial statements of each of the Company’s entities are measured using the currency of the primary economic environment in which the entity operates (the “functional currency”). The parent company only financial statements are presented in New Taiwan dollars, which is the Company’s functional currency.

A. Foreign currency transactions and balances

- (a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise.
- (b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences

arising upon re-translation at the balance sheet date are recognised in profit or loss.

- (c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
- (d) All other foreign exchange gains and losses are presented in the statement of comprehensive income within 'other gains and losses'.

B. Translation of foreign operations

The operating results and financial position of all the company entities, that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (a) Assets and liabilities presented in each balance sheet are translated at the closing exchange rate at the date of that balance sheet;
- (b) Income and expense presented in each comprehensive income statement are translated at average exchange rates of that period; and
- (c) All resulting exchange differences are recognised in other comprehensive income.

(4) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
 - (a) Assets that are expected to be realised, or are intended to be sold or consumed in the normal operating cycle;
 - (b) Assets that are held primarily for the purpose of trading;
 - (c) Assets that are expected to be realised within twelve months after the reporting period;
 - (d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities for at least twelve months after the reporting period.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
 - (a) Liabilities that are expected to be settled in the normal operating cycle;
 - (b) Liabilities that are held primarily for the purpose of trading;
 - (c) Liabilities that are due to be settled within twelve months after the reporting period;
 - (d) It does not have the right at the end of the reporting period to defer settlement of the liability at least twelve months after the reporting period.

(5) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the definition above and are held for the purpose of meeting short-term cash commitments in operations are classified as cash equivalents.

(6) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortised cost or fair value through other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Company measures the financial assets at fair value and recognises the transaction costs in profit or loss. The Company subsequently measures the financial assets at fair value, and recognises the gain or loss in profit or loss.

(7) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Company has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. The Company subsequently measures the financial assets at fair value. The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Company and the amount of the dividend can be measured reliably.

(8) Financial assets at amortised cost

- A. Financial assets at amortised cost are those that meet all of the following criteria:
 - (a) The objective of the Company's business model is achieved by collecting contractual cash flows.
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortised cost are recognised and derecognised using trade date accounting.

- C. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognised in profit or loss when the asset is derecognised or impaired.
- D. The Company's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(9) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Company a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(10) Impairment of financial assets

For financial assets at amortised cost, at each reporting date, the Company recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable that do not contain a significant financing component, the Company recognises the impairment provision for lifetime ECLs.

(11) Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to receive the cash flows from the financial asset expire.

(12) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average method. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

(13) Investment accounted for using equity method/ Subsidiaries

- A. Subsidiaries are all entities (including structured entities) controlled by the Company. The Company controls an entity when the Company is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.
- B. Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Company are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Company.
- C. The Company's share of its associates' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Company's share of losses in an subsidiary equals or exceeds its interest in the subsidiary, the Company continues to recognise losses proportionate to its ownership.
- D. At the balance sheet date, the Company performs an impairment test for an investment in an associate when there is an indication that the investment may be impaired. The entire carrying amount of the investment (including goodwill) is tested for impairment as a single asset, by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognized forms part of the carrying amount of the investment. Any reversal of impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.
- E. Pursuant to the "Regulations Governing the Preparation of Financial Reports by Securities Issuers," profit (loss) of the current period and other comprehensive income in the non-consolidated financial statements shall be equal to the amount attributable to owners of the parent in the consolidated financial statements. Owners' equity in the non-consolidated financial statements shall be equal to equity attributable to owners of the parent in the consolidated financial statements.

(14) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalised.
- B. Subsequent costs are included in the asset's carrying amount or capitalised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is capitalised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

- C. Property, plant and equipment are measured at cost model subsequently. Land is not depreciated. Other property, plant and equipment are depreciated using the straight-line method over their estimated useful lives. Each part of an item of property, plant, and equipment with a cost that is significant in relation to the total cost of the item must be depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of property, plant and equipment are as follows:

Buildings and structures	11-50 years
Machinery and equipment	2-10 years
Transportation equipment	4 years
Office equipment	2-5 years
Leasehold improvements	3-11 years

(15) Leasing arrangements (lessee)-right-of-use assets/ lease liabilities

- A. Leases are recognised as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Company. For short-term leases or leases of low-value assets, lease payments are recognised as an expense on a straight-line basis over the lease term.
- B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the interest rate implicit in the lease. Lease payments are comprised of fixed payments, less any lease incentives receivable.
- The Company subsequently measures the lease liability at amortised cost using the interest method and recognises interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognised as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.
- C. At the commencement date, the right-of-use asset measured at cost shall comprise the amount of the initial measurement of lease liability and any initial direct costs incurred.
- The right-of-use asset subsequently measured at cost model and shall be depreciated from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. When the lease liability is remeasured, the amount of remeasurement is recognised as an adjustment to the right-of-use asset.

