MANAGEMENT REPORT 2009

THE HISTORY OF CA IMMO

Ever since 1987, the Vienna-based property investment company CA Immo has been steadily building its business and its portfolio. Since 1999 CA Immo has been investing in Eastern Europe, branching into project development in Eastern Europe two years later. To clarify the division of regional business within the company, CA Immo underwent restructuring in 2006, establishing the subsidiary CA Immo International to manage its Eastern European property portfolio. As the company expanded in that region, it continued to build up property assets in Austria and Germany.

Shortly after the balance sheet date for 2007, the CA Immo Group acquired Vivico, the German railway property management group, for € 1.03 bn. The expansion enabled the Group to grow not only in terms of total assets and surface area, but also in terms of the quality of its business operations. The integration of Vivico provided the CA Immo Group with valuable property reserves and competences in the field of urban and project development and has since covered the entire value chain: from the development of high-return projects from wasteland to finished urban districts and their disposal or incorporation into the Group's own asset portfolio.

Like 2008, 2009 was again a year of integration and consolidation: instead of backing short-term market trends, the Group pressed ahead with organic asset growth in the defined core regions (Austria, Germany, Czech Republic, Hungary and Poland) for the purposes of a selective expansion strategy, as well as integrating the German subsidiary, Vivico, into the Group within the framework of a functional merger. In autumn 2009, CA Immo took advantage of the burgeoning optimism on the capital markets and placed the second corporate bond in the company's history; this was followed in November by the successful issue of a reverse convertible bond.

The CA Immo Group is positioned as an office portfolio-holder active in Central Europe with major development competence. In order to continue to build up assets in the high quality office property segment, the company will complete and continue current development projects in 2010, invest selectively in high quality, rented office property and push ahead with value creation, particularly deriving from development projects in Germany.

Since April 2007, CA Immo shares have been traded in the Prime Segment of the Vienna Stock Exchange (before that date in the Standard Market Auction) and some 90 % are in free float.

THE HISTORY OF CA IMMO

- Issuance of second public corporate bond
- Founding member of the "Austrian Sustainable Real Estate Council" (German short: ÖGNI)
- Issuance of a reverse convertible bond

2009

2008

- Acquisition of Vivico Group in Germany

- Entry to Serbian market
- Formation of CA Immo New Europe special fund (CAINE)

2007

- Acquisition of real estate package from the German state of Hesse
- Issuance of first public corporate bond

2006

- Acquisition of 78 properties in Austria from the former Brau Union property portfolio

2005

- Entry to Russian market
- CA Immo Int. floats on Vienna Stock Exchange

- Acquisition of office properties in Poland (Warsaw)

1999

1988

- Flotation on Vienna Stock Exchange

- Founding of CA Immobilien Anlagen AG

1987

HOLDINGS AND FUNDS

As long ago as 2006, work began on the strategic restructuring of the CA Immo Group into a real estate group with a broader base in terms of region and content. The first step was the flotation of CA Immo International; this was followed by the acquisition of a holding in the Viennese property development company, UBM Realitätenentwicklung AG, the set-up of the Special Fund for project development activities in Eastern Europe and finally the regional diversification with the purchase of Vivico Real Estate GmbH in Germany. The aim of this realignment was to achieve a broader spread of risk – both regionally and by incorporating institutional outside investors, to utilise potential earnings in project development business and ultimately also to offer a greater variety of investment opportunities to the widest possible range of investor groups.

Vivico Real Estate GmbH

Since 2008, the German urban district development company, Vivico Real Estate GmbH, has been the operational platform for all of the Group's business in Germany (project development and asset management). Vivico – formerly a collecting society for railway properties, owned by the German government – has at its disposal comprehensive competences in the development of inner-city properties formerly used for industrial or railway purposes. These development areas are currently at various project stages and will be rapidly developed to construction readiness over the coming years. This form of district development, from wasteland sites without a development plan to the finished urban district, involves high added value potential and is thus the ideal supplement to the stable basic business of stock property management. Vivico is fully consolidated in the CA Immo consolidated financial statements.

Vivico's property assets consist of high-quality income-producing properties (balance-sheet value as at 31.12. 2009: € 103.7 m), undeveloped plots or property under construction (balance-sheet value as at 31.12.2009: € 860.2 m) and a portfolio of additional properties intended for sale. The highest-quality property reserves are now being developed step by step, in line with current framework conditions, and, on completion, are either sold (as for example the ATMOS office block in Munich in 2009) or incorporated into the company's own asset portfolio or sold to property developers as construction-ready real estate. You will find more information about the Germany portfolio in the segment report on page 25.

ARNULFPARK®, ATMOS
Munich

All the tasks that are decisive for added value are covered by in-house staff at Vivico. These include drawing up district designs and procuring building approval and range right up to opening up areas as well as preparing them for sale. With offices in Frankfurt am Main, Berlin, Munich and Cologne, Vivico's organisation meets the requirements for a local presence combined with overall control and support. Every entity acts as a profit centre and carries out its projects largely independently. Building management, including project control, tenders, placing contracts, supervision of construction and general planning, is delivered by the Vivico subsidiary, omni-Con, acquired in July 2008, which also provides these services for third parties. In 2007, together with the Feuring Group, Vivico also set up the joint venture company, Viador, specialising in concept development for hotel businesses – another component of urban project activities. Its range of services includes site investigations, hotel market analyses and feasibility studies, as well as the economic planning based on these. External service-providers are commissioned specifically for activities ranging beyond these, so as to adapt the cost structure flexibly to the different workloads.

As part of a functional merger, the process of operational integration of Vivico into the CA Immo Group has now also been commenced as from the second half of 2009. The main focus of attention here is the identification and realisation of synergies at both the CA Immo level as property investor and the Vivico level as project developer, in order to increase efficient use of functionalities across the group and to reduce costs resulting from dual structures. You will find more details about the functional merger in the Chapter headed "Personnel" on page 49.

CA Immo International

The Eastern Europe portfolio of the CA Immo Group is pooled in the CA Immo International subsidiary, which is also listed on the Stock Exchange. The share capital of CA Immo International amounted to € 315.96 m as at the end of the year and was divided over 43,460,785 bearer shares that are traded in the Prime Market of the Vienna Stock Exchange.

As at the balance-sheet date, market capitalisation was € 227.3 m. CA Immo has a 62.77 % (as at end of last year) direct or indirect holding in the company, which is fully consolidated in the consolidated financial statements of CA Immo.

As at the balance-sheet date, the CA Immo International portfolio recorded a book value of about € 674.0 m. The company invests in nine countries – Poland, Czech Republic, Slovakia, Hungary, Romania, Bulgaria, Slovenia, Serbia and Russia. In terms of asset classes, the portfolio focuses on office space. The segment report on page 29 contains more information relating to the CA Immo International portfolio.

CA Immo New Europe Property Fund

CA Immo International has been concentrating its development projects in this project development fund since the start of 2007. The fund is set up under Luxembourg law in the form of a SICAR (Société d'Investissement

en Capital à Risque) and the fund investment strategy is geared to property development projects in the regions of Eastern and South East Europe. 60 % of the shares in the fund are held by CA Immo International, the remaining 40 % being owned by four institutional investors in Austria and abroad. The planned term of the fund, which is managed by one of CA Immo International's subsidiaries, is a total of seven years (with options for extension). The commitment period, within which new projects can be entered into, came to an end on 31.12.2009.

The total volume originally planned for the fund was € 1 bn, of which € 400.0 m was to be made available as equity capital. However, as a result of the changes in market conditions, investment activities were substantially reduced in comparison with the original plans and decisions were taken in agreement with the partner companies that only those development projects already in the process of implementation would be continued, so that only about one-third of the maximum amount had actually been called up as at 31.12.2009. Since the property development field was particularly badly affected by the turbulence on the property markets of Eastern and South East Europe, the original assumptions for numerous projects again had to be revised in 2009 with significant levels of value adjustments and balance-sheet provisions having to be made on the basis of these revisions. As at

ORGANISATIONAL STRUCTURE OF THE CA IMMO GROUP

POLECZKI BUSINESS PARK
Warsaw/Poland

the balance-sheet date the portfolio of the fund recorded a book value of about € 111.7 m. Currently there are three projects under development; two projects were recently completed (Dunacenter, Sava City). You will find more details about this in the segment report on page 29.

UBM holding

CA Immo International holds 25 % plus four shares (blocking minority) in Viennese property developer UBM Realitätenentwicklung AG, which is listed on the stock exchange. With its acknowledged development expertise in the CEE area, UBM is an ideal supplement to CA Immo International and hence to the CA Immo Group. The joint “Poleczki Business Park” project in Warsaw is progressing apace. In October 2009, the topping-out ceremony for the first phase of construction was celebrated, and completion

of the building complex on the site, with its total area of 14 hectares, is planned for 2015. UBM is also involved in the “Airport City St. Petersburg” project in St. Petersburg, where it is contributing both capital and, in particular, its know-how as a project developer.

In 2009, CA Immo International received a dividend of € 825.0 k for its holdings in UBM in 2008, corresponding to a return of 3 % on the capital invested. The UBM Group recorded turnover of € 205.9 m as at 30.9.2009, a drop of € 28.9 m on the previous year. The result for the first nine months of 2009 was € 7.1 m (2008: € 14.0 m). For 2010, UBM anticipates a further reduction in turnover and result. The majority shareholder in UBM – apart from CA Immo International – is the Porr Group with a holding of approximately 41 %.

ECONOMIC ENVIRONMENT

THE CYCLICAL TREND¹⁾

The general economic development has a major impact on the real estate sector. Economic growth is proving to be a determining factor in the demand for commercial real estate in particular. At a time of great uncertainty over the way in which the economy will develop, companies are postponing decisions with far-reaching consequences – decisions on investments as well as long-term leases. Moreover, a fall in employee numbers means that companies are requiring smaller premises. A recession – and especially one that persists – thereby forces up vacancy rates and suppresses rent levels. Given the inter-linked nature of these factors, the general economic conditions in 2009 posed serious problems for the real estate sector.

The year 2009 will be remembered as the year of the deepest recession since the Second World War. The contraction in economic output that began in the third quarter of 2008 intensified early in 2009, leading to strongly negative economic growth for the first half of the year. The downward trend came to an end in quarter three as the economic picture finally started to brighten; in the third and fourth quarters of 2009, both the USA and the Eurozone economies reported positive GDP growth rates.

Despite the upturn as the year ended, however, the GDP trend in the Eurozone for 2009 as a whole was clearly in negative territory at -4.2% (source: Eurostat, November 2009). Austria performed only slightly better with an expected decline of 3.6% for 2009 (source: Austrian National Bank, January 2010). The recovery in the closing quarters was driven by substantial but temporary government economic stimulus programmes. The withdrawal of these initiatives could once again decelerate the pace of economic development.

So far, the economic upturn has not been reflected on the labour market. As of autumn 2009, the unemployment rate in the Eurozone was around 9.8% , approximately two percentage points above the previous year's value (source: Austrian National Bank, December 2009).

AUSTRIA

A sharp fall in exports was the main effect of the global financial crisis on the Austrian economy; this in turn led to a collapse in investment. With negative growth rates reported in the second half of 2008 and first half of 2009 and moderate growth recorded from the third quarter of 2009 onwards, the pattern of the economic crisis in Austria largely mirrored that of the wider Eurozone. Nonetheless, the anticipated 3.6% decline in GDP for 2009 and renewed expansion of 1.5% for 2010 are figures well above those predicted for the Eurozone as a whole.

¹⁾ Comments are based on current data at the time of writing in February 2010; subsequent changes to preliminary figures and forecasts cannot be taken into account.

REAL-TERMS GDP GROWTH

2008 2009E 2010E

Sources: Eurostat, Deutsche Bundesbank, WIFO

With unemployment rising from 4.2 % at the end of 2008 to 4.7 % by autumn 2009, Austria had one of the lowest increases of any Eurozone country during the present crisis; the country's unemployment rate is the second lowest in the Eurozone (after the Netherlands).

GERMANY

Germany, the most important region for the CA Immo Group, was severely impacted in 2009 by the slump in global trade and the ensuing fall in international demand for German manufactured goods. For 2009 overall, real-terms GDP is likely to drop by around 5.0 % (source: Deutsche Bundesbank, January 2010); however, this decrease is not as great as had been expected halfway through the year (–6.0 % was forecast in June 2009). The improved outlook for the German economy in the second half of 2009 was mainly prompted by the massive monetary and fiscal stimulus packages.

Unemployment rose substantially, from 7.8 % at the end of 2008 to 8.2 % at the end of 2009; with the rate predicted to increase further to 9.1 % in 2010, no short-term recovery is likely on the labour market.

CEE AND SEE

By the first part of 2009, the Central, Eastern and South-eastern Europe region was feeling the tangible effects not

only of the economic crisis, but also of a collapse in trust – particularly from Anglo-American investors. Several observers offered a bleak assessment of the region, and in particular of the survival chances of its financial sector. By the third quarter of 2009, however, the region was also showing clear signs of stabilisation despite the many ominous predictions. The contraction in economic output across the region eased significantly in quarter three 2009 compared to previous quarters, although the overall economic situation remained somewhat subdued. Signs of recovery are evident, but it is still too early to predict an imminent upturn.

Results varied significantly from one country to another. Poland can be singled out as the only country to achieve positive economic growth (of +1.2 %) in 2009. By contrast, the Baltic states were severely impacted by the economic crisis, returning negative growth rates ranging from –13.7 % (Estonia) to –18.1 % (Lithuania) (source: Austrian National Bank, December 2009). Russia was another of those countries most seriously affected by the crisis, with GDP for 2009 likely to fall by –8.6 %. However, the latest indicators point to a stabilisation in Russia as well, with modest expansion of 2.7 % forecast for 2010.

An interesting indicator for how the economic crisis evolved over time in eastern Europe is the development of spreads charged for insuring against the risk of a default on government bonds (credit default swap spreads). As can be seen in the graph below, the uncertainty associated with the region reached its climax around March

Country Spreads (in bps)

2009 and slowly decreased thereafter. The country risk, as it is expressed in the CDS spreads, however, is still considerably above the levels seen prior to the recent crisis.

A similar picture presents itself when looking at the exchange rate development. The devaluation of local currencies against the Euro continued until quarter one 2009. From the second quarter onwards, however, there was a visible recovery of the exchange rates.

MONEY MARKET AND INTEREST RATE ENVIRONMENT

The European Central Bank responded to the continuing deterioration in economic news by cutting its base rate (the interest rate for main refinancing operations) in several stages between January and May, from 2.5 % to the current level of 1.0 %. Liquidity was also channelled to the market to an unprecedented degree. As the year progressed, this played a major part in stabilising money market rates, which were rooted at record low levels as the year ended.

As a particularly capital-intensive sector, the real estate area is heavily dependent on a functioning credit market. The restriction in the credit supply and the rise in credit costs prompted by the Lehman insolvency of autumn 2008 were still exerting a strong effect in the first six months of 2009 especially. As the general economic conditions have gradually eased as outlined before, the

liquidity situation of the banks has also been alleviated, thus improving access to the credit market for real estate companies once again.

OUTLOOK

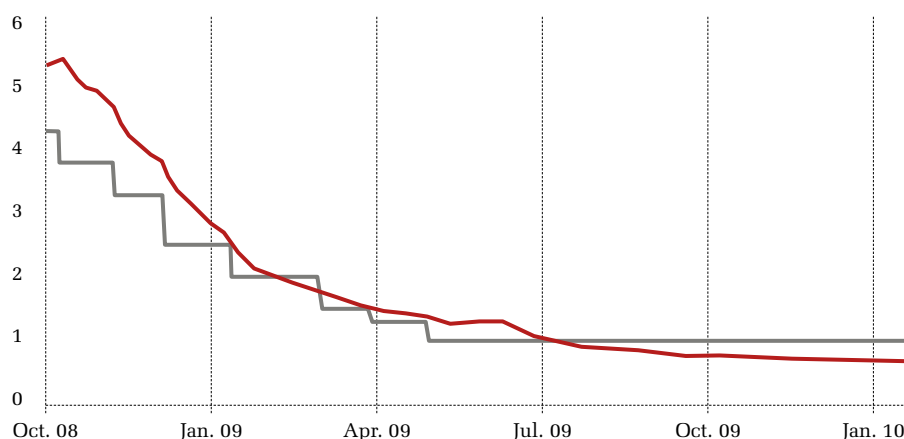

For the time being, 2010 can be viewed with cautious optimism. The worst of the crisis which had such an impact on 2009 is over, and growth is expected to return to positive territory. However, despite the evident signs of stabilisation in the economic environment, the medium-term future is fraught with risk. To a not inconsiderable degree, the current upturn has been based on government stimulus packages, and it is not possible to predict how the economy will react when these initiatives are terminated. Government debt, which is increasing as a consequence of the stimulus packages, will have to be addressed in the medium term. One related issue – and a key question of rising significance as far as the real estate sector is concerned – is the future development of interest rates and inflation. With the forecasts showing a wide variety of possible outcomes, it cannot be assumed that the current environment of record low interest levels and effectively non-existent inflation can be sustained over the long term.

PROPERTY MARKET AUSTRIA

The property market in Austria

Uncertainty over the long-term impact on the property sector of developments in the global economy affected the Austrian transaction market particularly severely in 2009. Even in a year of economic weakness, however, Vienna largely upheld its reputation as a traditionally stable market, with slight falls in rent levels, acceptable levels of vacancy and encouraging lettings performance.

The investment market: institutional investors return in second half ¹⁾

Security was the main consideration defining the Austrian property market in 2009. The effect of this on the investment market during the first half of the year was that private investors tended to invest in residential property, whereas institutional investors remained largely absent (not least because of the limited availability of credit). In 2009, some € 1.3 bn was invested in commercial real estate in Austria, a fall of nearly 40 % on the comparable figure for 2008. Almost all investors were based in Austria; interest from German institutional investors only

picked up in the third quarter. At the end of the year, top yields for office properties in prime locations stood at 5.7 %; by the end of 2010, they are expected to fall back to 5.5 %, the level of 2008. Peak yields for shopping centres stood at 6.25 %.

The office market: resizing rather than expansion ²⁾

The trend that took root in 2008 – exchanging expensive locations for lower priced office premises with smaller dimensions and the best possible transport connections – continued throughout 2009. Peak rents in central business districts were € 21/sqm, compared to € 23/sqm in 2008. Rents of € 13-15/sqm were commanded in good areas, with average locations attracting around € 7-12/sqm. It became much more difficult to let office properties in underdeveloped locations and those with outdated fixtures and fittings in particular. The attractiveness, quality and energy efficiency of a building are thus becoming increasingly important factors in the rent levels it can attain as well as its basic usability.

¹⁾ CBRE: Vienna Office Market Report 2009, EHL: Vienna Office Market Report 2009

²⁾ EHL: Vienna Office Market Report 2009

WOLFGANGASSE 58–60
Vienna

As a result of continuing reluctance on the investment market coupled with the restrictions on credit, falling demand was matched by a diminishing supply of new premises. In 2009, newly constructed premises with an approximate floor space of 195,000 sqm were added to the total stock of around 10.5 m sqm; new constructions in 2008 accounted for 220,000 sqm. The simultaneous decline in lettings performance (270,000 sqm compared to 300,000 sqm in the previous year) had a stabilising effect on the vacancy rate of 5.8 %.

The residential market³⁾

Demand remains strong for high quality residential properties in attractive locations. In areas of high population density in particular, the existing property stock, even taking new construction and converted offices into the equation, is not enough to cover the requirement. However, the needs of property seekers have changed: the market is currently calling for apartments with one or two bedrooms, and space efficiency and rental prices are becoming more important considerations. As a consequence, small flats and “bachelor pads” are experiencing a comeback. By contrast, it is becoming more difficult to let luxury apartments: these are often rented on behalf of senior executives by companies or international organisations whose budgets have been restricted owing to the rising pressure of costs. Further price rises are expected in 2010 for centrally located rented flats and condominiums in particular as well as townhouses and apartment houses.

The retail market⁴⁾

The higher end of the Austrian retail market in particular was relatively unscathed by the economic developments of 2009, and the market position could be described as stable. Established shopping malls, specialist retail centres and shopping avenues in prime locations continued to report stable rent levels and low vacancy. This is a segment in which moderate expansion plans have actually been made. On the other hand, retail properties in B-class locations are feeling the strain of the economic pressure. With consumers becoming more price-aware, chain stores are making an effort to appraise, compare and optimise the position, customer frequency, costs and turnover of their sites. This is leading to falling rents and rising vacancy, albeit at a moderate level by international comparison.

MARIAHILFER STRASSE 17
Vienna

The hotel market⁵⁾

The Viennese hotel market maintained generally stable performance in 2009, even if the economic crisis did not completely bypass the tourism sector in Austrian cities. Vienna represents a comparably secure market for investors thanks largely to its international conference business. Investors are particularly attracted to sites along principal access routes and close to transport hubs such as the Westbahnhof and Südbahnhof railway stations, the latter of which is due to be extended, modernised and linked to the European high-speed rail network by 2015. Expansion of Vienna's Schwechat Airport will also augment the city's reputation as a place of quality hotels.

A trend towards mid-range and budget hotels offering a good price/performance ratio emerged in late 2008 and continued into 2009. This pattern is also reflected in current delays in the realisation of plans for luxury hotels. Yields for hotels in Vienna are between 4 % and 8 % depending on location, with average room rates at € 95; Vienna is thus in the lower price category for Europe as a whole.

⁴⁾ CBRE: Retail Market Austria Austria 2009

⁵⁾ Metzger Realitäten Group

PROPERTY MARKET GERMANY

Thanks to the German federal government's economic recovery plan, the effects of the economic crisis were even less noticeable for the German economy in 2009 than had been predicted at the end of 2008. Experts recorded a slight easing of the market in the property sector at the end of the year. The year-end results of the King Sturge Real Estate Economy Index¹⁾ are cautious but far more optimistic than in the previous year. Overall, despite the volatile economic climate, the German property market proved to be largely resistant to the crisis. Within the property cycle, the real estate economy in 2009 is at a similar level to that of 2003.

Investment market²⁾

In the crisis year, 2009, the German investment market for commercial property recorded the lowest volume of transactions for ten years at about €10.5 billion. This meant that the transaction volume halved in comparison with the previous year, which was itself a poor one. The limited access to loan capital meant that credit granted in 2009 was perceptibly more restrictive and also more expensive than in previous years. Opportunistic investors were on the lookout for low-cost investments but no corresponding range of property came on to the market because of the low price levels. Investor interest was focused principally on core properties with long-term leases. It was primarily conservative purchasing groups, with equity capital strength and long-term orientation, such as institutional investors (closed-end funds and special funds) or private equity (e.g. family offices) that were active on the market.

High-quality office property focus for investors³⁾

Activities on the German investment market concentrated primarily on the five locations in which CA Immo is also focusing its operations via its subsidiary Vivico: Berlin, Düsseldorf, Frankfurt, Cologne and Munich. These locations generated approximately 45 % (some € 4.7 billion) of total turnover. Since the start of the economic crisis, investors have once more been turning their attention to traditional office strongholds, whereas in the boom years of 2006/2007 investments were also made in Class B locations and peripheral situations. The majority (88 %) of individual investments made were of the order of € 20 to 50 million. Office properties continued to be at the centre of investor interest with a market share of 35 %. Retail properties (approx. 31 %) and other properties (including

mixed-use, hotels, etc.) (27 %) were still in demand. Logistics properties disposed of accounted for a 7 % share.

Returns showed a sharp increase at the start of the year, stagnated as the year progressed and evened out at a stable level towards the middle of the year. This increase in returns led to a mirror image of decreasing property values, with high-grade properties in good locations being less affected, properties in Class B locations suffering more. For core properties, returns will reduce again in the medium term since it is here that investor demand will concentrate in the future with corresponding products being available only in limited numbers. For exclusively office properties the average values were 5.43 %. Peak yields in the office segment were achieved in Munich at 5.1 %, followed by Frankfurt at 5.2 %, Berlin and Düsseldorf at 5.4 % and Cologne at 5.5 %. Peak trading was in shopping and DIY centres with 5.75 % and 6.50 % returns respectively; logistics and warehouse properties saw returns of about 7.45 %.

Since investors were looking increasingly for solid products with stable returns in the crisis year, apartments were in greater demand than office property in 2009. The volume of transactions in this segment was € 3.6 billion by the end of the year.

Offices: rental prices and area turnover falling, little area under construction⁴⁾

Because the recession has a delayed effect on the commercial property market, the crisis had not entirely arrived on the rental market by the end of 2009 and the feared decrease in office positions had not as yet taken place. The decrease in rental prices and increase in vacancy rate were not as drastic as had been predicted at the start of the year. Nonetheless, the demand for office space decreased noticeably in 2009 as companies delayed or cancelled moves or reduced their space requirements. This affected the turnover of space in the five top locations, where the total turnover for 2009 was 1.7 million sqm, 27 % less than in 2008. Area turnover in Düsseldorf (–43 %) and Munich (–32 %) reduced to a greater than average extent. The cautious demand for space led to vacancy rates rising by the end of the year to a total of 6.9 million sqm office space. At the same time, the volume of new space under construction decreased to a major extent and reached 1.26 million sqm in the five traditional strongholds of German property, 630,000 sqm of which has not yet been leased. The proportion of area built on a speculative basis and due for completion in

Note: All floor space data given as rentable area according to gif, conversion factor: gross floor area x 0.85.

2010 or from 2011 onwards is highest in Munich and Cologne at 77 % and 66 % respectively. At the other three locations, some two-thirds of space has already been leased in advance. However, only a few projects were commenced last year so that the excess supply will fall again by 2011 at the latest.

High demand for high-quality office space

There is a strong trend towards demand for space that is smaller but of better quality. The main focus of rental activities in 2009 was on active and early renegotiation of rental agreements that were coming to an end. Rental prices had dropped at all the top locations by the end of the year. Munich, with a new top rent of € 34/sqm,

recorded a drop of 3 %. In Berlin, the peak rent fell by more than 8 % to € 20/sqm. However, the two Rhine metropolises, Düsseldorf and Cologne, proved to be very stable with decreases in rental prices of 3.4 % and 0.5 % respectively. In Frankfurt am Main, which is still the most expensive office location in Germany, the peak rent dropped from € 38 to 35/sqm (–8 %). But Frankfurt is simultaneously the only metropolis in which the average rent increased – by 14 % to € 20/sqm. The reason for this is the continuing high demand for high-quality space by users who have become more aware of price and are thus switching to space in the upper middle segment. This benefits disposal of the Europaviertel urban district developed by CA Immo subsidiary Vivico, and other projects as well.

Since the economic crisis will still affect events in the current year, isolated reductions in rental prices must be expected in 2010 as well. But the sharpest decreases will probably already have taken place in 2009.

Retail¹⁾

Even in this year of crisis, retail trade prospered in the 1A situations of the top locations of Munich, Frankfurt, Düsseldorf, Berlin and Cologne. Demand in central, well-frequented locations continued at a constant level. Rental prices in the top locations increased by about 4 % in 2009. In contrast, peripheral and small-town locations lost about 3 % of their value. The overall average value for new rentals at the end of the year was € 80/sqm. Munich continues to be the most expensive location with a peak rent of € 300/sqm, followed by Frankfurt and Düsseldorf (€ 250/sqm) and Berlin and Cologne (€ 220/sqm). Basic retail provision close to home remains the central component of the German retail industry and is of particular importance in the context of large-area district developments. Within the framework of its development projects, the CA Immo Group focuses on this segment and, by making retail provision available, is creating a fundamental component of functional, attractive urban districts.

Hotel sector²⁾

The German hotel sector suffered under the economic crisis along with every other sector in 2009. Even at the start of the year, the number of overnight stays decreased so that German hoteliers were obliged to accept losses in the first three quarters. The revenue per room (RevPar) dropped by 12 % because of reduced occupancy and prices, reaching an average value of € 47. The average price per room reached a value of € 79. In the principal

KÖNIGLICHE DIREKTION
Berlin

destinations for German urban tourism, room occupancy reduced only to a moderate extent: Berlin (–2.4 %), Frankfurt (–5.8 %), Cologne (–7.0 %) and Munich (–6.1 %). New hotel projects were cancelled or postponed in view of the insecure market situation and also because of the existing surplus of new hotels. Top hotels in the major cities and at airports, in particular, found themselves facing problems. Well-designed, low-budget hotels, on the other hand, will also be well placed to withstand a second year of crisis with stable occupancy and prices.

Residential³⁾

The requirement for residential space in Germany will continue to increase over the next few years, particularly in the economically strong regions, as a result of the increasing “singularisation” of households (i.e. one- and two-person households). Falling building approval levels and consequently a drop in numbers of completions mean that supply no longer meets the still increasing demand. High price increases have thus been seen in comparison with the previous year, particularly in the south and in a few cities in northern Germany. Because the demand for residential space is once more increasingly shifting inwards to the centres of the major cities, while the supply there is restricted, prices in these areas rose sharply in 2009. The most expensive locations among the large German cities continue to be Munich, with rents of € 13/sqm for newly built, high-quality apartments, and, more recently, Düsseldorf, followed by Frankfurt (€ 10.50/sqm). Only in Berlin are rents for new-build space at a level of € 7.80/sqm.

PROPERTY MARKET EASTERN EUROPE

The economic and financial crisis has had a severe impact on real economies across Eastern Europe; Hungary, some South Eastern European nations, the Baltic States and Russia have been particularly hard hit. Financing for property transactions remains very hard to come by in the region, and is only provided with high risk surcharges. This led to disintegrating investment markets, rising yields and falling property prices in 2008 and 2009.

The investment market¹⁾

In 2009, the transaction volume on the investment market for commercial real estate in the CEE region was around € 2.5 bn, of which roughly € 2 bn was generated in the second half of the year. Although total turnover was down by 75 % on the previous year, the rise in investment activity towards the end of 2009 reflected the growing confidence of investors and the resurgence of trust in the markets. Investors focused their interest on well appointed core properties in prime locations with long contract terms. Few contracts were concluded in 2009; high quality office properties accounted for some 44 % of the total transaction volume, compared to 38 % in 2008. Retail properties accounted for a market volume of 31 %, with industrial properties making up 12 % and hotels 8 % of market turnover.

Yields stabilised in the second half of 2009

For 2009 as a whole, yields again increased sharply throughout the region, which in turn forced down the value of properties. The trend was particularly acute in the first six months; the rise in returns only levelled out when the investment market staged a modest recovery near the end of the year.

The increase in yield was particularly pronounced in the aforementioned countries with severe problems affecting their real economies; returns rose by up to 300 base points in the main Russian cities of Moscow and St. Petersburg. As in the previous year, values dropped most markedly in Bucharest, Sofia and Budapest; by contrast, property values in Warsaw and Prague held up relatively well.

Experts believe yields may have bottomed out, particularly in the high quality segment and established markets such as Poland and the Czech Republic. At the same time, returns for class A and B locations are diverging at an ever faster rate due to averseness to risk on the part of investors. Property locations with short histories

and limited stocks (such as the smaller markets of South Eastern Europe and the Baltic States) continue to face the prospect of waning interest from potential investors and thus higher yields.

The office market²⁾

Office markets in Eastern Europe, which are especially susceptible to economic cycles, came under widespread pressure from the financial crisis and the associated fall in demand for office premises. Numerous projects initiated prior to the crisis were completed in recent months, which has led to a sharp rise in the average vacancy rate (to around 16 %) across the CEE, SEE and CIS; the collapse in the Russian market also contributed significantly to this development. The decline in demand for office space and the increase in vacancy rates were also linked to a drop in rent levels which varied considerably from one country to the next: peak rents in Moscow fell by 63 % last year, for example, with Warsaw reporting a drop of some 30 % by the end of quarter three; the figures for Prague and Budapest “only” fell by around 9 % and 4.5 % respectively.

Although office markets remained generally subdued, the beginnings of an upturn were noted towards the end of 2009 on established markets such as Poland and the Czech Republic. Given the high levels of supply and the greater sensitivity of investors as regards the quality of real estate, the market is much more receptive to prime properties in good sites than it is to B-class locations. Despite this, many companies neglected to relocate on account of internal cost pressure, leading to across-the-board falls in the numbers of new contracts in relation to lease contract extensions.

In the final quarter of 2009, prices for high quality properties in prime locations (central business districts) stood at approximately € 19-21/sqm in Prague and € 21-23/sqm in Warsaw. Relatively high rental rates were also reported in Bucharest (€ 19.50/sqm) and Budapest (€ 22/sqm), although this only applied to a handful of properties. Most contracts are concluded at € 13-15/sqm in Bucharest and at € 12-14/sqm in Budapest. Contracts in Moscow continue to have the highest value at around € 30-40/sqm.

The retail market

The retail sector also found itself under increasing pressure last year as sales fell. The majority of retailers, having significantly restricted or even halted their

Bratislava	15-17	12 %	7.50 %	6.25 %

expansion strategies, are now attempting to use lower rent levels to compensate for their losses. As with office premises, shopping centres in heavily frequented A-grade locations are outperforming those in B-class sites. Whilst rents have broadly stabilised in good locations, reductions of as much as 25 % have been reported in less frequented areas. Location and quality remain the critical factors in long-term property investments.

The CA Immo Group's activities in the retail sector are concentrated on secondary cities in Hungary (with one specialist retail centre in Győr) and Romania (where a similar centre is under construction in Sibiu). Local retail markets in both countries have been adversely affected by falling consumer spending. Peak rents in shopping centres in **Hungary** stand at around € 50–75/sqm per month, with regional cities attracting between € 12.5 and € 20/sqm per month. In the specialist retail centres (mainly developed in regional towns in Hungary since 2005), monthly rental rates are in the range of € 7–12/sqm.

The expansion of international chains in **Romania** has either decelerated significantly or stopped entirely. With several shopping centres completed simultaneously in 2009, vacancy rates rocketed to 40–60 %, especially on secondary markets (EHL CEE/SEE Real Estate market report 2009). With a vacancy rate below 10 % and peak rents for retail parks reaching around € 22–25/sqm, Bucharest has not been so seriously impacted. Specialist retail centres in secondary cities currently command approximate rents of € 8–11/sqm.

The hotels market¹⁾

The tourism industry in Europe experienced a tough year in 2009. The global economic crisis, rising unemployment and the spread of swine flu combined to curtail the travel plans of many. In particular, business travel contracted substantially due to drastic deterioration in the orders situation in most sectors. The crisis has also forced companies to pay greater attention to their costs, with the result that staff travel budgets have been cut, significantly in some cases. Early in 2009, spending by hotel guests in Europe was reported to have plummeted by as much as 31.3 %. Driven by declining occupancy figures and falling rates, revenue per available room (revPAR) fell by an average of 16.8 % in European hotels. According to the Hospitality Vision 2009 study by Deloitte, the figures for both visitors and overnight stays shrank in nearly every city in Europe. Countries in Eastern Europe – including the Czech Republic, the Baltic States, Romania, Russia and Slovakia – have suffered particularly heavy losses, with revPAR falling by over 20 % in local currency in some cases.

CA Immo International has two hotels in the Czech Republic, in Prague and Plzeň. In December, room occupancy in Prague increased by 2.6 % to stand at roughly 54.6 %, compared to 65.6 % in 2008. Although this signalled the first return to revenue growth for the city's hotel market since January 2008, the picture for the year as a whole remained dispiriting, with falling visitor numbers, an expanding surplus of new hotels and the continuing recession forcing down revenue by nearly 30 %. For 2009, revPAR was € 44 in Prague, € 37 in Budapest (where room occupancy stood at 53.5 %) and € 84 in Moscow (with occupancy of 57.8 %).

PROPERTY ASSETS

The CA Immo Group invests in commercial properties in the countries of Central Europe, with a clear emphasis on office properties.

The Group's regional activities in Austria are dealt with by the parent company CA Immo and those in Germany by the some 100 %-owned subsidiaries Vivico Real Estate GmbH and Vivico AG. The Eastern European portfolio of the Group is bundled in the CA Immo International subsidiary. The Group's core competence focuses on two business areas: portfolio management focusing on the management of investment properties for optimum returns, and investment properties under development.

In the consolidated balance sheet for 2009, the CA Immo Group posts property assets of some € 3.5 billion (2008: € 3.8 billion). € 2.4 billion of this (73 % of the total portfolio) is accounted for by investment properties¹⁾ and € 1.0 billion (27 % of the total portfolio) by investment properties under development.

The investment properties portfolio of the Group as at the key date of 31.12.2009 includes total effective rentable area of 1.38 m sqm, some 59 % of which is office space and 21 % storage space. In terms of balance-sheet value, 46 % of the investment properties are in Germany, 29 % in Austria and 25 % are investment properties of CA Immo International in the Eastern European states.

DISTRIBUTION OF BOOK VALUE CA IMMO GROUP BY TYPE

Of the investment properties under development with a total value of € 1.0 billion, about 3 % are developments and strategic site reserves owned by CA Immo in Austria, 90 % in Germany and the remaining 7 % are CA Immo International projects in the states of Central and Eastern Europe, South Eastern Europe and the CIS.

In 2009, the Group generated rental income amounting to € 177.0 m (2008: € 175.3 m). On the basis of annualised rental income, the investment portfolio yielded a return of 6.5 %²⁾. The average economic vacancy rate (measured against the annual target rental return) was 5.9 %²⁾ in 2009 (2008: 5.1 %), and the vacancy rate in sqm as at the key date was also 5.9 %²⁾.

¹⁾ including own used properties, properties intended for trading and assets held for sale

²⁾ Excluding project completions newly incorporated into the asset portfolio in 2009: Capital Square, Sava Business Center and Dunacenter

LEASE ANALYSIS based on effective rental income of the expiring lease contract

■ Austria ■ Germany ■ Eastern/South East Europe

The graph shows that more than 60 % of the CA Immo Group's rental agreements have a term longer than 5 years.

PORTFOLIO STRATEGY

Raising the corporate value of the Group is the main aim of the portfolio strategy and thus the key criterion on which each new investment decision is based.

CA Immo pursues this aim by positioning itself clearly as an investor in commercial real estate, focusing on the Central European region through the twin business areas of investment properties and investment properties under development. In doing so, the company can draw on over

20 years' experience, the local presence of qualified employees and a wealth of project development expertise generated through the subsidiary Vivico.

In the course of the recent financial crisis, the Group's portfolio strategy passed through a process of evaluation and a measure of adjustment to specific market conditions and the general economic circumstances.

Regardless of region or asset class, however, the central objectives are to secure the earning power of investment properties whilst realising development projects with the maximum efficiency.

Focus on countries with an established CA Immo presence

In regional terms, CA Immo restricted its activities to the existing markets of Austria, Germany and (South) Eastern Europe during 2009; no further expansion took place. In 2010, consolidation in those countries where a presence is already established will continue to take priority over entry into new markets, the aim being to achieve a balanced portfolio mix of established and developing markets.

In the company's core regions of Austria, Germany, Poland, Hungary and the Czech Republic, the objectives will be to secure investment properties for the long term and organic asset accumulation. In Austria and Germany in particular, the Group has its own teams to oversee progress on project development and manage investment properties locally; this proficiency can also be called on as required in other regions. Beyond maintaining current stock, there are no immediate plans to expand in the fringe markets, and exit strategies will be deployed if necessary. Although current development projects in the CIS region (and especially Russia) will continue, no new projects will be initiated in the short to medium term. Investment opportunities will be evaluated as they arise and entered into on a case-by-case basis.

Key asset class: office properties

CA Immo has always positioned itself as an office specialist. In this segment, the company can point to considerable expertise acquired over years of experience. The operational focus is on the business area of investment properties as well as project development in connection with high grade office properties (with a strong emphasis on prime locations). As regards stock, much of the organic asset accumulation envisaged for the years ahead will take place in this segment. Hotel and residential properties will be developed as the opportunities arise, mainly in the field of urban district development and in connection with specific projects; in the hotel segment, the company will utilise the expertise of Group subsidiary Viador, which specialises in hotel building. So far, too little

attention has been paid to the retail sector in the Group's portfolio as a whole; efforts will be made to redress the balance by means of selective development and collaborations with specialist project partners.

Urban district development adds high value

Thanks to its subsidiary Vivico Real Estate, CA Immo controls valuable reserves of real estate in prime locations in Germany. Development projects linked to these extensive sites, which include substantial stocks of residential property, are at varying stages of completion. Over the next few years, the sites will be made ready for building as fast as possible, whereupon they will either be sold to property developers, developed by CA Immo for investors or absorbed into the company's asset portfolio following completion. This urban district development programme covers various usage types and incorporates all asset classes, which will ensure the creation of functioning infrastructure that is integrated into the wider environment. This type of urban development – turning brownfield sites without development schemes into completed urban districts – has high potential for added value and ideally complements the more stable core business of managing investment properties.

Solid stock, strong development expertise

CA Immo will aim to establish a business ratio of 2:1 with a view to negating the volatility of project development to a large degree (two thirds investment properties to secure a stable cash flow, one third investment properties under development (based on total investment costs) to generate higher yield). It is a combination with advantages to both business areas: the business of investment properties benefits from access to high quality new real estate, whilst the steady income from property management supports project business. To release additional capital resources to implement projects in the pipeline, up to 10 % of established investment properties or completed developments are sold each year (according to market conditions and the receptiveness of the investment market).

The risks of project development are mitigated by means of scrupulous risk management: new projects are only launched where financing is fixed, a high level of pre-letting is assured or an end result is guaranteed in the shape of an investor.

SEGMENT REPORT FOR AUSTRIA

THE INVESTMENT PROPERTIES AREA

The investment properties¹⁾ in Austria provide a rentable effective area of approximately 377,600 sqm with a market value of around € 702 m according to current valuations. The portfolio (inclusive of assets sold in 2009) generated rental income of € 46.0 m last business year (compared to € 45.0 m in 2008), equivalent to an average yield of 6.3 %. As for lettings performance in Austria in 2009, new contracts (exclusive of assets sold in 2009) accounted for 14,740 sqm and contract extensions in terms of waived right of rescission covered 12,100 sqm; floor space of 5,200 sqm was vacated on account of expired rental agreements. The economic vacancy rate in the asset portfolio (measured on the basis of expected annual rental income) was 8.2 % in 2009 (compared to 9.8 % in 2008); vacancy in sqm on key date 31 December 2009 was equivalent to 8.8 % (9.9 % in 2008).

Wide-ranging renovation work has been under way at the **Galleria shopping centre** on Vienna's Landstrasser Hauptstrasse since July 2009. The new escalator and lift system directly linking the sales levels to the car park was completed late in November 2009. Phase two, launched at the start of 2010, will involve modernisation of the general mall areas, part of the rentable area and the facade. Of the rentable area of 13,500 sqm, 85 % has now been let to some 40 speciality retail outlets. All conversion work is due to be completed in time for the Christmas period of 2010. CA Immo has been the sole owner of the entire property, which was built as a condominium property nearly 20 years ago, since January 2009. The property has net rentable effective area of around 30,200 sqm; commercial premises account for approximately 45 % of this, with office and residential space making up the remainder. A car park with 388 spaces is available to customers.

¹⁾ Excl. of own used properties and assets held for sale

CA Immo invested approximately € 8.2 m in its Austrian portfolio in 2009. An additional € 3.3 m or so was devoted to maintenance costs with a view to upholding the fabric of buildings and the quality of rental units.

Sales in 2009

Strategic portfolio adjustments were carefully analysed and implemented in 2009. In this the company was assisted by the current economic conditions, which have produced a selective demand for direct property investments. Market placement was particularly successful for small to medium-sized apartment houses and plots of land in Vienna and the regional capitals, including a real estate package in Salzburg. Total sales revenue of some € 77 m was generated in 2009.

THE INVESTMENT PROPERTIES UNDER DEVELOPMENT AREA

Most progress has been made on two hotel projects that CA Immo will develop in 2010: one is part of an investment property on Fürbergstrasse in Salzburg, the other is located on a property on Rembrandtstrasse in Vienna's second municipal district (see supplementary report on page 48). Planning permission for another hotel project on Altmannsdorfer Strasse was secured in 2009; next steps are currently being discussed with potential operators.

Lände 3, a large-scale development and refurbishment project on Erdberger Lände in Vienna's third district, will commence in 2010. The site, which comprises rentable effective area of some 80,000 sqm in total, was let to Siemens in its entirety until February 2010. Starting in March, Siemens will gradually relocate, as planned, to a new purpose-built site, thereby vacating 33,200 sqm of effective office space at the end of February and another 30,700 sqm at the end of August.

Annualised rental income (€ m)	44.5	46.0	-3.3 %
Gross initial yield	6.3 %	6.1 %	+0.2 pp
Vacancy rate	8.2 %	9.8 %	-1.6 pp

The remaining floor space of some 18,000 sqm is long-term rented to Siemens (until 2014) respectively to an operating company of a gas station (until 2030). Rental revenue for the complex as a whole amounted to € 9.7 m in 2009; the figure for 2010 is likely to be € 5 m.

Activities linked to the future use, refurbishment and repositioning of the site are well under way; these range from rapid re-letting of the highest priced floor space to the revitalisation of certain older structures and the reconstruction of other sections – which are rented to Siemens for the time being – for residential usage.

The project, which will extend over a number of years, will aim to utilise floor space as effectively as possible, thereby securing the Erdberger Lände site for the long term and enhancing its value. With this in mind, CA Immo, in partnership with the city of Vienna, launched an urban planning competition in the first quarter of 2009, which was successfully finalised. The

principal task of the competition, which invited entries from across Europe, was to produce a feasible and future-focused blend of residential, hotel, office and retail usages capable of being realised in several stages; issues of transport, social infrastructure and urban development coordination also had to be considered. The resolutions in this matter by the city council are anticipated.

The wide-ranging project will also draw on the expertise of CA Immo's German subsidiary Vivico Real Estate, which specialises in the development of mixed-use inner city districts. The first phase of the revitalisation work is expected to be completed by 2012; the calculated investment volume for phase one will be some € 50 m, depending on the detailed conception and time schedule.

Re-letting efforts have already been successful, with a Siemens spin-off company agreeing to let some 6,800 sqm from 1 March 2010.

SEGMENT REPORT FOR GERMANY

CA Immo in Germany

CA Immo has been investing in Germany since the autumn of 2006. As of balance sheet date 31 December 2009, the company held property assets amounting to € 2.1 bn on this market, roughly equivalent to 60 % of the CA Immo Group's total property assets. CA Immo gained a foothold on Europe's largest property market through the acquisition of a package of properties worth € 798 m from the federal state of Hesse. These properties are leased to the state of Hesse for the long term: on average, lease agreements have around 22 years left to run. As well as procuring more commercial properties in 2007 and 2008, the company acquired Vivico Real Estate GmbH – a project development company with a significant portfolio of centrally sited real estate in major German cities – at the turn of the year 2007/2008. The total value of the property assets acquired (some € 1.3 bn) was recognised on the balance sheet and in the income statement in early 2008, establishing Germany as the most important market for the CA Immo Group.

Subsidiary Vivico provides platform for business in Germany

The Vivico Group emerged from a collecting society for railway properties in 2001, and until recently it was wholly owned by the German government. In 2003, its property portfolio was streamlined as part of a realignment towards intrinsically valuable real estate and properties with development potential. Since then, the core competence of Vivico has been urban district enhancement. The company's real estate services include portfolio management, portfolio development and trading. Vivico is highly skilled in the transformation of inner city real estate formerly given over to industrial usages, and specialises in the development of mixed-use districts in major cities. Vivico's experienced team of real estate experts also provides the CA Immo Group with a powerful platform on which to implement its activities in Germany (and especially its investment properties under development) with the utmost professionalism and cost-efficiency.

The integration of Vivico under the terms of a functional merger, and thus the structural realignment of the CA Immo Group's real estate and project development activities in Germany, were key priorities in 2009. Full details of these activities (and more information on Vivico and its subsidiaries) are provided in the "Equity investments and funds" section on page 05.

Focus on city district development

On a strategic level, the CA Immo Group focused its investment activities on the major west German cities in

2009. In places such as Munich, Frankfurt and Berlin, efforts were made to accelerate progress on (sometimes extensive) urban development projects with high degrees of pre-letting. Properties were also sold as planned in order to boost the Group's capital resources and generate capital for new projects.

THE INVESTMENT PROPERTIES AREA

Investment properties in Germany, which include landmark buildings such as the Königliche Direktion in Berlin, comprise an effective rentable area of around 716,500 sqm; as of the balance sheet date, this represented an approximate book value of € 1,103 m at current valuation (€ 1,185 m in 2008). The occupancy rate for these properties averaged 97.8 % in 2009 (98.7 % in 2008), with the typical remaining period on fixed-term rental contracts standing at around 22 years and average office rents at € 8.91/sqm. In 2009, rental income (including of properties sold in 2009) of € 69.2 m (€ 68.8 m in 2008) was generated and CA Immo invested approximately € 4.2 m in the maintenance of its German portfolio.

The German investment property portfolio delivered a yield of 5.8 %.

Sales in 2009

Vivico transacted total property sales of € 358 m in 2009. Returns on sale for the biggest transactions (described below) were in the range of 4.6 to 6.5 %. Buyers included open-end funds and private foundations.

Vivico sold the **ATMOS** office building in **Munich's Arnulfpark®** to Union Investment Real Estate AG in March for a purchase price in excess of € 100 m; the return on sale was 6.3 %. The principal tenant for the six-storey ATMOS building, which was completed in the first quarter of 2009, is the German headquarters of US pharmaceutical company Bristol-Myers Squibb. ATMOS, which was designed and realised as a green building, has been awarded silver certification by the German Sustainable Building Council (DGNB); the building derives as much as half of its energy requirement from renewable sources.

VELUM, an office and residential complex also located in the **Arnulfpark®** spanning approximately 5,800 sqm, was sold in August for a double-digit figure in the millions and a return of 4.6 %. The edifice provides 27 rental apartments in a seven-floor residential tower along with office and commercial premises spanning around 3,600 sqm. VELUM, which is fully let, was completed

in 2007, the first commercially utilised structure in the Arnulfpark®.

In September, two **office buildings in Cologne** were sold to Hamburg-based Hansainvest for around for € 55 m at a return of 6.3 %. The **RheinPalais** and **RheinAtrium** buildings are situated on Konrad-Adenauer-Ufer, adjacent to the River Rhine, and both properties have a total rentable area of around 16,000 sqm. Tenants include consultancy firm PricewaterhouseCoopers and fragrance retailer Douglas. The buildings were restored and partly reconstructed by Vivico.

The **Römischer Hof**, a listed building on Berlin boulevard Unter den Linden, was sold in October for approximately € 50 m and a return of 4.9 %. The historic structure, which has a rentable area of some 9,500 sqm, was comprehensively refurbished and modernised by Vivico. The Römischer Hof is now occupied by tenants that include a Ferrari showroom, the E-Plus Group and international publishing house Condé Nast.

THE INVESTMENT PROPERTIES UNDER DEVELOPMENT AREA

As of 31 December 2009, the CA Immo Group had rentable effective area of some 200,000 sqm in Germany and projects under construction respectively in advanced preparations with a calculated total volume of around € 800 m. Some 40 % of all investment costs have now been recouped and the remaining construction costs (totalling some € 500 m) have been fully covered through credit approval and capital resources. Given this extensive project pipeline and additional reserves of land worth around € 590 m, Germany is the market that will drive CA Immo's plans for continuous, organic asset accumulation over the years ahead. The Group is seeking building permission for gross floor area of approximately 1.6 m sqm on its real estate reserves in Germany by

2014, of which approvals for residential purposes would account for 30–40 % on current estimates. Once made ready for building, the sites will either be sold to property developers, developed by CA Immo for end investors or incorporated into the company's asset portfolio upon completion. The CA Immo Group is thus the largest project developer in Germany. Given that premises on the German market were only acquired in very small increments over recent years, good market absorption is anticipated for the next few years. Full details of the portfolio strategy may be found on page 21.

Key areas of development activity in Germany currently include:

The Europaviertel, Frankfurt/Main

The **Europaviertel** – a new city district on a site of around 90 hectares, 18 of which were developed by Vivico – is one of the CA Immo Group's biggest development projects. The modern district emerging on a site adjacent to the Frankfurt Exhibition Centre and the banking district will combine residential units, offices, restaurants, a conference centre and retail premises. Reputable companies such as BNP Paribas, PricewaterhouseCoopers, Grand Hyatt, Bayerische Versorgungskammer, Mövenpick, Realgrund and Meininger Hotel have already signed up as tenants, users or investors on the site.

The first residential tenants have already moved into the **EUROVENIA** complex on Europa-Allee, the backbone of the Europaviertel. Two other residential buildings are currently under construction; the topping out ceremony has been held for one of these, known as **CITY COLOURS**. The eastern section of the Europaviertel will offer more than 790 apartments in total. The topping out ceremony for the future **Meininger Hotel** also took place in September. In May, an architectural competition was held in respect of a planned **high-rise hotel** on Osloer Strasse; the designs submitted by Ben van Berkel/UNStudio of Amsterdam were recommended for further development.

CITY DISTRICT ARNULFPARK®
Munich, visualisation

The structural shell work for the main German offices of French bank **BNP Paribas** was completed at the turn of the year 2009/10.

Situated at the entrance to the Europaviertel, the largest single project – the 50-storey office building **Tower 185** – has surpassed the 30-metre mark. Sixty percent of Tower 185 has already been let to accountancy firm PricewaterhouseCoopers. Construction of the high-rise, which was conceived and realised as a green building, will be completed by the end of 2011.

Munich

CA Immo controls extensive development sites in locations with excellent infrastructure in the Bavarian capital. The **Arnulfpark®** district, now nearing completion, will be the first urban area developed by CA Immo in Germany. Around 1,000 apartments and 4,500 jobs will be created on the 18-hectare site close to the city's main railway station, along with hotels, several restaurants, local amenities and cultural facilities.

Also under construction is the **SKYGARDEN** office building. The structure, which will provide a gross floor area of some 33,000 sqm above ground, is being built by Vivico under the terms of a joint venture with German company OFB Projektentwicklung. Around 53 % of the office space has already been let to PricewaterhouseCoopers. The commercial section of the **MK 3** construction site will also feature an office building with floor area of around 25,000 sqm; Vivico is developing this project with joint venture partner E&G Financial Services GmbH.

In October, work began on a second new city district for Munich known as **Isargärten Thalkirchen**. Working with local housing association Infraplan, Vivico will create 11 residential buildings offering a total of 88 apartments in two construction phases. The first building section will cover 51 owner-occupied flats, of which some 70 % have been sold before construction work even starts. The flats in the new city district will be ready for occupancy in 2011.

Another district under development is the **Schloss-viertel Nymphenburg**. The exclusive residential and office district will include around 1,200 apartments, most of which are already occupied. A residential site spanning approximately 2,200 sqm was sold to a housing association during the year under review. Currently emerging is the AMBIGON office, commercial and medical centre, which will have an approximate gross floor area of 15,500 sqm. Marketing for the premises is under way, 50 % of which has been pre-let; construction was scheduled to start early in 2010.

Berlin

A number of projects are also at the planning stage in Berlin. One of those with high significance for the German capital is the **Europacity district**, north of the city's main railway station. At 40 hectares, the site is roughly twice the size of Potsdamer Platz; Vivico is developing around 20 hectares. The first building to be constructed is a 17-storey office block on Europaplatz, which will be the German headquarters of TOTAL (the oil company will let the entire 14,000 sqm tower). Construction of the office building, which will stand at some 69 metres, is scheduled to commence in the second quarter of 2010.

The **Lehrter city district**, directly adjacent to the city's main station, is an area of hotels and conference facilities that is already under development. The MK 3 construction site was sold to the investor High Gain House Investments, which was responsible for building a two-star business hotel for the Meininger group.

Purchases

Over the next few years, CA Immo subsidiary Vivico will work with Stadtwerke Mainz AG to realise **Zollhafen Mainz**, a new urban district of 30 hectares. The Zollhafen will provide a unique blend of residential, living, working and relaxation facilities in the capital city of Rhineland-Palatinate state. Attractively designed green spaces and water features, islands and canals, a spacious marina with mooring facilities and close proximity to the River Rhine will create a maritime-inspired environment with a big-city feel in this former harbour area.

Thanks to its experience in urban district development, Vivico prevailed in a Europe-wide bid invitation, securing the contract in autumn 2009 following an extensive award procedure. Vivico and Stadtwerke Mainz AG are now forming a project company to implement and market the Zollhafen project. The company will acquire the Zollhafen plot at residual value from Stadtwerke Mainz AG. Planning permission for the site is currently being sought.

TOWER 185
Frankfurt, construction site as of January 2010

SEGMENT REPORT FOR EASTERN AND SOUTH EASTERN EUROPE

The CA Immo Group has been investing in Eastern Europe since 1999. Today, the Group maintains a presence in nine countries of Central and Eastern Europe (CEE), South Eastern Europe (SEE) and Russia in the form of investment properties and investment properties under development. In 2006, CA Immo brought its entire Eastern European portfolio under the control of a subsidiary, CA Immo International, subsequently floating the company on the stock market; CA Immo held a stake of 63 % in CA Immo International as of 31 December 2009. CA Immo International's real estate activities are divided across two business areas: the acquisition and management of investment properties and the development of projects. Since 2006, the investment properties under development area has generally been managed through the CA Immo New Europe (CAINE) special fund; projects initiated prior to this date, and those which do not meet the fund prerequisites, are implemented by CA Immo International itself (which holds a share of 60 % in the fund).

THE INVESTMENT PROPERTIES AREA

The asset portfolio of CA Immo International, which predominantly comprises centrally located high quality office properties in Eastern European capitals, had an approximate market value of € 605 m (2008: € 588.2 m) on the balance sheet date 31 December 2009. The company invests in Poland, the Czech Republic, Slovakia, Hungary, Romania, Bulgaria, Slovenia and Serbia, with CEE states accounting for 62 % and the SEE region representing 38 %.

As of 31 December 2009, the overall portfolio had an occupancy rate (according to surface area) of 91 %. The portfolio was producing a yield of 8.5 % ¹⁾ (compared to 7.3 % in 2008), with properties in the SEE yielding 9.3 % ²⁾ (7.8 % in 2008) and those in the CEE yielding 8.0 % ³⁾ (against 7.0 % in 2008). Full details of the valuation results are contained in the "property valuation" section on page 35.

The Group has established regional management companies in Poland, Hungary, Romania and Serbia with a view to managing investment properties locally as efficiently as possible. Depending on regional requirements, these

organisations are charged with tasks connected to asset management, letting, administration, accounting and project management. Their local presence ensures greater proximity to the market and to tenants.

Over 2009 as a whole, CA Immo International recorded new lettings of 34,111 sqm, with roughly 47,656 sqm were let to existing tenants extending contracts and 3,703 sqm were let to existing tenants expanding their floor space.

In 2009, the **economic vacancy rate**¹⁾ in the investment properties portfolio (measured on the basis of expected annual rental income) was 9 %, compared to 6 % in 2008; **vacancy by sqm on key date** 31 December 2009 stood at 9 % equally. The company generated rental income of € 40.3 m in 2009.

Central and Eastern Europe (CEE)

With around two thirds of its assets in CEE states, CA Immo International has traditionally maintained strong representation in the region. The asset portfolio on the core market of **Poland** includes two high quality office properties in Warsaw: the Warsaw Financial Center (50 % owned by CA Immo International) and the Wspólna building in the capital's central business district. Both properties are earning an excellent level of rent by current market standards. Vacancy in the Warsaw Financial Center increased sharply early in 2009 when a major tenant moved out, but new lettings and extensions accounted for around 13,000 sqm over the year as a whole. The vacancy rate by sqm was 16 % on key date 31 December 2009, but fell to 12 % at the start of 2010. Given the prime location of this landmark structure and its fixtures and fittings, vacancy is likely to decline still further during 2010. The vacancy level by sqm for Wspólna stood at 14 % on the key date, but the property was again reported to be 100 % let early in 2010. Both buildings are managed by a Polish company belonging to CA Immo International; taken together, they have a total rentable effective area of 32,027 sqm and an approximate market value of € 101.5 m on current valuations.

In the **Czech Republic**, meanwhile, the company owns the Europort business hotel at Prague Airport, the Diplomat Center (a Marriott Courtyard hotel) in Plzeň and a building in Prague housing the English International School. As of key date 31 December 2009, these three properties had a total rentable effective area of 38,437 sqm, a market value of approximately € 76.1 m (2008: € 91.2 m) on current valuations and an economic vacancy rate of 1.6 %.

²⁾ Belgrade Office Park 2 in Serbia has been completed just before 31.12.2008 and was therefore not part of the stabilized portfolio

CA Immo International has one property in **Slovakia**: the Bratislava Business Center 1, acquired in 1999. With a large tenant having vacated the premises in the summer of 2009, the building will be renovated and the vacant floor space adapted for rent in smaller units. The market value of the Bratislava Business Center 1, which has a rentable effective area of 9,257 sqm, is € 9.5 m (2008: € 12.9 m). Furthermore, currently a project is under way for the extension of the property.

In **Hungary**, two buildings were added to the stock of five investment properties in 2009: the Capital Square office block in Budapest and the Dunacenter, a specialist retail centre in Győr that gave the company its entry into the region's retail segment. Hungary thus remains CA Immo International's largest regional market. The

investment properties, which are managed by a team of local experts, have a total market value of around € 190,5 m (according to current valuations) and an economic occupancy rate⁴⁾ of 86 %.

Situated in the centre of Budapest, the **Capital Square office building** was erected by Hochtief Development Hungary. Acquired under the terms of a forward purchase agreement, the building was handed over to CA Immo International on completion in mid-2009. Capital Square, which offers a rentable effective area of 31,831 sqm, is notable for its high quality architecture, low energy consumption and excellent infrastructural links. The property – nominated "Best Office Development" in Hungary

⁴⁾ Excluding Capital Square and Dunacenter

by Construction & Investment Journal (CIJ) in December 2009 – is one of the finest office buildings on the Budapest market. Rental contracts covering 3,500 sqm were concluded in the fourth quarter of 2009; in the second half of the year, 38 % of the floor space was let, mainly to international tenants such as Ferrero and Spedition Maersk. More rental agreements are expected to be signed in 2010, leading to a steady fall in the vacancy level.

The Dunacenter, a specialist retail centre, was completed in October 2009, the result of a 50:50 joint venture between the CA Immo New Europe Property Fund and a group of private investors. The 42,500 sqm site includes 16,375 sqm respectively 8,187.5 sqm (= 50 % stake of CA Immo International) of space rentable to national and international retailers. The economic occupancy rate for the building stood at 51 % on the key date.

South Eastern Europe (SEE)

Within the SEE region, CA Immo International invests in Romania, Bulgaria, Slovenia and Serbia. **Romania** is the company's main SEE target market: in the capital Bucharest, CA Immo International has three high quality office properties in good locations (Bucharest Business Park and the Opera Center 1 and 2). The properties, which are managed by a local CA Immo International team, are let at high rates; as of the key date, economic vacancy was 0.9 %. The buildings offer a rentable effective area of 40,691 sqm, and their market value is roughly € 89.9 m (2008: € 115.7 m) on current valuations.

The asset portfolio in **Bulgaria** comprises two office properties in Sofia – the Europark Office Building and the International Business Center (IBC) – both of which are fully let. Early agreement on a lengthy lease extension (to 2014) was reached in mid-2009 with Unicredit Leasing, the second largest anchor tenant of the Europark Office Building; contract negotiations are progressing with other tenants. The properties have a combined rentable effective area of 11,197 sqm and a total market value of some € 22.1 m (2008: € 25.2 m) based on latest valuations.

In **Slovenia**, the company owns a hotel in Ljubljana with an effective area of 17,931 sqm and an approximate market value of € 24.1 m (2008: € 33.1 m).

In **Serbia**, the CA Immo New Europe project development fund completed the Sava Business Center in July 2009. The eight-storey office building is located in the New Belgrade office district. The property offers a rentable effective area of some 18,500 sqm and 400 parking spaces, and was around 46 % let as of the key date. Although attracting new tenants on the Serbian market remained difficult, the company performed well in terms of lettings in 2009. This was especially evident in the case of the Sava Business Center, where reputable international organisations such as the Crédit Agricole banking group were signed up as new tenants for the long term. Counter to general market assessments and the overall market situation, which brought about corrective adjustments to

DISTRIBUTION OF BOOK VALUE BY COUNTRIES

DISTRIBUTION OF BOOK VALUE BY MAIN USAGE TYPE

SAVA BUSINESS CENTER
Belgrade/Serbia

rental rates in Serbia, existing contractual rents were sustained at above average levels.

Together with Belgrade Office Park (which reported an occupancy rate of 82 % on 31 December 2009), the company now has two office properties in the Serbian capital. In total, the buildings have 38,877 sqm of rentable effective area and a market value of € 91.3 m according to current valuations.

THE INVESTMENT PROPERTIES UNDER DEVELOPMENT AREA

Project development was significantly impacted by the extremely challenging economic climate of 2009. Property yields continued to rise, negotiations over financing became more difficult, financing costs increased, demand fell, potential tenants delayed making decisions and construction schedules were lengthened. All of this necessitated a re-evaluation of investment properties under development and (sometimes substantial) value adjustments in relation to individual projects. External factors in particular, but also variables under the control of project teams, will go a long way towards determining whether these value adjustments can be reversed, and if so to what extent. To give an example, falling prices of raw materials

and the general decline in construction activity should result in lower building costs and have a positive effect on project outcomes.

Despite the generally adverse external influences, significant operational progress was made in the investment properties under development area during 2009 as regards obtaining necessary approvals, the execution of construction work and utilisation. Projects completed and transferred to the stock of CA Immo International included the Capital Square office building in Budapest and the Sava Business Center office property in Belgrade in mid-2009; this was followed in October by the Dunacenter, a specialist retail centre in the Hungarian city of Győr.

The majority of projects in which CA Immo International holds a majority stake, and for which the company is responsible for raising equity capital, are fully funded, and as such can be realised on a sound financial footing. CA Immo International will continue to push ahead with current investment properties under development in its core regions in 2010. More information on company strategy is given in the “portfolio strategy” section on page 21.

In the field of investment properties under development, CA Immo International is involved in or contractually committed to the following projects through the CA Immo New Europe (CAINE) project development fund:

Poland

- **Poleczki Business Park:** This mixed-use complex made up of offices, commercial space and storage facilities is currently being built on a site spanning 140,000 sqm close to the airport and the centre of Warsaw. The project, which is being implemented as a 50:50 joint venture between the CA Immo New Europe project development fund and UBM Realitätenentwicklung AG, is currently the largest property development initiative in Poland. Following a construction period of 14 months, the topping out ceremony for the first building section of 45,000 sqm (comprising 38,000 sqm of office space and 7,000 sqm of commercial/service premises) took place in mid-October 2009. Phase one is due for completion in the first half of 2010; the aim is to establish a modern office district with a total effective area of 200,000 sqm by 2015. Investment in the first building section amounted to € 110 m and the construction project is estimated to cost € 250 m in total.

One major tenant acquired in December 2009 was Poland's Agency for Restructuring and Modernisation of Agriculture (ARMA), which will lease an area of 16,500 sqm. The first building section is thus 65 % pre-let.

Romania

- **Arad:** In cooperation with an Austrian joint venture partner, the erection of a specialist retail centre is planned for Arad, one of the ten largest cities in Romania. When complete, the centre will provide an effective area of roughly 16,700 sqm. Although financing for the project has been secured, the actual commencement of building work has been postponed for the time being owing to the difficult situation in the Romanian retail sector: implementation will only be economically viable when a sufficient level of pre-letting has been attained.

- **Sibiu:** With around 170,000 inhabitants and a catchment area of some 400,000 people, Sibiu is one of the 15 largest cities in Romania. The Retail Park Sibiu project envisages construction of a double-level shopping centre with two single-storey specialist retail centres attached on a site spanning 220,000 sqm through a joint venture with a German/Romanian partner. Work on the first construction phase for an international DIY chain began in August 2009 and is proceeding according to plan. Financing has been secured and completion is anticipated in the second quarter of 2010. Intensive negotiations are in progress concerning the start of building phase two. The total planned retail space amounts to approximately 80,000 sqm; the investment cost for the project as a whole is estimated at € 100 m.

RETAIL PARK SIBIU
Sibiu/Romania, visualisation

Russia

- **Airport City St. Petersburg** (formerly Pulkovo Business Park): In St. Petersburg, a four-star Crowne Plaza hotel and two office buildings will be built on a 62,300 sqm site adjacent to Pulkovo Airport through a joint venture with Warimpex, UBM and the city's airport. CA Immo International's project development fund holds a 25 % stake in the project, which will be realised in three construction phases. Investment of approximately € 260 m in the first two phases will create effective area of around 55,000 sqm. The extremely challenging conditions that still prevail in Russia have delayed negotiations regarding finance with outside capital whilst hampering realisation of the project and the utilisation of rental premises. Despite this, the entire site has been acquired, with completion conditions in the original lease agreement eradicating pressure over the realisation schedule, at least for the time being. Construction phase one is currently in progress.

Projects initiated before the establishment of the CA Immo New Europe fund, and those which do not satisfy the criteria of the fund, are implemented directly by CA Immo International. These projects include:

Russia

- **Maslov Tower:** The construction of an office property with rentable effective area of over 30,000 sqm is being planned for central Moscow in a joint venture with a German partner. The investment volume has been calculated at roughly € 150 m, 50 % of which will be taken on by CA Immo International. Although work to install the infrastructure started early in 2009, the project is still being adversely affected by the tough market situation in Russia, where financing with outside capital and pre-letting remain hard to attain. The general climate and market needs will determine the launch date of the project.

Slovakia

- **BBC 1 Plus:** An office extension is being developed on a site forming part of the Bratislava Business Center 1 office building (the BBC 1, an investment property of CA Immo International). The annexe will provide additional approximate rentable effective area of 14,000 sqm, and some 360 underground parking spaces. The tougher climate has already delayed the project by several months, but construction is due to start in the second quarter of 2010. As regards the letting situation, it is mainly tenants from BBC 1 that have expressed an interest in expanding or relocating.

- **Sekyra Tower:** Construction of a high quality multi-level mixed use (office, retail and residential) building with a net effective area of 34,000 sqm and an underground car park with around 430 spaces is planned in Bratislava with project development firm Sekyra, the largest Czech/Slovak company of its kind. The site of some 7,410 sqm is located close to the old town district and the National Bank of Slovakia in central Bratislava, and offers excellent public transport connections. Next steps depend on the outcome of the property use approval process and the development of demand on the Slovakian property market.

Other CA Immo International projects at an early stage of development include:

Czech Republic

- **CITY Deco:** The CITY Deco project involves real estate development in a fast-rising district of Prague. The mixed-use project with a total span of around 18,000 sqm will incorporate offices, a health centre and car park. CITY Deco is at an early stage, and realisation largely depends on an upturn in the extremely gloomy market situation; options remain open for involvement in the project.

Estonia

- **Tallinn:** An office building with a limited amount of retail space and a gross floor area of around 22,000 sqm is planned for the Estonian capital. A joint venture has been set up to realise the project, in which CA Immo International has a 40 % stake. Financing with outside capital was secured in 2008 to acquire the real estate, and planning permission is expected to be confirmed at the end of the second quarter of 2010. Given the poor economic conditions in the Baltic region, the revenue potential no longer matches original estimates. For this reason, the project is currently on hold and subject to re-evaluation with the consent of the joint venture partner.

Serbia

- **Novi Banovci:** CA Immo International acquired a 50 % stake in this strategic land reserve, which has an excellent location adjacent to a motorway junction near Belgrade. At the present time, negotiations over rezoning are under way; the construction of a logistics centre is one of the options envisioned.

PROPERTY VALUATION

It is not without reason that so much attention is paid to the valuation of the property assets: it is the basis for the valuation of the real estate company and the most important parameter for determining the value of our shares. 2009, like the previous year, was characterised by major negative market value adjustments. The CA Immo Group devalued its property assets by a total of about 4 % in 2009 and is posting a correspondingly negative consolidated net income.

General effects of the economic crisis on property valuations

The crisis in the global financial system caused major uncertainty in commercial property markets, which can lead, in particular, to prices and values being subject to increased fluctuations for some time. As has also been noted in some of the valuation reports, the volume of transactions decreased sharply as a result of the general economic situation. One consequence of this was a low number of reference transactions being available for valuation purposes. This phenomenon was particularly striking in Eastern and South Eastern Europe.

The reports are based on assumptions regarding future adjustments of rent agreements, expected vacancies and the length of these, lease expiration profiles and estimated market rents for the lease of vacant space and space that will become vacant in the future. These components may lead to deviations in value, particularly in the case of properties with low occupancy rates or short-term expected vacancy if market rents and rentability are incorrectly estimated.

Please refer to Point 1.6.4 in the Notes on the consolidated financial statements for an explanation of the valuation methods applied.

Austria

The general economic and financial crisis had less effect on Austrian property markets than on other European markets, and the relevant yields were largely constant when compared to the previous year. Consequently, the valuation result in Austria was, for the most part, determined by individual factors affecting the property involved in each case.

With respect to income-producing properties, revaluation gains of about € 6.5 m were offset by revaluation losses of € –18.8 m. About half (some € 3.0 m) of the gains were accounted for by a single property (Donau Business Centre), which benefited from a marked reduction in vacancy so that it was possible to partially reverse a devaluation undertaken in the previous year. Around 75 % of the losses were accounted for by three properties: as a result of more pessimistic assumptions about re-letting after the main tenant left, a further devaluation of € –5.5 m was made for the property Erdberger Lände. About € –5.2 m of the losses were accounted for by the Galleria property in Vienna. The principal reason for this was investments made in the course of the year that were not immediately reflected in an increased valuation of the property and thus resulted in devaluation. The Völkermarkter Strasse property, which was sold in 2009, was devalued by € –4.3 m.

The devaluations of development property assets amounted to € –3.0 m and were largely accounted for (€ –2.6 m) by a further decrease in the value of the Muthgasse property in Vienna.

Germany

The German property market recorded a slight easing at the end of the year and this was also reflected in a slight recovery in valuations in our portfolio.

VALUATION RESULT AUSTRIA ¹⁾

	Acquisition costs	Balance-sheet value	Revaluation/ Impairment		Gross initial yield	
	31.12.2009 in € m	31.12.2009 in € m	in € m	in %	31.12.2008	31.12.2009
Investment Properties	782.7	702.0	–12.2	–1.7 %	6.1 %	6.3 %
Investment Properties under Development	43.7	26.2	–3.0	–10.4 %		
Total	826.4	728.2	–15.3	–2.1 %		

¹⁾ including assets held for sale and excluding own used properties

With respect to our German investment properties portfolio, revaluation gains of € 32.3 m were offset by losses of € –9.3 m. About 24 % (€ 5.4 m) of the gains were accounted for by four properties, which were sold in 2009 and which were revalued upwards prior to their sale to the value derived from the purchase agreement. This was because the key date for a quarterly balance sheet fell between signing of the purchase agreement and transfer of rights and duties. The other revaluation gains were distributed across a large number of properties and reflect the slight easing on the property markets described above. Almost 90 % of revaluation losses among the investment properties were accounted for by just four properties. In these cases, it was principally factors specific to the property concerned that were responsible for the devaluations.

The sharp increase in gross yield of properties held in the trading portfolio is principally the result of the change in this portfolio's composition owing to the sales that took place in the course of the year.

The revaluation result of the property under development reflects the changes in accounting principles applicable from 1.1.2009 (IAS 40) as well as the actual change in valuation. Development property assets for future use as financial investments must now be valued at the market value and no longer at cost. As a result of these changes, hidden reserves of € 66.8 m for development property in Germany as at 31.12.2008 were revalued in the IFRS consolidated financial statements with an effect on net income as from the start of 2009. Since the values established as at 31.12.2009 were lower than the values as at 31.12. 2008, most of the revaluation was revised once again. Thus, a revaluation result of € +15.1 m remained, in overall terms, at year end.

Eastern and South Eastern Europe

As a result of the economic and financial crisis that was still clearly perceptible in Eastern and South Eastern Europe up to the end of 2009, valuation revealed a further sharp drop in property values. In total, devaluations of the property assets in Eastern and South Eastern Europe amounted to € –152.0 m, distributed as follows across the individual balance-sheet items:

VALUATION RESULT EASTERN AND SOUTH EASTERN EUROPE

	Acquisition costs	Balance-sheet value	Revaluation/ Impairment	
	31.12.2009	31.12.2009	in € m	in %
	in € m	in € m		
Investment Properties	688.4	605.0	–120.9	–16.7 %
Investment Properties under Development	121.0	67.7	–31.0	–31.4 %
Property intended for Trading	6.4	1.3	0.0	0.0 %
Total	815.7	674.0	–152.0	–18.4 %

Revaluations with respect to the investment properties portfolio were distributed across the individual countries of the region (see table on next page).

The Table shows that all the countries were affected by marked value adjustments. The most important factor for these devaluations was a sharp increase in the discount rate used by the valuers for capitalisation of the

VALUATION RESULT GERMANY ¹⁾

	Acquisition costs	Balance-sheet value	Revaluation/ Impairment		Gross initial yield	
	31.12.2009	31.12.2009	in € m	in %	31.12.2008	31.12.2009
	in € m	in € m				
Investment Properties	1,145.8	1,105.3	23.0	2.1 %	6.0 %	5.8 %
Investment Properties under Development	137.5	121.7	–8.0	–6.2 %	6.4 %	7.7 %
Property intended for Trading	889.9	872.7	15.7	1.8 %	n. a.	n. a.
Total	2,173.2	2,099.7	30.1	1.5 %		

¹⁾ including assets held for sale and excluding own used properties

rents (equivalent yield). The equivalent yields increased by about 0.5 % to 1.5 % in comparison with the previous year and are now in a range of between 7.65 % and 9 % in Hungary, between 7.50 % and 8 % in Poland and between 9.25 % and 9.75 % in Serbia. In Romania, Slovakia and Bulgaria, equivalent yields are just over 9 %. The equivalent yields applied to the hotel properties in the Czech Republic and Slovenia are between 8 % and 9 %.

Projects newly completed in the course of the year (Capital Square and Duna Centre in Hungary, and Sava City in Belgrade) are shown separately in the Table above because they are still in the start-up phase. The low yields posted thus reflect the vacancy rates of these properties, which are at the high level typical of a start-up period.

In addition to the increase in assumed yields, there was also a reduction in the Estimated Rental Values (ERV) assumed by the valuers, reflecting the sustainably achievable rent for a property and consequently also the estimated market rent for new and subsequent lets. Between 31.12.2008 and 31.12.2009, the ERV dropped by about –6.4 %. In the face of total devaluation of –17 % (Central and Eastern Europe), and –21 % (South Eastern Europe), about one third of the change in value can thus be attributed to the decrease in expected rents.

For those properties that were already part of the income-producing portfolio as at 31.12.2008, the change in ERV was as follows:

CHANGE IN ERV (LIKE FOR LIKE)

31.12.2009 as against 31.12.2008	
Slovakia	–8.5 %

Total	–6.4 %

TRANSPARENCY

The CA Immo Group's policy of transparent operation applies to the valuation of its properties as well and it publishes the value of every property on an annual basis, together with the parameters used to determine the valuation. These detailed data, which are listed in table form at the end of this annual report, are intended to allow readers of the annual report to satisfy themselves optimally of the market conformity of our property values.

EXTERNAL VALUATION TO INTERNATIONAL STANDARDS

A fundamental cornerstone of our commitment to transparency and objectifiable valuation is the fact that property values are determined by independent

experts. The external valuations were basically made in accordance with the standards defined by the "Royal Institution of Chartered Surveyors" (RICS). RICS defines the market value as the value at which a willing purchaser can acquire a property from a willing vendor at a transaction price in line with market conditions, both purchaser and vendor having acted professionally, prudently and without duress.

The value of the Austrian properties was calculated by CB Richard Ellis and the Metzger Realitäten Group; the property portfolio in Germany was valued by VALEURO Kleiber and Partners and CB Richard Ellis. Valuation of the CA Immo International portfolio is undertaken by CB Richard Ellis. The external valuations were basically made in accordance with the standards defined by the "Royal Institution of Chartered Surveyors" (RICS). Summaries of the expert reports can be viewed on our website at www.caimmoag.com.

As regards development property, the devaluation in 2009 was about 31 % as compared with the value at the start of the year. In regional terms, the devaluations can be broken down as follows:

VALUATION RESULT BY REGION

	Acquisition costs 31.12.2009	Balance-sheet value 31.12.2009	Revaluation/ Impairment	
	in € m	in € m	in € m	in %
CEE	53.6	39.0	-6.6	-14.4 %
SEE	36.7	23.7	-12.5	-34.5 %
CIS	30.7	5.0	-12.0	-70.5 %
Total	121.0	67.7	-31.0	-31.4 %

The devaluations in South Eastern Europe can be principally attributed to the shopping centre project in Sibiu, where the valuation assumptions regarding the areas scheduled for Phase II of the project were substantially reduced. The negative revaluation result relating to Russia is attributable to the Maslov Tower project in Moscow, the valuation of which reflects the continued difficult situation on the Moscow property market.

Changes in value in projects in which CA Immo only has a minority interest (such as the project Airport City in St. Petersburg, for example) do not form part of the revaluation result but only have an indirect accounting effect in the result from financial investments and the result from associated companies.

REVALUATION BY REGIONS

²⁾ Belgrad Office Park 2 in Serbia had only been completed shortly before 31.12.2008 and therefor was not part of the stabilised portfolio as at 31.12.2008

RESULTS

Gross revenue and net operating result

Rental income in 2009 amounted to € 177.0 m (2008: € 175.3 m). The Austrian and Eastern and South Eastern Europe segments posted a slight increase of 2.2 % and 4.2 % respectively. In Germany there was a slight decrease (–1.0 %), the result, in particular, of sales.

The movement of rental income in detail from 2008 to 2009 was as below.

The net rental result (rental income less operating costs that cannot be charged onwards and expenditure directly attributable to the properties) increased by 8.8 % from € 139.2 m to € 151.4 m, thus growing significantly more strongly than rental income. This is particularly a result of the decrease in direct property expenditure owing to the fact that one-off effects contained in last year's figures and deriving from maintenance expenditure were not repeated. The net operating income (NOI) attributable to rentals as a percentage of rental income also rose as a result – from 68 % in 2008 to 74 % in 2009.

In connection with the planned sale of properties in Germany that were held as current assets, trading income of € 78.0 m was achieved in 2009 (2008: € 88.3 m). This turnover is offset by the expenditure item “Book value of properties intended for trading”, which also contains other development expenditure attributable to the properties sold, in the sum of € –68.2 m (2008: € –70.6 m), so that the total result achieved for inventory trading was about € 9.9 m (2008: € 17.7 m). The acquisition costs of

RENTAL INCOME BY MAIN USAGE

the properties sold amounted to € 61.4 m, cash gains on disposals (sales income less acquisition costs) were thus about € 16.6 m, corresponding to a sales margin of some 27.1 % against acquisition cost.

Gross revenue from “Development, Services for third parties” (which comes primarily from the Group subsidiary OmniCon) amounted to € 4.5 m, as compared to € 3.7 m in 2008. The result from “Development, Services for third parties” was € 2.8 m, well above the result for

MOVEMENT OF RENTAL INCOME IN DETAIL FROM 2008 TO 2009

- Resulting from sale of properties	–2.4	–3.6	0.0	–5.9
Total change in rental income	1.0	–0.9	1.6	1.7
2009	46.2	90.5	40.3	177.0

RENTAL INCOME BY REGION

the previous year (€ 1.0 m). But since OmniCon was only purchased in the middle of 2008, the figures for the previous year are not directly comparable.

As a result of these developments, the Group net operating income (NOI) increased by 3.1 % to € 164.0 m as compared with € 159.2 m in 2008.

Income from sales of properties

In 2009, income of € 357.3 m was achieved from the sale of properties held as investment assets. Income from sales was thus about twice as high as in the previous year (€ 175.4 m). If the sales are classified by region, € 279.9 m were accounted for by Germany and € 77.1 m

by Austria. The income achieved from the sales of properties was below the previous year's figure at € 9.2 m (2008: € 11.7 m). In addition to the income from sales, a valuation result of € 3.6 m accrued to the properties disposed of in 2009. The income of € 357.3 m was offset by acquisition costs amounting to € 340.3 m, cash gains on disposal (sales income less acquisition costs) were therefore about € 17.0 m, corresponding to a sale margin of some 5.0 % against acquisition costs.