D. For lease modifications that decrease the scope of the lease, the lessee shall decrease the carrying amount of the right-of-use asset and remeasure the lease liability to reflect the partial or full termination of the lease, and recognise the difference in profit or loss. For all other lease modifications, the lessee shall remeasure the lease liability and adjust the right-of-use asset, correspondingly.

(16) Intangible assets

Computer software is stated at cost and amortised on a straight-line basis over its estimated useful life of 1 to 5 years.

(17) Impairment of non-financial assets

The Company assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. When the circumstances or reasons for recognizing impairment loss for an asset in prior years no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.

(18) Borrowings

Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(19) Notes and accounts payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
- B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(20) Convertible bonds payable

Convertible bonds or issued by the Company contain conversion options (that is, the bondholders have the right to convert the bonds into the Company's common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Company classifies the bonds payable upon issuance as a financial asset, a financial liability or an equity instrument in accordance with the contract terms. They are accounted for as follows:

- A. The embedded call options and put options are recognised initially at net fair value as 'financial assets or financial liabilities at fair value through profit or loss'. They are subsequently remeasured and stated at fair value on each balance sheet date; the gain or loss is recognised as 'gain or loss on valuation of financial assets or financial liabilities at fair value through profit or loss'.
- B. The host contracts of bonds are initially recognised at fair value. Any difference between the initial recognition and the redemption value is accounted for as the premium or discount on bonds payable and subsequently is amortised in profit or loss as an adjustment to 'finance costs' over the period of circulation using the effective interest method.
- C. The embedded conversion options which meet the definition of an equity instrument are initially recognised in 'capital surplus—share options' at the residual amount of total issue price less the amount of financial assets or financial liabilities at fair value through profit or loss and bonds payable as stated above. Conversion options are not subsequently remeasured.
- D. Any transaction costs directly attributable to the issuance are allocated to each liability or equity component in proportion to the initial carrying amount of each abovementioned item.
- E. When bondholders exercise conversion options, the liability component of the bonds (including bonds payable and 'financial assets or financial liabilities at fair value through profit or loss') shall be remeasured on the conversion date. The issuance cost of converted common shares is the total carrying amount of the abovementioned liability component and 'capital surplus—share options'.

(21) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability specified in the contract is discharged, cancelled or expires.

(22) Non-hedging and embedded derivatives

Non-hedging derivatives are initially recognised at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognised in profit or loss.

(23) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid and are recognised as expenses in the period in which the employees render service.

B. Pensions

(a) Defined contribution plan

For the defined contribution plans, the contributions are recognised as pension expense when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plan

i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of government bonds (at the balance sheet date) that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability.

ii. Remeasurements arising on the defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as retained earnings.

iii. Past service costs are recognised immediately in profit or loss.

C. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognised as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is paid by shares, the Company calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(24) Employee share-based payment

For the equity-settled share-based payment arrangements, the employees services received are measured at the fair value of the equity instruments granted at the grant date, and are recognized as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected

to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognised is based on the number of equity instruments that eventually vest.

(25) Income taxes

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C. Deferred tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the parent company only balance sheet. Deferred tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.
- D. Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. At each balance sheet date, unrecognised and recognised deferred tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.

(26) Share capital

- A. Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.
- B. Where the Company repurchases the Company's shares that have been issued, the consideration paid, including any directly attributable incremental costs (net of income taxes) is deducted from equity attributable to the Company's equity holders. Where such shares are subsequently reissued, the difference between their carrying amount and any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the Company's equity holders.

(27) Dividends

Cash dividends distributed from earnings in accordance with Articles of Incorporation of the Company are recognized as liabilities in the financial statements after resolving by the Board of Directors. In addition, the distribution of stock dividends is recognized as stock dividends to be distributed when the Company's shareholders' meeting resolves to distribute, and transfers to share capital- common stock on the base date of issuance of new stocks.

(28) Revenue recognition

A. Sales revenue

- (a) The Company manufactures and sells computer peripheral equipment and related products. Sales are recognised when control of the products has transferred, being when the products are delivered to the wholesaler. Either the buyer has accepted the products in accordance with the sales contract, or the Company has objective evidence that all criteria for acceptance have been satisfied.
- (b) Sales revenue was recognised based on the contract price net of sales discount. Sales discounts and allowances from these sales is recognised based on the content specified in the contract. Sales volume is used to estimate and provide for the sales discounts and allowances and revenue is only recognised to the extent that it is highly probable that a significant reversal will not occur. The estimation is subject to an assessment at each reporting date. As of year 2024, a refund liability is recognised for expected sales discounts and allowances payable to customers in relation to sales made until the end of the reporting period.
- (c) A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

B. Financing components

As the time interval between the transfer of committed goods or service and the payment of customer does not exceed one year, the Company does not adjust the transaction price to reflect the time value of money.

(29) Government grants

Government grants are recognised at their fair value only when there is reasonable assurance that the Company will comply with conditions attached to the grants and the grants will be received. Government grants are recognised in profit or loss on a systematic basis over the periods in which the Company recognises expenses for the related costs for which the grants are intended to compensate.

5. CRITICAL ACCOUNTING JUDGEMENT, ESTIMATES AND KEY SOURCES OF ASSUMPTION UNCERTAINTY

The preparation of these parent company only financial statements requires management to make critical judgements in applying the Company's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year. The related information is addressed below:

(1) Critical judgements in applying the Company's accounting policies

Based on the Company's assessment, there is no significant uncertainty in the adoption of the accounting policies.

(2) Critical accounting estimates and assumptions

(a) Assessing the doubtful accounts

In the process of assessing allowance for uncollectible accounts, the Company must use judgements and assumptions to determine the collectability of accounts receivable. The collectability is affected by various factors: customers' financial conditions, the Company's internal credit ratings, historical experience, current economic conditions and etc. Where there is suspicion of recoverability, the Company needs to individually assess the possible recoverable amount and recognise reasonable allowance. The assessment of impairment depends on reasonable expectation about future events on the basis of the conditions existing at the balance sheet date. The estimation may differ from the actual result and may lead to changes.

Details of the carrying amount of accounts receivable (including related parties) as of December 31, 2025 are provided in Note 6(4).

(b) Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Company must determine the net realisable value of inventories on balance sheet date using judgements and estimates. Due to the rapid technology innovation, the Company evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be material changes to the evaluation.

Details of the carrying amount of inventories as of December 31, 2025 are provided in Note 6(5).

A. The terms of the third domestic unsecured convertible bonds issued by the Company are as follows:

- (a) The Company issued \$300,000, third domestic unsecured convertible bonds at 108.93% of face value, as approved by the regulatory authority. The actual total issuance amount was \$326,782 (excluding the issuance cost of \$6,364) with a coupon rate of 0%. The bonds mature 5 years from the issue date (March 7, 2024 ~ March 7, 2029). The bonds will be redeemed in cash at face value at the maturity date. The bonds were listed on the Taipei Exchange on March 7, 2024.
- (b) The bondholders have the right to ask for conversion of the bonds into common shares of the Company during the period from the date after three months of the bonds issue to the maturity date, except for the stop transfer period as specified in the laws/regulations. The rights and obligations of the new shares converted from the bonds are the same as the issued and outstanding common shares.
- (c) The conversion price of the bonds is set up based on the pricing model specified in the terms of the bonds, and is subject to adjustments if the condition of the anti-dilution provisions occurs subsequently. The conversion price was NT\$ 34.2 when issued.
- (d) The Company can exercise the redemption right of the convertible bonds according to the following conditions:
 - i. The Company may repurchase all the bonds outstanding in cash at the bonds' face value if the closing price of the Company's common shares is above then conversion price by 30% (including 30%) for 30 consecutive trading days during the period from the date after three months of the bonds issue to 40 days before the maturity date. The Company will send a 'Notice of Withdrawal' by registered mail to the creditor (based on the records of creditors list in 5 days before mailing, and announce the investors who obtained the convertible bonds due to trading or other reasons) who holds the convertible bonds. The redeemed price

is set at the bonds' face value. The Company will bulletin and send a letter to Taipei Exchange.