Indirect expenditure and other operating income

Indirect expenditure decreased slightly from € –52.2 m to € –51.7 m. The most significant item under indirect expenditure is internal management costs, which rose from € –30.8 m in 2008 to € –33.5 m in 2009, largely owing to increased staff expenditure.

The Table below shows that the increase in staff costs can be attributed to the German segment where higher numbers of staff were required as a result of the intensified development activities. A large proportion of these staff costs can be directly attributed to individual development projects – these are neutralised in the form of “Own work, capitalised”. The staff expenditure remaining in the income statement after taking into account the “Own work, capitalised” item decreased by 10 % in comparison with the previous year.

With respect to the other indirect expenditure, the result of the implementation of cost-cutting measures can be seen; these resulted, in particular, in significant savings in legal, auditing and consultancy expenses (–25.4 % to € –8.2 m). In the other administrative expenses, cost reductions, such as, for example, particularly those in advertising expenses, and cost increases, particularly for

MOVEMENT IN STAFF LEVELS AND STAFF COSTS

€ m	Austria		Germany		Eastern/South Eastern Europe		Group	
	2009	2008	2009	2008	2009	2008	2009	2008
Average staff numbers	49	54	189	158	89	105	327	315

allocation to the provision for land transfer tax from previous periods, and bank charges in connection with the refinancing operations implemented in autumn 2009, balanced each other out. A detailed breakdown of indirect expenditure can be found in Chapter 2.1.7 in the Notes.

Other operating income decreased by € 4.5 m to € 8.3 m. The most critical item in other operating income was the release of provisions set up in previous periods.

Earnings before taxes and depreciation (EBITDA)

All of these developments led to a slight increase in earnings before taxes and depreciation (EBITDA) from € 137.8 m in 2008 to € 141.9 m in 2009. The first quarter accounted for € 36.4 m of this figure, the second quarter for € 42.9 m, the third quarter contributed € 36.5 m and the fourth quarter € 26.1 m. The fluctuations between the various quarters can be explained mainly by the unequal distribution of the gains from disposals and by the allocation described above to a provision for land transfer tax, which took place in Q4.

In terms of segments, the principal proportion (56 %) was accounted for by the German regional segment, as was also the case in the previous year. Gains from disposals in Austria in 2009 resulted in a reversal of the relative weightings between the Austrian and the Eastern/South Eastern Europe segments.

Depreciation and revaluation result

As had already been the case in 2008, the CA Immo Group was faced with a further marked weakening of property prices (the Chapter headed "Property valuation" provides an explanation of the key factors involved here).

The majority (€ –8.6 m) of the depreciation, amounting to € –10.4 m, was accounted for by unscheduled depreciation on properties intended for sale.

The revaluation result in 2009 was € –129.1 m (2008: € –178.1 m), the Eastern and South Eastern Europe segment accounting for € –152.0 m and the Austrian segment for € –15.3 m. In Germany, a positive revaluation result was achieved in 2009, amounting to € 38.2 m.

The fundamental cause of this result in Germany lay in changes to the accounting principles, under which, since 1 January 2009, property development projects are now also subject to the regulations of IAS 40, along with the investment properties that were already covered, and must therefore now be accounted for using the fair-value method in accordance with the option applied in the CA Immo Group. The result of this is that not only negative but also positive changes in the market value of property development projects are included in the revaluation result. Consequently, as at 1.1.2009, the total positive difference of € 67.0 m between current estimated values and previous book values (based on acquisition costs) of properties under development was recorded, where appropriate, as a revaluation gain. In the previous year, negative changes to the value of property development projects had been posted under depreciation.

Financial results

The financial result for 2009 was € –137.5 m as compared with € –142.8 m in 2008. The critical item in the financial result, financing costs, rose only modestly in comparison with 2008, by 3.2 % to € –108.4 m. Apart from this interest expenditure, entered in the income statement, interest amounting to € 4.1 m was capitalised on development projects under construction.

However, far more serious effects arose from a negative result from the valuation of interest-rate hedges in the result from derivative transactions, debiting the financial result with € –30.1 m (2008: € –15.9 m). This was the result, on the one hand, of a decline in the Euribor during the reporting period, while, on the other hand, cash-flow hedges that had previously been entered directly under changes in equity were recognised in the income statement as a result of reclassifications, particularly as a result of the early repayment of the loans underlying these hedges. In total, the result from derivative transactions is largely a non-cash-effective valuation result – only € –2.0 m of the total amount of € –30.1 m is accounted for by results that were actually realised.

Expenses from financial assets (€ –3.1 m) and the investment result from associated companies (€ –7.3 m) derived

Total	3,515.8	-137.2	-3.8 %

from property depreciation in companies in which the CA Immo Group is only a minority shareholder (and which are therefore non-fully consolidated), and from the depreciation of investments made in the form of loans or down payments to non-fully consolidated companies. The biggest single factor was the value adjustment for the 25 % share (held through the CA Immo New Europe property fund) in the project company running the St. Petersburg Airport project.

Taxes on income

As a result of the developments described above, the total net income before tax (EBT) for 2009 is € -134.5 m as compared to € -295.4 m in 2008. The taxes on income amounting to € -0.2 m are accounted for by actual taxes in the sum of € -38.7 m, on the one hand, and by changes in deferred taxation and tax adjustment items in the sum of € +38.5 m, on the other. The critical item here was the reversal of deferred taxes in the Eastern and South Eastern Europe segment following the negative revaluation result. Actual tax expenditure accrued chiefly in the German segment. Corporation tax and trade tax are attributable in Germany and Austria to sales of properties in particular, and in Eastern and South Eastern Europe the tax burden accrued from taxable currency fluctuations in addition to the operating results.

Consolidated net income

Consolidated net loss decreased from € -294.9 m to € -134.7 m. The income attributable to the shareholders of the parent company in 2009 was € -76.9 m as compared with € -237.1 m in 2008.

In detail, the movement of consolidated net income after minorities between 2008 and 2009 is shown on the next page.

Cash-flow

Cash-flow from business activities increased by 5.2 % over the previous year in 2009 to € 120.5 m. Since the sales made in 2009 were more than the investments in operating business, the cash flow from investment activities in 2009 was € +72.8 m as against € -127.8 m in 2008. Consequently, the repayment of loans also exceeded new loans taken out so that, after taking into account the interest paid, cash flow from financing activities in 2009 amounted to € -26.5 m (2008: € +89.1 m).

Funds from Operations (FFO)

Funds from Operations (FFO) amounted to € 27.0 m in 2009, thus substantially exceeding the previous year's figure of € 18.8 m.

CASH FLOW STATEMENT – SHORT VERSION

€ m	2009	2008	Change
Cash Flow from			
- Business activities	130.8	169.7	-23 %
- Investment activities	72.8	-127.8	n. a.
- Financing activities	-26.5	89.1	n. a.
Changes in cash and cash equivalents	177.0	130.9	35 %
Cash and cash equivalents			
- Start of business year	321.4	192.5	
- Changes in the value of foreign currency	-1.2	-2.0	
- End of business year	497.2	321.4	55 %

Changes in assets

The decrease in long-term assets by -7.9 % to € 3,528.3 m can be attributed, on the one hand, to sales of long-term properties with a total book value of € 348.1 m, and, on the other, to the negative revaluation result of € -129.1 m. These decreases could only partially be offset by the acquisitions made in 2009 amounting to € 246.8 m.

The key factors for the increase in short-term assets by 38.7 % to € 782.4 m were an increase in receivables and cash equivalents, which more than compensated for the decrease in properties intended for trading, attributable to sales. Both the increase in receivables from joint venture partners and also the increase in the item "Receivables and other assets" are basically attributable to receivables from the sale of properties. Another factor in the "Other assets" item was the increase in fixed-term deposits subject to restricted access.

Cash and cash equivalents as at 31 December 2009 amounted to € 497.2 m as compared with € 321.4 m at the start of the year. This significant increase reflects both income from the sale of properties and also, in particular, the inflow of capital from the issue of two bonds in the fourth quarter of 2009.

The balance-sheet total decreased by -1.9 % to € 4,310.7 m.

Balance sheet – Liabilities

Share capital in the company remained unchanged from the previous year at € 634.4 m, distributed across 87.3 m bearer shares. Some 90 % of the shares are in free float, the remaining 10 % (approximately), together with four registered shares (that each entitle the holder to nominate

FUNDS FROM OPERATIONS (FFO)

a Supervisory Board member), are held by Bank Austria. As at the key date of 31.12.2009 there was unused authorized capital (§ 169 Austrian Act relating to shares (AktG)) in the amount of € 317.2 m which can be exercised until August 8 2012 against contribution in cash or in kind as well as unexercised conditional capital (§ 159 AktG) in the amount of € 317.2 m.

In 2009, the shareholders' equity (including minority interests) dropped from € 1,854.7 m to € 1,729.2 m. This decrease was primarily due to the negative consolidated net income.

Additional critical factors were as follows:

- A drop in minority interests due to the losses attributable proportionately to the minority shareholders of CA Immo International and the minority shareholders of its subsidiary CA Immo New Europe Property Fund.
- As a result of the sale of own shares in the fourth quarter of 2009 (see also the Chapter headed "Investor Relations" in the Annual Report 2009 on page 22), equity capital increased by € 12.3 m. € 11.9 m of this sum is accounted for by the release of the reserve set up for own shares, and € 0.4 m by the positive sum of the difference between average purchase and selling price for own shares. A total of 1,494,076 shares (1.71 % of share capital), which had been bought on the stock exchange by CA Immo in 2008 for an average price of € 9.18, were sold at a price of € 9.55 per share. The Management Board received authorisation for the share buyback at the 21st AGM on 13 May 2008.

The equity ratio as at 31 December 2009 was 40 % (31 December 2008: 42 %).

Financial liabilities

The long-term financial liabilities reduced by 15.9 % to € 1,379.7 m. This decrease is principally due to the discharge of financial liabilities following the implementation of sales. Furthermore, some of the income from the corporate bond issued in the fourth quarter of 2009 was used to repay existing financial liabilities. The increase in liabilities from bonds from € 194.9 m as at 31 December 2008 to € 472.5 m as at 31 December 2009 reflects the issues of a corporate bond and a convertible bond in the fourth quarter of 2009. The corporate bond has a volume of € 150 m, a term of 5 years and a rate of interest of 6.125 %. The volume of the convertible bond, which also has a term of 5 years, is € 135 m, and the interest rate is 4.125 %. The conversion price was set at € 11.8502, representing a premium of 27.5 % over the share price at the time of the issue. The conditions of both these bonds provide for a redemption right for the bond holders in the event of a change of control at CA Immobilien Anlagen AG (the same also applies to the bond issued in 2006). There are no other significant agreements that would take effect in the event of a change of control.

The Group also has lines of credit available for development projects, drawn gradually by the banks as construction progresses. The current usage is contained in the debit balance of the financial liabilities. Joint ventures are included at the level of the participating interest. CA Immo has a total of about € 124.3 m available from the credit lines that are open and not yet fully utilised for projects in Central and Eastern Europe, and some € 391.7 m for projects in Germany (including Tower 185 with € 270 m).

About 99 % of financial liabilities are in Euro. CA Immo's interest rate hedging strategy provides for comprehensive hedging of the risk of interest rates changing. For this reason, long-term loan agreements are concluded with hedges in the form of interest rate swap contracts or fixed interest agreements. Thus, as at 31.12.2009, 58.7 % of financial liabilities were secured with interest rate swaps and a further 26.0 % with fixed interest rate agreements. 15.3 % of the financial liabilities were at variable rates. Given the current low level of interest rates, development project loans are generally taken at variable rates with a "lock-in" clause being used, according to which a fixed-rate agreement will be concluded if a specified interest rate is exceeded. This allows CA Immo to remain below the calculated

RESULT BRIDGE BETWEEN CONSOLIDATED NET INCOME 2008 AND 2009

financing budget for construction costs while still retaining cost stability if interest levels rise.

The average interest rate of bank and bond liabilities at the end of the 2009 business year was 4.74 % (2008: 5.27 %) after taking into account the interest rate hedging in each case.

Since the beginning of the year, therefore, the net debt (financial liabilities including bonds and less cash and cash equivalents and securities) has fallen by around 7.5 % and was € 1,472.3 m as at 31 December 2009; the gearing (ratio of net debt to shareholders' equity) fell slightly from 85.8 % as at 31 December 2008 to 85.1 % as at 31 December 2009.

As at 31 December 2009, the annual maturity profile of the financial liabilities was as shown on the next page.

Net Asset Value

Owing to the annual loss and the other factors described above, the NAV (shareholders' equity excluding minority interests) fell by –3.9 %, from € 1,623.0 m as at 31 December 2008 to € 1,559.0 m as at 31 December 2009. The NAV per share fell by –5.6 % from € 18.92 as at 31 December 2008 to € 17.87 as at 31 December 2009. The number of outstanding shares as at 31 December 2009 was 87,258,600 (31 December 2008: 85,764,524). The increase in the number of shares resulted from the sale in Q4 2009 of treasury shares that had been held by CA Immo at the

MATURITY PROFILE OF THE FINANCIAL LIABILITIES

key date for the previous year. Since the conversion price of the convertible bond issued in Q4 2009 was above the share price at the end of the year, no dilutive effects were included in the computation of NAV per share.

The computation of the NNNAV based on NAV in accordance with the Best Practice Policy Recommendations of the European Public Real Estate Association (EPRA) is shown in the table aside. The significant factor here is the consideration of the effect of discounting on deferred taxes. Since development projects have been entered in the balance sheet since the start of 2009 using Fair-Values and not acquisition costs, as was previously the case, there is no longer any need for value adjustments in the context of the NNNAV.

As at 31 December 2009, therefore, the NNNAV stood at € 1,612.1 m or € 18.5 /share (9.9 % lower than in 2008).

OUTLOOK

Clear signs of stabilisation were observed on our main markets early in 2010. In particular, financiers are increasingly ready to resume supplies of loan capital and equity to the real estate sector. As the financing situation eases, it is reasonable to assume that 2010 will be strongly influenced by trends on the rental market. Given the low inflation rates and muted demand for new lettings on most of our markets, rent levels attainable on new lettings are likely to decline somewhat. We therefore expect rental income to fall slightly in 2010 on a like-for-like basis, particularly with the principal tenant vacating our Erdberger Lände property in Vienna. If we then factor in the effects of forfeited rental income linked to property sales transacted in 2009 (for which completions and acquisitions could only partially compensate), it is likely that rental income for 2010 will be as much as 10 % below that of 2009. Despite this, the management team anticipates a positive overall result for 2010 provided property values stabilise as expected and project completions deliver useful valuation contributions.

In operational terms, the emphasis will be on realising scheduled and ongoing development projects in 2010. To this end, around € 400 m is earmarked for investment (secured through credit approval and existing liquidity).

Another objective will be to maintain the equity ratio around the current level of 40 % in spite of the increase in total assets associated with progress on current development projects. To achieve this, selective sales will again be transacted in 2010 (particularly from current assets).

With stable capitalisation and a healthy level of available liquidity, the CA Immo Group remains in a position to seize opportunities as they arise in the current climate; the Group thus intends to evaluate specific acquisitions, especially with a view to consolidating the portfolio of investment properties.

Outlook on the capital market

Although share prices are generally rising around the world, investors remain unusually circumspect, and prices could fall again on negative reports. In particular, the publicly traded real estate sector is likely to correlate closely with general stock markets into the medium term. The CA Immo share will probably face continued volatility as a result.

Looking ahead to 2010: the principal risks and uncertainties

Our expectations for 2010 are based on certain assumptions concerning the general conditions and the specific circumstances governing the real estate business. The persistently volatile economic situation has created additional uncertainty as regards the company's ability to meet targets on investment volumes, realisation times and earnings quality.

The main factors affecting our business plans for 2010 are likely to be:

- Subsequent developments on international capital markets and the effect of these on economies in our regions.
- The extent to which economic trends affect rental demand and rent levels in specific regions.
- The availability and the cost of borrowing.
- Further developments on the property investment market, the associated price trend and its effect on the valuation of our portfolio.
- The speed at which planned development projects are realised, which will largely be determined by the availability of the requisite outside loan capital and equity.
- Political, fiscal, legal and economic risks, and the transparency and extent of development on specific property markets, especially in the SEE and CIS regions.
- The development of the general interest level.

SUPPLEMENTARY REPORT

The following activities are reported for the opening months of business year 2010:

GERMANY

Major lease extended and expanded in Berlin

The contract with Bombardier Transportation, principal tenant at the Königliche Direktion building in Berlin, has been extended. The company has prolonged its lease agreement for around 15,000 sqm by six years, and will also let an additional 1,530 sqm. The world leader in the rail transport industry established its head offices at the Königliche Direktion in 2005. Extensive architectural and technical upgrading of the neo-renaissance structure was carried out by Vivico.

Competition for new Munich district concludes

In partnership with the state capital Munich, Vivico organised a competition for town planners and landscape architects. Ideas were invited for a new district in the Munich suburb of Berg am Laim on the theme of 'urban nature'. The jury awarded first prize to the designs put forward by Ammann Albers StadtWerke and Schweingruber Zulauf Landschaftsarchitekten (both based in Zurich). The city of Munich will proceed with development of the 135,000 sqm area on the basis of the competition results (and subject to a revision phase).

Project company Zollhafen Mainz starts work

All contracts relating to a long-term 50:50 joint venture between Vivico and Stadtwerke Mainz AG were concluded in mid-January. The project company known as Zollhafen Mainz GmbH & Co. KG has now started work on developing and marketing a harbour area in Mainz, for which planning permission is currently being sought. Over the next 10 to 15 years, the Zollhafen will emerge as a mixed-use urban district for Mainz, with CA Immo investing around € 53 m (including plot of land).

Construction of AMBIGON begins

Construction of the AMBIGON office, commercial and medical centre got under way at the end of January in the Munich district of Schlossviertel Nymphenburg. With a gross floor area of approximately 16,400 sqm, the building combines a range of usage types under one roof: offices, retail outlets, a medical centre and a rehabilitation/fitness zone. The investment volume is around € 40 m. Vivico succeeded in concluding contracts for some 47 % of the rental space before building work had started.

Topping out ceremony held for first office building in Europaviertel; land sold

Vivico is currently engaged in construction of the new German headquarters of BNP Paribas at the Europaviertel in Frankfurt. The topping out ceremony for the building, which has a total gross floor area of some 34,000 sqm, was held in mid-February. BNP Paribas will start to establish its main German offices on around 67 % of the rentable office space in summer 2010.

CA Immo sold the building to Union Investment Real Estate before construction work started. The building, which was developed in line with sustainability criteria, was awarded silver pre-certification by the German Sustainable Building Council (DGNB).

Also in the Europaviertel, a plot of land measuring around 1,600 sqm was sold to STRABAG Real Estate GmbH. STRABAG plans to build a three-star hotel for the operator Gold Inn AG on the "Süd 7" site, which is situated on Europa-Allee; a 20-year lease agreement has already been signed.

AUSTRIA

Two lease agreements concluded with budget hotel chain Meininger

In 2011, Meininger hotels will be established on two CA Immo sites: on Fürbergstrasse in Salzburg (attached to the Zentrum im Berg shopping centre) and on Vienna's Rembrandtstrasse, adjacent to the Augarten park. Meininger, the chain of budget hotels, will lease both hotels (which are scheduled for completion in 2011) for a term in excess of 20 years. The Salzburg hotel will have 100 rooms, with its Viennese counterpart having around 130 rooms. CA Immo will be investing up to € 20 m in the properties.

BULGARIA

In 2007, CA Immo International signed a forward purchase agreement in Sofia, under the project name "Mega-park", for a multi-functional building complex with useful area of about 43,400 sqm. However, ambiguities regarding fundamental elements of the contract cast doubt on whether the forward sale could be realised and led to renegotiation. The status at present is agreement that the project will be realised as a partnership by means of a financial stake expected to stand at 35 %. Completion of the first of two construction phases will be at the end of April 2010.

PERSONNEL

The CA Immo Group has its head office in Austria and also has a presence in Germany and eastern Europe (Hungary, Poland, Serbia, Romania) via subsidiaries. As at 31.12.2009, the Group employed a total of 332 people (31.12.2008: 330). The operational business of CA Immo and CA Immo International is managed by an experienced core team, some of whom have been with the company for many years, and all the German activities of the Group are dealt with via the Vivico Real Estate subsidiary.

CA Immo and CA Immo International: synergies arising from centralised Group control

The agendas of CA Immo and CA Immo International are largely centrally controlled from the head office in Vienna. Staff in the functional areas of Investor Relations, Corporate Communications, Finance and Accounting, Controlling, Legal Affairs and Personnel as well as IT and Organisation is employed by CA Immobilien Anlagen AG and perform their tasks for both companies. The associated costs are divided between the two companies according to requirements so that synergies between the two companies can be exploited cost-effectively. Asset and Investment Management and Holding Management are managed separately by the individual companies, and the areas of property management, project control, book-keeping and facility management for the Eastern European investment properties are covered by local subsidiaries in Poland, Hungary, Serbia and Romania. CA Immo International staff also work in a joint executive capacity for CA Immo New Europe where they and their teams

contribute the necessary expertise to the management of the Special Fund.

Germany: functional merger for increased added value

The process of operational integration of the German subsidiary Vivico Real Estate into the CA Immo Group has now also commenced in the course of a functional merger. The main focus here is the identification and realisation of synergies at both the CA Immo and the Vivico level so as to increase efficiency, on the one hand, and reduce costs resulting from dual structures, on the other. The project is concentrating on unifying the organisational structure of the Group along with the process areas (e.g. concentrated coordination in the administration and service area) and was set up with the assistance of external consultants. In the long term, this should achieve operational stability while taking into account the core competences of the two parts of the company – CA Immo as property investor and Vivico as project developer. Vivico employs a total staff of 193. You will find more details about Vivico in the Chapter headed “Holdings and Funds” on page 05 and about the Group’s activities in Germany in the segment report from page 25 on.

Changes at management level

A first step has been taken by restructuring the Group organisation and redesigning the individual corporate areas (departments, staffs, etc.). The two companies have also been more strongly meshed at Management and Executive Board level: since October 2009, Bernhard H.

PERSONNEL DISTRIBUTION
WITHIN THE CA IMMO GROUP

PERSONNEL DISTRIBUTION
BY COMPANY OFFICE

Hansen (CEO of Vivico) has been on the CA Immo and CA Immo International Management Board as CTO (Chief Technical Officer) and is thus responsible for all the technical units of the Group and for implementation of all the Group's development activities. At the same time, the existing Executive Board of Vivico, made up of Bernhard H. Hansen, Gregor Drexler and Matthias Tripp, has been enlarged to include Bruno Ettenauer and Wolfhard Fromwald. The distribution of competences in the Management Boards within CA Immo is described in the Corporate Governance Report in the Annual Report 2009 on page 28.

Investing in knowledge

Sustainable and dynamic staff development is critically important for the profitable administration of our properties and for the efficient realisation of our development projects in a rapidly changing market environment. In the context of a strategy of requirement-based personnel management, CA Immo invests specifically in the training and continued development of its international staff team.

Staff development sessions, in which performance, potential and development opportunities are explained to individual staff members across all departments, were brought in for the whole Group in 2009.

Human Resources: motivation and responsibility

The wages and salaries paid at CA Immo are commensurate with sector and market norms. In addition to the fixed salary component, performance-related bonuses

have been defined in the form of annual targets agreed with the Supervisory Board. The highest bonus stands at a maximum of 10 % of annual salary for any employee. At management level, there is also a bonus scheme linked to the company's growth and earnings. No staff bonus was paid in 2009 as a result of economic developments. CA Immo pays 2.5 % of employees' annual salaries into a pension fund after they have been with the company for three years. A collective accident insurance policy was also effected in 2009 for all employees of CA Immo and CA Immo International, providing 24/7 cover both at work and during non-working hours.

Please find details concerning salary costs and fees for personnel development measures in chapter "results" from page 39 on.

Women strongly represented

Women are strongly represented in the CA Immo Group making up 47 % of personnel. The proportion of female management staff at the second management level (Group management level) is still as high as 36 %. Work-life balance is also important to the Group: CA Immo uses flexible working time models to actively support compatibility between family and working life, particularly for staff members wishing to return to work after maternity leave or a career break.

PERSONNEL DISTRIBUTION WITHIN THE CA IMMO GROUP

				2009				2008		Change

CA Immo International	59	28	55	32	87	65	25	90	-3	-3 %

RESEARCH AND DEVELOPMENT

Research and development in the CA Immo Group is increasingly focused on one central issue: the sustainable development and management of real estate. The focus was sharpened with the German subsidiary Vivico, which specialises in the transformation of inner city real estate formerly given over to industrial or railway usages. Developments of recent years have shown that sustainability is increasingly emerging as a key competitive factor in the real estate industry.

In the real estate area, research and development activities revolve around long-term economic, ecological and social objectives and tasks:

- Minimising the lifecycle costs of buildings
- Minimising maintenance expenditure in relation to construction expenditure
- Conserving resources and cutting carbon emissions in the construction and management of real estate
- Wherever possible, preventing pollutants in the construction, modification and utilisation of properties and closing the materials cycle as regards building materials
- Creating a suitable living and working environment and promoting social integration (preventing the creation of ghetto areas)
- Linking up working, living and leisure space within the urban framework and thus creating a long-term stable environment

The primary aim of all research and development activity at CA Immo is to safeguard the value of real estate and the quality of life enjoyed by users over the long term. Uniform standards and certification are applied to ensure the transparency of all such activities.

Helping to create a sustainability seal of approval

Although numerous certification procedures are in place around the world, there is no unified “green building” standard. The two main methods used by the CA Immo Group are the American **Leadership in Energy and Environmental Design (LEED)** certification scheme and the seal of approval from the German Sustainable Building Council (DGNB).

To clarify what is meant by “sustainable construction”, the CA Immo Group, through its German subsidiary Vivico, has been heavily involved in the first application of an energy certificate for office properties. The Group supported the creation of a **seal of approval from the German Sustainable Building Council (DGNB)** by taking part

The rating criteria for LEED certification (an American sustainability standard) are based on the following factors:

- Environmentally sustainable site (and location)
- Efficiency of water consumption (utilisation of rainwater)
- Energy efficiency (operation, installation engineering, energy sources)
- Primary building materials (recycling, regional materials, renewable raw materials)
- Quality of interiors (air, light, climate)

in the pilot phase. The seal enables both investors and users to assess the sustainability of real estate much more effectively than has hitherto been possible by assessing lifecycles in a transparent and quantifiable manner. Moreover, in the autumn of 2009, CA Immo became a founding

member of the **Austrian Green Building Council (ÖGNI)**. The aim of the Council, in which CA Immo has been involved from day one, will be to adapt the German seal of approval for sustainable building to Austrian standards.

Global exchange of experiences in sustainable urban development

Through the subsidiary Vivico, CA Immo is an active member of the Urban Land Institute (ULI), a global coalition of leading companies in the field of responsible property development and land use. The ULI exists to promote the proper development of environmentally friendly concepts in the use of land, giving equal weighting to ecological, economic and social considerations. Thanks to the constant exchange of information (which extends to the global level), CA Immo has faster access to pertinent information concerning market, usage and urban development; at the same time, undesirable development is avoided and productive concepts can be applied to the company's projects.

For more information on CA Immo's commitment to sustainability and Corporate Social Responsibility, see the Annual Report 2009 page 39.

FINANCIAL AND NON-FINANCIAL PERFORMANCE INDICATORS

At the heart of the business strategy pursued by CA Immo lies a commitment to achieving a sustained increase in the value of the company. Financial performance indicators (key figures or ratios) are an important identifier and measure of the main factors that contribute to raising value long-term, and are thus used for value management purposes.

The primary such indicator is the net income generated with the money shareholders have invested (RoE– Return on Equity). The target is to produce a ratio that is higher than the imputed cost of equity (we assume a medium-term rate of around 7.5 %) and thus to generate shareholder value. As a consequence of the substantial devaluation of property assets, the return on equity for 2009 is significantly negative – the target was not, therefore, met in the year under review. However, we are confident that the market-related devaluations of property assets have now bottomed out and that we will therefore be able to achieve an appropriate Return on Equity once more in the medium term.

Among the other quantitative factors used to measure and manage our shareholders' long-term yield are the change in NAV per share, the operating cash flow per share, return on capital employed (ROCE) and economic value added (EVA).

Since the financial indicators ultimately demonstrate the operational success of our property business, they are preceded by a series of performance indicators that cannot be immediately quantified in financial terms, which are key to measuring and managing the operating business:

Vacancy rate and average rent

Sound economic data nurture the demand for commercially used premises and invigorate both building activity and the property market. Cyclic discrepancies between supply and demand are reflected in the occupancy rate and attainable rents. Viewed over time, the vacancy rate and average rent are key indicators of a portfolio's quality and its successful management on the one hand, and of the asset managers' ability to respond in a timely fashion to economic influences.

Location quality

The quality of sites is a major criterion in property marketing. The accessibility of a location, determined by the infrastructure, plays a crucial role in this context. Changes in the quality of a location take place gradually and are eventually reflected not only in price, but also in the difficulty of attracting new tenants.

Local presence

Local knowledge and familiarity with the territory are critical factors in the effective cultivation of very diverse regional markets. For this reason, CA Immo maintains its own branch offices in our key markets in Germany and Eastern Europe.

Know-how and synergies

The competitive edge of CA Immo stems from the local knowledge of its operating employees and the leverage of synergies in the Group, in particular in project development and property marketing.

VALUE INDICATORS

		2009	2008	2007	2006
NAV/share		17.9	18.9	22.0	20.6
Change in NAV/share	%	–5.6	–14.1	6.1	6.4
Operating cash flow/share	€	1.40	1.32	1.10	0.93
RoE ¹⁾	%	–4.8	–13.4	3.3	5.9
ROCE ²⁾	%	0.1 %	Negative	5.2	5.8
EVA ³⁾	€ m	Negative	Negative	2.7	11.3

¹⁾ Return on Equity (profit-generating efficiency) = consolidated net income after minority interests / average equity (without minority interests)

²⁾ Return On Capital Employed (ROCE) = net operating profit after tax (NOPAT) / capital employed

³⁾ EVA (economic value added) is a registered trademark of Stern Stewart & Co; EVA = capital employed * (ROCE – WACC); WACC 2009 = 5.1 % (WACC is the weighted average cost of debt and equity)

RISK MANAGEMENT REPORT

The CA Immo Group is exposed to many kinds of risk in the course of its activities as an international manager of property stocks and project developer. These risks have the potential to influence current operational business outcomes and progress towards the strategic goals of the company. Ultimately, continuous growth is invariably associated with risks; for effective countermeasures to be taken, these must be identified at an early stage and assessed for content, impact and likelihood of occurrence. Systematic risk management is thus a key element of the Group's internal controlling process with a direct bearing on strategic and operational decision-making within the company. The Management Board is involved in all risk-relevant decisions and bears overall responsibility for such decisions. At all process levels, decisions are subject to the dual verification principle. Clear internal guidelines and strategies, business and investment plans and the introduction of continuous reporting systems have made it possible to monitor and control the economic risks associated with everyday business activity. All measures are applied to every Group subsidiary; investment plans are subject to scrutiny by the Supervisory Board or its investment committee. Controlling, monitoring as part of risk management and the verification and control aspects of internal auditing ensure the target-focused coordination of planning and information provision. The Internal Monitoring System (IMS) has been expanded to assist in the early identification and monitoring of risks. The effectiveness of risk management at CA Immo is appraised annually by the auditor, who reports findings to the audit committee, Supervisory Board and Management Board. The risks that can confront CA Immo in the course of its business activities are described below.

STRATEGIC RISKS

- **Capital market risk:** Refinancing on the financial market is an important matter for CA Immo. Over the past 18 months, however, it has become clear that the proper functioning of the capital market presupposes adherence to the regulations on the part of its participants, and that breaches of the rules impair the trust of investors and thus make the procurement of capital (both shareholders' equity and loan capital) much more difficult. CA Immo addresses this capital market risk on several levels. Firstly, the company is highly skilled at planning and securing liquidity in order to avoid bottlenecks. Secondly, CA Immo covers itself by entering into equity partnerships (joint ventures) at project level as an alternative and supplement to established sources of equity capital procurement. As regards the raising of loan capital,

CA Immo is increasingly seeking to establish or develop business relationships with domestic and foreign banks (in addition to Bank Austria, its principal bank). Generally, CA Immo regards capital market compliance as a fixed element of corporate risk management involving not just observance of the applicable regulations, but also efficient communication that addresses the interests of investors and analysts and builds the trust of investors on the basis of constant transparency. CA Immo's compliance programme comprises internal guidelines (including compliance guidelines), a code of conduct for staff, training and internal counselling for individuals as required as well as the assertion of sanctions under employment law where violations occur.

- **Geopolitical risks:** In view of the group structure of CA Immo, these risks principally apply to the subsidiary CA Immo International. With the exception of Russia and Serbia, all of the countries in which the company has a presence are EU members, which means greater legal certainty and a lower risk of fundamental political or economic policy reversals. In non-EU member states, consideration is given in specific cases to insuring investments against expropriation, political violence and the convertibility of local currency, and precautions are taken as appropriate.

- **Expansion risk:** The realisation of investment plans, the assimilation of fully acquired property packages and companies and, not least, development projects constitute major challenges for the company and its employees. CA Immo flexibly adjusts the pace of its expansion to global and (above all) regional conditions. In line with the current market climate, the company has recently slowed the pace of growth considerably. Expansion planning is carefully coordinated with the planning of financial and personnel resources. To prevent organisational bottlenecks, service processes have been developed and are subject to continual adaptation. Staff development is addressed by means of active personnel management.

- **Market and liquidation risk:** In its capacity as an investor, the Group is exposed to external, market-specific risks such as macroeconomic trends, developments in tenant sectors, rent development, the activities of other market players and the development of real estate yield across the various segments. Bearing this in mind, CA Immo performs its own exhaustive market analyses prior to any investment decision and as a regular part of portfolio management; the company also maintains constant contact with leading experts in the sector. To minimise regional risks, the ideal resale times for the largest properties in the portfolio are considered as part of

regular discussions concerning location quality, property quality and market changes. In this way, CA Immo reduces the risk of not being able to sell properties, or only being able to sell them at a discount. Through this approach, key early indicators of market risk are systematically applied to evaluations of investment and project plans, and thus to medium-term corporate planning.

- **Concentration (cluster) risk:** “Cluster risk” arises where certain investments are overrepresented in the portfolio. CA Immo addresses the risk of certain properties dominating the portfolio by purposely distributing property assets according to both usage type and geographical location. As a rule, no single investment may exceed 20 % of the total portfolio value for a particular region; joint venture partners are sought for large-scale investment plans.

PROPERTY-SPECIFIC RISKS

- **Property valuation risk:** Real estate prices are subject to considerable fluctuation on account of changing economic conditions (rising and falling interest rates, expanding or contracting economies, imbalance between the supply and demand of real estate and other factors). In common with most companies in the sector, CA Immo opted for the market value method in the conversion of its accounting to IFRS. As a consequence, changes in market value can lead to major discrepancies in results; this has produced some very positive outcomes in recent years, but also extremely negative effects more recently. Value reductions curtail not only results but also equity capital; this in turn adversely affects creditworthiness, with loan-to-value covenants unable to be upheld in some circumstances. CA Immo has its properties externally valued once every year (quarterly in Eastern Europe in view of the significantly higher volatility of property prices). Owing to distortion on the capital market, limited liquidity and the associated low level of property transactions, the lack of comparable transactions and the prospect of distress sales, value assessment has been significantly hampered and properties may only be sold with greater liquidation expenditure, even at the values quoted. To maintain its creditworthiness, CA Immo agrees appropriate leverage in advance and secures appropriate restoration periods in connection with financing.

- **Location risk:** The location of a property has a decisive influence on rentability and long-term letting potential as well as the earning power and sales revenue of a property. Location is therefore the greatest risk associated with real estate investment. To minimise this risk,

CA Immo commissions external experts to carry out regular analyses of locations and trends. Locations that are candidates for investment are assessed separately according to stringent criteria.

- **Investment cost/project development risk:** Since 2006, the CA Immo Group has significantly increased its proportion of development projects, with the area gaining a boost from the acquisition of Vivico Real Estate GmbH in Germany. In Eastern Europe, these activities are mainly managed through the CA Immo New Europe project development fund. The objective is to generate extra income through the addition of the value inherent to project development. Project business is, however, associated with higher risk. Risks can arise from imponderables such as delays in the property use approval or planning permission processes, cost/deadline overruns, construction defects and so on. These risks can never be completely eliminated, even with meticulous planning and monitoring. Project development risk has increased substantially in the past two years as capital market and geopolitical risks have risen and general conditions have changed. Consequently, original project costings have had to be revised, in some instances considerably. CA Immo is responding to the evolving situation as necessary, adjusting book values clearly and appropriately. In general, CA Immo is countering project development risk by choosing partners and service providers with care whilst maintaining stringent controlling, both internally and externally. Controlling involves regular cost monitoring, variance analyses and appropriate reporting. The start-up losses that typically arise in connection with project development also have a detrimental effect on results with the accrual of non-capitalisable costs. Over the project life-cycle, these losses are offset against revenue from lettings and sales; accordingly, projects are only launched where financially viable (the initiation of projects in Germany is subject to pre-letting of 50–60 % on average). CA Immo also runs the risk of construction prices increasing; building firms are rarely prepared to shoulder construction cost risks in the context of development projects. CA Immo has responded to this trend by establishing a wide network within the construction industry. Cost reliability is maximised by awarding contracts singly or in batches and grouping cost pools within large-scale projects. The company also seeks to enter into cooperative partnerships with a view to ensuring price stability throughout the project development cycle.

- **Profit fluctuation risk:** This risk group essentially comprises the aforementioned resale risk along with vacancy

CA IMMO GROUP RISK MANAGEMENT

RISK MANAGEMENT CORPORATE LEVEL

STRATEGIC RISKS	PROPERTY SPECIFIC RISKS	GENERAL BUSINESS RISKS
1. Capital market risk 2. Geopolitical risk	1. Property valuation risk 2. Asset management risk	1. Financial risk 2. Business organisation risk

RISK MANAGEMENT PROPERTY LEVEL

STRATEGIC RISKS	PROPERTY SPECIFIC RISKS	GENERAL BUSINESS RISKS
3. Growth risk 4. Market and liquidation risk 5. Concentration (cluster) risk	3. Location risk 4. Investment cost and project development risk 5. Profit fluctuation risk 6. Management risk 7. Contract risk 8. Environmental risk	3. Seller's risk 4. Insurance risk

risk (where floor space is not let, income is forfeited, vacancy costs arise and the value of a property falls). The risk of loss of rent also falls into this category: we cannot rule out the possibility that the present economic climate will affect the rental market in 2010. To keep vacancy and rent losses to an absolute minimum, CA Immo screens the creditworthiness and reputation of potential tenants. The budgeted and actual revenues generated by all properties are continually monitored, and structured quality checks are carried out. The company also cooperates with reputable estate agents when seeking new tenants. In certain cases, CA Immo has circumvented probable future risks by selling a property – a measure that can be deployed only sparingly at the present time.

- **Property management risk:** The build quality of a property has a considerable influence on the costs of its management. A property that does not comply with current standards can generate higher investment costs in connection with restoration and improvement measures, or fail to attract tenants; this in turn adversely affects the earning power of that property. To stop this happening, CA Immo undertakes technical due diligence prior to acquisition in order to determine a property's quality and the compliance of its fixtures and fittings with CO₂ criteria, energy performance certificates and so on. The

company also maintains close contact with tenants and property managers so that any hidden construction defects can be remedied quickly and cost-effectively. When implementing its own projects, CA Immo seeks to ensure that properties qualify for certification (green building).

- **Contract risk:** In order to minimise risks linked to legal disputes, CA Immo works with lawyers on its relevant target markets, integrating them into decision-making processes at appropriate stages. At the present time, no lawsuits or arbitration proceedings which could have a material influence on the economic situation of the company are pending or foreseeable.

- **Environmental risk:** Increasingly stringent environmental regulations are establishing ecological impact as a determining factor in property valuation to an ever greater degree. Aside from the bearing on value, ecological damage can lead to properties being left vacant or abandoned. CA Immo therefore incorporates this consideration into its wide-ranging assessments prior to every purchase. Appropriate guarantees are also required from sellers. In its capacity as a project developer, the Group makes use of environmentally sustainable materials and energy-saving technologies wherever possible (see also "Property management risk").

FINANCIAL RISK MANAGEMENT

RISK	EFFECT	COUNTERMEASURES
CHANGE IN INTEREST RATES Evaluating interest rate development	Reduced Group success if interest rates rise	<ul style="list-style-type: none"> - Mix of long-term pegged interest rates and loans bearing variable interest - Use of derivative financial instruments
DEVELOPMENT IN EXCHANGE RATE Evaluating the relationship of the EUR to the USD	Significant fluctuation in earnings owing to exchange rate gains/losses	<ul style="list-style-type: none"> - Natural hedging where loans are agreed in the same currency as rental agreements - Changing of USD financing to EUR when changing currency in the rental agreements - Exchange rate hedging
LIQUIDITY Lack of liquidity	Attractive investments cannot be realised	<ul style="list-style-type: none"> - Continual short- and medium-term updating of liquidity planning - Optimisation of investment
CREDIT AGREEMENTS Lack of flexibility of specific conditions	Cost drawbacks during the term of the agreement	<ul style="list-style-type: none"> - Continual checks on credit agreements (including derivatives) for any need for adjustment - Project-related, long-term financing agreements

GENERAL BUSINESS RISKS

- **Financial risks:** Risks linked to liquidity, interest rates, credit and currencies make up the main financial risks. Full details of these risks, along with a corresponding liquidity analysis, are also provided in the notes section starting on page 131. The various financial risks facing CA Immo are as follows:

- **Interest rate risk:** Risks from changes in interest rates are generally linked to long-term financing with outside capital. CA Immo uses a mix of long-term fixed-rate and floating-rate loans to cut the interest rate risk. In the case of floating-rate loans, derivative financial instruments (interest rate caps and interest rate swaps) are also used. Without exception, such instruments are used to hedge against the risk of interest rate changes arising from underlying transactions. These financial instruments are also subject to changes in value. Changes in the value of contracts that can be defined as cash-flow hedges (and the majority of the SWAPs used by CA Immo come into this category) are shown as changes in shareholders' equity. Changes in the value of contracts classified as fair-value derivatives are directly depicted as expenditure or income in the income statement. The reference value for interest rate derivatives is the Euribor,

which has sustained significant falls, leading to negative cash values for the SWAP contracts (in most cases, this related to valuation losses which had no effect on cash). To neutralise the interest rate risk associated with these SWAPs, two new, countervailing SWAPs with a nominal value of € 105.4 m were concluded in business year 2009, thus establishing a fair value hedge in this amount. No risks constituting a serious and permanent threat to the company exist at the present time. Sufficient provisions have been formed for all identified risks. A list of all major interest-bearing liabilities and concluded SWAPs (including details of maturity) appears in the notes section from page 123 and page 127 on.