- ii. The Company may repurchase all the bonds outstanding in cash from the bondholders at the bonds' face value at any time if the outstanding balance of the bonds is less than 10% of total initial issue amount during the period from the date after three months of the bonds issue to 40 days before the maturity date. The Company will send a 'Notice of Withdrawal' by registered mail to the creditor (based on the records of creditors list in 5 days before mailing, and announce the investors who obtained the convertible bonds due to trading or other reasons) who holds the convertible bonds. The redeemed price is set at the bonds' face value. The Company will bulletin and send a letter to Taipei Exchange.
- (e) The bondholders can exercise the put options of the convertible bonds according to the following conditions:

The convertible bonds set the date after three years from the issue date as the put effective date for the bondholders to early put the bonds back to the Company. The Company shall send a 'Notice of Put Options Exercise' by registered mail to the creditor (based on the records of creditors list in 5 days before mailing, and announce the investors who obtained the convertible bonds due to trading or other reasons) who holds the convertible bonds upon 40 days prior to the put effective date. The Company will bulletin and send a letter to Taipei Exchange for the exercise of the put options for the bondholders. The bondholders have the right to require the Company to redeem their bonds in cash at the price of the bonds' face value plus interests (100.7518% of the bonds' face value upon three years from the issue date (actual yielding rate is 0.25%)) within 40 days before the put effective date.
- (f) Under the terms of the bonds, all bonds redeemed (including bonds repurchased from the Taipei Exchange), matured and converted are retired and not to be resold or re-issued; the conversion rights attached to the bonds are also extinguished.

B. Convertible corporate bonds of compound instruments

Regarding the issuance of convertible bonds, the equity conversion options amounting to \$51,051 were separated from the liability component and were recognised in 'capital surplus—share options' in accordance with IAS 32. The redemption rights and put options embedded in bonds payable were separated from their host contracts and were recognised in 'financial liabilities at fair value through profit or loss' in accordance with IFRS 9 because the economic characteristics and risks of the embedded derivatives were not closely related to those of the host contracts. The effective interest rates of the bonds payable after such separation was 2.35%.

- C. As of December 31, 2025, the bonds totaling \$300 (face value) had been converted into 8,771 shares of common stock.

A. The Company signed a five-year syndicated credit agreement with six banks, including Hua Nan Commercial Bank, Ltd., acting as the lead and managing bank, in April 2023. The agreement stipulates the following:

(a) Credit Items and Limits: The total credit limit is NT\$1.6 billion.

i. Item A:

Mid-term (secured) loans with a limit of NT\$500 million, which cannot be drawn down on a revolving basis.

ii. Item B:

Mid-term loans with a limit of NT\$1.1 billion or the equivalent in US dollars, which can be drawn down on a revolving basis.

(b) Credit Period:

The credit period for both Item A and Item B starts from the initial drawdown date and lasts for 5 years.

(c) Utilization Period:

- i. Item A Credit: The borrower can only draw down the credit limit of Item A once, starting from 3 months after the signing date of this agreement.
- ii. Item B Credit: The borrower can draw down the credit limit of Item B on a revolving basis within the last 3 months before the final expiration date of this agreement.

(d) Financial Commitments:

The borrower must maintain the following financial ratios, based on the audited or reviewed consolidated financial statements of the borrower's accountant, reviewed every six months:

- i. Current ratio [Current Assets / Current Liabilities]: Not less than 100%.
- ii. Financial debt ratio [Short-term borrowings + Long-term borrowings + Long-term borrowings due within one year / Tangible Net Worth]: Not more than 150%.
- iii. Interest coverage ratio: [Profit before tax + Depreciation + Amortization + Interest expense] / Interest expense: Not less than 3 times. (To be adjusted on a period-by-period basis as follows: Second quarter of 2026: Not less than 1 time; For the year 2026: Not less than 1.5 times; Second quarter of 2027: Not less than 2. times; For the year 2027: Not less than 3 times.)

According to the provisions of the joint credit agreement, the above ratios and standards are reviewed every six months, based on the borrower's second quarter and annual consolidated financial statements. If the borrower's financial condition does not meet any of the ratios or standards specified herein at any review, the borrower shall improve it by the next review date. However, from the date of submission of the financial report for the current period until the date of submission of the financial report for the period after the borrower submits the improvement, an additional annual interest rate of 0.1% shall be added to the loan interest rate applicable to the unpaid principal balance. If the borrower fails to complete the improvement, it shall be deemed a default event, and the managing bank shall notify the borrower in writing, declaring that all outstanding principal balances, interest, and other amounts payable by the borrower to each joint credit bank and managing bank under this agreement shall become immediately due and payable. The borrower shall immediately repay all such amounts.

The Company has obtained an exemption letter from the joint credit bank consortium agreeing to exempt the Company from reviewing the current ratio, financial liabilities ratio and interest coverage ratio for the first half of the year 2025 and the year 2025, effective October 3, 2025.

B. The Company recognised interest expenses in profit or loss. Please refer to Note 6(22) for details.

(13) Pensions

A. Defined benefit pension plan

(a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions for the deficit by next March.

- (d) The Bank of Taiwan was commissioned to manage the fund of the Company's defined benefit pension plan assets in accordance with the Fund's annual investment and utilisation plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilisation of the Labor Retirement Fund" (Article 6: The scope of utilisation for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitisation products, etc.). With regard to the utilisation of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorised by the Regulator. The Company has no right to participate in managing and operating that Fund and therefore, the Company is unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2025 and 2024, is given in the Annual Labor Retirement Fund Utilisation Report announced by the government.
- (e) The principal actuarial assumptions used were as follows:

	Year ended December 31	
	2025	2024
Discount rate	1.30%	1.60%
Future salary increases	2.00%	2.00%

The assumption of future mortality is based on the Sixth Taiwan Standard Ordinary Experience Mortality Table.

The analysis on present value of defined benefit obligations based on the changes on principal actuarial assumption are as follows:

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
<u>December 31, 2025</u>				
Effect on present value of defined benefit obligation	(\$ 163)	\$ 167	\$ 166	(\$ 162)
<u>December 31, 2024</u>				
Effect on present value of defined benefit obligation	(\$ 162)	\$ 167	\$ 166	(\$ 162)

The sensitivity analysis above is based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The method utilised in sensitivity analysis is the same as the method utilised in calculating net pension liability on the balance sheet.

- (f) Expected contributions to the defined benefit pension plan of the Company for the year ending December 31, 2026 amount to \$190.
- (g) As of December 31, 2025, the weighted average duration of the retirement plan is 5 years. The analysis of timing of the future pension payment was as follows:

	Amount
Within 1 year	\$ 453
1-2 year(s)	1,074
2-5 years	5,801
Over 5 years	4,883
	<u>\$ 12,211</u>

(17) Tax on undistributed earnings / after the Balance Sheet Date

- A. According to the Articles of Incorporation of the Company, the methods of appropriation of the earnings are as follows:

The current year's earnings, if any, shall be distributed in the following order:

- (a) Pay all taxes.
- (b) Offset accumulated deficit.
- (c) Set aside 10% for legal reserve until the legal reserve equals the total capital stock balance.
- (d) Set aside or reverse a special reserve in accordance with related laws.
- (e) The appropriation of the remaining earnings, if any, along with the beginning unappropriated earnings as the accumulated distributable earnings for shareholders, shall be proposed by the Board of Directors and resolved by the shareholders.

The abovementioned distribution of the shareholders' bonus or legal reserve or capital surplus, in whole or in part, in the form of cash in accordance with the regulations, shall be authorised to the Board of Directors, upon approval adopted by the majority vote at their meeting attended by at least two-thirds of the total number of directors; and in addition thereto a report of such distribution shall be submitted to the shareholders during their meeting.

In order to meet future capital requirements, long-term financial plan, and satisfy the cash inflow which was required by shareholders, taking into account the business environment and growth stage of the Company, the Company can appropriate distributable earnings as dividends based on future operation conditions. Shareholders' bonus shall account for 10%~100% of the accumulated distributable earnings, among which the cash dividends shall account for 10%~100% of total shareholders' bonus distributed while stock dividends shall account for 0%~90% of total shareholders' bonus distributed.

- B. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.
- C. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.

D. The following is the Company's earnings distribution

11. Significant Events after the Balance Sheet Date

(1) For details of the appropriations of 2025 earnings as proposed by the Board of Directors on March 12, 2026, please refer to Notes 6(16) and 6 (17).