- **Investment risk:** As of 31 December 2009, CA Immo was mainly investing its liquid assets on the money market (daily allowances); a small proportion is also invested in an ABS fund, which entails exchange risk as well as creditworthiness and liquidity risks. To minimise this risk, shares were continually sold during 2009, significantly reducing the ABS fund volume to € 6.9 m by the end of the year and substantially cutting the risk of value fluctuations. No risks constituting a serious and permanent threat to the company exist at the present time.

- **Currency (change) risk:** Owing to investment activity abroad, the management of currency risks is another important element of risk management. Exchange rate fluctuations can impact on results where rents are payable in foreign currencies or loans were raised in US dollars, Czech koruna or Swiss francs. Non-cash effects on consolidated net income can result from the translation of individual financial statements of subsidiaries outside the eurozone. For this reason, the subsidiary CA Immo International seeks to peg rents to a hard currency when acquiring new properties in Eastern and South Eastern Europe. Loans are taken out in the currency underlying the relevant lease. Owing to the volatility of Eastern European currencies, payments in local currency (with the exception of operating expenses, which can also be paid in local currency) are converted into euros upon receipt.

- **Liquidity risk:** The liquidity risk facing CA Immo is the risk of being unable to settle financial liabilities at the time of maturity. The company thus controls liquidity by ensuring the availability of sufficient financial resources to settle due liabilities. CA Immo is proficient at planning and securing liquidity with a view to preventing bottlenecks of this kind while avoiding unnecessary potential losses and risks. In keeping with the investment horizon for real estate, most of the loans raised are long-term loans.

- **Taxation law risk:** National taxation systems are subject to ongoing change on the target markets of the CA Immo Group. Working with international consultants, CA Immo monitors all relevant debates and decisions taken by national legislators. Despite this, short- and long-term tax rises linked to changing legal frameworks pose a constant risk to revenue.

INTERNAL MONITORING SYSTEM (IMS)

The Internal Monitoring System (IMS) is a conglomeration of systematically structured measures designed to ensure compliance with guidelines and prevent errors; the guidelines include both specific company rules (Group manual, authority to sign, dual verification principle, regulations for release, etc.) as well as legal provisions. The objectives of the IMS are to preclude (preventive monitoring) and identify (detective monitoring) errors in accounting and financial reporting, thus enabling amendments or countermeasures to be introduced in good time. CA Immo defines preventive monitoring as those checks undertaken by responsible administrators as they carry out business processes prior to and/or

within individual systems (e.g. accounting and consolidation software). Detective monitoring refers in particular to controls carried out by responsible heads of department or the head of finance and accounting on the basis of analyses derived from such systems. In accordance with the organisational structure of the CA Immo Group, responsibility for the implementation and supervision of the Internal Monitoring System lies with the appropriate local management teams, i.e. the managing directors of the various subsidiaries are required to perform self-checks in order to assess and document compliance with the monitoring measures making up the IMS, which has been standardised across the Group. To strengthen the Internal Monitoring System, CA Immo set up an internal auditing unit alongside the risk management unit as part of a reorganisation process. The internal auditing section, which is under the control of the full Management Board, will take up its assigned duties in 2010. In future, the unit will monitor compliance with legal provisions, internal guidelines and codes of conduct across the Group on the basis of an annual auditing plan approved by the Management Board (or in response to ad-hoc assessments performed as needs dictate); on an operational level, the unit will review the functioning of (business) processes as regards possible risk and cost-effectiveness and assess the potential for efficiency improvements. In future the internal auditing unit will also supervise the observance of checks by local management teams and determine the dependability of operational information. To achieve this, detailed reporting (EuroSox/SOX documentation) on specific processes and controls as well as accounting and financial reporting is essential. Finally, the results of these assessments will be reported to the responsible executive boards as well as the full CA Immo Management Board. The Supervisory Board will be informed as to the auditing plan and the assessment results at least once a year. Furthermore, the proper functioning of the risk management system will be evaluated annually by the Group auditor, with the findings presented to the Management Board and the Supervisory Board or its audit committee.

CONSOLIDATED FINANCIAL STATEMENTS 2009

A. CONSOLIDATED INCOME STATEMENT FOR THE YEAR ENDED 31.12.2009

€ 1,000	Notes	2009	2008
Rental income	2.1.2.	176,974.5	175,283.6
Income from the sale of properties intended for trading	2.1.3.	78,025.5	88,269.2
Gross revenues from development services	2.1.4.	4,518.9	3,700.4
Other gross revenues	2.1.2.	0.0	1,258.5

In order to ensure the comparability of the segment information 2009 with 2008 the following reclassifications were made in the segment Germany for the business year 2008:

- Reclassification of expenses amounting to € 499.4K from operating expenses to other expenses directly related to properties.
- Reclassification of income from changes in properties intended for trading amounting to € 1,027.5K from book value of properties intended for trading to capitalised services.

¹⁾ Incl. a property in Switzerland.

²⁾ Financing costs and result from financial investments are allocated to the segments before consolidating entries. Financing costs and result from financial investments are therefore comparable only in total with Consolidated Statement of Comprehensive Income.

³⁾ Segment properties include investment properties, investment properties under development, own used properties, properties intended for trading and prepayments made on properties..

⁴⁾ Capital expenditures include all acquisitions in property assets (long-term and short-term), office furniture, equipment, other assets and intangible assets.

⁵⁾ Situation as at 31.12.2009 (31.12.2008), employees in companies consolidated on a proportional basis are included at 100 %.

481,627.0	250,339.3	1,127,182.5	1,859,148.8

In order to ensure the comparability of the segment information 2009 with 2008 the following reclassifications were made for the business year 2008:

- Reclassification of expenses amounting to € 499.4K from operating expenses to other expenses directly related to properties (segment development).
- Reclassification of income from changes in properties intended for trading amounting to € 1,027.5K from book value of properties intended for trading to capitalised services (segment trading).

Income and expenses until completion of properties under construction are allocated to the segment development. Assets and liabilities of properties under construction are solely allocated to the segment income producing.

¹⁾ Incl. a property in Switzerland

²⁾ Financing costs and result from financial investments are allocated to the segments before consolidating entries. Financing costs and result from financial investments are therefore comparable only in total with Consolidated Statement of Comprehensive Income.

³⁾ Segment properties include investment properties, investment properties under development, own used properties, properties intended for trading and prepayments made on properties.

⁴⁾ Capital expenditures include all acquisitions in property assets (long-term and short-term), office furniture, equipment, other assets and intangible assets.

G. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS AS AT 31.12.2009

1. GENERAL NOTES

1.1. Operating activities

CA Immobilien Anlagen Aktiengesellschaft and its subsidiaries (the “CA Immo Group”) is an internationally active property group. The parent company is CA Immobilien Anlagen Aktiengesellschaft (“CA Immo AG”), domiciled at 1030 Vienna, Mechelgasse 1. Subsidiaries exist in Austria, Germany, Switzerland, Bulgaria, Estonia, Croatia, Luxembourg, the Netherlands, Poland, Romania, Russia, Serbia, Slovakia, Slovenia, the Czech Republic, Hungary and Cyprus. As at 31.12.2009, the CA Immo Group held properties in all of the forenamed countries (except the Netherlands, Luxembourg, Croatia and Cyprus).

1.2. Accounting principles

The consolidated financial statements of CA Immo AG were prepared in accordance with the International Financial Reporting Standards (IFRS), to the extent these standards are applicable to companies within the European Union.

The balance sheet date of all companies is 31.12.2009. At the date of preparation of the consolidated balance sheet no published financial data were available for the listed company UBM Realitätenentwicklung AG, Vienna, therefore the half-yearly report dated 30.6.2009 of UBM Realitätenentwicklung AG, Vienna, was drawn on for the consolidated balance sheet.

The consolidated financial statements are presented in one thousand euros (“€K”, rounded according to the commercial rounding method). The use of automatic data processing equipment may give rise to rounding differences in the addition of rounded amounts and percentage rates.

1.3. Scope of consolidation

The following companies are included in the consolidated financial statements in addition to CA Immobilien Anlagen Aktiengesellschaft:

Company	Registered office	Nominal capital	Currency	Interest in %	Consolidation method ¹⁾

The number of consolidated companies developed as follows in the 2009 business year:

	Full consolidation	Proportional consolidation	At equity
As at 1.1.2009	129	26	5
Acquisitions	1	6	0
New establishments	4	1	0
Change to consolidated companies	-2	2	-1
Sales	0	-6	0
Restructurings	-10	-1	0
As at 31.12.2009	122	28	4
- of which foreign companies	102	25	3

¹⁾ FC = full consolidation, PC = proportional consolidation, EQ = At Equity consolidation

In the 2009 business year, the CA Immo Group acquired the following companies:

Company name/domicile	Interest held ²⁾ %	Purchase price € 1,000	First-time consoli- dation date
Lokhalle München Verwaltungsgesellschaft mbH & Co. KG, Munich	50.0	10.0	1.1.2009
- Lokhalle München GmbH, Munich	50.0	–	1.1.2009
Vivico Berlin Europaplatz 01 Verwaltungs GmbH, Frankfurt	100.0	27.5	4.5.2009
Concept Bau Premier Vivico Isargärten GmbH & Co. KG, Grünwald	33.3	5.0	30.6.2009
Concept Bau Premier Vivico Isargärten Verwaltungs GmbH, Grünwald	33.3	8.3	30.6.2009
Infraplan Vivico Isargärten GmbH & Co. KG, Munich	33.3	5.0	30.6.2009
Infraplan Vivico Isargärten Verwaltungs GmbH, Munich	33.3	8.3	30.6.2009

In the 2009 business year the CA Immo Group acquired three project companies and four management companies in Germany. The purchase price for the interest including incidental purchase expenses amounted to in total € 64.1K and was paid in full.

The earnings of the acquired companies are included in the Consolidated Financial Statements from the relevant date of acquisition. The acquisitions were carried in the consolidated financial statements according to the purchase method detailed under Point 1.4.

In addition, the following companies were established and consolidated for the first time in the 2009 business year:

- Vivico Berlin Europaplatz 01 GmbH & Co. KG, Frankfurt (project company)
- Vivico Frankfurt Tower 2-Betriebsgesellschaft mbH, Frankfurt (project company)
- Vivico München Ambigon Nymphenburg GmbH & Co. KG, Frankfurt (project company)
- EG Vivico MK 3 Arnulfpark Verwaltungs GmbH, Oberhaching (management company)
- OOO Saimir, Moscow (management company)

Capital contributions to the newly-established companies totalled € 60.2K.

The capital contribution amounting to € 50.0K from the joint venture partners in REC Frankfurt Objekt KG, Hamburg, led to the interest reducing to 50 %.

50.0 % of the shares in Vivico München MK 3 Arnulfpark Grundstücksverwertungs GmbH, Munich, were sold with effect from 1.10.2009 at a purchase price of € 9,503.4K to a joint venture partner. The purchase price was paid in full. Subsequent to the sale, the company's form and name were changed to EG Vivico MK 3 Arnulfpark GmbH & Co. KG.

Effective 2.7.2009 the CA IMMO NEW EUROPE PROPERTY FUND S.C.A. SICAR, Luxembourg, in which the CA Immo Group holds 60.0 % via CA Immo International AG, Vienna, sold 50 % of its shares to Taverio Enterprises Limited ("Matryoshka" project), Nicosia, to the joint venture partner. With the sale of the shares to Taverio Enterprises Limited, Nicosia, shares in the following companies were also sold:

- Kornelco Holdings Limited, Nicosia
- OOO BBV, Moscow
- OOO BB Invest, Moscow

²⁾ The percentage interests shown relate to the valuations of interests in the relevant individual group companies.

The selling price of € 2 accompanied a settlement to the amount of € 3,545.7K for termination of the joint venture by the CA IMMO NEW EUROPE PROPERTY FUND S.C.A. SICAR, Luxembourg.

In addition, the CA Immo Group disposed CEE Development B.V., Hoofddorp (holding company), and Astrakhan Hotelinvest B.V., Hoofddorp (holding company). The aggregate purchase price of € 7.0K was paid in 2009.

Retroactively to 1.1.2009 MI Immobilienverwertungs GmbH, Vienna, merged with CA Immobilien Anlagen Aktiengesellschaft, Vienna.

Retroactively to 1.1.2009 the following companies merged with Vivico Real Estate GmbH, Frankfurt:

- Vivico München MI 3 Arnulfpark Grundstücksverwertungs GmbH, Frankfurt
- Vivico München MI 5 Arnulfpark Grundstücksverwertungs GmbH, Frankfurt
- Vivico München MI 6 Arnulfpark Grundstücksverwertungs GmbH, Frankfurt
- Vivico München MK 4 Arnulfpark Grundstücksverwertungs GmbH, Frankfurt
- Vivico München HKW – Arnulfpark Grundstücksverwertungs GmbH, Frankfurt
- Vivico Frankfurt Hotel Vermietungsgesellschaft mbH, Frankfurt
- Vivico Frankfurt Tower–2-Hotelbetriebsgesellschaft mbH, Frankfurt

Effective 31.10.2009, two mergers took place when CSB Vagyonkezel Kft., Budapest, merged with its subsidiary Canada Square Kft., Budapest, and Skogs Hungary Kft., Budapest, merged with its subsidiary Skogs Buda Business Center II. Kft., Budapest. Each of the new entities adopted the name of the former subsidiary.

Effective 31.12.2009 Warsaw Financial Center Sp.z.o.o., Warsaw, merged with CA Betriebsobjekte Polska Sp.z.o.o., Warsaw.

The acquisition and/or sale of these companies has had the following effect on the composition of the consolidated financial statements (values at the time of acquisition or final consolidation):

€ 1,000	Acquisition at book values	Adjustment to market values	Acquisition at market values	Sales	Total
Properties as per IAS 40	1,324.2	124.5	1,448.7	-12,894.0	-11,445.3
Properties intended for trading	911.7	0.0	911.7	-8,456.0	-7,544.3
Other assets	252.4	0.0	252.4	-10.5	241.9
Cash and cash equivalents	35.0	0.0	35.0	-49.2	-14.2
Deferred tax liabilities	39.5	-39.5	0.0	1,406.7	1,406.7
Financial liabilities	-878.4	0.0	-878.4	11,160.1	10,281.7
Provisions	0.0	0.0	0.0	69.5	69.5
Other liabilities	-235.5	0.0	-235.5	819.2	583.7
Non-controlling interests	0.0	0.0	0.0	6,498.1	6,498.1
Receivables/liabilities related companies	-1,472.3	0.0	-1,472.3	-6,348.9	-7,821.2
Net assets			61.6	-7,805.0	-7,743.4

In the 2009 business year the CA Immo Group acquired companies which consisted solely of a few assets and liabilities and did not therefore represent going businesses. Therefore, these company acquisitions do not qualify as mergers as defined by IFRS 3.

The 2009 gross revenues of the acquired companies from the date of acquisition amounted to € 0.0K (since 1.1.2009 € 0.0K), while income before taxes amounted to € –3,300.2K (since 1.1.2009 € –3,468.7K). The acquired companies are included in the Consolidated Statement of Financial Position as at 31.12.2009 as assets of € 3,527.7K and liabilities of € 5,941.8K.

The companies are included in the consolidated financial statements with the following proportional values (50 % and 33.3 % respectively). The key items are thus:

€ 1,000	31.12.2009	31.12.2008
Properties as per IAS 40	194,293.9	158,409.5
Properties intended for trading	19,748.6	3,379.5
Other short-term assets	44,609.7	11,008.5
Deferred tax assets	65.9	18.2
Total assets	258,718.1	172,815.7
Long-term liabilities	102,914.0	80,802.0
Short-term liabilities	47,653.9	17,504.3
Deferred tax liabilities	15,405.9	14,595.4
Debts	165,973.8	112,901.7
Rental income	7,463.1	7,547.4
Income from the sale of properties intended for trading	3,145.0	0.0
Other gross revenues	0.0	55.8
Depreciation and amortisation	–764.8	–29,895.3
Result from revaluation	–11,190.8	10,039.0
Other income	1,489.6	634.0
Other expenses	–6,578.0	–19,399.2
Financial result	–4,364.3	–5,922.1

For the companies included in the consolidated financial statements within the scope of the at equity consolidation

- OAO Avielen AG, St. Petersburg
- Soravia Center OÜ, Tallinn
- UBM Realitätenentwicklung AG, Vienna
- Isargärten Thalkirchen GmbH & Co. KG, Grünwald

the following information is available regarding assets, liabilities, rental income and results for the periods:

€ 1,000	31.12.2009	31.12.2008
Properties as per IAS 40	403,047.4	413,964.2
Short-term assets	166,799.8	156,398.2
Long-term liabilities	350,246.8	296,156.6
Short-term liabilities	92,324.5	152,906.4
Group's share in net assets	31,747.6	30,567.7
Rental income	108,209.1	87,858.7
Result for period	2,301.6	7,627.6
Group's share in consolidated net income	565.8	1,893.5

1.4. Consolidation methods

The first-time inclusion of a newly acquired subsidiary in the consolidated financial statements is done in accordance with the purchase method by allocating the acquisition costs to the revalued assets (especially properties) and liabilities of the subsidiary.

The acquisition of property companies generally concerns the acquisition of individual assets and liabilities and did not therefore represent going businesses. Therefore, these company acquisitions do not qualify as mergers as defined by IFRS 3.

All intragroup transactions between companies belonging to the scope of full and proportional consolidation, and the relevant income and expenses, receivables and payables as well as unrealised interim profits, are eliminated.

If a material influence can be exerted on the business and financial policy of companies (associated companies), these companies are carried at equity and the proportional annual surplus/loss of the company is entered under the book value of the shares. The value of any dividends is proportionally reduced.

1.5. Foreign currency translation

Business operations in foreign currency

The individual group companies record foreign currency transactions at the mean rate of exchange ruling on the day of the relevant transaction. Monetary assets and liabilities in foreign currency existing at the balance-sheet date are translated into the Group currency, the euro, at the applicable rate of exchange on that date. Any resulting foreign currency gains or losses are recognised in the income statement of the relevant business year.

Translation of individual financial statements denominated in foreign currency

The Group currency is the euro (EUR).

Since the euro is also the functional currency of the companies located outside the European Monetary Union in Eastern/South East Europe and included in the Consolidated Financial Statements, the financial statements prepared in foreign currency are translated in accordance with the re-measurement method. Under this method, investment property (investment properties and investment properties under development) as well as monetary assets and liabilities are translated at closing rates, whereas other non-monetary assets are translated at historical exchange rates. Items from the income statement are translated at the average exchange rates of the relevant reporting period. Any gains and losses resulting from foreign currency translation are recognised in the income statement.

For the subsidiary in Switzerland the functional currency is the Swiss Franc (CHF). Balance sheet values are translated at the valid closing rates. Only the shareholders' equity is translated at historical exchange rates. Items from the income statement are translated at the average exchange rates of the relevant reporting period. Any gains and losses resulting from the application of the closing rate method are not recognised in the income statement and are reported under shareholders' equity in the reserve from currency translation.

The foreign currency translation was based on the following rates of exchange:

	Croatia	Hungary	Slovakia ¹⁾	Czech Republic	Poland	Romania	Bulgaria
	HRK	HUF	SKK	CZK	PLN	RON	BGN
Closing rate 31.12.09	7.3000	272.0000	—	26.4000	4.1225	4.2250	1.9558
Average exchange rate 2009	7.3543	281.5375	—	26.5179	4.3475	4.2438	1.9557
Closing rate 31.12.2008	7.3990	265.5500	30.1260	26.5000	4.1880	4.0300	1.9550
Average exchange rate 2008	7.2300	251.1000	31.1743	24.9875	3.5355	3.7075	1.9528

	Russia	Serbia	Switzerland	CHF		USD	
	RUB	RSD	CHF	Selling	Buying	Selling	Buying
Closing rate 31.12.09	43.4000	96.5000	1.4876	1.4940	1.4812	1.4410	1.4310
Average exchange rate 2009	44.3238	94.2500	1.5112				
Closing rate 31.12.2008	41.4500	89.3000	1.4932	1.4966	1.4868	1.4140	1.4040
Average exchange rate 2008	36.7831	81.7625	1.5810				

1.6. Accounting and valuation principles

All compulsory amendments to existing IAS and IFRS and IFRIC and SIC interpretations (previous standards and their amendments, and new standards) to be applied in the European Union (EU) as at 31.12.2009 were taken into account in the preparation of the consolidated financial statements. The consolidated financial statements of the CA Immo Group therefore complies with the International Financial Reporting Standards.

1.6.1. First-time application of new and revised standards and interpretations

The following standards and interpretations, already an integral part of EU law, were to be applied for the first time in 2009 business year:

- Amended version of IAS 1 (Presentation of Financial Statements)

As a consequence of the amendments to IAS 1, some of the constituents of the financial statements have been restructured and renamed. One of the key changes to IAS 1 is the Statement of Comprehensive Income, which contains the earnings components of the Income Statement that are recognised in profit or loss, and the earnings components that are recognised directly in equity. The CA Immo Group adopts the two statement approach when disclosing its comprehensive income. One statement contains all the expenses and income that are recognised in profit or loss. The second statement contains all the earnings constituents that are recognised directly in equity. Starting with the result for the period as per the Income Statement, the Statement of Comprehensive Income thus gives rise to a general statement of performance during the accounting period. The statement of changes in shareholders' equity is therefore abridged. It now serves the purpose of separately depicting transactions with the owners of the company.

- Amended version of IAS 23 (Borrowing Costs)

IAS 23 has been revised to change the way in which financing costs are recognised. These costs must now be capitalised if the property concerned is a qualifying asset. The application of IAS 23 is not obligatory, however, for assets recognised at market value. The amendment of IAS 23 does not trigger any change in the accounting and valuation methods because the CA Immo Group was already exercising the capitalisation option available in prior years. It will continue to capitalise the financing costs for properties under development as acquisition and production costs.

¹⁾ Adopted the euro on 1.1.2009

- **Improvements to the IFRS issued in 2008 in various standards, in particular the amendment of IAS 40**

The “Improvements to IFRS 2008” entailed the amendment of IAS 40. Investment properties under development that are to be used later as investment properties are no longer to be measured at amortised acquisition or production cost, but at fair value. The amendment of IAS 40 is to be applied prospectively from 1.1.2009.

- **Amendments to IFRS 7 “Financial instruments: Disclosures”**

The amendments require additional disclosures about financial instruments in the Notes. In particular, the extent to which fair values of financial instruments are determined on the basis of published market prices or unobservable internal company data must be shown using a so-called “fair value hierarchy”. Furthermore, the duties of disclosure are extended to include liquidity risks from financial instruments. The 2009 consolidated financial statements of the CA Immo Group have taken into consideration the amendments to IFRS 7.

- **IFRS 8 (Operating Segments)**

This standard replaces IAS 14 and requires that external segment reporting exclusively reflects the control and reporting variables that are used internally (“management approach”). The presentation of segments is done for the CA Immo Group by region and division, and corresponds to the internal reporting system. Application of the IFRS 8 does not give rise to any change in segment reporting.

- **IFRIC 14/IAS 19 (The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction)**

IFRIC 14 provides general guidelines on determining the upper limits of the surplus amount of a pension fund, which under IAS 19 may be carried as an asset. The amendment is relevant if a company, which has to make minimum contributions in relation to its pension plans, makes advance payments towards this. The change in interpretation enables the company to carry the benefit from these advance payments as an asset. Application of the IFRIC 14 has already been taken into account in the consolidated financial statements of the CA Immo Group.

- **Amended version of IAS 27 (Consolidated and Separate Financial Statements)**

The amendments contain simplified arrangements for the valuation of investments in an individual financial statement that is prepared under IFRS for the first time. There are no consequences for the consolidated financial statements.

- **Amendments to IAS 32 (Financial Instruments: Presentation)**

In order to improve understanding of the final recipients of the financial instruments and their influence on the asset, financial and earnings position, specific issued instruments, which previously in spite of great similarities with ordinary shares were classified as liabilities, are now to be allocated to shareholders' equity. There are no consequences for the consolidated financial statements of the CA Immo Group.

- **Amendment of IAS 39 (Financial Instruments: Recognition and Measurement) concerning the reclassification of financial instruments and relating to embedded derivatives**

The amendments contain transitional arrangements and a clarification regarding the date of application of the option introduced in 2008, of valuing certain non-derivative financial assets at amortised acquisition costs which previously had to be valued at fair value. See IFRIC 9 “Embedded Derivatives” for further details. The CA Immo Group does not make use of this option; therefore there are no consequences for the consolidated financial statements.

- **Amendments to IFRS 1 (First-time Adoption of International Financial Reporting Standards)**

The amendments to IFRS 1 have the objective of avoiding unreasonably high costs during the transition to IFRS. The amendments have no effect on the consolidated financial statements of the CA Immo Group.

- Revised version of IFRS 2 (Share-based Payment)

This lays down that terms of implementation are only terms of service and performance. Moreover the rules on premature termination apply regardless of which party terminates the pro-rated remuneration plan, i.e. the company or another party, which previously was not the case. This standard has no consequences for the consolidated financial statements of the CA Immo Group.

- IFRIC 9 (Embedded Derivatives)

The amendments to IFRIC 9 and IAS 39 “Embedded Derivatives” clarify the arrangements under which, when reclassifying a financial instrument previously valued at fair value and recognised in profit or loss to the category “Valued at amortised acquisition costs”, it must be examined whether the relevant embedded derivatives are liable to separation.

The amendment was necessary to clarify that the scope of IFRIC 9 excludes contracts with embedded derivatives, which are acquired in a merger of companies under joint control or on formation of a joint venture. The revised definition of an operating activity in IFRS 3 (2008), shifts the formation of a joint venture into scope of IFRIC 9.

The IASB (International Accounting Standards Board) has stipulated compulsory adoption already for business years that end on or after 30.6.2009. First-time adoption has no consequences for the consolidated financial statements of the CA Immo Group.

- IFRIC 13 (Customer Loyalty Programmes)

IFRIC 13 deals with the accounting and valuation of bonus credits granted to customers on the purchase of goods and services. Application of IFRIC 13 has no effect on the CA Immo consolidated financial statements.

1.6.2. New and revised standards and interpretations that are not yet compulsory

The following amendments and new versions of standards and interpretations had already been endorsed by the EU as at the balance sheet date, but their application was not yet compulsory in the reporting period:

Standard/ Interpretation	Content	Effective date ¹⁾
IAS 32	Amendment about Classification of Rights Issues The amendments concern the accounting by the issuer of subscription rights, options and warrants to acquire a fixed number of equity instruments denominated in a currency other than the issuer's functional currency.	1.2.2010
IAS 39	Financial instruments: Recognition and Measurement The amendments substantiate the principles of accounting hedge relations. The amendments concern the requirements for the qualification of inflation risks as underlying transaction of a hedge relation. Unresolved issues regarding the hedging of unilateral risks are also clarified.	1.7.2009
IFRS 1 (revised)	First-time Adoption of International Financial Reporting Standards Restructured version of IFRS 1, in which outdated transitional provisions were deleted and minor amendments were made to the text.	31.12.2009

¹⁾ The standards and interpretations are to be applied to business years commencing on or after the effective date

Standard/ Interpretation	Content	Effective date ¹⁾
IFRS 3 (revised) / IAS 27	<p>Business Combinations</p> <p>Amended regulations on accounting of company acquisitions. Particular changes are to the scope of IFRS 3 and the accounting of gradual share acquisitions. Moreover IFRS 3 (revised) provides an option: the shares of non-controlling limited partners may be valued at their fair value or with the proportional net assets.</p> <p>In the revised version of IAS 27 the IASB has in particular amended the regulations on accounting of transactions with non-controlling shareholders of a group: Transactions used by a parent company to change the proportion of its interest in a subsidiary, without surrendering control, shall in future be recorded as equity transactions not recognised in profit or loss. New rules have also been introduced concerning accounting in the event of loss of a controlling position with regard to a subsidiary: The standard stipulates how a final consolidation result is calculated and any residual interest in a former subsidiary is valued after a partial sale</p>	1.7.2009
IFRIC 12	<p>Service Concession Arrangements</p> <p>Governs the accounting of agreements under which private companies conclude contracts with government bodies, intended to implement mandatory duties. The private company hereby makes use of infrastructure which remains under the authority of the government bodies.</p>	1.4.2009
IFRIC 15	<p>Agreements for the Construction of Real Estate</p> <p>Governs the accounting of real estate sales, whereby the contract is concluded with the buyer before completion of the construction work. The interpretation in particular clarifies the requirements under which IAS 11 or IAS 18 is applicable and the date on which the gross revenues should be realised.</p>	1.1.2010
IFRIC 16	<p>Hedges of a Net Investment in a Foreign Operation</p> <p>Dubious issues in relation to currency hedging a foreign business concern are clarified.</p>	1.7.2009
IFRIC 17	<p>Distributions of Non-cash Assets to Owners</p> <p>Governs the accounting for the distribution of non-cash assets to the owners of a company</p>	31.10.2009
IFRIC 18	<p>Transfers of Assets from Customers</p> <p>Governs the accounting of assets transferred by customers to a company, in order to be connected to a network or receive permanent access to a supply of goods or services</p>	31.10.2009

The indicated new versions and interpretations are not being applied prematurely.

The amendments are not at present believed to have any material effects on the presentation of the asset, financial and earnings position of the CA Immo Group.

¹⁾ The standards and interpretations are to be applied to business years commencing on or after the effective date.

1.6.3. Change of recognition, accounting and valuation methods

Change to IAS 40

The “Improvements to IFRS 2008” entailed the amendment of IAS 40. Investment properties under development that are to be used later as investment properties are no longer to be measured at amortised acquisition or production cost, but at fair value. The amendment of IAS 40 is to be applied prospectively from 1.1.2009. Since the CA Immo Group exercises the option afforded by IAS 40 and measures investment properties at market value, properties under development must be measured at market value from 1.1.2009.

The effect of this amendment of IAS 40 on the Consolidated Income Statement for 2009 is as follows: As at 31.12.2008, the properties under development in Germany contained undisclosed reserves not recognised in the consolidated financial statements according to IFRS in the amount of € 66,840.9K, and those in Eastern and South East Europe in the amount of € 130.8K; these reserves were revalued and recognised in profit and loss effective the start of 2009. There were no undisclosed reserves in the property under development in Austria as at 31.12.2008. The valuation of the property under development in 2009 is shown in Revaluation gains/losses. The Consolidated Income Statement for the 2009 business year includes revaluation gains/losses for property under development in Austria of € –3,048.7K, in Germany of € 15,181.0K, and in Eastern/South East Europe of € –26,261.9K. Until the previous year necessary impairment losses were shown in the Consolidated Income Statement under Depreciation and amortisation (see Point 2.1.10.) .

Reductions in market value were shown in 2008 as Impairment losses and in 2009 as Revaluation losses. The amendment of the IAS 40 therefore affects the Consolidated Income Statement only in the event of revaluation gains. For the property under development shown in the consolidated balance sheet as at 31.12.2009, the following revaluation gains less deferred taxes were accounted for in the 2009 business year:

€ 1,000	Austria	Germany	Total
Revaluation gain from properties under development	604.7	45,399.2	46,003.9
Deferred tax	–151.2	–14,430.2	–14,581.3
Increase of consolidated net income 2009 based on revaluation properties under development	453.5	30,969.1	31,422.6

The amendment of the IAS 40 thus increased the earnings per share in the current business year by € 0.36.

Reclassifications of Consolidated Income Statement 2008

In the 2008 business year the changes in stock of property intended for trading was offset with the book value or with direct material costs. As however the changes in stock concern the capitalisation of indirect expenditure on property intended for trading, changes in stock are now shown together with capitalised services according to the net operating income (NOI). For this reason and to ensure comparability as per IAS 1 the sum of € 1,027.5K was reclassified in 2008. The third comparison period lapses, as property intended for trading was included in the accounts for the first time in the 2008 business year on account of purchase by the Vivico Group.

The ongoing operating expenses for property under development, e.g. property tax, insurance fees, property management costs, are shown under real estate-related expenditure, unless charges can be passed on to a tenant on the basis of an ongoing construction project. Hereby, as per IAS 1 for comparability in 2008 an expenditure to the amount of € 499.4K was reclassified from operating expenses to other expenses directly related to properties.

1.6.4. Accounting and valuation methods in detail

Property valuation

The external valuations were carried out generally in accordance with the standards defined by the Royal Institution of Chartered Surveyors (RICS). The RICS defines the fair value as the amount for which a property could be exchanged between willing parties in an arm's length transaction in which both the buyer and the seller act knowledgeably, prudently and without compulsion. The crisis in the global financial system has triggered considerable uncertainty in commercial property markets. For a certain period, therefore, prices and values can be subject to significant fluctuations. The current lack of liquidity in the capital markets could make it more difficult to sell the investment properties in the short term.

As a general rule, the value appraisers also take into consideration future changes in contractual rents, anticipated vacancies and their duration, lease expiration profiles and an estimation of the market rent for vacant premises and premises becoming available in future. Especially in the case of properties with a low occupancy rate and vacancies anticipated at short notice, this factor can give rise to discrepant values if the market rent and rentability are incorrectly estimated.

The valuation methods are described in detail by region below.

Valuation in Austria:

99 % of the total investment properties in Austria were externally valued as at the reporting date 31.12.2009. In Austria valuation took place in accordance with national valuation standards, which comply with the latest professional principles. Austrian valuation law defines the market value as the value that is normally generated for such properties in a sales transaction between bona fide parties. This national Austrian standard corresponds with the capitalised earning value method, the asset value method, and the comparative method. For properties in commercial use, the capitalised earning value method is used. As with the cash flow method, future contracts and expenditure are also discounted on the valuation date. Relevant components in determining the discounting factor or the gross yield are not only estimation of the risks compared with a risk-free investment, but also the index and the estimated remaining life of the building.

Valuation in Germany:

Valuation of all properties (investment properties, investment properties under development and property intended for trading) in Germany was carried out as at the reporting date of 31.12.2009. About 94 % of the value of these investment properties was determined by external experts. Other investment properties were adjusted internally by a certified expert on the basis of valuation of the previous year or on the basis of binding purchase agreements.

Selection of valuation methods depends on the stage of development and the type of use of a property. The leased office properties, hall and logistics properties are valued using the capitalised earning value method or the investment method. For properties still under construction, the residual value method is used.

For undeveloped sites the comparative method and/or the liquidation, calculation and residual value method is used.

Parameters and factors determining the value include amongst other things location, quality of build and other aspects such as state of development, conservation of ancient monuments, and contamination, etc.

The parameters and other value-influencing factors are determined for each property derived from the market data during valuation or by qualified assessment by the surveyor.

Valuation of properties in Eastern Europe:

All the investment properties and a majority of the investment properties under development were valued effective 31.12.2009 by independent, international experts taking the current market situation into account. For property under development with a balance sheet value of € 5,420.0K, i.e. about 8 % of the balance sheet value of the total investment properties under development, no external valuation reports were obtained.

In Eastern Europe, the calculated fair values of the investment properties are based on discounted, expected future cash flows or capitalised rental income. The present value of the future cash flows is determined by discounting these cash flows as at the reporting date. The discount rate is established on the basis of yields arising from transactions with comparable properties. In view of the lack of liquidity, hardly any transactions took place in most Eastern European countries. This absence of liquidity is reflected in the increasing and strongly fluctuating yields.

In the case of investment properties under development, the calculated market value is based on the projected earnings value of the projects upon completion, with an appropriate developer profit and taking into consideration the outstanding cost to completion (residual value method). Any risks were considered either in the expected future cash flows, the estimated rent or in the capitalisation interest rates used. The interest rates vary, in particular depending on the different property locations, and were determined based on experts' empirical values. Land acquisitions on which no active developments are expected in the near future are valued on the basis of comparative transactions.

The most relevant components in the valuation of the investment properties in Eastern Europe are first, the estimated rental value, which reflects the sustainable rent that can be obtained for the property and, therefore, the estimation of the market rent for new and substitute tenancies, and second, the equivalent yields. Year on year, the equivalent yields have increased by around 0.5 % to 1.5 % and currently lie in a band from 7.65 % to 9 % for Hungary, 7.5 % to 8 % for Poland, and 9.25 % to 9.75 % for Serbia. In Romania, Slovakia and Bulgaria, the equivalent yields stand at just above 9 %. For the hotel properties in the Czech Republic and Slovenia, the recognised equivalent yields are between 8 % and 9 %.

Properties held as financial investments (investment properties and investment properties under development)

All properties held as financial investments are measured according to the fair value method specified as an option under IAS 40. Thus the property asset is carried at the fair value as at the balance sheet date. Changes to the current book value before revaluation (fair value from the previous year plus subsequent/additional acquisition or production costs minus subsequent reductions in the acquisition price) are recognised in the income statement in the "Result from revaluation" (see Point 2.3.1. or 2.1.12.).

Financing costs for investment properties under development are capitalised as production costs in accordance with requirements of IAS 23.

Own used properties and office furniture, equipment and other assets

The valuation of own used properties, office furniture, equipment and other assets takes place in accordance with the acquisition cost method, i.e. at purchase or production cost less regular amortisation and impairment losses. Investment grants are recognised as reductions of acquisition costs from point of binding agreement.

Regular depreciation of office furniture, equipment and other assets takes place across the board over the forecast remaining life, which essentially amounts to three to ten years. Regular depreciation of the own used properties, applying the component approach, is 10 to 80 years.

Intangible assets

Intangible assets are carried in the consolidated statement of financial position at acquisition cost less straight-line amortisation and impairment losses. For the amortisation of computer software, a useful life of three to five years was assumed.

The "Other intangible assets" item contained in the statement of financial position is the difference between the distribution of acquisition costs over the relevant fair values of the properties acquired and the relevant undiscounted deferred tax liabilities in accordance with IAS 12. This difference represents the benefit resulting from the later maturity of the deferred tax liabilities. It is amortised regularly in accordance with the maturity. Unscheduled amortisation takes place because of the fall in the properties' market value. The impairments are recognised in the tax expenses.

Impairment losses

If signs of a value impairment are evident, the CA Immo Group determines the recoverable amount for own used properties, office furniture, equipment and other assets and intangible assets. The recoverable amount is the higher of the fair value less the sales costs (net receivable value) and the value in use.

Fair value is the amount for which an asset could be exchanged between a knowledgeable, willing buyer and a knowledgeable, willing seller in an arm's length transaction.

The value in use is the cash value of the expected future cash flows that are likely to be generated by the continued use of an asset and its retirement at the end of its useful life.

If the recoverable amount is lower than the carrying value of the asset, the asset is written down to the lower value.

The calculated impairment loss is recognised in the income statement (see Point 2.3.1. or 2.1.10.).

If at a later date a value impairment ceases to exist, the impairment loss is reversed to profit or loss up to the carrying amount of the amortised original acquisition or production cost (see Point 2.1.11.).

Financial assets

Securities held as short-term assets are subject to common management and are assigned to the category "at fair value through profit and loss" as the portfolio is taxed on the basis of its relevant fair value. Securities from long-term and short-term assets are valued at fair value at the time of purchase and are recognised as income in subsequent periods at the relevant fair values resulting from the relevant stock market quotations. Value changes are recognised in profit or loss. The result of the market valuation is recognised in the income statement under the "Result from financial investments". Purchases and sales are recognised at the trading date.

Loans granted by the company and prepayments on investments in properties are carried at amortised cost.

Investments in associated companies are valued at equity. Changes in the shareholders' equity of associated companies are recognised in profit or loss under "Income from associated companies". Changes in shareholders' equity that are not recognised in profit or loss are recognised in the "Reserves for associates".

Assets held for sale

"Held for sale" under IFRS 5 denotes long-term assets which may be sold in their present state and which are highly likely to be sold. Requirements for classification as "Held for sale" are the existence of an actual intent to sell, the immediate disposability of the assets and – with certain exceptions – sale within twelve months.

As a general rule, these assets are no longer regularly depreciated, but valued at the lower of book value at the date of classification and fair value less sales costs. The CA Immo Group values properties held as financial investments as per IAS 40 in accordance with the model of fair value; the special valuation rules of the IFRS 5 do not apply in these cases.

The valuation rules applicable in 2009 under IAS 40 (see Point 1.6.4.) therefore also apply to the assets classified under IFRS 5. However the special disclosure rules under IFRS 5 do apply.

If the conditions for classification as “Held for sale” no longer apply, the assets are reclassified in the appropriate balance sheet item.

Properties intended for trading

Properties intended for trading in the ordinary course of business, or in the process of development or construction for such sale, are recognised as inventories in compliance with IAS 2.

In contrast to the classification of investment properties in accordance with IAS 40, properties are shown as being intended for trading if the relevant property is intended to be sold during the ordinary course of business or is being constructed with a view to selling it at a later date during the ordinary course of business.

The properties are first valued at acquisition or production cost. Thereafter the properties intended for trading are measured at the lower of acquisition or production costs and net realisable value as at the relevant balance sheet date.