12. Others

(1) Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Company monitors capital on the basis of the debt to asset ratio. This ratio is calculated as total debt divided by total assets.

The Company's strategy in 2025 was consistent with the 2024 strategy. As of December 31, 2025 and 2024, for the debt to asset ratios, please refer to parent company only balance sheets.

(2) Financial instruments

A. Financial instruments by category

Except for the following, the Company's financial assets (cash and cash equivalents, financial assets at amortised cost (current and non-current), notes receivable, accounts receivable (including related parties), other receivables (including related parties), and non-current financial assets at fair value through other comprehensive income) and financial liabilities (short-term borrowings, accounts payable (including related parties), other payables (including related parties), bonds payable, long-term borrowings (including current portion), and lease liabilities (current and non-current)) are provided in parent company only balance sheets and Note 6.

B. Financial risk management policies

(a) The Company's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial position and financial performance.

(b) Risk management is carried out by a central treasury department (Company treasury) under policies of the Company. Company treasury identifies, evaluates and hedges financial risks in close co-operation with the Company's operating units.

C. Significant financial risks and degrees of financial risks

(a) Market risk

i. Foreign exchange risk

- (i). The Company operates internationally and is exposed to exchange rate risk arising from the transactions of the Company used in various functional currency, primarily with respect to the USD. Foreign exchange rate risk arises from future commercial transactions and recognised assets and liabilities.
- (ii). Management has set up a policy to require Company entities to manage their foreign exchange risk against their functional currency. The entities are required to hedge their entire foreign exchange risk exposure with the Company treasury.
- (iii). The Company's businesses involve some non-functional currency operations (the Company's and certain subsidiaries' functional currency: NTD). The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

December 31, 2025			
	Foreign currency amount (In thousands)	Exchange rate	Book value (NTD)
(Foreign currency: functional currency)			
<u>Financial assets</u>			
<u>Monetary items</u>			
USD:NTD	\$ 28,872	31.43	\$ 907,447
<u>Investments accounted for using equity method</u>			
USD:NTD	\$ 55,370	31.43	1,740,287
<u>Financial liabilities</u>			
<u>Monetary items</u>			
USD:NTD	\$ 41,713	31.43	\$ 1,311,040
December 31, 2024			
	Foreign currency amount (In thousands)	Exchange rate	Book value (NTD)
(Foreign currency: functional currency)			
<u>Financial assets</u>			
<u>Monetary items</u>			
USD:NTD	\$ 35,112	32.79	\$ 1,151,147
<u>Investments accounted for using equity method</u>			
USD:NTD	\$ 66,700	32.79	2,186,776
<u>Financial liabilities</u>			
<u>Monetary items</u>			
USD:NTD	\$ 43,709	32.79	\$ 1,433,000

- (iv). The total exchange gain and loss, including realised and unrealised, arising from significant foreign exchange variation on the monetary items held by the Company for the years ended December 31, 2025 and 2024, are provided in Note 6(21).

- (v). Analysis of foreign currency market risk arising from significant foreign exchange variation:

Year ended December 31, 2025				
Sensitivity analysis				
	Degree of variation	Effect on profit or loss	Effect on comprehensive income	
(Foreign currency: functional currency)				
Financial assets				
Monetary items				
USD:NTD	1%	\$ 9,074	\$	-
Financial liabilities

	Degree of variation	Effect on profit or loss	Effect on comprehensive income	
(Foreign currency: functional currency)				
Financial assets				
Monetary items				
USD:NTD	1%	\$ 11,511	\$	-
Financial liabilities				
Monetary items				
USD:NTD	1%	(\$ 14,330)	\$	-

ii. Price risk

- (i) The Company's equity securities, which are exposed to price risk, are the held financial assets at fair value through other comprehensive income.
- (ii) The Company's investments in equity securities comprise shares issued by the domestic companies. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 1% with all other variables held constant, other components of equity for the years ended December 31, 2025 and 2024 would have increased/decreased by \$215 and \$240, respectively, as a result of other comprehensive income classified as equity investment at fair value through other comprehensive income.

iii. Cash flow and fair value interest rate risk

- (i). The Company's interest rate risk arises from long-term and short-term borrowings. Borrowings issued at variable rates expose the Company to cash flow interest rate risk which is partially offset by cash and cash equivalents held at variable rates. At December 31, 2025 and 2024, the Company's borrowings which were calculated at floating rate were in NTD and USD.
- (ii). If the borrowing interest rate had increased/decreased by 1% with all other variables held constant, profit after tax for the years ended December 31, 2025 and 2024 would have increased/decreased by \$19,246 and \$17,498, respectively. Changes in interest expense mainly results from floating-rate borrowings.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Company arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the notes and accounts receivable (including related parties) based on the agreed terms.
- ii. The Company manages their credit risk taking into consideration the entire Company's concern. According to the Company's credit policy, each local entity in the Company is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits. The utilisation of credit limits is regularly monitored.
- iii. The Company adopts following assumptions under IFRS 9 to assess whether there has been a significant increase in credit risk on that instrument since initial recognition:
If the contract payments were past due over 30 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition.
- iv. Based on past collection experience, the default occurs when the contract payments are past due over 90 days.
- v. The Company classifies customers' accounts receivable in accordance with customer types. The Company applies the modified approach using a provision matrix and the loss rate methodology to estimate the expected credit loss.
- vi. The Company wrote-off the financial assets, which cannot be reasonably expected to be recovered, after initiating recourse procedures. However, the Company will continue executing the recourse procedures to secure their rights.

- vii. The Company used the forecastability to adjust historical and timely information to assess the default possibility of notes and accounts receivable (including related parties). The provision matrix is as follows:

		Up to 30 days	31~90 days	90 days	
December 31, 2025	Not past due	past due	past due	past due	Total
Expected loss rate	0.30%	0.60%	0.90%	100%	
Accounts receivable (including related parties)	\$ 828,415	\$ 68,294	\$ 13,720	\$ -	\$ 910,429
Total book value	\$ 828,415	\$ 68,294	\$ 13,720	\$ -	\$ 910,429
Loss allowance	(\$ 1,168)	(\$ 196)	(\$ 40)	\$ -	(\$ 1,404)

Accounts receivable (including related parties)	919,414	78,593	1,158	1,782	1,000,947
Total book value	\$ 919,419	\$ 78,593	\$ 1,158	\$ 1,782	\$ 1,000,952
Loss allowance	(\$ 1,661)	(\$ 231)	(\$ 3)	(\$ 1,782)	(\$ 3,677)

Individual Assessment:None

The above ageing analysis was based on past due date.

- viii. Movements in relation to the Company applying the modified approach to provide loss allowance for accounts receivable are as follows:

	Year ended December 31	
	2025	2024
At January 1	\$ 3,677	\$ 3,272
Impairment (gain) loss	24,229	405
Write-off during the year	(1,783)	-
At December 31	\$ 26,123	\$ 3,677

(c) Liquidity risk

- i. Cash flow forecasting is performed in the operating entities of the Company and aggregated by Company treasury. Company treasury monitors rolling forecasts of the Company's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times.

ii. The Company has the following undrawn borrowing facilities:

	December 31, 2025	December 31, 2024
Floating rate:		
Expiring within one year	\$ 1,751,980	\$ 1,242,085
Expiring beyond one year	50,000	440,000
	<u>\$ 1,801,980</u>	<u>\$ 1,682,085</u>

iii. The Company's derivative financial liabilities were analysed based on the fair value at balance sheet date. Additionally, except for the following, the Company's non-derivative financial assets are analyzed based on the remaining period at the balance sheet date to the contractual maturity date, they are due for repayment within one year, and amounts were in line with those amounts listed in the balance sheet. The amounts disclosed in the table are the contractual undiscounted cash flows:

	December 31, 2025		
	Less than		
Non-derivative financial liabilities	1 year	Over 1 year	Total
Lease liabilities (including current portion)	\$ 12,242	\$ 5,420	\$ 17,662
Long-term borrowings (including current portion)	163,854	1,887,653	2,051,507
Bonds payable	-	299,700	299,700

	December 31, 2024		
	Less than		
Non-derivative financial liabilities	1 year	Over 1 year	Total
Lease liabilities (including current portion)	\$ 13,738	\$ 15,136	\$ 28,874
Long-term borrowings (including current portion)	126,112	1,147,420	1,273,532
Bonds payable	-	299,700	299,700

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Company's investment in unlisted stocks is included in Level 3.