The net realisable value is the estimated sales proceeds obtainable in the ordinary course of business less the estimated cost to completion and the estimated necessary selling costs.

The necessity of writing inventories down below cost to net realisable value is examined separately for each property. Estimates of the net realisable value of the properties classified as inventories are based on market value reports and/or internal valuations.

If the conditions that previously caused write-downs to the net receivable value no longer exist due to changes in circumstances, then the write-down is reversed up to the historic acquisition and production cost as a maximum (see Point 2.3.6.).

Financing costs arising during the construction phase are also capitalised as acquisition or production costs in the case of properties intended for trading if the criteria of IAS 23 are satisfied. Here again, the amendment of IAS 23 does not trigger any change in the accounting and valuation methods because the CA Immo Group was already exercising the capitalisation option available in prior years.

Receivables and other assets

Trade debtors and other assets are initially recognised at fair value and subsequently measured at amortised cost, applying the effective interest-rate method and allowing for impairments.

An impairment for trade debtors is formed depending on the status of the dunning procedure and individual credit rating of the relevant debtor, taking into account securities received, and is recognised if there is an objective indication that the due receivables cannot be collected in full. If a receivable has ceased to be collectable, it is charged off against the impairment losses account for trade debtors. Subsequent payment receipts from receivables that have already been adjusted are recognised in profit or loss and shown under “Other operating income”.

Receivables are original financial instruments, which are not listed on an active market and not intended for sale.

Cash and cash equivalents with drawing restrictions and a remaining term of more than three months are shown under “Receivables and other assets”.

Order completion

Contracts for the provision of services directly connected with the completion of an asset are carried in accordance with IAS 11 and – if requirements apply – under trade debtors.

Within the context of the profit realisation method to be used (“percentage of completion method”), order income and order costs in connection with order completion are recognised according to the progress of performance as at the balance-sheet date. The ratio of the order costs incurred up to reporting date regarding the total order costs estimated on the balance-sheet date (cost-to-cost-method) is hereby determined. Losses expected in connection with the completion order are included immediately as expenditure (see Point 2.1.4.).

Cash and cash equivalents

Cash and cash equivalents include cash, sight deposits with banks as well as other short-term, highly liquid financial assets with an original term of up to three months. This item also encompasses bank balances subject to drawing restrictions of not more than three months.

Payment obligations to employees

In accordance with legal requirements, CA Immo Group is obliged to pay employees taken on in Austria before 1.1.2003 a one-off severance payment in the event of termination or on reaching retirement age. This will depend on the number of years of service and the definitive salary in respect of severance and will be between two and twelve months’ salary. A provision has been made to cover this obligation. The reserve carried is calculated in the same way as it was calculated last year in accordance with IAS 19 using the Projected Unit Credit method based on an interest rate of 5.0 % (2008: 5.75 %), salary increases of 2.0 % expected in the future (2008: 2.0 %), expected inflation of 2.0 % (2008: 2.0 %) and an accumulation period of 25 years (2008: 25 years). All actuarial gains and losses are recognised in the income statement in the year they occur.

The CA Immo Group has the legal obligation to pay 1.53 % of the monthly salary of all domestic staff employed after 31.12.2002 into a staff provision fund. There are no other obligations. This means that the pension scheme is a defined contribution plan (see Point 2.1.7.).

Based on an agreement with a pension fund in Austria and with a support fund for medium-sized companies in Germany, there is a defined contribution pension obligation in respect of employees in Austria and Germany who have worked a certain number of years of service (see Point 2.1.7.).

Four directors of the Vivico Group also have obligations from performance-based pension plans. The commitments involve four future pensions, three of which are for directors who have already resigned. For the performance-based pension plans the pension obligations are determined using the projected unit credit method in accordance with IAS 19. External actuarial reports are obtained for this annually. Pension plan reinsurance was concluded for these pension obligations in 2005. In the 2009 business year plan assets were disclosed in accordance with IAS 19.59 for the first time under “Receivables and other assets” in the consolidated statement of financial position, insofar as the plan assets exceed the cash value of future obligations and the CA Immo Group holds the entitlements. All actuarial gains and losses are recognised in the income statement in the year they occur.

Other provisions

Other provisions are stated if the CA Immo Group has legal or actual payment obligations towards third parties due to a past event and if this obligation is likely to lead to an outflow of funds. Such provisions are stated at the value which can be determined through the best possible estimate at the time the consolidated financial statements are prepared. If a reasonable estimate of the amount is not possible, a provision is not set up and an explanation of the facts must be given in the Notes. If the cash value of the provisions determined on the basis of prevailing market interest rates differs substantially from the nominal value, the cash value of the obligation is stated.

Taxes

The income tax expense reported for the business year contains the income tax of the individual subsidiaries calculated from their taxable income and the tax rate applicable in the relevant country ("actual tax") and the change in deferred tax items recognised in the income statement as well as the amortisation of the item "Other intangible assets" and the fiscal effect from equity entries not recognised in profit or loss, which do not lead to temporary differences (e.g. tax on issue costs for capital increases and options based on convertible bonds, valuation and sales of own shares and – in some cases – on the valuation of derivative transactions) and depreciation of the item "Other intangible assets" (see Point 2.3.2.).

In accordance with IAS 12, all temporary differences between tax accounts and consolidated statement of financial position are considered in the calculation of deferred taxes. Deferred taxes on losses carried forward are capitalised to the extent that such losses carried forward are likely to be netted against future tax profits within the next five to seven years.

For the calculation of deferred taxes, the tax rates expected to apply at the time of reversing the temporary difference are used. The calculation of deferred tax was based on the following tax rates: Austria 25 % (2008: 25 %), Bulgaria 10 % (2008: 10 %), Germany 15.825 % to 31.79 % (2008: 15.825 % to 31.925 %), Croatia 20 % (2008: 20 %), Luxembourg 28.59 % (2008: 29.63 %), the Netherlands 20 % (2008: 20 %), Poland 19 % (2008: 19 %), Romania 16 % (2008: 16 %), Russia 20 % (2008: 24 %), Serbia 10 % (2008: 10 %), Slovakia 19 % (2008: 19 %), Slovenia 20 % (2008: 20 %), the Czech Republic 19 % (2008: 19 %), Hungary 19 % (2008: 16 %), Cyprus 10 % (2008: 10 %) and Switzerland 31.925 % (2008: 29.92 %).

Estimates are to be made for the purpose of forming tax provisions. An examination must also be performed to establish whether an adjustment has to be made for the deferred tax assets. The probability that deferred tax assets arising from temporal differences and losses carried forward can be offset against taxable profits is to be assessed. Uncertainties exist concerning the interpretation of complex tax regulations and regarding the amount and effective date of future taxable income. The impairment test applied to deferred tax assets depends on enterprise-specific forecasts concerning, among other things, the future earnings situation in the relevant group company. In particular against the background of an existing web of diverse international alliances, differences between the actual results and the assumptions on the one hand, and future changes to these assumptions on the other, can influence future tax expenses and refunds. The CA Immo Group forms appropriate provisions for probable charges arising from current tax audits by the relevant national revenue authorities.

Income tax is basically payable in respect of property on both the rental income from the relevant property and profits from the sale of the property. Income from the sale of investments in companies in Germany, Switzerland and Eastern/South East Europe is wholly or partly exempt from income tax if certain requirements are met. Even if these conditions are met in individual cases, the deferred taxes are carried in full for property assets.

Since the 2005 business year, the CA Immo Group in Austria has had a group and tax compensation agreement for the formation of a group of companies as defined by Paragraph 9 of the Austria Corporate Tax Act (KStG). The head of the group is CA Immobilien Anlagen Aktiengesellschaft, Vienna. The following companies are members of the group in 2009:

- CA Immo Anlagen Beteiligungs GmbH, Vienna
- CA Immo Asset Management GmbH, Vienna
- CA Immo BIP Liegenschaftsverwaltung GmbH, Vienna
- CA Immo Galleria Liegenschaftsverwaltung GmbH, Vienna
- CA Immo Germany Holding GmbH, Vienna
- CA Immo International AG, Vienna
- CA Immo International Beteiligungsverwaltungs GmbH, Vienna

- CA Immo International Holding GmbH, Vienna
- CA Immo Investment Management GmbH, Vienna
- CA Immo LP GmbH, Vienna
- CA Immo ProjektentwicklungsgmbH, Vienna
- CA Immo Rennweg 16 GmbH, Vienna
- CA Immo – RI – Residential Property Holding GmbH, Vienna
- BIL-S Superädifikatsverwaltungs GmbH, Vienna
- Parkring 10 Immobilien GmbH, Vienna
- SQUARE S Holding GmbH, Vienna

Within the Vivico Group corporation tax and commercial tax is consolidated in accordance with German tax law between Vivico Real Estate GmbH, Frankfurt, as controlling company and the subsidiaries below as consolidated companies:

- Vivico München Ambigon Nymphenburg Verwaltungs GmbH, Frankfurt
- Vivico Bauphase I Verwaltungs GmbH, Frankfurt
- Vivico Köln K1 GmbH, Frankfurt
- Vivico Köln K2 GmbH, Frankfurt
- Vivico Köln K3 GmbH, Frankfurt
- Vivico München MK 2 Arnulfpark Grundstücksverwertungs GmbH, Frankfurt
- Vivico München MK 6 Arnulfpark Grundstücksverwertungs GmbH, Frankfurt
- Vivico Schöneberger Ufer Beteiligungs GmbH, Frankfurt
- Vivico Schöneberger Ufer Verwaltungs GmbH, Frankfurt
- Vivico Unter den Linden Beteiligungs GmbH, Frankfurt
- Vivico Unter den Linden Verwaltungs GmbH, Frankfurt

Under the profit-pooling contracts effective since the 2005 business year, the subsidiaries are obliged to pay over all their profits (the profit for the business year before profit-pooling less any loss carried forward from the previous year – subject to the formation or release of reserves – to the parent company. Vivico Real Estate GmbH, Frankfurt is obliged to compensate for any other annual deficits incurred during the term of the contract as long as this is not done by taking amounts put in during the term of the contract from the other appropriated reserves.

Financial liabilities

Financial liabilities are stated at the amount actually received. Any difference between the amount received and the repayment amount is allocated over the term of the financing according to the effective interest rate method and recognised under financing costs.

Trade creditors and other liabilities

Trade creditors and other liabilities are measured at amortised acquisition cost.

Derivative financial instruments

The CA Immo Group uses derivative financial instruments, such as interest rate swaps, forward exchange transactions and time options in order to hedge against interest and currency risks. These derivative financial instruments are recognised at fair value at the time the contract is concluded and remeasured at fair value in the following periods. Derivative financial instruments are recognised as financial assets if their fair value is positive, and as financial liabilities if their fair value is negative. The fair value of the derivative financial instruments corresponds to the amount that would be payable by the CA Immo Group if the position were closed on the balance sheet date. The method applied to recognise gains and losses depends on the classification of the derivative financial instrument, as either a cash flow hedge (safeguard against future cash flows) or a fair value hedge (safeguarding the fair value of assets and liabilities), and on the satisfaction of the criteria for hedge accounting.

As at balance sheet date there are swaps without underlying transactions (see Point 2.5.1.).

Cash flow hedges

In the case of derivatives serving the purpose of hedging cash flows and thus qualifying as cash flow hedges, the effective portion of the change in fair value is recognised directly in equity (see Point 2.2.). The ineffective portion is immediately recognised as an expense under the item “Result from derivative transactions”. The measurement gains or losses from cash flow hedges recognised in equity are reclassified into profit or loss in the period in which the conditions for (cash flow) hedge accounting are no longer satisfied.

In order to satisfy the conditions governing classification as a cash flow hedge, when concluding the derivative or other transaction, the CA Immo Group records the hedging relation between the hedging instrument and the underlying transaction, the aim of its risk management, and the underlying strategy pursued when concluding hedging transactions. The effectiveness of the hedging relation is regularly assessed by measuring the prospective and retrospective effectiveness.

The CA Immo Group holds interest rate swaps as a hedging instrument for the interest rate risk arising from variable interest payments.

Fair value derivatives

Derivatives transactions that do not or no longer meet the criteria of cash flow hedge accounting are identified as fair value derivatives. The amendment of the fair value of these derivative hedging instruments is recorded in the consolidated statement of comprehensive income under “Result from derivative transactions”.

To hedge derivative transactions which no longer meet the requirements of a cash flow hedge relation, interest rate swaps are adopted for the first time, and likewise classified as fair value derivatives.

The CA Immo Group primarily uses interest rate swaps, forward exchange transactions and time options in order to hedge against interest and currency risks.

Recognition of revenues

Rental income is recognised on the basis of the lease contracts.

With regard to the entry of gross revenues for property transactions, it is obligatory in accordance with IAS 18 to break down contracts into individual services if significantly different services have been agreed within a contract (multi-component activity). A multi-component activity exists if a contract contains a number of complementary but different individual services, e.g. a service-related activity as well as a sales-related activity. The various components of a contract lead to the realisation of separate income if it is possible to separate them in terms of both content and value. In such cases, the contractually agreed purchase price will be broken down into the purchase price for the property and the purchase price for the services still to be provided. The purchase price for the property is recognised according to the criteria for income realisation in connection with sales. Income for services (development services or other services) is realised based on the progress of performance. The share of the purchase price which is attributable to the income not yet realised is shown on the liabilities side under “Other liabilities” (prepayment received) until the time of realisation.

Income from completion orders is entered – under consideration of IAS 11 – according to the extent of the services provided as at the balance sheet date using the “percentage of completion method” based on the relevant progress of performance. In order to determine the progress of performance of the individual completion order, the ratio between the order costs incurred up to the value date and the estimated total order costs as at the value date is determined.

Income from service contracts is entered – under consideration of IAS 18 – according to the extent of the services provided as at the balance sheet date based on the relevant progress of performance.

Financial result

Financing costs comprise interest payable for external funds, expenses similar to interest as well as results from hedging transactions. Interest is deferred over time.

Foreign currency gains/losses which primarily arise in connection with financing and investment are shown separately in the financial result.

The result from derivative transactions include profits and losses from the sale and valuation of interest rate swaps and interest rate caps unless these transactions are effective cash flow hedges which are recognised under equity with no effect on profit or loss.

The fair values of the interest rate swaps and the interest rate cap are calculated by discounting the future cash flows from variable payments on the basis of generally recognised models of financial mathematics. A cash flow hedge relationship does not exist in the case of interest rate swaps without a concurrent loan agreement, so that changes from the valuation of the interest rate swaps are shown in the “Result from derivative transactions” (see Point 2.1.15.).

The result from financial investments includes the interest, dividends and similar income from the investment of funds and investments in financial assets, profits and losses from the sale of securities and the valuation of securities shown on balance sheet date as well as income and actuarial profits and losses from reinsurance for pension obligations (see Point 2.3.7.).

Impairment of financial investments refers to the valuation of loans and prepayments made on investments in properties.

The income from associated companies encompasses the individual results of companies valued at equity.

2. NOTES TO THE CONSOLIDATED INCOME STATEMENT, CONSOLIDATED STATEMENT OF COMPREHENSIVE INCOME, CONSOLIDATED STATEMENT OF FINANCIAL POSITION AND CONSOLIDATED CASH FLOW STATEMENT

2.1. Consolidated Income Statement

2.1.1. Gross revenues and segment reporting

The Consolidated Income Statement adopts the type of expenditure format and follows the recommendation of EPRA (European Public Real Estate Association).

The segments subject to mandatory reporting were identified on the basis of the information regularly used by the company's principal decision maker when deliberating on the allocation of resources and assessing earning power.

The presentation of segments is done for the CA Immo Group by region and sector, and corresponds to the internal reporting system.

The segments subject to mandatory reporting generate gross revenues from rental activity. The gross revenues are allocated to the country in which the investment property is situated. The majority of gross revenues are earned in Austria and Germany. In the Eastern/South East Europe segment there is no country in which more than 10.0 % of the total rental income is generated.

The CA Immo Group obtains rental income from a large number of tenants. There is one lessee in Germany (Fed. State Hessen) from which the CA Immo Group earns more than 10.0 % of its entire rental income.

€ 1,000	2009	2008
Rental income Fed. State Hessen	41,818.1	41,847.4
Rental income total	176,974.5	175,283.6
Principal tenant as a % of the rental income total	23.6 %	23.9 %
Market value properties leased to Fed. State Hessen	768,203.0	740,887.0
Market value investment properties	2,409,589.1	2,520,674.0
Principal tenant as a % of the investment properties	31.9 %	29.4 %

As a result of the acquisition of the Vivico Group and its main activity in the field of development, allocation of operating segments is also carried out by sector. This is then sub-categorised by properties or management companies' activities. The subdivision is as follows:

- Income producing: let investment properties and own used properties, and investment properties in acc. with IFRS 5
- Development: investment properties under development and land reserves, development services for third parties and investment properties under development in acc. with IFRS 5
- Trading: properties intended for trading

The accounting and valuation principles of segments subject to mandatory reporting correspond with the accounting and valuation principles given in Point 1.6.

The segment reporting by region allocates transactions between the operating segments as follows:

- Management expenses are allocated to the individual operating segments on the basis of actual costs.
- Interest expenses and income are allocated according to the corresponding contracts.
- In addition, the Germany segment is allocated financial liabilities to the amount of € 261,950.5K and related interest expenses and derivative transactions which are based on the acquisition of the Vivico Group. The Austria segment is credited to the same amount.

The segment reporting by sector allocates transactions between the operating segments as follows:

- Management expenses are allocated in proportion to the properties on the balance sheet date.
- Interest expenses and income are allocated according to the corresponding contracts.
- In addition, the Development segment is allocated financial liabilities to the amount of € 261,950.5K and related interest expenses and derivative transactions which are based on the acquisition of the Vivico Group. The Income-producing segment is credited to the same amount.

2.1.2. Rental income/other gross revenues

The rental segment comprises the following:

€ 1,000	2009	2008
Rental		
Rental income	176,974.5	175,283.6
Operating costs passed on to tenants	29,133.7	30,278.5
Gross rental income	206,108.2	205,562.1
Operating expenses	-35,015.9	-37,049.7
Other expenses directly related to properties	-19,696.1	-29,346.3
Net rental income	151,396.2	139,166.1
Net rental income as a % of the gross rental income	73.5 %	67.7 %
Other gross revenues	0.0	1,258.5

The prior year's other gross revenues relate to the income from the hotel business in Ljubljana. The hotel management company was sold with effect from 1.4.2008.

In 2008 expenses to the amount of € 499.4K was reclassified from operating expenses to other expenses directly related to properties (see Point 1.6.3.).

2.1.3. Result from the sale of properties

In accordance with IAS 2, subsequent valuation of properties intended for trading takes place on the quarterly reporting date with the lower of acquisition or production cost and net realisable value. The resultant impairment losses are shown under impairment costs. The annual profits on a property sold within the business year is therefore – in the event of change in the net realisable value during the period – shown under depreciation and amortisation or in the result from the sale of properties.

The total economic result therefore shows the following:

€ 1,000	2009	2008
Trading		
Income from sales	78,025.5	88,269.2
Book value of properties intended for trading	-63,072.2	-69,768.9
Other development expenses/ materials expenses	-5,089.0	-800.3
Result from property transactions	9,864.3	17,700.0
Result from property transactions as a % of the income from sales	12.6 %	20.1 %
Impairment loss on sold properties	-734.9	0.0
Economic result from property transactions	9,129.4	17,700.0

As the changes in stock concern the capitalisation of indirect expenditure on properties intended for trading, changes in stock are now shown together with the capitalised services. In the 2008 business year the amount of € 1,027.5K was reclassified (see Point 2.1.8.).

Details on calculated impairment loss – see Point 2.1.10.

The result from the sale of properties likewise contains multi-component activity, which exist if a contract contains a number of complementary but different individual services, e.g. a service-related activity as well as a sales-related activity. The various components of a contract lead to the realisation of separate income if it is possible to separate them in terms of both content and value.

€ 1,000	2009	2008
Result from sales in the current business year	8,634.8	16,481.5
Result from multi-component transactions and realisation of prepayments received	3,238.5	2,018.8
Other development expenses/ materials expenses	-2,009.1	-800.3
Result from property transactions	9,864.3	17,700.0

2.1.4. Result from development services

€ 1,000	2009	2008
Development services¹⁾		
Gross revenues from commissioned work as per IAS 11	4,152.4	3,700.4
Gross revenues from service contracts	366.5	0.0
Other material costs	-1,756.0	-2,665.9
Result from development services	2,762.9	1,034.5
Result from services as a % of the development revenues	61.1 %	28.0 %
Staff expenses ²⁾	-1,156.3	-1,316.7
Economic result from development services	1,606.6	-282.2

¹⁾ Previous year's figures not comparable, as commenced 1.7.2008

²⁾ Staff expenses contained in indirect expenditure

The incurred costs of commissioned work as per IAS 11 for projects ongoing as at balance-sheet date amount to € 1,240.0K (2008: € 1,137.3K). Prepayments have been received to the amount of € 1,938.1K (31.12.2008: € 1,137.3K). Profits registered according to progress of performance in 2009 amount to € 206.3K (2008: € 18.9K).

In the 2009 business year the changes to standards of performance (degree of completion) of projects accounted for within the scope of commissioned work using the percentage-of-completion-method (PoC) are shown as receivables from PoC (under “Trade debtors” – see Point 2.3.7.).

2.1.5. Operating expenses and other expenses directly related to properties

The expenses listed here are expenses in connection with let investment properties and expenses for investment properties under development that are not capable of capitalisation.

€ 1,000	2009	2008
Operating costs passed on to tenants	-28,414.8	-27,719.5
Own operating costs (vacancy costs)	-6,601.1	-9,330.2
Operating expenses	-35,015.9	-37,049.7
Maintenance costs	-7,960.0	-14,823.8
Bad debt losses and reserves for bad debts	-3,412.3	-1,724.8
Project development and project execution	-1,708.1	-2,794.9
Operating expenses properties under development (without rental)	-1,653.0	-499.4
Property tax	-983.4	-670.9
Agency fees	-950.8	-4,575.5
Administrative fees	-722.2	-2,099.7
Non-deductible property-related pretax	-346.4	-124.3
Insurance fees	-321.5	-490.4
Claims	-181.1	-449.4
Usufruct	-21.4	-154.0
Rental expense (buildings on 3 rd party land)	0.0	-104.5
Other directly related expenses	-1,435.9	-834.7
Other expenses directly related to properties	-19,696.1	-29,346.3
Total	-54,712.0	-66,396.0

The revenue from operating costs passed on to tenants amounts to € 29,133.7K (2008: € 30,278.5K). The difference to operating cost expenses result from profits arising from flat-rate fees for operating costs and from subsequent charging of operating costs for previous years.

The maintenance costs for the current business year chiefly concerns properties in Germany and Austria. In the previous year the maintenance costs were still relatively high on account of work required in relation to acquisition of the “Hessen portfolio” in 2007. Because of the sale of properties and the normal fluctuations in the area of necessary maintenance work, the Vivico Group was able to reduce the costs of maintenance significantly in comparison to the previous year.

Bad debt expenses and valuation adjustments are mainly due to receivables value adjustments in respect of tenants in Germany, Slovenia, the Czech Republic and Austria.

The expenses relating to project development and project implementation relate to non-capitalised expenditure for investment properties under development.

Operating costs for investment properties under development primarily involves property taxes, insurance fees and current property costs such as water charges and cleaning costs for ongoing developments. These properties are not yet let, being incomplete.

Other expenses directly related to properties involve current property costs for let investment properties, e.g. water, electricity, caretaker costs, which are not however categorised as operating costs on the basis of the leases that have been concluded, especially in Germany.

2.1.6. Result from the sale of long-term properties

This item contains earnings from sales of long-term investment properties and investment properties under development.

Under IAS 40 investment properties are valued on the quarterly reporting date exercising the option for investment properties held as financial investment at market value. The annual profits on a property sold within the business year is therefore – in the event of change in the market value – shown in both the result from revaluation and in result from sales. The total economic result consists of the following:

€ 1,000	2009	2008
Result from sale of investment properties	429.2	10,715.2
Result from sale of properties under development	7,299.1	1,022.7
Result from multi-component transactions and realisation of prepayments received	1,489.3	0.0
Result from the sale of long-term properties	9,217.7	11,737.9
plus revaluation gains/losses from sold		
-investment properties in Austria	-4,310.0	0.0
-investment properties in Germany	5,429.2	0.0
-properties under development in Germany	2,890.5	0.0
-properties under development in Eastern/South East Europe	4,478.8	0.0
Result from revaluation of sold properties	8,488.5	0.0
Economic result from property sales	17,706.2	11,737.9

The revaluation loss in Austria results from the valuation in the period of a property sold within the business year (industrial park in Klagenfurt).

The revaluation gain in Eastern/South East Europe is connected with termination of the joint venture for the “Matryoshka” project (see Point 1.3.).

In 2008 there were no revaluation gains/losses for investment properties sold in the period (primarily sale of RTW Sp. z.o.o., Warsaw, on 1.1.2008). For investment properties under development no valuations at market value could be shown in 2008 and thus no revaluation gains (amendment of IAS 40 only on 1.1.2009).

2.1.7. Indirect expenditure

Indirect expenditure consists of the following:

€ 1,000	2009	2008
Internal management		
Staff expenses (excl. for hotel in Ljubljana)	-25,610.8	-22,510.4
Office rent	-2,332.9	-2,200.4
Travel expenses and transportation costs	-1,075.7	-1,360.4
Administrative and management fees	-1,007.0	-1,225.7
Membership fees and licences	-901.9	-462.2
Telephone fees	-611.2	-569.5
Vehicle costs	-562.9	-549.6
Office expenses and other leasing costs	-499.6	-570.0
Seminar and training costs	-41.2	-254.4
Other	-1,004.9	-1,048.8
	-33,648.1	-30,751.4
Legal, auditing and consultancy fees		
Solicitor's fee	-2,509.1	-3,101.7
Auditing costs	-1,575.4	-1,905.6
Reports	-1,197.1	-2,727.5
Tax consulting and accounting fees	-975.9	-1,517.6
Group reorganisation	-836.0	0.0
Other fees	-634.4	-733.0
Notary's fee	-215.4	-224.5
Technical consulting fees	-208.4	-297.4
Staff recruitment and appointment	-79.0	-519.8
	-8,230.7	-11,027.1
Other indirect expenses		
Taxes and duties	-2,602.7	-759.4
Bank charges and bank guarantee fees	-2,112.9	-668.7
Non-deductible value-added tax	-1,724.5	-2,197.7
Advertising and representation	-1,169.0	-3,421.1
Penalties and cases of damage	-1,025.1	-704.9
Insurance fees	-389.4	-264.3
External project management	-369.0	-376.1
Remuneration of the Supervisory Board	-235.5	-116.8
Publication costs	-196.2	-416.9
Marketing and sales fees	-9.0	-614.8
Hotel expenses (Ljubljana) including hotel staff expenses	0.0	-887.8
	-9,833.3	-10,428.5
Total	-51,712.1	-52,207.0

Staff expenses have increased on account of the rise in average employees (white-collar and blue-collar) from 299 in the 2008 business year to an average 312 employees in the 2009 business year. Staff expenses record amongst other things payments to the staff provision fund to the amount of € 62.9K (2008: € 75.0K) and payments to pension funds to the amount of € 284.4K (2008: € 235.5K).

The administrative and management fees primarily contain management services in Austria, in particular for the EDP network, software packages, internet portals and payroll, and administration of CA IMMO NEW EUROPE PROPERTY FUND S.C.A. SICAR, Luxembourg.

Membership fees principally contain subscriptions to Chambers of Commerce.

From legal, auditing and consultancy fees to the amount of in total € 8,230.7K (2008: € 11,027.1K) €2,320.9K (2008: € 4,001.6K) falls to the Vivico Group, €2,308.7K (2008: € 2,897.4K) to Eastern/South East Europe and € 3,601.1K (2008: € 4,128.1K) to other companies.

Taxes and duties essentially include conveyance duty and VAT.

The rise in bank charges at € 1,582.7K results above all from compensation for prepayment on account of unscheduled repayment of loans in Austria and Germany.

Non-deductible pretax mainly relates to Germany which accounts for € 945.5K (2008: € 1,801.2K) and Eastern/South East Europe which accounts for € 777.1K (2008: € 396.5K).

Cost savings meant it was possible to reduce advertising and representation fees significantly compared to the previous year.

Penalties and cases of damage include value adjustments in relation to claims for reimbursement of pretax and unpaid purchase price claims.

The hotel expenses of the previous year concerns the costs for management of the hotel in Ljubljana, which was transferred to an Austrian hotel operator effective 1.4.2008.

2.1.8. Capitalised services and changes to stock

This item shows the indirect expenditure – primarily staff expenses – that is capable of capitalisation, which can be proportionately allocated to investment properties under development and properties intended for trading.

€ 1,000	2009	2008
Capitalised services on properties under development	11,234.3	5,323.5
Changes to stock properties intended for trading	914.5	1,027.5
	12,148.8	6,351.0

In the previous year the changes in stock of investment properties intended for trading was offset with the book value or with direct material costs. The changes in stock however concern capitalisation of indirect expenditure, which is allocated to investment properties intended for trading. Therefore changes in stock are now shown jointly with the capitalised services according to net operating income (NOI). As per IAS 1, to ensure comparability, the 2008 sums to the amount of € 1,027.5K were thereby also reclassified.

2.1.9. Other gross revenues

Other gross revenues consist of the following:

€ 1,000	2009	2008
Agency	1,979.0	111.7
Release of provisions	1,549.6	4,009.0
Settlements from cancellation of rent agreements and compensation	1,517.2	1,867.5
Operating costs passed on to tenants	1,030.7	4,063.8
Insurance compensation	500.8	286.9
Release of value adjustments	295.5	868.8
Discharge of lapsed liabilities	166.5	470.4
Property management revenue	147.2	154.9

€ 1,000	2009	2008
Capital profit from sale of office furniture and equipment	0.8	61.4
Other	1,076.1	840.6
Total	8,263.4	12,735.0

Income from agency work contains Vivico Group management services to joint ventures in Germany, which it was possible to increase on account of greater activities in project developments.

Income from release of provisions to the amount of € 1,549.6K (2008: € 4,009.0K) largely concern release of contractual obligations in Germany at € 1,147.6K (2008: € 3,842.6K).

The revenue from operating costs passed on to tenants concerns expenses from the previous year, where it was still uncertain how much could be passed on in the year that it arose.

The settlements – as in the 2008 business year – concern premature terminations of rent agreements and changes to settlement agreements in Poland, Romania and Germany.

2.1.10. Depreciation and amortisation

Depreciation and amortisation consist of the following:

€ 1,000	2009	2008
Impairment charges for investment properties under development	0.0	–91,384.9
Impairment charges for other long-term assets	–113.7	–1,638.4
Impairment charges for properties intended for trading	–8,555.5	–14,446.0
Scheduled depreciation	–1,723.6	–4,829.9
	–10,392.8	–112,299.2

In view of the amendment of IAS 40, impairment charges for investment properties under development are recognised under the result from revaluation from 1.1.2009.

Impairment charges for other long-term assets concern properties in own use.

Impairment charges for properties intended for trading consist of the following:

€ 1,000	2009	2008
Impairment loss of properties stated on balance-sheet date	–7,820.6	–14,446.0
Impairment loss of properties sold during financial year	–734.9	0.0
Impairment loss of properties intended for trading	–8,555.5	–14,446.0

2.1.11. Reversal of write-down

In the 2009 business year for the properties intended for trading there was a reversal of write-down of up to maximum of the historic acquisition and production costs to the amount of € 544.5K (2008: € 0.0K). The cause of this was largely risen market values in Berlin.

Reversal of write-down is only possible for long-term properties for the own use, as changes in the market values of investment properties and from 1.1.2009 also in investment properties under development as per IAS 40 are shown in the result from revaluation. For long-term properties there was no reversal of write-down in either 2009 or 2008.

2.1.12. Result from revaluation

€ 1,000	2009	2008
Revaluation loss for investment properties under development ¹⁾	-18,911.2	-83.5
Revaluation loss for investment properties	-110,175.3	-178,009.6
Revaluation loss	-129,086.5	-178,093.1
Impairment charges for investment properties under development	0.0	-91,384.9
	-129,086.5	-269,478.0

The revaluation gains/losses arising from investment properties under development and investment properties are shown as a netted amount in the consolidated income statement. In detail, the result from revaluation consists of the following:

€ 1,000	2009	2008
Revaluation gain as at 1.1.2009/amendments IAS 40	66,971.7	0.0
Revaluation gain	58,995.2	16,650.7
Revaluation loss	-255,053.4	-194,743.8
	-129,086.5	-178,093.1

As at 31.12.2008, the investment properties under development in Germany contained undisclosed reserves not recognised in the consolidated financial statements according to IFRS in the amount of € 66.840.9K, and those in Eastern and South East Europe in the amount of € 130.8K; these reserves were revalued and recognised in profit and loss effective the start of 2009.

The 2009 revaluation gains of € 7,087.0K (2008: € 1,638.5K) result from revaluations of investment properties in Austria, of € 47,427.1K (2008: € 1,227.9K) of properties in Germany and of € 4,481.1K (2008: € 13,784.3K) of properties in Eastern/South East Europe.

The 2009 revaluation losses of € 22,384.9K (2008: € 66,246.1K) result from revaluations of investment properties in Austria, of € 76,102.8K (2008: € 60,047.4K) of properties in Germany and of € 156,565.7K (2008: € 60,450.3K) of properties in Eastern/South East Europe.

See the explanations in Point 2.3.1 Long-term properties and office furniture, equipment and other assets.

2.1.13. Financing costs

Financing costs consist of the following:

€ 1,000	2009	2008
Bank interest	-85,216.3	-86,969.6
Bond interest	-11,836.1	-10,768.2
Convertible bonds interest	-1,103.9	0.0
Interest expenses of joint ventures	-2,175.0	-2,622.0
Interest expenses of joint ventures	-10.7	-25.3
Other interest and financing costs	-8,088.2	-4,728.7
	-108,430.2	-105,113.8

¹⁾ 2008: concerns the valuation or measurement of investment properties under development reclassified as investment properties upon completion (see segment reporting by division).

Other interest and financing costs to the amount of in total € 8,088.2K (2008: € 4,728.7K) largely contain the accumulated long-term liabilities, of which € 4,310.5K (2008: € 780.4K) was due to Austria, € 3,192.0K (2008: € 3,764.1K) to Germany and € 585.6K (2008: € 184.2K) to Eastern/South East Europe.

2.1.14. Foreign currency gain/loss

Foreign currency gain/loss consist of the following:

€ 1,000	2009	2008
Value change forward foreign exchange transactions	2,138.5	0.0
Other foreign currency gains/losses	435.0	-3,467.6
	2,573.5	-3,467.6

Other foreign currency gain/loss largely result from unrealised (non-cash-effective) profits and losses from end-of-period valuation of the foreign currency loans taken out in USD and CZK.

2.1.15. Result from derivative transactions

This item contains the valuation results for fair value derivatives.

€ 1,000	Category ¹⁾	2009	2008
Valuation derivative transactions (not realised)	FV/P&L	-8,870.6	-9,908.3
Reclassification as at 31.12.2008 of valuations recorded in shareholders' equity	FV/P&L	-19,090.1	0.0
Ineffectiveness of swaps	FV/P&L	-210.1	0.0
Realised result from derivatives transactions	HFT	-1,952.4	-5,966.2
Result from derivative transactions		-30,123.2	-15,874.5

At € -17,766.6K valuation results contain the valuation of cash flow hedges on account of premature repayment of the underlying loans. In total € -12,824.4K of this is owing to the valuation on 31.12.2008 (reclassification).

In addition the unrealised valuation result includes the "frozen" valuation in the shareholders' equity of cash flow hedges as at 3.12.2008 resp. 23.12.2008 to the amount of € -6,265.7K, which are recognised in profit or loss in the absence of follow-on funding in the 2009 business year. As at 31.12.2009 the fair value of these interest rate swaps amounted to € -6,837.3K. The value change for these interest rate swaps in the 2009 business year was € -571.6K.

Moreover interest rate swaps without cash flow hedge relation of € -3,356.8K were recognised in the result. In order to neutralise the interest rate risk connected with these swaps, additional counter-swaps with a nominal value of € 105,350.0K were concluded in the 2009 business year, also classified as fair value derivatives.

The item "Ineffectiveness of swaps" contains the differences identified as at balance sheet date in effectiveness tests, whereby the effectiveness of the cash flow hedges significantly exceeded 100 %.

¹⁾ FV/P&L At fair value through profit or loss, HFT Held for trading, L&R Loans and Receivables, HTM Held to maturity, CFH Cash flow hedge

2.1.16. Result from financial investments (without impairment)

Result from financial investments consists of the following:

€ 1,000	Category ¹⁾	2009	2008
Result from securities	FV/P&L	-692.8	-15,244.8
Income from bank interest	L&R	3,609.7	13,951.8
Income from interest from loans to associated companies and joint ventures	HTM	3,550.9	3,074.3
Other interest income	L&R	2,353.9	2,652.3
		8,821.7	4,433.6

Details on investment in securities see Point 2.3.8.

The result from securities to the amount of € -692.8K (2008: € -15,244.8K) consists of the following:

€ 1,000	2009	2008
Realised income from securities	-370.1	-9,844.4
Valuation securities (not realised)	-322.7	-5,400.4
Result from securities	-692.8	-15,244.8

In accordance with the categories from IAS 39, financing expenses and income (financing costs, result from financial investments and result from derivative transactions) are broken down as follows:

€ 1,000	Category ¹⁾	2009	2008
Net profits and net losses			
Valuation securities	FV/P&L	-322.7	-5,400.4
Total from instruments designated FV/P&L		-322.7	-5,400.4
Changes in the value of interest rate swaps (CFH frozen) ²⁾	HFT	-6,837.3	1,066.9
Changes in the value of interest rate swaps (CFH relation terminated)	HFT	-17,766.6	-4,909.1
Changes in the value of other ineffective interest rate swaps	CFH	-210.1	0.0
Changes in the value of interest rate swaps (fair value derivative) ³⁾	HFT	-3,356.8	-6,064.8
Changes in the value of interest rate caps	HFT	0.0	-1.3
Total HFT/CFH		-28,170.8	-9,908.3
Total net profits and net losses		-28,493.5	-15,308.7

¹⁾ FV/P&L At fair value through profit or loss, HFT Held for trading, L&R Loans and Receivables, HTM Held to maturity, CFH Cash flow hedge

²⁾ The item contains the valuation of frozen cash flow hedges in shareholders' equity as at 31.12.2008, which are recorded in the Consolidated Income Statement in the absence of suitable follow-up funding. The valuation consists of the frozen value in shareholders' equity as at 31.12.2008 to the amount of € -6,265.7K and the 2009 valuation to the amount of € -571.6K.

³⁾ The item contains interest rate swaps with valuation to the amount of € -2,751.2K, which on account of lack of follow-up funding does not meet the requirements of a cash flow hedge. For two of these swaps interest rate swap transactions with a valuation to the amount of € 605.6K were concluded as off-set entries for security.

€ 1,000	Category ¹⁾	2009	2008
Interest income and interest expenses			
Other interest income	L&R	5,963.7	16,604.1
Interest income from loans	HTM	3,550.9	3,074.3
Interest income from financial instruments not valued at FV/P&L		9,514.6	19,678.4
Interest other bonds	HTM	-11,836.1	-10,768.2
Interest from convertible bonds	HTM	-1,103.9	0.0
Interest expenses from liabilities	L&R	-95,490.2	-94,345.6
Interest expenses from financial instruments not valued at FV/P&L		-108,430.2	-105,113.8
Realised result from derivative transactions	HFT	-1,952.4	-5,966.2
Expenditure from securities	FV/P&L	-370.2	-9,844.4
Total interest expenses		-110,752.7	-120,924.4

2.1.17. Impairment of financial investments

Impairment of financial investments, in the amount of € 3,121.7K (2008: 2008: € 7,800.9K), arises from a value adjustment for loans to joint ventures in the amount of € 3,011.3K (2008: € 2,797.4K) and a value adjustment of a prepayment on investments in properties in the amount of € 110.4K (2008: € 5,003.5K).

2.1.18. Income from associated companies

Income from associated companies consists of the following:

€ 1,000	2009	2008
UBM Realitätenentwicklung AG, Vienna	1,760.0	1,999.1
OAO Avielen AG, St. Petersburg	-9,088.9	-17,064.4
Isargärten Thalkirchen GmbH & Co. KG, Grünwald	13.2	-5.8
	-7,315.7	-15,071.1

2.1.19. Income tax

Tax expenses consist of the following:

€ 1,000	2009	2008
Corporation tax (actual tax)	-25,194.4	-25,733.3
Trade tax (actual tax)	-13,532.1	-22,506.4
Corporation tax and trade tax (actual tax)	-38,726.5	-48,239.7
Tax expense in relation to issue costs for convertible bonds	-21.5	0.0
Tax income/expense in relation to sale and valuation of own shares	1,997.9	-1,861.5
Tax income/expense on valuation of derivative transactions	1,454.9	-6,937.7
Amortisation of adjustment items from intangible assets	-14,341.0	-11,515.1
Change in deferred tax liabilities (deferred taxes)	49,438.2	69,064.2
Tax expense/tax income	-198.0	510.2

¹⁾ FV/P&L At fair value through profit or loss, HFT Held for trading, L&R Loans and Receivables, HTM Held to maturity, CFH Cash flow hedge

Taxes on income, € –2,172.0K of which relate to previous years, are shown under actual taxes to the amount of € –38,726.5K.

The reasons for the difference between the expected tax credit and the stated income tax expenses (tax credit) are as follows:

€ 1,000	2009	2008
Net income before taxes	–134,521.9	–295,399.0
Forecast tax income (25 % / previous year 25 %)	33,630.5	73,849.8
Non-usable losses carried forward and adjustment of preceding periods	–15,245.2	–25,932.6
Amortisation of other intangible items ¹⁾	–14,341.0	–11,515.1
Differing tax rates abroad	–9,674.8	–10,789.3
Amortisation of investment affecting tax	7,487.8	9,735.6
Non-tax deductible expense and permanent differences	–4,872.7	–5,822.3
Tax-exempt income	3,519.9	3,216.0
Change in tax rate	–796.7	–58.6
Exchange rate differences not affecting tax	531.8	8,659.8
Trade tax effects	62.9	–4,453.6
Assessment changes in holding period for properties	0.0	–36,923.3
Other	–500.5	543.9
Effective tax expense / effective tax income	–198.0	510.2

The utilisation of losses carried forward that have not been recognised to date reduces the tax expenses by € 2,395.0K (shown under item “Non-usable losses carried forward and adjustment of preceding periods”).

Because of the change in the accounting methods in the sector “investment properties under development” (accounting as of market value instead of amortised acquisition costs) there was in the 2009 business year a revaluation gain for investment properties under development to the amount of € 46,003.9K (see Point 1.6.3.). The deferred taxes formed from this amount to € –14,581.3K and increase the deferred tax expense by this amount.

2.1.20. Non-controlling interests held by limited partners

This item includes the proportional earnings for German minority shareholders, whose investments have been recognised in the balance sheet as liabilities under the item “Non-controlling interests held by limited partners”.

2.2. Other total result

Presentation of the result was partly restructured as a result of the amendments to IAS 1. The Statement of Comprehensive Income goes from result after taxes to the total result as per IAS 1, containing the elements of profit recorded directly in equity. These include the change of the cash flow hedges recorded in equity, the elements that are not recognised in profit or loss in the equity of associated companies (cash flow hedges and foreign currency translation) and the difference from foreign currency translation in Switzerland.

¹⁾ see Point 2.3.2.

The CA Immo Group has in the 2009 business year recorded the following items directly in shareholders' equity:

€ 1,000	Valuation result (hedging))	Reserves from associates	Reserves from foreign currency translation	Total 2009	Total 2008
Other income before taxes	-5,540.5	433.9	-0.1	-5,106.7	-96,898.6
Taxes on income on other result	-1,589.8	-38.6	0.0	-1,628.4	20,273.6
Other result	-7,130.3	395.3	-0.1	-6,735.1	-76,625.0
- thereof: attributable to the owners of the parent	-6,158.4	246.0	-0.1	-5,912.5	-73,018.1
- thereof: non-controlling interests	-971.9	149.3	0.0	-822.6	-3,606.9

The reasons for the difference between the expected tax credit and the stated income tax expenses (tax credit) on the valuation results (hedging) are as follows:

€ 1,000	2009	2008
Valuation results (hedging)	-5,540.5	-96,358.3
Forecast tax income (25 %/previous year 25 %)	1,385.1	24,089.6
Differing tax rates abroad	-1,969.8	-3,971.4
Impaired deferred tax	-1,067.9	0.0
Tax rate changes	62.8	0.0
Effective tax expense / tax income	-1,589.8	20,118.2

The valuation result (hedging) contains the reclassification to the amount of € 19,090.1K, the differences determined as at balance-sheet date in the effectiveness tests (ineffectiveness) to the amount of € 210.1K and other changes to cash flow hedges.

The reclassifications to the amount of € 19,090.1K concern the market values of the cash flow hedges recorded in shareholders' equity on the balance-sheet date of the previous year, for which premature repayment of the underlying loan took place in the current business year. Moreover, the valuation of cash flow hedges "frozen" on 3.12.2008 resp. 23.12.2008 must now, in the absence of an underlying loan transaction, be recognised in profit or loss. The item "Reclassification" consists of the following:

€ 1,000	2009	2008
Early repayment cash flow hedges	12,824.4	0.0
Cash flow hedges frozen in previous year's shareholders' equity	6,265.7	0.0
Reclassification	19,090.1	0.0

2.3. Consolidated balance sheet

Ongoing capital expenditure in existing investment properties under development mainly concerns “Tower 185” and “Nord 1” in Frankfurt and one project each in Moscow, Warsaw and Sibiu. The capital expenditure in investment properties largely derives from the redevelopment of a shopping centre in Vienna, from the construction of a multi-storey car park in Cologne, from the revitalisation of a property in Budapest and from tenants fit outs in Warsaw.

The disposals chiefly concern various sales in Austria with a book value to the amount of € 72,838.1K, the sale of several properties in Germany with a book value to the amount of € 254,719.5K and the sale of the “Matryoshka” project in Moscow.

The amendment of the IAS 40 means that from 1.1.2009 the investment properties under development also have to be valued and carried at the fair value. See Point 2.1.10. resp. 2.1.12. for explanatory notes on depreciation and amortisation and revaluation gains/losses.

During 2009 the CA Immo Group launched two project developments in the Munich area with joint venture partners. Taking IAS 40.57 into account, reallocation took place in connection with the start of the joint development, and the properties were allocated to Property intended for trading (IAS 39 2).

As at 31.12.2009 the CA Immo Group has long-term assets that are classified as Held for sale in accordance with IFRS 5.6ff. Sales agreements were signed for these properties in the Development and Income-producing segments in the 2009 business year or are under negotiation with a sale in 2010 regarded as highly probable. Three properties in Germany and one property in Austria were reclassified in accordance with IFRS 5 from long-term properties to the item “Properties held for sale” (see Point 2.3.5.).

The book value of the properties pledged as collateral for long-term loans amounts to € 2,280,464.9K (31.12.2008: € 2,503,755.8K). Of which, joint ventures represented € 145,974.2K (31.12.2008: € 120,935.5K).

In the 2009 business year total financing costs to the amount of € 4,142.5K (2008: € 4,434.8K) were capitalised in the construction of properties at production costs with a weighted average interest rate of 2.55 % (2008: 4.80 %).

2.3.2. Intangible assets

€ 1,000	Software	Others	Total
Acquisition costs			
As at 1.1.2008	441.7	37,641.0	38,082.7

Book value as at 31.12.2008 = 1.1.2009	225.3	53,166.2	53,391.5
Book value as at 31.12.2009	347.8	39,181.3	39,529.1

The balance sheet item “Other intangible assets” is the difference between the distribution of acquisition costs over the relevant fair values of the properties acquired and the relevant undiscounted deferred tax liabilities in accordance with IAS 12. In terms of content, it represents the benefit resulting from the subsequent maturity of the deferred tax liabilities and is carried in the tax expense subject to maturity. Owing to the fallen market values of the properties there was also an extraordinary writing-off of these tax adjustment items in 2009 to the amount of € 5,542.0K (2008: € 5,015.2K).

2.3.3. Financial assets

€ 1,000	Category IAS 39	Acquisition costs	Changes in value recognised in profit or loss			Repayment/ Repatriation	Changes in value not recognised in profit or loss	Fair value 31.12.2009	Book value 31.12.2009	Book value 31.12.2008

HTM Held to maturity, AE At Equity, L&R Loans and Receivables, HFT Held for trading

The item “Prepayments on investments in properties” concerns contracts which will close at a later date. As in the previous year, this item refers as at 31.12.2009 to the prepayment for a project development company in Prague (Forward Purchase). The performance of the contract by the partner is uncertain at present.

The investments in associated companies comprise the following:

€ 1,000	31.12.2009	31.12.2008
UBM Realitätenentwicklung AG, Vienna	31,805.6	30,475.3
OAO Avielen AG, St. Petersburg	6,414.3	15,503.2
Isargärten Thalkirchen GmbH & Co. KG, Grünwald	22.2	0.0
	38,242.1	45,978.5

As at 31.12.2009, the share price of UBM Realitätenentwicklung AG, Vienna, was € 29.90 (2008: € 30.00). Therefore, the stock market value of 750,004 shares at a price of € 29.90 was € 22,425.1K (2008: € 22,500.1K).

The fair value of the remaining financial assets corresponds to the discounted future repayments on the basis of a current market interest rate.

Interest rate caps relate to two contractually-agreed interest rate ceilings which will be valid until 31.1.2010. The fair value corresponds to the amount which the CA Immo Group would receive upon liquidation of the transactions on the balance-sheet date.

2.3.4. Deferred tax

The deferred tax on temporary differences between the carrying values in the Consolidated Statement of Financial Position and the relevant tax base has the following effect in the individual financial items:

€ 1,000	31.12.2009	31.12.2008
Deferred tax assets		
Intangible assets	24.4	21.8
Office furniture and equipment	901.9	0.0
Receivables and other assets	1,388.9	2,908.7
Cash and cash equivalents	11.9	116.3
Liabilities	25,453.8	20,538.5
	27,780.9	23,585.3
Deferred tax liabilities		
Long-term properties	147,378.0	189,468.0
Assets held for sale	1,079.0	0.0
Short-term properties (properties intended for trading)	2,877.9	12,573.9
Office furniture and equipment	0.0	1.6
Provisions	14,509.5	11,280.8
	165,844.4	195,160.8
Value adjustment for deferred tax assets	-5,977.0	-2,508.8
Losses carried forward deferred tax assets	38,858.8	42,051.4
Tax deferral (net)	-105,181.7	-150,196.4
thereof: deferred tax assets	24,606.3	55,553.2
thereof: deferred tax liabilities	129,788.0	205,749.6

In the previous year, the value adjustments for deferred tax (excluding losses carried forward) were not recognised separately and reduced the amount of the relevant item in the accounts. The value adjustment on deferred tax as at 31.12.2008 to the amount of € 2,508.8K results from € 789.2K to trade creditors, € 1,702.8K to long-term properties and € 16.8K to provisions.

Deferred tax developed as follows:

€ 1,000	2009	2008
Deferred taxes as at 1 January (net)	-150,196.4	-92,077.8
Change due to company acquisitions purchase price arrears	-4,388.1	-142,175.8
Change due to sale of companies	1,406.7	1,617.7
Change due to exchange rate fluctuations	-150.4	208.7
Changes recognised in equity	-1,291.7	13,166.6
Changes recognised in the income statement	49,438.2	69,064.2
Deferred taxes as at 31 December (net)	-105,181.7	-150,196.4

Deferred taxes on losses carried forward are capitalised if they are likely to be used within the next five to seven years. The basis of deferred taxes carried on losses carried forward amounts to € 158,172.6K (31.12.2008: € 169,271.7K). The deferred tax entitlement approach arises firstly from available budgets, which show a realisation of tax losses carried forward in the near future, and on the other hand from the existence of sufficient taxable temporary differences from property assets.

Deferred taxes on losses carried forward which have not been capitalised amount to € 60,522.7K (31.12.2008: € 29,435.1K). Losses carried forward, for which no deferred taxes were carried, amount to € 247,087.9K and expire after subsequent years:

Year	€ 1,000
2010	169.0
2011	13,903.5
2012	2,600.6
2013	4,998.6
2014	1,487.6
2015	2,885.4
2016	816.4
2017	276.2
2018	9,894.9
2019	2.9
Without limitation in time	210,052.9
Sum total unrecorded losses carried forward	247,087.9
thereof: non-capitalised deferred taxes	60,522.7

The temporary differences in relation to shares in affiliated companies, joint ventures and associated companies, for which no deferred tax entitlement was carried under IAS 12.39, appear as follows:

There is a far smaller quantity of temporary differences in relation to shares in Austrian affiliated companies, joint ventures and associated companies, for which no deferred taxes were carried under IAS 12.39, than unrecorded losses carried forward in Austria. Unrecorded losses carried forward of the Austrian companies amount to € 100,023.7K.

There were no temporary differences in relation to shares in foreign affiliated companies, joint ventures and associated companies, for which no deferred taxes were carried under IAS 12.39, at the CA Immo Group on the reporting date. If certain requirements are met, contracts from the sale of investments in foreign companies are fully or partly exempted from income tax.

2.3.5. Assets held for sale

As at 31.12.2009 properties with a market value of € 6,020.1K (31.12.2008: € 0.0K) were classified as held for sale. These were one property in Vienna and three properties in Germany. The actual transfer of entitlements and obligations to the buyer will take place in 2010. Purchase agreements have already been concluded or are under negotiation and as at 31.12.2009 a sale in 2010 is regarded as highly probable.

The book values are determined using the fair value model (see Point 1.6.4.). Valuation of the properties remains subject to regulations of the IAS 40 at fair value. In the consolidated balance sheet it is however shown under a separate item. No value impairment costs or write-ups have been recorded since reclassification to assets held for sale.

In the segment report the property in Vienna is shown under Austria and the three German properties under Germany. In the operating segments by sector, the properties in Vienna and Frankfurt are shown under Development; the other two German properties are shown under Income-producing.

€ 1,000	31.12.2009	31.12.2008
Vienna, Praterstraße 10/Ferdinandstraße 1	1,975.1	0.0
Frankfurt, Süd 7 Europaallee	1,890.0	0.0
Münster, Ämtergebäude Bahnhof	1,815.0	0.0
Berlin, Hallesches Ufer	340.0	0.0
Assets held for sale	6,020.1	0.0

2.3.6. Properties intended for trading

	€ 1,000
Acquisition costs	
As at 1.1.2008	0.0
Additions	182,796.1
As at 31.12.2008 = 1.1.2009	182,796.1
Additions	24,477.5
Disposals	-66,263.5
Reclassification	2,840.5
As at 31.12.2009	143,850.6
Accumulated depreciation	
As at 1.1.2008	0.0
Depreciation	-14,446.0
As at 31.12.2008 = 1.1.2009	-14,446.0
Reversal of write-down of properties	544.5
Depreciation ¹⁾	-8,555.4
Disposals	1,508.8
As at 31.12.2009	-20,948.2
Book value as at 1.1.2008	0.0
Book value as at 31.12.2008 = 1.1.2009	168,350.1
Book value as at 31.12.2009	122,902.4

The item contains properties from the Vivico Group in Germany and the planned development of residential units intended for sale in Slovakia.

In the 2009 business year for the short-term investment properties there was a write-up to the amount of € 544.5K (2008: € 0.0K). For Details see Point 2.1.11.

€ 1,250.0K (2008: € 38,440.8K) from the properties intended for trading is mortgaged as security for loan liabilities.

The change in the security results from the sale of a property in Germany.

For one property in the 2009 business year financing costs to the amount of € 141.8K (2008: € 178.5K) were capitalised with a weighted average interest rate of 1.49 % (2008: 3.96 %).

¹⁾ of which € -734.9K from property intended for trading that was valued during the period and already sold (see Point 2.1.3.).

The division of the properties intended for trading breaks down by valuation method as follows:

€ 1,000	Production costs	Depreciation/Reversal of write-down of properties	Book value 31.12.2009
At production costs	60,598.4	0.0	60,598.4
At realisable value	83,252.2	-20,948.2	62,304.0
Total properties intended for trading	143,850.6	-20,948.2	122,902.4

Properties intended for trading which are recorded at production costs contain undisclosed reserves to the amount of € 23,422.6K. Under IAS 2 appreciation may only take place up to historic production costs.

2.3.7. Receivables and other assets

Receivables and other assets consist of the following:

€ 1,000	IAS 39 category	Classes	Book value = Fair value 31.12.2009	Book value = Fair value 31.12.2008
Receivables from joint ventures (50 % interest)	L&R	Trade debtors	40,034.4	6,686.2
Trade debtors	L&R	Trade debtors	8,905.1	9,981.9
Trade debtors (Other)	L&R	Trade debtors	8,078.9	4,373.3
Receivables from property sales	L&R	Other receivables	26,503.8	13,031.0
Fixed deposits with restrictions on disposal	L&R	Other receivables	24,374.7	7,465.6
Receivables from accounts warranty	L&R	Other receivables	18,040.2	0.0
Receivables from fiscal authorities	L&R	Other receivables	12,213.0	9,116.8
Loans granted	L&R	Other receivables	3,234.5	3,779.3
Net position plan assets from pension obligations	L&R	Other receivables	2,933.1	0.0
Deferred income	L&R	Other receivables	1,579.5	1,491.8
Positive market value of derivative financial instruments (hedge accounting)	FVD	Derivatives	807.1	0.0
Receivables from accrued interest	L&R	Other receivables	3.2	1,381.9
Other receivables and assets	L&R	Other receivables	2,617.5	5,656.3
Receivables and other assets			109,290.6	56,277.9
			149,325.0	62,964.1
-of which: L&R			148,517.9	62,964.1
-of which: FVD			807.1	0.0

L&R Loans and Receivables, FVD Fair value derivatives

Trade debtors contain receivables from sales of properties intended for trading and receivables from commissioned work (PoC) accounted for in accordance with IAS 11 using the percentage of completion method (see Point 1.6.4. and 2.1.4.) and development consulting.

Receivables from property sales concern receivables for the sales of long-term properties.

Receivables from accounts warranty contain receivables that are not yet due from sellers of property companies in Germany. Receivables to the amount of € 18,040.2K (31.12.2008: € 0.0K) are also counterbalanced by payables from these accounts warranty (see Point 2.3.14.).

Cash and cash equivalents with drawing restrictions and a remaining term of more than three months are shown within other receivables.

Aging of receivables and other assets:

31.12.2009

Other receivables and assets	6,443.6	212.4	317.6	1.6	63.0	7,038.2
As at 31.12.2008	57,431.0	3,814.2	1,036.8	395.6	286.5	62,964.1

Change in value adjustments:

€ 1,000	2009	2008
As at 1.1.	2,308.1	4,363.0
Appropriation (value adjustment expenses)	4,130.7	2,031.3
Additions from first-time consolidation	0.0	3,547.7
Use	-307.1	-6,750.6
Release	-283.1	-868.8
Interest income from impaired financial assets	-11.4	-7.1
Foreign currency gains/losses	-4.8	-7.4
As at 31.12.	5,832.5	2,308.1

Receivables and other assets, which are already more than one year overdue, to the amount of € 113.7K (31.12.2008: € 286.4K) were not adjusted. These are primarily receivables from one lessee, with which a rent reduction was agreed for 2010, and the VAT for value adjusted receivables which are reimbursed on reversal of receivables from the fiscal authorities.

Net position of pension obligations

For four directors of the Vivico Group there are obligations from performance-based pension plans, involving four future pensions, three of which are for directors who have already resigned/retired. Pension plan reinsurance was concluded for these pension obligations in 2005.

As at 31.12.2008 there was no balance sheet disclosure of the pension obligations or plan assets, since according to an actuarial pension evaluation report they counterbalance one another.

On account of amendments to parameter the plan assets exceed the obligation as at 31.12.2009 in the amount of € 2,877.5K.

€ 1,000	2009
Adjustment to obligation	-328.6
Adjustment to plan assets	3,206.1
Adjustment to net assets from pension obligation	2,877.5

In the 2009 business year plan assets were disclosed for the first time in the consolidated balance sheet under receivables and other assets, insofar as the plan assets exceed the cash value of the future obligations of the CA Immo Group and it thus has future entitlements.

€ 1,000	2009	2008
Cash value of obligation	-3,032.8	-2,343.2
Fair value of plan asset	5,965.9	2,343.2
Net position recorded in consolidated statement of financial position	2,933.1	0.0

In the 2009 business year there was a contribution to the plan assets, in order to balance an underfunding of entitlements of future beneficiaries. No additional payments are planned for the following business years.

The development of the pension obligations and of the plan assets is as follows:

€ 1,000	2009	2008
Scope of obligation as at 1.1.	2,343.2	2,715.7
Adjustment to obligation	328.6	0.0
Service cost	65.9	65.9
Interest expenses (5.87 %, 2008: 5.32 %)	156.8	144.5
Actuarial gains/losses	138.3	-582.9
Scope of obligation as at 31.12.	3,032.8	2,343.2
Plan asset as at 1.1.	2,343.2	2,715.7
Adjustment to plan asset	3,206.1	0.0
Forecast income from plan asset	160.3	210.4
Actuarial gains/losses	12.6	-582.9
Payments received	243.7	0.0
Plan asset as at 31.12.	5,965.9	2,343.2

The following expenditure was recorded in the Consolidated Income Statement:

€ 1,000	2009	2008
Service cost	-65.9	-65.9
Interest expenses	-156.8	-144.5
Forecast income from plan asset	160.3	210.4
Actuarial gains/losses from pension obligation	-138.3	582.9
Actuarial gains/losses from plan asset	12.6	-582.9
Pensions costs	-188.1	0.0

The service cost and the actuarial profits and losses in relation to the pension obligations are recorded in staff expenses, and therefore in indirect expenditure. The interest expenses, the actuarial profits and losses in relation to the plan assets and the forecast income from the plan assets are contained in the financial result.

2.3.8. Securities

As at 31.12.2009 and as at 31.12.2008 the ABS fund represents the CA Immo Group's sole investment in securities. In the current business year parts of the ABS fund were sold, thereby realising a loss of € 370.1K.

The acquisition costs for the securities as at 31.12.2009 amounted to € 10,760.7K (31.12.2008: € 16,651.7K). For securities available as at 31.12.2009 a loss from the valuation on the reporting date to the amount of € 322.7K was recognised in the result.

The following securities are held by the CA Immo Group:

	Unit.	31.12.2009 € 1,000	Unit.	31.12.2008 € 1,000
ABS Dynamic Cash	1,180	6,948.2	1,826	11,251.2

As at 31.12.2008 securities were pledged in favour of a loan from Bank Austria/UniCredit Group. As at the reporting date at 31.12.2009 there were no more pledged securities.

2.3.9. Cash and cash equivalents

€ 1,000	31.12.2009	31.12.2008
Credit balances with banks	485,104.8	306,895.3
Bank balances subject to drawing restrictions	12,062.5	14,462.2
Cash on hand	32.0	22.8
	497,199.3	321,380.3

Cash and cash equivalents with drawing restrictions includes bank credits to which the CA Immo Group has only limited access. Their remaining term is however less than three months. These balances serve the purpose of securing current loan repayments.

2.3.10. Shareholders' equity

The fully paid-in nominal capital of CA Immobilien Anlagen Aktiengesellschaft in the amount of EUR 634,370,022 is stated as share capital. It is subdivided into 87,258,596 registered shares of no par value, and four registered bearer shares of no par value. The registered shares are held by Bank Austria/UniCredit Group and carry the right to nominate one Supervisory Board member each. This right has not been exercised. All Supervisory Board members were elected by the General Meeting.

At the 21st Ordinary General Meeting of shareholders held on 13 May 2008, the Management Board was authorised to buy back the company's own shares by other means than via the stock exchange or by a public offer up to the statutory maximum permissible extent of 10 % of the share capital for the duration of 30 months from date of resolution in accordance with Section 65 para. 1 sentence 8 of the Austrian Stock Corporation Act (AktG). The Management Board made use of this authority with consent from the Supervisory Board between July and October 2008. In October 2009 all company's own shares, i.e. 1,494,076 units, were sold again at a price of € 9.55.

The company's own share reserve in the individual financial statement of CA Immo AG as at 31.12.2008 amounted to € 6,276.9K and was reclassified on sale of the own shares in the 2009 business year to the free reserve.

Likewise at the 21st Ordinary General Meeting on 13.5.2008, the Management Board was authorised with the consent of the Supervisory Board once or repeatedly to issue convertible bonds with a total nominal value of up to € 317,185.0K, otherwise with the option to exclude subscription rights of the shareholders, and granting the bearers of convertible bonds conversion rights on up to 43,629,300 units of registered ordinary shares in CA Immo AG, until 12.5.2013. Based on this authorisation, in November 2009 a five-year convertible bond was issued with a volume of € 135,000.0K. The coupon of the convertible bond was fixed at 4.125 % the conversion price at € 11.5802 (equal to a premium of 27.5 % above the reference price). Hence in the event the conversion rights are exercised a maximum 11,657,829 shares of no par value may be issued.

The convertible bond is shown to the amount of € 4,699.4K (3.5 %) in shareholders' equity and € 130,300.6K (96.5 %) in liabilities. The increase in the capital reserves in relation to the convertible bond consists of the following:

	€ 1,000
Conversion right (3.5 %)	4,699.4
-less deferred taxes	-1,175.0
-less proportional issue costs	-85.8
-plus tax expense for issue costs	21.5
increase in capital reserves re. convertible bonds	3,460.1

Pursuant to section 229 para. 7 of the Austrian Commercial Code (UGB), the appropriated capital reserves to the amount of € 868,545.0K (31.12.2008: € 868,545.0K) stated in the individual financial statements of CA Immo AG may only be released to cover a net loss which would otherwise be shown. Basically, a distribution of profits may according to the Austrian Commercial Code be carried out only up to the amount of the net profit as stated in the individual financial statements of the parent company. The net profit as stated in the financial statements of CA Immo AG as at 31.12.2009 to the amount of € 5,896.7K is however according to Section 235 Z 1 of the Austrian Commercial Code barred from dividend distribution on account of a revaluation in the 2009 business year.

As at the reporting date of 31.12.2009 there is an unused authorised capital to the amount of € 317,185.0K, which may be made use of until 8.8.2012 at the latest, and a conditional capital to the same amount.

2.3.11. Provisions

€ 1,000	Actual Taxes	Staff	Other	Total
As at 1.1.2009	46,340.4	3,656.5	86,627.0	136,623.9
Exchange rate differences	2.3	-0.3	-1,999.5	-1,997.5
Disposals from final consolidation	-39.5	0.0	-30.0	-69.5
Use	-1,930.7	-1,583.9	-62,706.4	-66,221.0
Release	-2,556.7	-1,082.5	-6,586.9	-10,226.1
Set-up	40,476.2	2,782.1	38,528.9	81,787.2
As at 31.12.2009	82,292.0	3,771.9	53,833.1	139,897.0
-of which: short-term	82,292.0	3,249.5	53,833.1	139,374.6
-of which: long-term	0.0	522.4	0.0	522.4

€ 79,705.1K of the provision for current taxes concerns the Vivico Group and includes corporation tax and trade tax for the years 2007 to 2009, which have not yet been assessed by the fiscal authorities, and possible risks from an ongoing audit for the years 2001 to 2003 in Germany.

Staff provisions largely concern the cash value of long-term obligations for settlement payments to employees to the amount of € 522.4K (31.12.2008: € 560.1K), premiums exclusively for employees of the Vivico Group on account of individually agreed arrangements to the amount of € 1,413.8K (31.12.2008: € 2,139.4K), still unused holiday entitlement to the amount of € 953.0K (31.12.2008: € 822.0K) and expenses on account of the group reorganisation to the amount of € 500.0 (31.12.2008: € 0.0).

The cash value of severance payment obligations developed as follows:

€ 1,000	2009	2008
Provisions for severance payments		
Cash value of severance payment obligations as at 1.1	560.1	598.7
Appropriation of reserve	-99.1	-325.0
Interest expenses	22.4	23.9
Service cost	39.0	262.5
Cash value of severance payment obligations as at 31.12	522.4	560.1

Interest expenses and service cost are included in staff expenses and thus in indirect expenditure.

For the directors of the Vivico Group (three of whom have already resigned/retired) there are performance-based pension plans, for which reinsurance was concluded to meet the pension entitlements. As the cash value of the pension obligations exceeded the plan assets at balance-sheet date, the net position to the amount of € 2,933.1K (31.12.2008: € 0.0K) was shown under receivables and other assets (see Point 2.3.7.).

The table below shows the composition of other significant provisions:

€ 1,000	31.12.2009	31.12.2008
Construction services	25,475.1	59,139.2
Subsequent costs of sold properties	9,519.9	2,356.7
Conveyance duty and registration fees	4,686.9	10,345.9
Warranty and technical risks from sales	4,614.5	4,095.6
Operating costs and outstanding purchase invoices	1,620.5	1,321.8
Auditing costs	1,089.7	1,324.8
Legal consultancy fees	1,089.0	1,548.4
Export opinions	780.8	1,258.5
Tax consultancy fees	543.8	813.9
Group reorganisation	500.0	0.0
Property tax	338.5	670.3
Annual reports	203.3	215.8
Fees	83.7	1,476.9
Other	3,287.4	2,059.2
	53,833.1	86,627.0

The foregoing costs concern interest expenditure and services to be defined in relation to already-sold properties, which are not assessed as multi-component transactions (essentially guarantees).

2.3.12. Bonds

€ 1,000

	Maturity			31.12.2009	31.12.2008
	up to 1 year	1–5 years	more than 5 years	Book value Total	Book value Total
Convertible bonds	0.0	128,302.9	0.0	128,302.9	0.0
Other bonds	0.0	148,771.9	195,450.5	344,222.4	194,903.6
	0.0	277,074.8	195,450.5	472,525.3	194,903.6

2.3.12.1. Convertible bond

	Nominal value in € 1,000	Book value 31.12.2009 in € 1,000	Nominal interest rate	Effective interest rate	Issue	Repayment	Price as at	
							31.12.2009 in €	31.12.2008 in €
Convertible bond	135,000.0	128,302.9	4.125 %	6.146 %	9.11.2009	9.11.2014	91.79	–

The coupon of the convertible bond was fixed at € 11.5802, equal to a premium of 27.5 % above the reference price.

In accordance with IAS 39.43, the transaction costs directly attributable to the issue of the convertible bond have been deducted and distributed over the term of the bond in the form of an effective interest rate. The transaction costs incurred in the 2009 business year amount to in total € 2,394.0K, € 85.8K of which concern the conversion rights recorded in equity and € 2,308.2K recorded in long-term liabilities.

2.3.12.2. Other bonds

	Nominal value in € 1,000	Book value 31.12.2009 in € 1,000	Nominal interest rate	Effective interest rate	Issue	Repayment	Price as at	
							31.12.2009 in €	31.12.2008 in €
Bonds 2006-2016	200,000.0	195,450.5	5.125 %	5.530 %	22.9.2006	22.9.2016	94.89	91.00
Bonds 2009-2014	150,000.0	148,771.9	6.125 %	6.329 %	16.10.2009	16.10.2014	103.23	–
Total	350,000.0	344,222.4						

In accordance with IAS 39.43, the transaction costs directly attributable to the bond have been deducted and distributed over the term of the bond in the form of an effective interest rate. The costs of issue of the bonds in 2009 amounted to € 1,274.5K.

2.3.13. Financial liabilities

€ 1,000				31.12.2009	31.12.2008
	up to 1 year	Maturity 1–5 years	more than 5 years	Book value Total	Book value Total
Investment credit	103,216.2	387,826.1	985,389.5	1,476,431.8	1,693,831.1
Credit from joint venture partners	15,556.1	0.0	6,452.8	22,008.9	32,174.5
Deferred interest on convertible bond	793.4	0.0	0.0	793.4	0.0
Deferred interest on other bonds	4,710.6	0.0	0.0	4,710.6	2,813.2
	124,276.3	387,826.1	991,842.3	1,503,944.7	1,728,818.8

The terms of the major financial liabilities are as follows as at 31.12.2009:

Type of financing and currency	Effective interest rate as at 31.12.2009 %	Interest variable/fixed	Maturity	Book value € 1,000	Fair value € 1,000
Investment credit/EUR	6.700	variable	02/2010	7,828.6	7,828.6
Investment credit/EUR	2.450	variable	10/2010	18,175.8	18,175.8
Investment credit/EUR	2.500	variable	12/2010	5,344.5	5,344.5
Investment credit/EUR	2.200	variable	12/2010	14,160.7	14,160.7
Investment credit/EUR	3.827	variable	07/2011	14,213.9	14,213.9
Investment credit/EUR	5.631	variable	07/2011	20,828.0	20,828.0
Investment credit/EUR	4.310	variable	12/2011	15,054.0	15,054.0
Investment credit/EUR	5.855	variable	12/2011	23,215.2	23,215.2
Investment credit/EUR	1.328	variable	05/2012	5,180.0	5,180.0
Investment credit/EUR	4.610	variable	06/2012	51,212.8	51,212.8
Investment credit/EUR	5.161	fixed	12/2013	12,652.4	14,275.9
Investment credit/EUR	5.937	variable	12/2014	23,664.1	23,664.1
Investment credit/EUR	4.750	variable	11/2015	29,637.8	29,637.8
Investment credit/EUR	4.930	variable	12/2015	12,505.4	12,505.4
Investment credit/EUR	1.770	variable	12/2015	18,548.0	18,548.0
Investment credit/EUR	7.667	variable	03/2016	27,420.9	27,420.9
Investment credit/EUR	5.980	variable	12/2016	27,563.4	27,563.4
Investment credit/EUR	4.409	variable	01/2017	530,098.6	530,098.6
Investment credit/EUR	4.913	variable	10/2017	7,666.2	7,666.2
Investment credit/EUR	5.029	variable	12/2017	46,333.2	46,333.2
Investment credit/EUR	3.913	variable	06/2018	78,413.3	78,413.3
Investment credit/EUR	5.755	variable	11/2018	26,626.3	26,626.3
Investment credit/EUR	5.981	variable	12/2018	16,538.0	16,538.0
Investment credit/EUR	5.845	variable	12/2018	90,819.8	90,819.8
Investment credit/EUR	2.394	variable	06/2019	5,252.7	5,252.7
Investment credit/EUR	4.753	variable	06/2019	29,462.0	29,462.0
Investment credit/EUR	7.296	variable	09/2019	11,586.5	11,586.5
Investment credit/EUR	4.859	variable	09/2020	6,616.9	6,616.9

Type of financing and currency	Effective interest rate as at 31.12.2009 %	Interest variable/fixed	Maturity	Book value € 1,000	Fair value € 1,000
Investment credit/EUR	1.470	variable	12/2020	20,217.6	20,217.6
Investment credit/EUR	3.086	variable	03/2021	59,196.1	59,196.1
Investment credit/EUR	5.877	variable	12/2021	10,596.0	10,596.0
Investment credit/EUR	5.855	variable	12/2021	48,542.4	48,542.4
Investment credit/EUR	6.200	variable	06/2022	27,550.3	27,550.3
Investment credit/EUR	5.144	variable	12/2023	15,065.8	15,065.8
Investment credit/EUR	6.528	variable	03/2024	28,631.1	28,631.1
Investment credit/EUR	4.930	variable	12/2024	6,412.0	6,412.0
Investment credit/EUR	2.250	variable	08/2030	5,501.4	5,501.4
Investment credit/EUR	2.279	variable	12/2030	43,646.0	43,646.0
Investment credit/CZK	5.720	variable	10/2026	7,522.0	7,522.0
Credit from joint venture partners/EUR	14.900	fixed	03/2010	14,386.4	14,533.6
Credit from joint venture partners/EUR	3.200	variable	12/2016	6,451.2	6,451.2
Other financial liabilities each with a nominal value below € 5,000.0K				33,607.4	34,718.5
				1,503,944.7	1,506,826.5

Other financial liabilities include amongst others USD credits with a book value of € 3,069.0K.

The average weighted interest rate, considering the hedging transactions concluded in each case, amounts to about 4.61 % for all EUR investment credits, about 2.20 % for all USD investment credits, and about 5.72 % for the CZK investment credit.

The fair values of the fixed rate investment credits correspond to the book values due to the market situation.

In order to hedge the interest rate risk, interest rate caps were concluded in the year 2000 for two long-term loans equal to the amount outstanding. These derivative financial instruments are basically shown to the amount of the long-term financial assets, however the book value as at 31.12.2009 amounts to € 0.0K (see Point 2.5.1.).

The CA Immo Group uses interest rate swaps to hedge the interest rate risk. Insofar as these hedge transactions meet the requirements for hedge accounting, the effective part of the value changes of the fair values on the relevant recording date is not recognised in profit or loss (see Point 2.5.1.). The ineffective portion is immediately recognised as an expense under the item "Result from derivatives transactions". The remaining swaps which do not meet these requirements are recognised in profit or loss and are entered under the item "Result from derivative transactions". In total, the nominal value of all interest rate swaps concluded at the balance sheet date amounted to about 78.8 % of the floating rate EUR investment credits and 100.0 % of the variable rate CZK investment credit. For the variable rate USD investment credits no interest rate swaps were concluded.

2.3.14. Other liabilities

€ 1,000				31.12.2009	31.12.2008
		Maturity		Book value	Book value
	up to 1 year	1–5 years	more than 5 years	Total	Total
Fair value					
Derivative transactions	299.9	14,642.4	100,015.8	114,958.1	81,265.9
Prepayments received	29,726.1	43,512.5	0.0	73,238.6	56,899.5
Outstanding purchase invoices	24,005.3	0.0	0.0	24,005.3	19,329.7
Fiscal authorities	15,503.4	0.0	0.0	15,503.4	15,196.2
Deferred income	2,657.6	2,780.9	9,026.6	14,465.1	16,128.6
Rent deposits	527.0	3,770.4	60.6	4,358.0	3,712.9
Other	5,412.2	13.9	0.0	5,426.1	5,780.3
	78,131.5	64,720.1	109,103.0	251,954.6	198,313.1

The division of the maturities of the fair values of the derivative transactions was carried out on the basis of the term end of the derivative transactions.

Prepayments received include purchase payments received for sales of properties (both long-term and intended for trading) incl. services provided for which due to the separation of services, income realisation in connection with services is not shown until services have been provided by the Vivico Group in subsequent years (multi-component activity).

The liabilities in respect of outstanding purchase invoices relate to property acquisitions in Germany and to assets and property acquisitions in Eastern/South East Europe, as well as to liabilities for accounts warranty (see Point 2.3.7.).

Deferred income mainly relates to rent paid in advance where an amount of € 12,831.1K (31.12.2008: € 14,465.9K) is attributable to Germany, € 953.9K (31.12.2008: € 1,015.8K) to Austria and € 680.1K (2008: € 646.9K) to Eastern/South East Europe.

2.4. Cash flow

The consolidated cash flow statement shows how the cash position has changed in the business year because of cash inflows and outflows.

2.4.1. Fund of cash and cash equivalents

The cash fund (fund of cash and cash equivalents) consists of cash and bank balances. Securities and short-term liabilities to banks do not form part of the cash fund.

The balances also include credits to the amount of € 12,062.5K (31.12.2008: € 14,462.2K), over which the CA Immo Group has only restricted access. These balances serve the purpose of securing current loan repayments (amortisation and interest). They cannot be used otherwise without the consent of the lender.

Restricted credit balances with a term of more than three months are on the other hand shown under receivables and other assets and amount to € 24,374.7K as at 31.12.2009 (31.12.2008: € 7,465.6K).

2.4.2. Cash flow from operating activities

The reduction of the cash flow from operating activities is largely due to the increase in unpaid trade debtors (sales of properties intended for trading) and fallen gross revenues from property dealing of € 10,243.7K. The sale of leased properties during the period of the 2009 business year and in the previous year (included in cash flow from investment activities) has caused related rental income to fall in 2009 in comparison to the previous year by € 2,366.0K in Austria and by € 3,560.8K in Germany.

2.4.3. Cash flow from investment activities

Outpayments for acquisition of properties (asset deal) consist of the following:

€ 1,000	2009	2008
Additions resulting from investments in properties and projects	-236,951.0	-181,432.6
Additions resulting from property acquisitions	-7,508.4	-39,250.3
Change in provisions for outstanding construction services	-21,046.4	25,295.2
Change in trade creditors and other liabilities	5,222.4	4,022.5
Acquisition of long-term properties	-260,283.4	-191,365.2

In addition there were prepayments made on properties to the amount of € 543.6K (2008: € 20,482.5K) for which the transfer of ownership only takes place in the subsequent year.

The acquisition of companies (share deal) led to an increase in consolidated statement of financial position item (see Point 1.3.). However these were non-cash item transactions, which are not part of the cash flow statement. Cash flow from investment activities thus presents the actual payment of purchase prices for property companies acquired during the current or previous business years. In detail the item "Acquisition of property companies, less cash and cash equivalents" is as follows:

€ 1,000	2009	2008
Purchase price for acquired companies	-64.1	-1,108,570.0
Less prepayments made in previous years	0.0	540,033.4
Purchase price retentions (payment in following years)	0.0	9,842.9
Payments for companies acquired in previous years	-1,228.1	-6,786.7
Inflow of funds from first-time consolidations	35.0	174,534.5
Acquisition of property companies, less cash and cash equivalents	-1,257.2	-390,945.9

The payment receipts from the sale of properties and holding companies consist of the following:

€ 1,000	2009	2008
Income from the sale of long-term properties	357,308.8	175,433.3
Change in prepayments received	-18,076.5	-6,666.9
Change to outstanding purchase prices	-13,940.9	-9,704.1
Settlement for project exit	-3,545.7	0.0
Retirement of cash and cash equivalents from final consolidation	-49.2	-2,286.6
Sale of long-term properties and other assets less cash and cash equivalents	321,696.5	156,775.7

2.4.4. Cash flow from financing activities

The cash inflow from the issue of bonds and the convertible bond are each shown after deduction of transaction costs.

The dividends from subsidiaries to non-controlling shareholders include € 36.4K distributed to non-controlling shareholders in equity and € 418.7K distributed to non-controlling shareholders of limited partners.

In addition to bank finance, subsidiaries of the CA Immo Group are equipped with own resources to implement project developments. Other limited partners also hold an interest in some group companies, which are fully consolidated by the CA Immo Group (more than 50 % interest), however do not exert significant influence on the business of the CA Immo Group (non-controlling shareholders). Capital increases in these companies lead to a higher liquidity in the CA Immo Group and to an increase in the non-controlling interests shown in equity.

The repayment of derivative transactions to the amount of € 1,952.4K concerns premature release of interest swap contracts.

2.5. Other information

2.5.1. Financial instruments

Financial instruments include both primary and derivative financial instruments.

Primary financial instruments held within the Group mainly comprise financial assets, loans, securities, other receivables, credit balances with banks, bonds and financial liabilities, trade creditors and other liabilities.

Derivative financial instruments consist of the following:

	31.12.2009			31.12.2008		
	Book value	Fair value	Nominal value	Book value	Fair value	Nominal value
	€ 1,000	€ 1,000	€ 1,000	€ 1,000	€ 1,000	€ 1,000
Interest rate caps	0.0	0.0	5,784.9	0.0	0.0	6,837.6
Forward exchange transactions	629.4	629.4	6,848.3	0.0	0.0	0.0
Time options	177.7	177.7	1,250.0	0.0	0.0	0.0
Interest rate swaps	-114,958.1	-114,958.1	1,699,973.1	-81,265.9	-81,265.9	1,582,509.4
- of which cash flow hedges	-76,183.1	-76,183.1	1,164,427.7	-64,185.9	-64,185.9	1,378,914.4
- of which fair value derivatives	-38,775.0	-38,775.0	535,545.4	-17,080.0	-17,080.0	203,595.0

Interest rate caps are used exclusively to hedge the interest rate risk related to loans. The forward exchange transactions and time options concern two EUR loans in Poland to hedge against future rate fluctuations. The CA Immo Group uses interest rate swaps (variable into fixed) to protect against the risk of interest rate fluctuation.

In regard to accounting, the CA Immo Group divides interest rate swaps into two categories:

The cash flow hedges include interest rate swaps, that were concluded to secure the interest rate risk resulting from variable interest payments. The hedge relationship between hedging instrument and underlying transaction is documented formally on conclusion. The effectiveness of the hedge relationship is regularly examined using effectiveness measurements. In 2009 ineffective parts of the interest rate swaps with a nominal value of in total € 2,282.4K and a market value to the amount of € -210.1K (2008: € 0.0K) was recognised as an expense.

Swaps with a nominal value of in total € 229,324.2K and a market value of € –17,766.6K are shown under fair value derivatives. As at 31.12.2008 they were qualified as cash flow hedges and were reclassified on account of premature repayments of the underlying loan transactions in 2009. As at 31.12.2008 these swaps were valued at € –12,824.4K. The value change for these interest rate swaps in the 2009 business year was € –4,942.2K.

Furthermore fair value derivatives also include interest rate swaps with a nominal value of € 59,346.3K which qualified as a cash flow hedge until 3.12.2008 or 23.12.2008 respectively. As at 31.12.2008 follow-up funding was expected, therefore there was no reclassification from equity in the consolidated income statement. In the absence of an underlying transaction concluded in the business year 2009, the valuation frozen on 3.12.2008 resp. 23.12.2008 to the amount of in total € –6,265.7K and the value change that took place in 2009 to the amount of € –571.6K must be recognised in profit or loss. As at 31.12.2009 the fair value of these interest rate swaps amounted to € –5,770.3K (31.12.2008: € –5,198.7K).

Swaps with a nominal value of € 141,525.0K and an underlying valuation of € –2,751.2K already in 2008 did not meet the requirements of cash flow hedges and are likewise shown under the category “Fair value derivatives”. For two of these swaps with a nominal value of in total € 105,350.0K interest rate swap transactions were concluded as at-set entries for security in the 2009 business year, and these were also classified as fair value derivatives and show a market value as at 31.12.2009 of € –605.6K (31.12.2008: € 0.0K).

On 31.12.2009 the market values and conditions of the existing interest rate swaps as at 31.12.2009 are as follows:

Currency	Nominal value in € 1,000	Start	End	Fixed inter- est rate as at 31.12.2009	Reference interest rate	Fair value 31.12.2009	Allocation

CZK	7,522.0	06/2008	06/2013	4.620 %	3M-Pribor	-499.6	cfh
	1,699,973.1					-114,958.1	

cfh Cash flow hedge, fvd Fair value derivative

Both the cash flow hedges and the fair value derivatives belong in the category HFT – held for trading.

The average weighted interest rate is about 4.05 % for all EUR interest rate swaps, and about 4.62 % for the CZK interest rate swap.

The fair value corresponds to the value which the relevant company would receive or pay upon liquidation of the deal on the balance sheet date. This value was determined by the relevant bank with which these transactions had been concluded.

The fair values were calculated by discounting the future cash flows from variable payments on the basis of generally recognised models of financial mathematics. The valuation was based on interbank middle rates of exchange.

Changes recognised directly in equity

€ 1,000	2009	2008
As at 1.1.	-55,350.0	20,890.1
Change in valuation of cash flow hedges	-24,840.7	-96,358.3
Ineffectiveness cash flow hedges	210.1	0.0
Reclassification cash flow hedges	19,090.1	0.0
Taxes on income on cash flow hedges	-1,589.8	20,118.2
As at 31.12.	-62,480.3	-55,350.0
- of which: parent company's share	-58,291.6	-52,133.2
- of which: non-controlling interests	-4,188.7	-3,216.8

On account of premature termination of the underlying transaction, interest rate swaps originally shown as cash flow hedges no longer meet the requirements of a hedge relation and have had to be reclassified as fair value derivatives. Details for taxes on income on cash flow hedges see Point 2.2.

The table below shows the financial instruments that are subsequently measured at fair value. They are assigned to one of levels 1 to 3, depending on the extent to which the fair value is observable in the market.

- Level-1 measurements at fair value are those arising from listed prices (unadjusted) on active markets for identical financial assets or liabilities.
- Level-2 measurements at fair value are those based on parameters not corresponding to listed prices for assets or liabilities as in level 1 (data), but deduced either directly (as prices) or indirectly (deduced from prices).
- Level-3 measurements at fair value are those arising from models using parameters to measure assets or liabilities, whereas such parameters are not based on observable market data (unobservable parameters, assumptions).

€ 1,000	31.12.2009			Total
	Level 1	Level 2	Level 3

Total	0.0	-114,151.0	0.0	-114,151.0

No transfers between the levels were made during the reporting period.

Capital market risk

The CA Immo Group manages the risks arising from the capital markets in a variety of ways: It takes extensive liquidity planning and safeguarding measures, for example, in order to avoid tight positions. It also protects itself by entering into capital partnerships (joint ventures) for project development purposes. This policy serves as an alternative to and extension of the customary sources of equity. Outside capital is procured by the CA Immo Group not only from its principal bank, Bank Austria/UniCredit Group, but also and to a growing extent through new or developing business relations with other domestic and foreign banks.

Interest rate risk

Risks resulting from changes in interest rates basically concern long-term loans. In order to reduce the interest rate risk, a mix of long-term fixed interest rate and variable interest rate loans is used. The variable interest rate loans concluded also include derivative financial instruments (interest rate caps, interest rate swaps). However, the purpose of all of these is just to hedge against interest rate risks from underlying transactions.

A list of all major interest rate liabilities and swaps concluded as well as details on maturities is given under Points 2.3.13. and 2.5.1.. There are currently no risks which represent a major and permanent danger to the CA Immo Group.

A change in interest rates of 100 basis points would have the following effect on the consolidated income statement and the equity. This analysis is based on the assumption that all other variables, especially exchange rates, will remain constant:

€ 1,000	Recognised in profit or loss		Recognised directly in equity	
	100 bp increase	100 bp decrease	100 bp increase	100 bp decrease
31.12.2009				
Variable rate instruments	-14,612.8	14,612.8	0.0	0.0
Interest rate swaps (interest)	16,999.7	-16,999.7	0.0	0.0
Interest rate swaps (valuation)	25,736.5	-26,903.5	48,246.0	-49,646.4
	28,123.4	-29,290.4	48,246.0	-49,646.4
31.12.2008				
Variable rate instruments	-18,732.7	18,732.7	0.0	0.0
Interest rate swaps (interest)	15,825.1	-15,825.1	0.0	0.0
Interest rate swaps (valuation)	12,020.9	-13,189.6	63,904.3	-68,749.7
	9,113.3	-10,282.0	63,904.3	-68,749.7

The sensitivity analysis is based on the consolidated statement of financial position values as at 31.12.2009 assuming an interest rate change of 100 basis points. The variable rate instruments include interest rate-dependent financial liabilities and loans, disregarding hedge relations. In the case of the financial derivatives, an interest rate change gives rise to a component that is recognised in profit and loss (interest and valuation of fair value swaps) and to the change in value of the cash flow hedges recognised in equity.

Currency risk

Currency risks result from rental income and receivables in foreign currency, especially in SKK¹⁾, BGN, CZK, HUF, PLN, RON and RSD. These foreign currency inflows from rents are secured through a linkage of rents to EUR and USD so that on balance no major risk exists. On the liabilities side, risks may result from loans taken out in CHF, CZK and USD (see Point 2.3.13.). This risk mainly relates to rental income in CZK and USD. Loans are taken out in the same currency as the one on which the rental agreement in question is based. The translation of individual financial statements denominated in local currency relating to companies located outside the Euro zone may result in non-cash related effects on the consolidated net income.

An assumed USD exchange rate increase by 10 % (from 1.4310 to 1.5741) as at the balance sheet date would have resulted in a currency gain of € 279.0K. An assumed USD exchange rate decrease by 10 % (from 1.4310 to 1.2879) as at the balance sheet date would have resulted in a currency loss of € 341.0K.

An assumed CZK exchange rate increase by 10 % (from 26.4000 to 29.0400) as at the balance sheet date would have resulted in a currency gain of € 683.8K. An assumed CZK exchange rate decrease by 10 % (from 26.4000 to 23.7600) as at the balance sheet date would have resulted in a currency loss of € 835.8K.

The group company in Switzerland can proportionally dispose of balances to the amount of CHF 1,139.2K (Book value: € 765.8K). An assumed CHF exchange rate increase by 10 % (from 1.4876 to 1.6364) as at the balance sheet date would have resulted in a currency loss of € 69.6K. An assumed CHF exchange rate decrease by 10 % (from 1.4876 to 1.3388) as at the balance sheet date would have resulted in a currency gain of € 85.1K.

Credit risk

On the assets side, the amounts stated represent the maximum default risk as no major set-off agreements exist. The trade debtors are counterbalanced by rent deposits received in the amount of € 4,358.0K and by bank guarantees. Where recognisable, the risk resulting from rent receivables and receivables from property sales is considered by carrying out value adjustments. If there are objective indications of a value adjustment (such as e.g. late payment, litigation, insolvency), an impairment is recognised. The same applies to financing obtained by joint ventures or associated companies if, in view of the relevant company's business development, full repayment is not to be expected. The impairment loss is the difference between the current book value of the asset and the cash value of the expected future cash flow from the receivable. The default risk of other financial instruments stated on the assets side may be considered as low since the transactions were mainly concluded with blue-chip financial institutions. For risks from securities and other guarantees see Point 2.5.3.

Fair values

The fair values of the financial assets and financial liabilities are stated together with the relevant items. The fair value of the other primary financial instruments corresponds to the book value due to day-to-day maturity or very short maturities.

2.5.2. Liquidity risk

The liquidity risk is the risk of being unable to settle financial liabilities at the time of maturity. The CA Immo Group controls liquidity by ensuring the availability of sufficient financial resources to settle due liabilities, while avoiding unnecessary potential losses and risks. In keeping with the investment horizon for real estate, most of the loans raised are long-term loans.

The table below shows the contractually agreed (non-discounted) interest payments and repayments relating to primary financial liabilities and derivative financial instruments.

¹⁾ Slovakia adopted the euro on 1.1.2009. Therefore the currency risk for SKK will no longer exist in future.

31.12.2009	Book value	Contractually	Cash flow	Cash flow	Cash flow

2.5.3. Other liabilities and contingent liabilities

Guarantees

As at 31.12.2009, there are guarantees within the Vivico Group in the amount of € 22,033.0K (31.12.2008: € 32,178.0K) from urban development contracts as well as from purchase contracts concluded with regard to the payment of costs in respect of contaminated sites and war damage in the amount of € 4,765.3K (31.12.2008: € 3,706.0K). There are also rent guarantees in the amount of € 211.0K (31.12.2008: € 211.0K) which have been provided. (In addition, letters of in-

¹⁾ The cash flows for interest rate derivatives are assumed values based on the forward rates.

tent have been issued for two companies in Germany consolidated on a proportional basis to the amount of € 2.285.0K (31.12.2008: € 6,098.5K) and one surety to the amount of € 800.0K (31.12.2008: € 0.0K).

Tax audits are currently underway both in Austria and in Germany. Provisions have been formed for the tax risks insofar as an enforcement of claims is expected.

As at 31.12.2009 there are for Eastern/South East Europe guarantees to the amount of € 1,905.0K (31.12.2008: € 7,182.0K) for a proportionally consolidated company in Slovakia.

The proportional contingent liabilities of associated companies, which the CA Immo Group has assumed jointly with the other owners, amount to € 3,360.0K (31.12.2008: € 3,360.0K) and relate to the mortgage security of a long-term loan.

Pending lawsuits

In the reporting period, an out-of-court compensation claim in the amount of around € 22,000.0K, considered unjustified by the CA Immo Group, was asserted against the Group. Since an actual demand currently appears unlikely, no provisions were formed in this connection.

Significant liabilities in respect of outstanding purchase invoices

Besides the liabilities and provisions already contained in the statement of financial position as at 31.12.2009, the acquisition of a property company in Hungary is no longer associated with a purchase commitment arising from the forward purchase (31.12.2008: € 51,000.0K).

The prepayments made on investments in properties to be closed at a later date refer to City Deco in Prague. The performance of the contract by the partner is uncertain at present.

2.5.4. Leases

CA Immo Group as lessor

The rent agreements concluded by the CA Immo Group as the landlord or lessor are classified as operating leases according to IFRS. They generally contain the following material provisions:

- linkage to EUR or USD, CHF
- value maintenance through linkage to international indices
- medium-term to long-term maturities or waiver of termination

As at 31.12.2009, the future minimum rental income from existing lease contracts that are either limited in time or subject to a termination waiver comprises the following elements:

€ 1,000	2009	2008
In following year	140,422.2	149,997.6
Thereafter 4 years	434,910.8	440,249.1
More than 5 years	1,071,136.2	1,096,843.3
	1,646,469.2	1,687,090.0

All of the other lease contracts can be terminated at short notice.

The minimum lease payments (rents) consist of the net rents payable until the agreed end of the contract or until the earliest possible termination date available to the lessee (tenant).

CA Immo Group as lessee

All the rental or lease obligations accepted by the CA Immo Group are to be classified as operating leases.

The lease contracts concluded by the Vivico Group as lessee relate principally to leased properties in Frankfurt (until 2011), Cologne (until 2011), Munich (until 2017) and Berlin (until 2018).

The remaining operating lease agreements of CA Immo Group concern office furniture, equipment and other assets and motor vehicles. No call options have been agreed.

The following minimum lease payments fall due in the forthcoming periods:

€ 1,000	2009	2008
In following year	1,668.5	1,446.0
Thereafter 4 years	1,900.1	3,414.0
More than 5 years	634.0	165.0
	4,202.6	5,025.0

2.5.5. Business relationships with related companies and parties

Related companies and parties of the CA Immo Group are:

- joint ventures, in which CA Immo Group holds interests
- associated companies, in which CA Immo Group holds interests
- the executive bodies of CA Immobilien Anlagen Aktiengesellschaft
- the Bank Austria/UniCredit Group

As of the indicated balance-sheet dates, the following significant receivables from/payables to joint ventures and associated companies in which the CA Immo Group held an interest existed:

€ 1,000	31.12.2009	31.12.2008

Total	15,225.9	3,820.5

The loans to joint ventures were granted for the purpose of follow-up funding of the ongoing project. No guarantees were issued for the loans and receivables. The loan to Soravia Center OÜ, Tallinn, was completely impaired (see Point 2.1.16.).

There were no other impairments or value adjustments recognised in profit or loss.

The liability to CA Betriebsobjekte Polska Sp.z.o.o., Warsaw, is a loan liability. All other liabilities derive from services in Germany and Switzerland.

The terms and conditions (in particular interest) of the above mentioned transactions are in line with those prevailing in the market.

¹⁾ Effective 31.12.2009 Warsaw Financial Center Sp.z.o.o., Warsaw, merged to become CA Betriebsobjekte Polska Sp.z.o.o., Warsaw.

The executive bodies of CA Immobilien Anlagen Aktiengesellschaft, Vienna:

Management Board

Bruno Ettenauer
 Wolfhard Fromwald
 Bernhard H. Hansen (since 1.10.2009)

Supervisory Board

Wolfgang Ruttenstorfer, Chairman
 Helmut Bernkopf, Chairman's Deputy
 Detlef Bierbaum
 Reinhard Madlencnik
 Horst Pöchlacker
 Regina Prehofer
 Gerhard Nidetzky (until 13.5.2009)
 Christian Nowotny (until 13.5.2009)

The Management Board of CA Immobilien Anlagen Aktiengesellschaft is also the Management Board of CA Immo International AG, Vienna, and Managing Director of Vivico Real Estate GmbH, Frankfurt. The Management Board members Bruno Ettenauer and Wolfhard Fromwald are remunerated for their work in all three companies solely within the scope of their contracts of employment with CA Immobilien Anlagen Aktiengesellschaft. The remuneration of Bernhard H. Hansen is borne in full by Vivico Real Estate GmbH, Frankfurt; no costs are passed on to CA Immobilien Anlagen Aktiengesellschaft or to CA Immo International AG.

As at 31.12.2009, all members of the Supervisory Board had been elected by the General Meeting.

The total costs of the Management Board comprise as follows:

€ 1,000	2009	2008
Payments due at short notice (inc. staff incidentals)	766.3	1,651.3
Endowments to severance payments/contributions to pensions funds	72.9	27.6
Payments for termination of employment ¹⁾	0.0	375.6
Total costs	839.2	2,054.5

The management fees passed on to CA Immo International AG (inc. staff incidentals, benefits in kind and pension provisions) in 2009 totalled € 243.4K (2008: € 250.7K), equal to about 29.0 % of the total costs of the Management Board and was allocated according to the time/work contributed by the individual Management Board members. There is no Stock Option Plan.

CA Immobilien Anlagen Aktiengesellschaft paid out in total € 56.0K in 2009 (for the 2008 business year) as remuneration of the Supervisory Board (2008 for the 2007 business year: € 73.3K). No fees, in particular for consultancy and agency work, were paid beside that to members of the Supervisory Board. No loans or advances were granted to members of the Management Board or of the Supervisory Board.

Besides their function in CA Immobilien Anlagen Aktiengesellschaft Helmut Bernkopf and Reinhard Madlencnik also act on the Supervisory Board of CA Immo International AG. In addition, Helmut Bernkopf is responsible on the Management Board of UniCredit Bank Austria AG for corporate customers and the "Investment Banking" sector, and Reinhard Madlencnik is divisional managing director of the "Properties" department at UniCredit Bank Austria AG.

The UniCredit Bank Austria AG/UniCredit Group is the principal bank of the CA Immo Group. The CA Immo Group transacted the majority of its payments and part of its credit financing with this bank and made most of its financial investments with this bank. In addition, CA Immo AG issued a corporate bond in October 2009 and a convertible bond in November 2009. Both issues were handled by UniCredit CAIB AG as lead manager (corporate bond) or jointly with Deutsche Bank as joint bookrunner (convertible bond).

¹⁾ Gerhard Engelsberger retired from the Management Board with effect from 31.1.2008.

The tables below illustrate the relationships that exist with UniCredit Bank Austria AG/UniCredit Group:

- Consolidated statement of financial position:

€ 1,000	31.12.2009	31.12.2008
Share of financial liabilities recognised in consolidated statement of financial position	26.8 %	32.6 %
Outstanding receivables/liabilities	-149,966.8	-453,747.5
Market value of interest rate swaps	-79,405.5	-54,058.8

- Consolidated income statement:

€ 1,000	2009	2008
Net interest expenses of CA Immo AG (incl. interest income, swap expenses and income and loan processing charges)		
- CA Immo AG	-16,762.8	-1,205.0
- CA Immo AG subsidiaries	-30,740.9	-6,264.5
Marketing and sales fees	-9.0	-614.8
Issue costs	-1,105.5	0.0

Liabilities to banks were assumed for follow-up funding of group activities and are secured by pledges of company shares, mortgages and similar guarantees. There were no impairments recognised in profit or loss for bank receivables. The terms and conditions of the business relationship with the Bank Austria/UniCredit Group are in line with those prevailing in the market.

2.5.6. Net profit effect on the income statement of the settlement of transactions within the CA Immo Group and the CAINE Group

The CA Immo Group has a majority (62.8 %) stake in CA Immo International AG, Vienna, alongside other investors. CA Immo International AG for its part has a majority (60.0 %) stake in CA IMMO NEW EUROPE PROPERTY FUND S.C.A. SICAR, Luxembourg. The individual financial statements of CA IMMO NEW EUROPE PROPERTY FUND S.C.A. SICAR, Luxembourg and the individual financial statements of CA Immo International AG are shown as fully consolidated in the consolidated financial statements of the CA Immo Group so that business transactions with CA Immo International AG and CA IMMO NEW EUROPE PROPERTY FUND S.C.A. SICAR and its subsidiaries (the CA Immo International Group and the CAINE Group for short) are not taken into consideration in the individual items from the annual financial statements but reflected only in the share of net income attributable to non-controlling interests.

Reconciliation of the non-controlling interest in the subgroup CA IMMO NEW EUROPE PROPERTY FUND S.C.A. SICAR, Luxembourg (CAINE) based on group-internal settlements:

€ 1,000	31.12.2009	31.12.2008
Result of subgroup CAINE after consolidation of CA Immo Group	-24,349.9	-46,228.4
- of which 39.97 % expected non-controlling interest	-9,732.0	-18,476.2
Actual non-controlling interest	-11,166.0	-20,819.9
Difference	1,434.0	2,343.7

€ 1,000	31.12.2009	31.12.2008
Composition of the difference		
Non-controlling interest in respect of asset management fee	1,358.9	1,766.5
Non-controlling interest in respect of interest income	38.6	558.5
Non-controlling interest in respect of management fees	36.5	39.7
Non-controlling in respect of marketing expenses	0.0	-21.0
Total	1,434.0	2,343.7

2.5.7. Capital management

The objective of the CA Immo Group's capital management is, firstly, to make the necessary resources for the continuation of the company available at all times, and secondly, to optimise the costs for the capital required for this.

A key parameter set for management of capital, is the ratio of shareholders' equity to net debt within the total capital structure. The objective is not to exceed a gearing ratio of about 100 %. There is no external rating or explicit requirements set by third parties regarding parameters for management of the group capital. In determining the target values, consideration is given firstly to the normal market conditions under which capital providers are willing to provide financing, and on maximising the return on the shareholders' equity used. If the gearing ratio is too low, inadequate leverage would cause the shareholders' equity returns to suffer, whereas if the debt is too high, access to financing would become harder and/or far higher interest would be demanded. Derived from this overall goal, a suitable ratio of equity to outside capital is determined for each individual investment decision, depending on the real estate or development project. If, in particular on account of unscheduled write-downs, the gearing ratio rises for a sustained period above the target value, action may be taken in particular by real estate sales and by capital increases. If the target value is not met, it is possible to respond by repatriation of equity to the shareholders, and this may take place in the form of dividends or share repurchase.

The net financial liability and the gearing ratio are definitive key figures for presenting the capital structure of the CA Immo Group and show the following development:

€ 1,000	2009	2008
Interest-bearing liabilities		
Loans	472,525.3	194,903.6
Financial liabilities	1,503,944.7	1,728,818.8
Interest-bearing assets		
Securities	-6,948.2	-11,251.2
Cash and cash equivalents	-497,199.3	-321,380.3
Net financial liability	1,472,322.5	1,591,090.9
Shareholders' equity	1,729,160.1	1,854,654.1
Gearing ratio (Net debt/equity)	85.1 %	85.8 %

2.5.8. Key figures per share

Earnings per share

The undiluted earnings per share (as shown in the Consolidated Income Statement) is calculated by division of the group result allocatable to the owners of ordinary shares in the parent company by the weighted average number of ordinary shares that were in circulation during the business year.

In calculating the diluted earnings per share the result allocatable to the owners of the parent company divided by the weighted average number of ordinary shares that were in circulation during the business year, plus the weighted average number of ordinary shares that would arise from the conversion of all financial instruments with a dilution effect into ordinary shares.

The share capital of CA Immo AG as at 31.12.2009 is € 634,370,022 and is broken down into 87,258,600 shares of no par value. In the 2009 business year 1,494,076 units of own shares acquired in the previous year were resold, therefore as at balance-sheet date there were again 87,258,600 units in circulation. As a result at the sale in October 2009 there were on average 86,141,113 shares in circulation in the 2009 business year.

In 2009 a convertible bond was issued. The interest expenditure since issue amounted to € 1,103.9K. The consolidated net income apportionable to the owners of the parent company adjusted by interest expenditure for the convertible bond is € -75,811.1K. On account of the negative consolidated net income the diluted earnings per share in accordance with IAS 33.43 equals the undiluted earnings per share. In the event of a future positive consolidated net income the convertible bond would however have a dilution effect, i.e. earnings per share fall on account of the potential additional shares in the event of conversion.

The undiluted earnings per share and the diluted earnings per share work out as follows:

		2009	2008
Weighted number of shares in circulation		86,141,113	86,739,128
Consolidated net income attributable to the owners of the parent	€ 1,000	-76,915.0	-237,120.6
Cash and cash equivalents	€	-0.89	-2.73

Cash flow per share

The cash flow per share is calculated by dividing the operating cash flow and the cash flow from operating activities by the weighted number of ordinary shares in circulation during the business year.

		2009	2008
Weighted number of shares in circulation		86,141,113	86,739,128
Operating cash flow	€ 1,000	120,519.1	114,588.7
Operating cash flow per share	€	1.40	1.32
Cash flow from business activities	€ 1,000	130,758.2	169,660.3
Cash flow per share	€	1.52	1.96

2.5.9. Payroll

The CA Immo Group employed in the 2009 business year on average 277 employees (2008: 263) and 20 workers (2008: 19), of which on average 189 (2008: 157) employees were engaged by the Vivico Group. In addition, an average of 11 white-collar workers (2008: 14) and 19 blue-collar workers (2008: 20) were employed by companies consolidated on a proportional basis.

2.5.10. Costs for the auditor

In accordance with Section 266 Z 11 Austrian Commercial Code the costs for the auditor of CA Immo AG, Vienna, incurred in the business year are to be disclosed. These are as follows:

€ 1,000	2009	2008
Audit services	289.8	315.5
Other advisory services	132.0	132.0
Tax consultancy services	22.0	81.0
Other services	44.0	154.0
	487.8	682.5

2.5.11. Events after the close of the business year

In January 2010 the properties were sold that are shown under section 2.3.5. as being held for sale.

On 14.1.2010 the Joint Venture contracts for the development of Mainz custom harbour were notarised.

Moreover construction started on the AMBIGON project in the Nymphenburg "Schlossviertel" of Munich; the volume of the construction is expected to be in the amount of EUR 40.1m.

Also in January 2010 the Vivico Group extended the head lease for a Berlin property of 15,000 sqm by six years.

AUDITOR'S REPORT

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of

**CA Immobilien Anlagen Aktiengesellschaft,
Vienna,**

for the fiscal year from 1 January 2009 to 31 December 2009. These consolidated financial statements comprise the consolidated statement of financial position as at 31 December 2009, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of cash flows and the consolidated statement of changes in equity for the fiscal year ended 31 December 2009 and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements and for the Accounting System

The Company's management is responsible for the group accounting system and for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the EU. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility and Description of Type and Scope of the Statutory Audit

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with laws and regulations applicable in Austria and with International Standards on Auditing, issued by the International Auditing and Assurance Standards Board (IAASB) of the International Federation of Accountants (IFAC). Those standards require that we comply with professional guidelines and that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Group's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

Our audit did not give rise to any objections. In our opinion, which is based on the results of our audit, the consolidated financial statements comply with legal requirements and give a true and fair view of the financial position of the Group as at 31 December 2009 and of its financial performance and its cash flows for the year from 1 January to 31 December 2009 in accordance with International Financial Reporting Standards (IFRSs) as adopted by the EU.

Report on the Management Report for the Group

Pursuant to statutory provisions, the management report for the Group is to be audited as to whether it is consistent with the consolidated financial statements and as to whether the other disclosures are not misleading with respect to the Company's position. The auditor's report also has to contain a statement as to whether the management report for the Group is consistent with the consolidated financial statements and whether the disclosures pursuant to Section 243a UGB (Austrian Commercial Code) are appropriate.

In our opinion, the management report for the Group is consistent with the consolidated financial statements. The disclosures pursuant to Section 243a UGB (Austrian Commercial Code) are appropriate.

Notes to the accounts for the business year 2009

A. Accounting and valuation methods and general information

The financial statements have been drawn up pursuant to the provisions of the Austrian Commercial Code (UGB).

With the merger agreement of 25.6.2009 MI Immobilienverwertungs-Gesellschaft m.b.H., Vienna, a 100%-owned subsidiary, being the transferor company, was merged with CA Immobilien Anlagen Aktiengesellschaft, the acquiring company, with retrospective effect to 31.12.2008 subject to application of Section I of the Corporate Restructuring Taxes Act (UmgrStG). The merger results in a merger loss in the amount of €900K.

1. Fixed assets

Intangible and tangible fixed assets

The intangible and tangible assets are stated at acquisition or production cost reduced by scheduled depreciation, where depreciable, and unscheduled depreciation, where required.

The scheduled depreciation is carried out on a linear basis, with the depreciation period corresponding to the useful life expectancy.

Additions in the first half of the fiscal year are subject to full annual depreciation, additions in the second half are subject to half of annual depreciation.

Financial assets

The shares in affiliated companies and the participations are stated at original cost reduced by required unscheduled depreciation and amortisation, and loans at original cost reduced by repayments made.

Unscheduled inventory write-downs on intangible and tangible fixed assets are only carried out where it is anticipated that permanent value impairments have occurred. In fiscal 2009 no unscheduled write-downs (previous year: €22,511K) were made on the tangible assets and write-downs to the value of €438,941K (previous year: €53,142K) were made on the financial assets.

In fiscal 2009 write-ups on the tangible assets to the value of €8,548K (previous year: €0K) were not carried out. Write-ups on the financial assets to the value of €15,738K (previous year: €0K) were made.

2. Current assets

Receivables are valued at nominal value, and identifiable default risks are accounted for by means of individual write-downs.

Current investments are stated including accrued interest attributable to the securities, though not higher than at market value.

3. Other untaxed reserves

The construction cost subsidies received from the public sector are shown as Exceptional items for investment subsidies and are written back on a pro rata basis in accordance with the effective life of the projects they are used to part-finance.

4. Provisions and liabilities

Provisions for severance payments amount to 134.40% (previous year: 121.28%) of the imputed statutory severance payment obligations existing on the balance sheet date. The calculation is made using the PUC method, which is recognised in international accounting, based on an interest rate of 5% (previous year: 5.75%) and future salary increases of 2% for employees plus an inflation payment of 2% and not taking into account a fluctuation discount. The interest rate was reduced by 0.75% compared to the previous year, otherwise the same parameters were applied for calculation of the provisions as in the previous year.

The Tax and other provisions are made on a prudent basis in accordance with the anticipated requirement. They take into account all identifiable risks and as yet unquantified liabilities.

Liabilities are stated on a prudent basis at their repayment amount.

5. Note on currency conversion

Foreign exchange receivables are valued at the purchase price or at the lower bid rate as at the balance sheet date. Foreign exchange liabilities are valued at the purchase price or the higher offer rate as at the balance sheet date.

B. Explanatory notes on the balance sheet and income statement

1. Explanatory notes on the balance sheet

1.1 Fixed assets

Intangible assets

The Goodwill is the result of the merger with CA Immo Beteiligungen und Leasing GmbH which took place in fiscal 2002 and is amortised over a period of ten years in accordance with the effective economic life.

The Rights relate to CAP rights acquired as protection against interest rate rises. These are subject to scheduled depreciation in equal amounts in accordance with the dates of fixing of interest rates. As in the previous year there was no unscheduled depreciation in fiscal 2009.

Tangible assets

The additions to Land and buildings and to Prepayments made and construction in progress relate for the most part to current investments, in particular amalgamation and division of leased premises at the Handelskai and Wiedner Hauptstrasse locations and preconstruction works for the Erdberger Lände.

The disposals relate to the sale of several items of real estate. As at the balance sheet date the tangible assets include 30 properties (previous year: 37 properties).

Financial assets

(See supplement: Notes on affiliated companies)

The book value of the Shares in affiliated companies is €1,629,445K (previous year: €2,046,091K). The additions are mainly the result of shareholder contributions to CA Immo Rennweg 16 GmbH in the amount of €5,500K and the acquisition of 448,254 shares in CA Immo International AG with a total value of €1,722K. The reduction in the book value is attributable to the valuation, this relating for the most part to the depreciation of the shares in CA Immo International Holding GmbH in the amount of €436,216K and the write-up of the shares in Vivico AG in the amount of €15,086K.

Loans to affiliated companies

This item comprises a loan to CA Immobilien Anlagen Beteiligungs GmbH & Co Finanzierungs OG in the amount of €111,094K (previous year: €104,031K) for the refinancing of various subsidiaries for real estate investments.

1.2 Current assets

Accounts receivable (remaining term up to one year) to the value of €122K (previous year: €237K) include outstanding rent and operating cost payments.

€697K (previous year €1,176K) of Receivables due from affiliated companies (remaining term up to one year) to a total value of €31,996K (previous year: €26,633K) relate to trade receivables and the balance to other receivables.

In the Other receivables (remaining term up to one year) for the fiscal year in the amount of €9,502K (previous year: €1,797K) the main item is a receivable from the sale of the property at Thunstraße and Völkermarkterstraße in the amount of €9,276K.

1,494,076 Own shares of CA Immobilien Anlagen AG were sold in the completed fiscal year at a price of €9.55.

The Other securities include 1,180 shares in ABS Dynamic Cash to the value of €6,948K (previous year: 1,826 shares to the value of €11,251K).

1.3 Deferred expenses

Deferred expenses in the amount of €1,667K (previous year: €889K) essentially comprise deferred discounts to the value of €1,607K (previous year €624K) for the issuance of a bond in the amount of €200,000K in 2006 and a bond issued in fiscal 2009 to the value of €150,000K.

1.4 Equity capital

The company's Share capital of €634,370,022 is fully paid up (previous year: €634,370,022). It is broken down into four nonpar registered shares and 87,258,596 nonpar bearer shares.

The company's own shares acquired in the previous year were sold again in October 2009. The reserve for the company's own shares was transferred to the free revenue reserve at the book value of 31.12.2008, being €6,277K.

In the ordinary shareholders' meeting of 13.5.2008 the Management Board was authorised with the approval of the Supervisory Board and up to 12.5.2013 to issue convertible bonds to a total nominal value of up to €317,185K on a once-off basis or repeatedly, also under exclusion of the subscription rights of the shareholders, and to grant the bearers of convertible bonds conversion rights on up to 43,629,300 of the company's ordinary bearer shares. In November 2009, on the basis of this authorisation, a five-year convertible bond worth €135,000K was issued. The coupon of the convertible bond was fixed at 4.125% and the conversion price at €11.5802 (this corresponds to a premium of 27.5 % over the reference price). Due to the conditions of the convertible bond, it is stated in full as a liability.

The net income for 2009 includes write-ups on shares in affiliated companies to the value of €15,738K. Pursuant to § 235, No. 1, Austrian Commercial Code (UGB) there is a profit distribution restriction equivalent to the net income of €5,897K.

As at 31.12.2009 there is authorised but unissued capital in the amount of €317,185,011 which can only be made use of up until 8.8.2012 and conditional capital in the same amount.

1.5 Untaxed reserves

Exceptional items for investment grants

This relates to construction cost subsidies of the municipality of Linz for the property at Schubertstraße 16-20, Linz, and of the Provincial Government of Vienna for the property at Zimmermannplatz 1, Vienna 9. The subsidies are written back in operating income in accordance with the remaining useful life of the investments thus financed.

1.6 Provisions

Provisions for severance payments

There is a provision of €489K (previous year: €510K) for the severance payment claims of employees of the company.

The Tax provisions in the amount of €284K (previous year: €731K) relate for the most part to the minimum corporation tax for 2005 to 2008 and a provision for German corporation tax.

Other provisions

This item is made up as follows:

	31.12.2009 €K	31.12.2008 €K
Derivatives transactions	46,965	36,026
Group reorganisation	350	0
Liabilities vis-à-vis affiliated companies	724	0
Personnel (vacation and overtime)	363	341
Publications and expert reports	269	264
Audit costs	163	177
Construction services	105	168
Legal and consulting fees	83	89
Commission	39	169
Real property tax and land transfer tax	0	215
Other	206	104
	49,267	37,553

The liabilities vis-à-vis affiliated companies relate to commitments to an affiliated company in respect of cover of negative equity capital as at 31.12.2009. In January 2010 a shareholder contribution was granted to cover the negative equity capital.

1.7 Liabilities

€K (previous year)	Remaining term up to 1 year	Remaining term 1-5 years	Remaining term more than 5 years	Total
Bonds	0 (0)	285,000 (0)	200,000 (200,000)	485,000 (200,000)

Total	92,437 (377,372)	379,175 (341,390)	269,784 (266,749)	741,396 (985,511)

Bonds

This item comprises a 10-year bond with a nominal value of €200,000K and a nominal interest rate of 5.125% maturing in 2016; a 5-year bond issued in fiscal 2009 with a nominal value of €150,000K and a nominal interest rate of 6.125% maturing in 2014. Furthermore, in fiscal 2009 a 5-year convertible bond with a nominal value of €135,000K and a nominal interest rate of 4.125% maturing in 2014 was issued.

Due to financial institutions

This item mainly comprises investment loans with a filed claim to entry in the land register to the value of €152,204K (previous year: €163,176K).

Trade accounts payable

This item for the most part comprises liabilities for construction services and liability guarantees as well as general administrative costs.

Due to affiliated companies

The liabilities shown under this item mainly relate to group-internal loans to the value of €95,321K (previous year: €571,564K) and liabilities from transfer within the group of swaps in the amount of €290K (previous year €16,218K).

Other liabilities

This item is essentially made up of accrued interest for bonds and convertible bonds (€5,503K) which only become cash-effective in the autumn of 2010 and Tax Office netting from the advance VAT return for November and December 2009.

1.8 Deferred income

Deferred income comprises an investment subsidy from the municipality of Vienna in the amount of €336K (previous year: €355K), rent prepayments received in the amount of €936K (previous year: €982K) for various properties, and wage and salary accruals to the value of €5K (previous year €0K).

1.9 Contingent liabilities

	Maximum amount as at 31.12.2009 €K	31.12.2009 Used as at reporting date €K	31.12.2008 Used as at reporting date €K
Irrevocable guarantee in respect of a loan extended to CA Immo Rennweg 16 GmbH, Vienna	15,054	15,054	15,054
Guarantee for a loan extended to CA Immobilien Anlagen Beteiligungs GmbH, Vienna	0	0	9,832
Guarantee for loans extended to CA Immo BIP Liegenschaftsverwaltung GmbH, BIL-S Superädifikatsverwaltungs GmbH, CA Immo Galleria Liegenschaftsverwaltung GmbH, Betriebsobjekte Verwertung Gesellschaft mbH & Co. Leasing OHG and Vivico Real Estate GmbH	192,479	129,033	192,479
Guarantee for a loan extended to Vivico Frankfurt Tower 185 Projekt GmbH & Co KG, Frankfurt	34,000	0	0
		<u>144,087</u>	<u>217,365</u>

Furthermore, the stake of CA Immobilien Anlagen Aktiengesellschaft in CA Immo International Holding GmbH, Vienna, CA Immo BIP Liegenschaftsverwaltung GmbH, Vienna, and Betriebsobjekte Verwertung Gesellschaft m.b.H. & Co. Leasing OHG, Vienna, are pledged in favour of the lenders to subsidiaries and the shares in CA Immo International AG.

Furthermore, the following letters of comfort were issued to financial institutions financing subsidiaries:

BIL S Superädifikationsverwaltungs GmbH
Betriebsobjekte Verwertung Gesellschaft m.b.H. & Co. Leasing OHG

1.10 Liabilities from utilisation of tangible assets

The lease-related liability from utilisation of tangible assets not reported in the balance sheet is €683K for the subsequent fiscal year and €3,388K for the subsequent five fiscal years.

Of this €675K is attributable to affiliated companies for the subsequent fiscal year and €3,373K for the subsequent five fiscal years.

1.11 Details of derivative financial instruments

Type of financial instrument	Nominal amount	Fair value €K	Balance sheet item	Book value €K
Interest cap (€K)	2,308	0	Rights	0
Interest cap (CHF K)	5,150	0	Rights	0
Interest rate swaps (fixed interest payers; €K)	635,891	-46,965	Other provisions	46,965

The fair value corresponds to the amount that CA Immobilien Anlagen Aktiengesellschaft would receive or pay upon liquidation of the business on the balance sheet date. These values were determined by the financial institution with which the transactions were concluded. The cited figures are present values. Future income streams from variable payments and discount rates are determined on the basis of generally recognised financial models. Interbank mid-rates are used for valuation. Specific bid/offer spreads and other liquidation costs are not included in the valuation.

2. Explanatory notes on the Income Statement**2.1 Sales revenues**

As on 1.1.2009 the only unit of real estate in Germany directly owned by CA Immobilien Anlagen AG was sold. The sales revenues for 2009 thus relate in full to real estate located in the domestic market and total €28,435K (previous year: €28,161K incl. one property in Germany) and are made up as follows:

€K	2009	2008
Rental income for real estate	24,895	24,520
Operating costs passed on to tenants	3,540	3,641
	28,435	28,161

2.2 Other operating income

This item comprises Income from the disposal of tangible assets to the value of €9,680K (previous year: €19K), Income from the liquidation of provisions in the amount of €349K (previous year €105K) and Other operating income of €3,223K (previous year €2,842K) resulting from fees, cost allocations, insurance revenues, annuity contributions and other revenues.

2.3 Personnel costs

This items includes wages, salaries, statutory social welfare contributions and expenses for severance payments and pensions totalling €4,196K (previous year: €4,784K) for the 43 staff (previous year 44) employed by the company on average.

The Expenses for severance payments are made up as follows:

€K	2009	2008
Reversal/transfer of provision for severance payments for directors and executive employ	-24	286
Transfer/reversal of provision for severance payments for other employees	3	-2
Severance payments to other employees	3	2
Contributions to staff welfare fund for directors and executive employees	13	20
Contributions to staff welfare fund for other employees	26	27
	21	333

Pension costs are made up as follows:

€K	2009	2008
Pension fund contributions for directors and executive employees	98	93
Pension fund contributions for other employees	10	7
	108	100

2.4 Depreciation and amortisation

Scheduled depreciation and amortisation in the amount of €8,834K is shown (previous year: €9,463K). In the previous year unscheduled depreciation to the value of €22,511K was shown in addition. The composition of scheduled depreciation and amortisation is as follows:

€K	2009	2008
Depreciation of intangible assets	259	248
Depreciation of buildings	8.147	8.776
Depreciation of other assets, BGA	425	420
Low-value assets	3	19
	8,834	9,463

2.5 Other operating expenditure

Where they do not come under taxes on income the Taxes in the amount of €389K (previous year: €350K) mainly comprise real estate charges passed on to tenants in the amount of €342K (previous year: €347K), and €34K is the land transfer tax due following the merger with MI Immobilienverwertungs-Gesellschaft m.b.H., Vienna.

The Other operating expenses are made up as follows:

EUR	2009	2008
Expenses directly allocable to the real estate		
Operating costs passed on to tenants	3,181	3,264
Maintenance costs	1,436	1,748
Losses from the disposal of real estate assets	12	1,247
Own operating costs (vacancy costs)	844	969
Administration and brokerage fees	230	327
Other	137	454
Subtotal	5,840	8,009
General administrative costs		
Cost of issuing a straight bond and a convertible bond	2,686	0
Marketing and sales fees	9	615
Office rent	600	546
Administrative and management costs	564	590
Advertising and representation expenses	645	1,437
Legal, auditing and consultancy fees	1,284	1,285
Group reorganisation	686	0
Other fees and expenses in relation to financial transactions	434	5,130
Other	1,027	2,028
Subtotal	7,935	11,631
Total of other operating expenses	13,775	19,640

The “Other general administrative costs” item comprises remuneration of the Supervisory Board and publication expenses.

2.6 Income from participating interests

This item comprises the dividend paid to shareholders of CA Immo International Holding GmbH in the amount of €435,400K.

2.7 Income from loans from financial investments

This item comprises income from loans to affiliated companies to the value of €5,773K (previous year: €8,437K).

2.8 Other interest and similar income

The interest income originates from fixed term deposits and short-term investments in securities and from cash at bank and cash advances to affiliated companies and swap transfers to affiliated companies.

2.9 Income from the sale of and addition to financial assets and investments held as current assets

Due to reversals of impairment losses write-ups of shares in affiliated companies were carried out to the value of €15,738K in the fiscal year (in the previous year: write-downs of shares in affiliated companies to the value of €26,176K).

In addition income from the sale of the company's own stock to the value of €7,992K was generated.

2.10 Expenses from financial assets and investments held as current assets

The sources of the expenses were as follows:

- write-down of shares in affiliated companies in the amount of €438,941K, of which €435,400K due to dividends (previous year: €53,142K).
- transfer of provisions for liabilities vis-à-vis affiliated companies in the amount of €724K (previous year: €0K) and
- disposal and write-down of other investments held as current assets to the value of €693K (previous year: €18,109K).

2.11 Interest and similar expenditure

This item consists mainly of interest for loans taken up and bank liabilities for the financing of real estate assets (€5,759K, previous year: €31,370K), expenses for derivatives transactions (€25,506K, previous year €38,909K), interest costs for bonds (€12,940K, previous year €10,250K) and interest costs in respect of affiliated companies (€10,468K, previous year €18,514K).

2.12 Extraordinary expenses

This item is the result of the merger of CA Immobilien Anlagen Aktiengesellschaft with MI Immobilienverwertungs-Gesellschaft m.b.H.

2.13 Taxes on income

This item essentially comprises the income from tax compensation of group members in the amount of €11,449K (previous year: €6,783K).

The corporation tax provisions from previous years in the amount of €451K were reversed.

As at 31.12.2009 CA Immobilien Anlagen Aktiengesellschaft has losses carried forward in the amount of €195,329K (previous year: €192,845K) for which pursuant to the provisions of the Austrian Commercial Code (UGB) no deferred taxes were shown in the financial statements.

Other information

1. Affiliated companies

See notes in supplement

CA Immobilien Anlagen Aktiengesellschaft, Vienna, is the ultimate parent company of CA Immobilien Anlagen AG Group. The Group Consolidated Financial Statements are drawn up pursuant to International Financial Reporting Standards (IFRS) and the supplementary provisions of § 245a Austrian Commercial Code (UGB) and filed at the Vienna Commercial Court.

2. Fiscal corporate group

In fiscal 2005 a group and tax compensation agreement was concluded for the formation of a corporate group within the meaning of § 9 Corporation Tax Act (KStG) effective from fiscal 2005, and this was expanded in the subsequent years to include additional group members. In fiscal 2007 an agreement was concluded with CA Immo International AG and CA Immo Investment Management GmbH on the amendment and supplementing of the group and tax compensation agreement. The group is headed by CA Immobilien Anlagen Aktiengesellschaft, Vienna.

In 2009 the following companies are group members:

CA Immobilien Anlagen Beteiligungs GmbH, Vienna
 CA Immo ProjektentwicklungsgmbH, Vienna
 CA Immo Rennweg 16 GmbH, Vienna
 CA Immo International Holding GmbH, Vienna
 CA Immo - RI - Residential Property Holding GmbH, Vienna
 CA Immo International AG, Vienna
 CA Immo BIP Liegenschaftsverwaltung GmbH, Vienna
 CA Immo Galleria Liegenschaftsverwaltung GmbH, Vienna
 CA Immo Investment Management GmbH, Vienna
 CA Immo Asset Management GmbH, Vienna
 SQUARE S Holding GmbH, Vienna
 CA Immo International Beteiligungsverwaltungs GmbH, Vienna
 BIL-S Superädifikatsverwaltungs GmbH, Vienna
 Parkring 10 Immobilien GmbH, Vienna
 CA Immo LP GmbH, Vienna
 CA Immo Germany Holding GmbH, Vienna

3. Executive bodies and employees

Supervisory Board¹

Dr. Wolfgang Rutenstorfer, Chairman (since 13.5.2009)
 Mag. Helmut Bernkopf, Deputy Chairman (since 13.5.2009)
 Mag. Reinhard Madlencnik
 DI Horst Pöchlhammer
 Mag. DDr. Regina Prehofer
 Detlef Bierbaum
 Dkfm. Gerhard Nidetzky (until 13.5.2009)
 Univ.-Prof. Dr. Christian Nowotny (until 13.5.2009)

Management Board

Dr. Bruno Ettenauer
 Mag. Wolfhard Fromwald
 Bernhard H. Hansen (since 1.10.2009)

In 2009 the members of the Management Board received remuneration to the total value of €581K (previous year: €1,218K), of which €0K (previous year €638K) was performance-based.

¹ As at 31.12.2009 all members of the Supervisory Board had been elected by the General Meeting.

Subject to the adoption of a resolution by the Annual General Meeting the total remuneration of the Supervisory Board for fiscal 2009 was €79K (previous year: €77K).

The average number of staff employed by the company during the fiscal year was 43 (previous year: 44).

4. Auditor's remuneration

There is no indication of the auditor's remuneration for the fiscal year pursuant to § 237, Page 14 Austrian Commercial Code (UGB), as this information is contained in the Group Consolidated Financial Statements of CA Immobilien Anlagen Aktiengesellschaft.

Vienna, 2 March 2010

The Management Board

Mag. Wolfhard Fromwald

Dr. Bruno Ettenauer

Management report for business year 2009

General

CA Immobilien Anlagen Aktiengesellschaft is the parent company of the CA Immo Group. Its head office is at Mechelgasse 1, 1030 Vienna. The CA Immo Group is an internationally active property group. It has subsidiaries in Austria, Bulgaria, Croatia, Cyprus, the Czech Republic, Estonia, Germany, Hungary, Luxembourg, the Netherlands, Poland, Romania, Russia, Serbia, Slovakia and Slovenia. As of 31 December 2009, the CA Immo Group owned real estate and properties in all of the aforementioned countries except the Netherlands, Croatia, Cyprus, Luxembourg and Estonia. The company's main activity involves administering and financing the domestic and foreign subsidiaries. It also owns 30 properties in Austria (as of 31 December 2009).

Business activity in 2009

The economic environment¹

Developments in the macroeconomy are having a major impact on the real estate sector. Economic growth is proving to be a determining factor in the demand for commercial real estate in particular. At a time of great uncertainty over the way in which the economy will develop, companies are postponing decisions with far-reaching consequences – decisions on investments as well as long-term leasing. Moreover, a fall in employee numbers means that companies are requiring smaller premises. A recession – and especially one that persists – therefore forces up vacancy rates and suppresses rent levels. Given the interlinked nature of these factors, the general economic conditions in 2009 posed serious problems for the real estate sector.

The year 2009 will be remembered as the year of the deepest recession since the Second World War. The contraction in economic output that began in the third quarter of 2008 intensified early in 2009, leading to strongly negative economic growth for the first half of the year. The downward trend came to an end in quarter three as the economic picture finally started to brighten; in the third and fourth quarters of 2009, both the USA and the euro zone economies reported positive GDP growth rates. Despite the upturn as the year ended, however, the GDP trend in the euro zone for 2009 as a whole was clearly in negative territory at -4.2 % (source: Eurostat, November 2009). Austria performed only slightly better with an expected decline of 3.6 % for 2009 (source: Austrian National Bank, January 2010). The recovery in the closing quarters was driven by substantial but temporary government economic stimulus programmes in particular. The withdrawal of these initiatives could once again decelerate the pace of economic development.

A sharp fall in exports was the main effect of the global financial crisis on the Austrian economy; this in turn led to a collapse in investment. With negative growth rates reported in the second half of 2008 and first half of 2009, and moderate growth recorded from the third quarter of 2009 onwards, the pattern of the economic crisis in Austria largely mirrored that of the wider euro zone. Nonetheless, the anticipated 3.6 % decline in GDP for 2009 and renewed expansion of 1.5 % for 2010 are figures well above those predicted for the euro zone as a whole. With unemployment rising from 4.2 % at the end of 2008 to 4.7 % by autumn 2009, Austria had one of the lowest increases of any euro zone country during the present crisis; the country's unemployment rate is the second lowest in the euro zone (after the Netherlands).

Germany, the most important region for the CA Immo Group, was severely impacted in 2009 by the slump in global trade and the ensuing fall in international demand for German manufactured goods. For 2009 overall, GDP is likely to drop in real terms by around 5.0 % (source: Deutsche Bundesbank, January 2010), but this decrease is not as great as had been expected halfway through the year (-6.0 % was forecast in June 2009). The improved outlook for the German economy in the second half of 2009 was mainly prompted by the massive monetary and fiscal stimulus packages. Unemployment rose substantially, from 7.8 % at the end of 2008 to 8.2 % at the end of 2009; with the rate predicted to increase further to 9.1 % in 2010, no short-term recovery is likely on the labour market.

During the first part of 2009 especially, the Central, Eastern and South East Europe region was feeling the tangible effects not only of the economic crisis, but also of a collapse in trust – particularly from British and American investors. Several observers offered a bleak assessment of the region, and in particular of the survival chances of its financial

¹ Data correct at the time of going to press in February 2010 – subsequent adjustments to interim figures and forecasts have not been taken into account.

sector. By the third quarter of 2009, however, Central, Eastern and South East Europe was also showing clear signs of stabilisation despite the many ominous predictions. The contraction in economic output across the region eased significantly in quarter three 2009 compared to previous quarters, although the overall economic situation remains somewhat subdued. Signs of recovery are evident, but it is still too early to predict an imminent upturn. Results varied significantly from one part of the region to another. Poland can be singled out as the only country to achieve positive economic growth (of 1.2 %) in 2009. By contrast, the Baltic States were severely impacted by the economic crisis, returning negative growth rates ranging from -13.7 % (Estonia) to -18.1 % (Lithuania) (source: Austrian National Bank, December 2009). Russia was another of the countries most seriously affected by the crisis, with GDP for 2009 likely to fall by -8.6 %. However, the latest indicators point to a stabilisation in Russia as well, with modest expansion of 2.7 % forecast for 2010.

Property market

Uncertainty over the long-term impact on the property sector of developments in the global economy affected the extremely weak Austrian transaction market particularly severely in 2009. Even in a year of economic sluggishness, however, Vienna largely upheld its reputation as a traditionally stable market, with slight falls in rent levels, acceptable levels of vacancy and encouraging lettings performance.

Thanks to the German federal government's economic recovery plan, the effects of the economic crisis were less noticeable for the German economy in 2009 than had been predicted at the end of 2008. Experts recorded a slight easing of the market in the property sector at the end of the year. The year-end results of the King Sturge Real Estate Economy Index are cautious but far more optimistic than in the previous year. Overall, despite the frail economic climate, the German property market proved to be largely resistant to the crisis. In 2009, the real estate economy was at more or less the same place within the business cycle as it was in 2003 (source: King Sturge, 2009).

The economic and financial crisis has had a severe impact on real economies across Eastern Europe; Hungary, some South East European nations, the Baltic States and Russia have been particularly hard hit. Financing for property transactions remains very hard to come by in the region, and is provided only with high risk surcharges. This led to disintegrating investment markets, rising yields and falling property prices in 2008 and 2009. The advance in yields was especially pronounced in the forenamed countries in which the real economic problems were significant. Returns rose by up to 300 basis points in the major Russian cities, such as Moscow and St. Petersburg. As in the previous year, values dropped most markedly again in Bucharest, Sofia and Budapest.

Property assets

Raising the Group's enterprise value is the main aim of the portfolio strategy and therefore the overriding decision-making criterion for each new investment. The CA Immo Group pursues this goal through its unequivocal positioning as an investor in commercial real estate with a regional focus on Central Europe and two principal activities, income-producing properties and project development. It draws on more than 20 years' experience, the regional knowledge of skilled employees and the comprehensive expertise in the project development business provided by the subsidiary Vivico (see also "Equity investments and funds"). The Group's portfolio strategy has remained unchanged for many years, although the recent financial crisis prompted a process of evaluation and a measure of adjustment to specific market conditions and the general economic circumstances. Regardless of region or asset class, however, the central objectives are to secure the earning power of income-producing properties whilst realising development projects with the maximum efficiency. In regional terms, the CA Immo Group restricted its activities to the existing markets of Austria, Germany, and Eastern and South East Europe in 2009. It did not engage in any further expansion. In 2010, consolidation in countries where a presence is already established will continue to take priority over entry into new markets. The aim is to achieved a balanced portfolio in both established and growing markets.

In its consolidated balance sheet for 2009, the CA Immo Group posts property assets (including income-producing properties, properties used for own purposes, properties held for trading, properties held for sale, and development projects) of around €3.5 bn (2008: €3.8 bn); the assets attributable to the portfolio of income-producing properties total €2.4 bn (69 % of the portfolio) and those attributable to development projects €1.0 bn (27 % of the portfolio). The remain 4 % consist of properties used for own purposes, properties held for trading and properties held for sale with a recognised asset value of €0.1 m. The income-producing portfolio of the Group as at the key date encompasses a total useful area of 1.382 m sqm, some 59 % of which is office space. The regional distribution of the recognised value of these income-producing properties is as follows: 46 % Germany, 29 % Austria and 25 % Eastern Europe (via the subsidiary CA Immo International AG – see also "Equity investments and funds"). Of the development projects, about 90 % are developments and strategic property reserves in Germany, 3 % are situated in Austria, and the remaining 7 %

are CA Immo International projects. On the basis of the annualised rental income for 2009 (in the amount of €149.1 m), the asset portfolio produced a yield of 6.5 %^{*)}.

*) The annualised rental income and associated yield figures do not take account of the following recently completed projects: Capital Square (Budapest), Duna Center (Győr) and Sava City (Belgrade).

Of the total portfolio, CA Immobilien Anlagen AG itself holds 30 properties with total lettable space of 233,301 sqm and a recognised value of €283.3 m (2008: €308.5 m). In 2009 the company invested around €1.1 m in properties (2008: €6.3 m).

The business trend

Gross revenues generated in business year 2009 amounted to €28.4 m (2008: €28.1 m), originating exclusively from renting the properties located in Austria. Income from the disposal of properties totalled €9.7 m (previous year: €0.0 m). Staff expenses decreased by around 12 %, from €4.8 m in 2008 to €4.2 m. Amortisation of intangible assets and depreciation of tangible assets together fell to €8.8 m (2008: €32.0 m) because in 2009 there was no unscheduled depreciation pursuant to Section 204 Para. 2 of the Austrian Commercial Code arising from the external valuation of properties as of the balance sheet date (previous year: €-22.5 m). Other operating expenses declined by 30 %, from €20.0 m in 2008 to €14.2 m; the downturn is chiefly attributable to decreases in money transfer charges and advertising and representation costs, as well as the absence of marketing and distribution fees. The issue of a bond and a convertible bond gave rise to costs in the amount of €2.7 m. The operating result stood at €14.5 m (€-25.6 m in 2008). Income from investments in the amount of €435.4 m (previous year: €1.0 m) contains the dividend payout of the subsidiary CA Immo International Holding GmbH. Unlike in the previous year, the subsidiary CA Immo International AG did not distribute a dividend. Expenses from financial investments and securities held as current assets totalled €440.4 m (2008: €78.7 m). They arose predominantly from the dividend-related depreciation of shares in affiliated companies. The company generated revenue of €5.8 m from loans to affiliated companies (2008: €8.4 m). Interest income climbed from €5.5 m in 2008 to €10.4 m in 2009. It originated from fixed deposits, short-term investments in securities, bank balances and cash advances to affiliated companies. Income from the disposal and write-up of financial investments and securities held as current assets totalled €23.7 m (previous year: €0.04 m) and are attributable to the reversal of impairment losses for shares in affiliated companies in the amount of €15.7 m (previous year: €-26.2 m). Additional income in the amount of €8.0 m arose from the disposal of treasury shares. Interest and similar expenses were recognised in the amount of €54.7 m (2008: €99.0 m) and contain interest on loans obtained to finance property assets, expenses for derivatives, interest expenses for the bond issued in 2006, and interest expenses for affiliated companies. The forenamed factors gave rise to a financial result as of the balance sheet date in the amount of €-19.7 m (2008: €162.8 m) and a result from ordinary business activities of €-5.2 m (2008: €-188.5 m). Since 2005, CA Immo AG has been party to a group and tax compensation agreement with its subsidiaries. In 2009, the subsidiaries generated significant profits for tax purposes primarily from property disposals (realisation of undisclosed reserves), for which they must pay 22 % group tax to CA Immo AG by 30 September of the following year in each case. The income taxes item therefore rose from €6.8 m in 2008 to €11.9 m. After allowing for taxes, the annual surplus totalled €5.8 m (2008: annual deficit of €-181.7 m). The company's net result for the year as of 31 December 2009 was €5.9 m (previous year: €0.0 m).

Cash flow from business activities (operating cash flow plus changes in net current assets) for business year 2009 stood at €418.1 m (€-16.7 m in 2008); cash flow from investment activities was €-456.6 m (€-214.2 m in 2008). Cash flow from financing activities came to €245.9 m (€224.8 m in the previous year).

The total assets of CA Immo Anlagen AG fell from €2.5 bn in 2008 to €2.3 bn in 2009. Fixed assets decreased year on year, from €2.5 bn to around €2.0 bn. The ratio of fixed assets to total assets was approximately 88 % on 31 December 2009 (97 % in 2008). As of the reporting date, the company's property assets encompassed 30 properties in Austria with a recognised value of €283.6 m (2008: €311.3 m). The total useful area is 233,301 sqm. Intangible assets closed the year at €0.5 m (2008: €0.7 m). This item contains rights, EDP software and, in particular, goodwill, which decreased as a result of regular amortisation from €0.6 m in 2008 to €0.4 m as of 31 December 2009. Tangible fixed assets fell to €284.9 m (from €312.9 m in 2008). The additions to property and buildings and to down-payments made and construction in progress chiefly concern current investments, in particular the consolidation and separation of rented premises on Handelskai and Wiedner Hauptstrasse, as well as preparatory construction works for Erdberger Lände. The disposal relates to the disposal of several fragmented properties. The carrying value of shares in affiliated companies is €1.6 bn (2008: €2.0 bn). The additions originate largely from shareholder subsidies for CA Immo Rennweg 16 GmbH in the amount of €5.5 m and the acquisition of 448,254 shares in CA Immo International AG with a value of €1.7 m. The reduction in the carrying value is attributable to valuation; it largely concerns the impairment of shares in CA Immo

International Holding GmbH, in the amount of €436.2 m, and the reversal of impairment losses for shares in Vivico AG, in the amount of € 15.0 m. The loans to affiliated companies contain a loan to CA Immobilien Anlagen Beteiligungs GmbH & Co Finanzierungs OG in the amount of €111.1 m (previous year: €104.0 m) for refinancing the property investments of various subsidiaries. Current assets were increased by the issue of a bond and a convertible bond, from €70.4 m in 2008 to €280.3 m as of 31 December 2009. Equity remained unchanged year on year at €1.5 bn. The equity ratio stands at around 66 % (2008: 60 %). The equity to fixed assets ratio was 74 % (2008: 61 %).

Information provided under Article 243a of the Austrian Commercial Code (UGB)

The following information must be declared according to Section 243a UGB

1. The company's share capital remains unchanged year on year at €634.4 m; it is divided between 87,258,596 bearer shares and four no-par registered shares. The four registered shares are held by UniCredit Bank Austria AG and each share entitles the holder to appoint one member of the Supervisory Board. The bank did not exercise this right. All Supervisory Board members were elected by the General Meeting. As of 31 December 2009, the company does not hold any treasury shares (31 December 2008: 1,494,076 shares). CA Immo shares are traded in the prime market segment of the Vienna Stock Exchange (ISIN: AT0000641352).
2. There are no restrictions on voting rights. The transfer of the registered shares is subject to the company's consent.
3. As of the year-end, around 10 % of the shares in CA Immo Anlagen AG are held by UniCredit Bank Austria AG; the remaining shares are in free float. The company does not know of any other shareholders with an investment of 10 % or more.
4. Apart from UniCredit Bank Austria AG (see item 1.), no shareholders dispose of shares with special rights of control.
5. Employees who hold shares exercise their voting rights directly at the Ordinary General Meeting.
6. According to the Articles of Association, the company's Management Board must comprise one, two or three persons. The age limit for members of the Management Board shall be determined in the internal rules of procedure for the Management Board and fixed at the completion of the age of 65. The duration of the last term of office as member of the Management Board shall end with the completion of the General Annual Meeting following the 65th birthday. The Supervisory Board shall consist of at least three and no more than twelve members. The holders of the four registered shares are entitled to appoint one member of the Supervisory Board each (see also item 1.). The appointed Supervisory Board members can be dismissed by the entitled party and replaced by other members at any time. The provisions of the Articles of Association governing the term of office and elections to fill vacancies do not apply to the thus appointed members. The other members of the Supervisory Board are elected by the Ordinary General Meeting. The age limit for members of the Supervisory Board shall be determined in the internal rules of procedure for the Supervisory Board and is fixed with the completion of the age of 70. Members of the Supervisory Board shall leave the Supervisory Board at the completion of the Annual General Meeting following their 70th birthday.
7. The changes in shareholders' equity are indicated below:

Change in €K	31.12.2008	Reclassification of reserves	Dividend	Annual result	31.12.2009
Share capital	634,370				634,370
Appropriated capital	868,545				868,545
reserves					
Reserves for treasury shares	6,277	-6,277			0
Retained earnings	0	6,277			6,277
Net profit	0		0	5,897	5,897
Total equity	1,509,192	0	0	5,897	1,515,089

As of the reporting date, 31 December 2009, capital authorised but not issued (under Section 169 AktG (Austrian Stock Corporation Act)) existed in the amount of €317.2 m; the closing date for the issue of the capital is 8 August 2012.

The Ordinary General Meeting of 13 May 2008 authorised the Management Board until 12 May 2013, with the approval of the Supervisory Board, to issue convertible bonds in the total nominal amount of up to €317.2 m, including in several tranches and excluding the subscription right of existing shareholders, and to grant conversion rights to the holders of convertible bonds in respect of up to 43,629,300 ordinary bearer shares in

the company. On the basis of this authority, a five-year convertible bond with a principal of €135 m was issued in November 2009. The coupon was fixed at 4.125 % and the conversion price at €11.58 (corresponding to a premium of 27.5 % above the reference price). In view of the conditions applying to the convertible bond, its entire amount is recognised as a liability. In this connection, the same Ordinary General Meeting granted authority for a contingent capital increase (under Section 159 AktG) in the amount of €317.2 m.

The Ordinary General Meeting of 13 May 2008 further authorised the Management Board according to Section 65 Para. 1 No. 8 AktG for a period of 30 months from the date of the resolution to repurchase and, if necessary, redeem or sell treasury shares, including off the stock exchange or other than by way of a public offering, up to the legally permissible ceiling of 10 % of the share capital. In compliance with this resolution, the company acquired 1,494,076 ordinary bearer shares (1.71 % of the share capital) in 2008 in the context of a share redemption programme at a weighted average price of €9.18 per share (total volume around €13.7 m). The treasury shares were sold off the stock exchange in October 2009, with the approval of the Supervisory Board, to two European institutional investors. The total purchase price was about €14.3 m.

8. There are no significant agreements becoming effective, changing or terminating in connection with a change of control within the company resulting from a takeover bid.
9. There are no compensation agreements in place with Management Board members, Supervisory Board members or employees for the event of a public takeover bid.
10. As regards the accounting process, the main features of the internal monitoring and risk management system are as follows: minimum standards for internal monitoring systems are defined in a set of internal Group guidelines; to ensure these standards are observed, an internal auditing unit was set up alongside the risk management unit in October 2009 as part of a reorganisation process. The internal auditing section, which is under the control of the full Management Board, will take up its assigned duties in business year 2010. In future, the unit will monitor compliance with legal provisions, internal guidelines and codes of conduct on the basis of an auditing plan; it will also review the functioning of operational processes (upholding the dual verification principle across all organisational units, continual reporting, etc.) as regards possible risk, and assess the potential for efficiency improvements (regular auditing of Group companies). Reports on the auditing plan and the assessment results will be submitted to the Supervisory Board at least once a year. The internal monitoring system (IMS) has been expanded to assist in the early identification and monitoring of risks. The definition of standard Group rules governing the compilation of annual and interim financial statements is also regulated in a set of internal Group guidelines. The Group has a comprehensive risk management system. Key sub-processes in the accounting process have been identified and analysed, with their effectiveness assessed on the basis of a rolling timetable; the sub-processes were also adapted according to best practice (e.g. derivatives, management of receivables). The risk management system forms part of the auditor's regular assessment programme; results of the assessments are reported to the Supervisory Board's audit committee.

Commitment to observing the provisions of the Austrian Corporate Governance Code

The Management Board and Supervisory Board of CA Immo are committed to the regulations of the Austrian Corporate Governance Code and thus to transparency and uniform principles of good corporate management. CA Immo has implemented almost in full the regulations and recommendations of the Code as amended in January 2009 (the version applicable to business year 2009). Deviations are reported from C Rule 2 (right to appoint members of the Supervisory Board), C Rule 45 (executive positions in competitor organisations) and C Rule 53 (independence of the Supervisory Board). An appropriate statement concerning the deviations is published at http://www.caimmoag.com/investor_relations/corporate_governance/ in the corporate governance report, which listed companies are bound to compile according to Section 243b UGB. Compliance with the Code is evaluated once a year by KPMG Wirtschaftsprüfungs- und Steuerberatungs GmbH; the results of the evaluation are also published on the company's website.

Risk management

Systematic risk management is a key element of CA Immo Group's internal controlling process and has a direct bearing on strategic and operational decision-making within the company. The Management Board is involved in all risk-relevant decisions and bears overall responsibility for such decisions. At all process levels, decisions are subject to the dual verification principle. Clear internal guidelines and strategies, business and investment plans and the introduction of continuous reporting systems have made it possible to monitor and control the economic risks associated with everyday business activity. All measures are applied to every subsidiary in the CA Immo Group; investment plans are subject to scrutiny by the Supervisory Board or its investment committee. Until recently, the controlling division was responsible

for the target-focused coordination of planning and information provision as well as control, assessment and monitoring activities. In future, the risk management department will perform control activities and the internal auditing unit will carry out assessment and monitoring tasks. The internal monitoring system (IMS) has been expanded to assist in the early identification and monitoring of risks. The effectiveness of risk management at CA Immo is appraised annually by the auditor, who reports findings to the audit committee, Supervisory Board and Management Board.

Strategic risks

Capital market risk: CA Immo manages the risks arising from the capital markets by taking extensive liquidity planning and safeguarding measures, for example, in order to avoid tight positions. CA Immo also covers itself by entering into equity partnerships (joint ventures) at project level as an alternative and supplement to established sources of equity capital procurement. As regards the raising of loan capital, CA Immo is increasingly seeking to establish or develop business relationships with domestic and foreign banks in addition to Bank Austria, its principal bank. More generally, the company regards capital market compliance as a fixed element of corporate risk management.

Geopolitical risks: In view of the structure of the CA Immo Group, these risks principally apply to the subsidiary CA Immo International. With the exception of Russia and Serbia, all of the countries in which the company has a presence are EU members, which means greater legal certainty and a lower risk of fundamental political or economic policy changes. In non-EU member states, consideration is given in specific cases to insuring investments against expropriation, political violence and the convertibility of local currency, and precautions are taken as appropriate.

Growth risk: The realisation of investment plans, the assimilation of fully acquired property packages and companies and, not least, the elevated proportion of development projects constitute major challenges for the company and its employees. CA Immo flexibly adjusts the pace of its expansion to global and, above all, regional outline conditions. In line with the current market climate, the company has recently slowed the pace of growth considerably. Expansion planning is carefully coordinated with the planning of financial and personnel resources. To prevent organisational bottlenecks, service processes have been developed and are subject to continual adaptation. Staff development is addressed by means of active personnel management.

Market and liquidation risk: In its capacity as an investor, the Group is exposed to external, market-specific risks, such as macroeconomic trends, developments in tenant sectors, rent development, the activities of other market players and the development of real estate yield across the various segments. Bearing this in mind, CA Immo performs its own exhaustive market analyses prior to any investment decision and as a regular part of portfolio management; the company also maintains constant contact with leading experts in the sector. To minimise regional risks, the ideal resale times for the largest properties in the portfolio are considered as part of regular discussions concerning location quality, property quality and market changes. In this way, CA Immo reduces the risk of not being able to sell properties, or only being able to sell them at a discount. Through this approach, key early indicators of market risk are systematically applied to evaluations of investment and project plans, and thus to medium-term corporate planning.

Concentration (cluster) risk: "Cluster risk" arises when certain investments are overrepresented in the portfolio. CA Immo addresses the risk of certain properties dominating the portfolio by purposely distributing property assets according to both usage type and geographical location. As a rule, no single investment may exceed 20 % of the total portfolio value for a particular region; joint venture partners are sought for large-scale investment plans.

Property-specific risks

Property valuation risk: Real estate prices are subject to considerable fluctuation on account of changing economic conditions, including rising and falling interest rates, expanding or contracting economies, an imbalance between the supply and demand of real estate and other factors. In common with most companies in the sector, CA Immo has opted for the market value method in the conversion of its accounting to IFRS. As a consequence, changes in market value can lead to major variances in results; this has produced some very positive outcomes in recent years, but also extremely negative effects more recently. Value reductions curtail not only results but also equity capital; this in turn adversely affects creditworthiness, with loan-to-value covenants unable to be upheld in some circumstances. CA Immo has its properties externally valued once every year – quarterly in Eastern Europe in view of the significantly higher volatility of property prices there. Owing to distortions on the capital market, limited liquidity and the associated low level of property transactions and prospect of distress sales, value assessment is significantly hampered by a lack of comparable transactions, and in some cases properties can be sold, even at the indicated values, only with greater realisation expenses. To maintain its creditworthiness, CA Immo agrees appropriate leverage in advance and secures appropriate restructuring options (periods) in connection with financing.

Location risk: The location of a property has a decisive influence on rentability and long-term letting potential as well as earning power and sales revenue. Location is therefore the greatest risk associated with real estate investment. To minimise this risk, CA Immo commissions external experts to carry out regular analyses of locations and trends. Locations that are candidates for investment are assessed separately according to stringent criteria.

Investment cost/project development risk: Since 2006, the CA Immo Group has significantly increased the share of development projects in its portfolio, including through the acquisition of Vivico Real Estate GmbH in Germany. In Eastern Europe, these activities are mainly managed through the CA Immo New Europe project development fund. The objective is to generate extra income through the elevated value-added arising from project development. Project business is, however, associated with higher risk. Risks can arise from imponderables, such as delays in the property use approval or planning permission processes, cost/deadline overruns, construction defects and so on. These risks cannot be entirely excluded, despite careful planning and control. Project development risk has increased substantially in the past two years as capital market and geopolitical risks have risen and general conditions have changed. Consequently, original project costings have had to be revised, in some instances considerably. CA Immo is responding to the evolving situation as necessary, adjusting book values clearly and appropriately. In general, CA Immo counters project development risk by choosing partners and service providers with care whilst maintaining stringent controlling, both internally and externally. Controlling involves regular cost monitoring, variance analyses and appropriate reporting. The start-up losses that typically arise in connection with project development also have a detrimental effect on results with the accrual of non-capitalisable costs. Over the project lifecycle, these losses are offset against revenue from lettings and sales; accordingly, projects are launched only if they are financially viable. In Germany, moreover, projects are not initiated until an average pre-letting ratio of 50 to 60 % is reached. CA Immo also runs the risk of construction prices increasing: building firms are rarely prepared to shoulder construction cost risks in the context of development projects. CA Immo has responded to this trend by establishing a wide network within the construction industry. Cost security is maximised by awarding contracts singly or in batches and grouping costs within large-scale projects. The company also seeks to enter into cooperative partnerships with a view to ensuring price stability throughout the project development cycle.

Profit fluctuation risk: This risk group essentially comprises the aforementioned resale risk along with the vacancy risk. If floor space is not let, income is forfeited, vacancy costs arise and the value of the property falls. The risk of loss of rent also falls into this category: the possibility of the present economic climate affecting the rental market in 2010 cannot be ruled out. To keep vacancy and rent losses to an absolute minimum, CA Immo therefore screens the creditworthiness and reputation of potential tenants. The budgeted and actual revenues generated by all properties are continually monitored, and structured quality checks are carried out. The company also cooperates with reputable estate agents when seeking new tenants. In certain cases, CA Immo has circumvented probable future risks by selling a property – a strategy that can be deployed only sparingly at the present time.

Property management risk: The build quality of a property has a considerable influence on the costs of its management. A property that does not comply with current standards can generate higher investment costs because of renovation and improvement measures, or fail to attract tenants and thus adversely affect earning power. CA Immo manages these risks by undertaking technical due diligence prior to acquisition in order to determine a property's quality and the compliance of its fixtures and fittings with CO₂ criteria, energy performance certificates and so on. The company also maintains close contact with tenants and property managers so that any hidden construction defects can be remedied quickly and cost-effectively. When implementing its own projects, CA Immo seeks to ensure that properties qualify for certification (green building).

Contract risk: In order to minimise risks linked to legal disputes, CA Immo works with lawyers on its relevant target markets, integrating them into decision-making processes at appropriate stages. At present, no lawsuits or arbitration proceedings which could have a material influence on the economic situation of the company are pending or foreseeable.

Environmental risks: Increasingly stringent environmental regulations are establishing ecological impact as a determining factor in property valuation to an ever greater degree. Aside from the bearing on value, ecological damage can lead to properties being left vacant or abandoned. CA Immo therefore incorporates this consideration into its wide-ranging assessments prior to every purchase. Appropriate guarantees are also required from sellers. In its capacity as a project developer, the Group makes use of environmentally sustainable materials and energy-saving technologies whenever possible (see also "Property management risk").

General business risks

Interest rate risk: Risks resulting from changes in interest rates chiefly concern long-term loans. In order to reduce the interest rate risk, CA Immo uses a mix of long-term fixed-rate and floating-rate loans. In the case of floating-rate loans, derivative financial instruments (interest rate caps and swaps) are also used, but only to hedge against the risk of interest rate fluctuation. These financial instruments are also subject to changes in value. The reference value for interest rate swaps is the Euribor, which has sustained significant falls, leading to negative present values for the swap contracts. In most cases, the outcome is a non-cash valuation loss. In order to neutralise the interest rate risk associated with these swaps, two new reverse swaps with a nominal amount of €105.4 m were concluded in 2009, giving rise to a fair value hedge in this amount.

Investment risk: As of 31 December 2009, CA Immo predominantly invests liquid funds as overnight deposits on the money market. A small portion is also invested in an ABS fund; besides the creditworthiness and liquidity risk, a price risk also exists in this case. This risk was counterbalanced by continuously selling units in 2009, so that the volume of the ABS fund had been reduced to €6.9 m by the year-end, thus significantly diminishing the exposure to the risk of value fluctuation. Risks constituting a major and permanent danger to CA Immo do not exist at present.

Currency (exchange rate) risk: Owing to investment activity abroad, the management of currency risks is another important element of risk management. Exchange rate fluctuations can impact on results if rents are payable in foreign currencies or loans were raised in US dollars, Czech korunas or Swiss francs. Non-cash effects on the consolidated net income can result from the translation from local currency of the individual financial statements of subsidiaries outside the euro zone. For this reason, the subsidiary CA Immo International seeks to peg rents to a hard currency when acquiring new properties in Eastern and South East Europe. Loans are taken out in the same currency as the one on which the rental agreement in question is based. Owing to the volatility of Eastern European currencies, payments received in local currency (with the exception of operating expenses, which are also to be paid out in local currency) are converted into euros immediately upon receipt.

Liquidity risk: For CA Immo, this is the risk of being unable to settle financial liabilities at the time of maturity. The company thus aims to control liquidity by ensuring the availability of sufficient financial resources to settle due liabilities. CA Immo is highly skilled at planning and securing liquidity in order to prevent bottlenecks and avoid unnecessary potential losses and risks. In keeping with the investment horizon for real estate, most of the loans raised are long-term loans.

Taxation law risk: The national tax systems in the CA Immo Group's target markets are subject to continuous changes. Working with international consultants, the company monitors all relevant debates and decisions taken by national legislators. Despite this, short and long-term tax rises linked to changing legal frameworks pose a constant risk to revenue.

Financial instruments

The company uses interest rate caps in order to reduce existing risks from interest rate rises. CA Immo also uses interest rate swaps in order to manage the risk of interest rate fluctuations. Interest rate caps are recognised at amortised cost or the lower fair value on the balance sheet date. In compliance with the realisation and imparity principle, interest rate swaps are recognised at fair value in the provisions only in the event of an accounting loss arising on the balance sheet date. The fair value is the amount which the company would receive or pay upon liquidation of the deal at the balance sheet date. The nominal amount and the fair value as of 31 December 2009 are shown in the Notes. This value was determined by the bank with which the relevant transaction was concluded. Risks resulting from changes in interest rates chiefly concern only long-term loans. Under interest and similar expenses, CA Immobilien Anlagen AG has disclosed expenses from derivatives transactions (interest including measurement) in the amount of €25.9 m (previous year: €35.1 m).

Branch offices

CA Immobilien Anlagen AG has its headquarters in Vienna. The company has no branch offices.

Equity investments and funds

Measures aimed at transforming the CA Immo Group into a diversified property group operating across a wider region were introduced in 2006. The first step was the flotation of CA Immo International, which was followed by the

acquisition of a holding in the Vienna-based property development company, UBM Realitätenentwicklung AG, the establishment of the special fund for project development activities in Eastern Europe, and finally regional diversification through the purchase of Vivico Real Estate GmbH in Germany. The aim of this realignment was to achieve a broader spread of risk – both regionally and by incorporating institutional outside investors, to utilise potential earnings in the project development business, and ultimately also to offer a greater variety of investment opportunities to a very wide range of investor groups.

Vivico Real Estate GmbH

Since 2008, the German urban district development company, Vivico Real Estate GmbH, has been the operational platform for all of the Group's business in Germany (project development and asset management). Vivico – formerly a German state-owned company that was established to dispose of railway property assets – has at its disposal comprehensive competences in the development of inner-city properties formerly used for industrial or railway purposes. These development areas are currently at various project stages and will be rapidly developed to construction readiness over the coming years. This form of district development, from wasteland sites without a development plan to the finished urban district, involves high value-added potential and is thus the ideal supplement to the stable basic business of stock property management. Vivico is fully consolidated in the CA Immo consolidated financial statements.

Vivico's property assets consist of high-quality income-producing properties (balance sheet value as of 31 December 2009: €103.7 m), undeveloped plots or property under construction (balance sheet value as of 31 December 2009: €860.2 m) and a portfolio of additional properties held for trading or sale. The highest-quality property reserves are now being developed step by step, in line with the current climate, and are to be sold on completion (such as the ATMOS office block in Munich in 2009), or incorporated into the company's own asset portfolio, or sold to property developers as real estate ready for development.

All the tasks that are decisive for value-added are covered by in-house staff at Vivico. These include drawing up district designs, procuring building approval, site development, and preparing the sites for sale. With offices in Frankfurt am Main, Berlin, Munich and Cologne, Vivico's organisation meets the requirements for a local presence combined with overarching control and support. Every site acts as a profit centre and carries out its projects largely independently. Building management, including project control, tenders, placing contracts, supervision of construction and general planning, is delivered by the Vivico subsidiary, omniCon, acquired in July 2008, which also provides these services for third parties. In 2007, together with the Feuring Group, Vivico also set up Viador, a company specialising in concept development for hotel businesses – another component of urban project activities. Its range of services includes site investigations, hotel market analyses and feasibility studies, as well as economic planning based on these assessments. External service-providers are commissioned specifically for activities ranging beyond these, so as to adapt the cost structure flexibly to the different workloads.

As part of a functional merger, the process of integrating Vivico's operations into the CA Immo Group was initiated from the second half of 2009. The main focus of attention here is the identification and realisation of synergies at both the CA Immo level as property investor and the Vivico level as project developer, in order to increase the efficient use of functionalities across the Group and to reduce costs resulting from dual structures.

CA Immo International

The Eastern European portfolio of the CA Immo Group is pooled in the CA Immo International subsidiary, which is also listed on the Stock Exchange. The share capital of CA Immo International amounted to €315.96 m at the end of the year and was divided between 43,460,785 bearer shares that are traded in the prime market segment of the Vienna Stock Exchange. As of the balance sheet date, the market capitalisation was €227.3 m. CA Immo has a 62.77 % direct and indirect interest in the company (at year-end), which is fully consolidated in the consolidated financial statements of CA Immo.

As at the balance sheet date, the CA Immo International portfolio had a book value of about €674.0 m. The company invests in nine countries – Poland, the Czech