B. Financial instruments not measured at fair value

The carrying amounts of the Company's financial instruments not measured at fair value, including cash and cash equivalents, financial assets at amortised cost(current and non-current), notes receivable, accounts receivable (including related parties), other receivables(including related parties), other current assets-guarantee deposits paid, other non-current assets-guarantee deposits paid, short-term borrowings, accounts payable (including related parties), other payables (including related parties), bonds payable, lease liabilities (current and non-current), and long-term borrowings (including current portion), approximate to their fair values.

D. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities at December 31, 2025 and 2024 are as follows:

(a) The related information of natures of the assets and liabilities is as follows:

<u>December 31, 2025</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets				
<u>Recurring fair value measurements</u>				
Financial assets at fair value through other comprehensive income

Financial liabilities at fair value through profit or loss				
- Convertible bonds-redemption/repurchase	\$ -	\$ 5,998	\$ -	\$ 5,998
<u>December 31, 2024</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets				
<u>Recurring fair value measurements</u>				
Financial assets at fair value through other comprehensive income				
- Equity securities	\$ -	\$ -	\$ 23,983	\$ 23,983
Liabilities				
<u>Recurring fair value measurements</u>				
Financial liabilities at fair value through profit or loss				
- Convertible bonds-redemption/repurchase	\$ -	\$ 3,720	\$ -	\$ 3,720

- (b) The methods and assumptions the Company used to measure fair value are as follows:
- i. When assessing non-standard and low-complexity financial instruments, for example, debt instruments without active market, interest rate swap contracts, foreign exchange swap contracts and options, the Company adopts valuation technique that is widely used by market participants. The inputs used in these financial instruments valuation usually are observable information in the market.
 - ii. For high-complexity financial instruments, the fair value is measured by using self-developed valuation model based on the valuation method and technique widely used within the same industry. The valuation model is normally applied to derivative financial instruments, debt instruments with embedded derivatives or securitised instruments. Certain inputs used in the valuation model are not observable at market, and the Company must make reasonable estimates based on its assumptions.
 - iii. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Company's financial and non-financial instruments. As a result, the estimate generated by valuation model will be slightly adjusted based on additional inputs, such as model risk or liquidity risk. According to the Company's valuation model management policies and other related controlling procedures, management believes that the adjustment made is adequate and necessary and that the parent company only balance sheet presents fairly, in all material aspects, the fair value of financial instruments and non-financial instruments. The pricing information and input are prudently evaluated in the valuation process and shall be timely adjusted based on market condition.
- D. For the years ended December 31, 2025 and 2024, there was no transfer between Level 1 and Level 2.
- E. The following chart is the movement of Level 3 for the years ended December 31, 2025 and 2024:

	Year ended December 31,	
	2025	2024
	Non-derivative equity instrument	Non-derivative equity instrument
At January 1	\$ 23,983	\$ 21,639
Recognised in other comprehensive loss	(2,512)	2,344
At December 31	<u>\$ 21,471</u>	<u>\$ 23,983</u>

F. Financial segment is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently updating inputs and making any other necessary adjustments to the fair value.

G. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

<u>December 31, 2025</u>	<u>Fair value</u>	<u>Valuation technique</u>	<u>Significant unobservable input</u>	<u>Range (weighted average)</u>	<u>Relationship of inputs to fair value</u>
Unlisted public shares	\$ 21,471	Market comparable companies	Discount for lack of marketability	30%	The higher the discount for lack of marketability, the lower the fair value
Unlisted public shares	-	Net asset value	Not applicable	-	Not applicable
<u>December 31, 2024</u>	<u>Fair value</u>	<u>Valuation technique</u>	<u>Significant unobservable input</u>	<u>Range (weighted average)</u>	<u>Relationship of inputs to fair value</u>
Unlisted public shares	\$ 23,983	Market comparable companies	Discount for lack of marketability	30%	The higher the discount for lack of marketability, the lower the fair value
Unlisted public shares	-	Net asset value	Not applicable	-	Not applicable

H. The Company has carefully assessed the valuation models and assumptions used to measure fair value. However, use of different valuation models or assumptions may result in different measurement. If discount for lack of marketability of financial assets categorized within Level 3 had increased or decreased by 1%, other comprehensive income would not have been significantly impacted as of December 31, 2025 and 2024.
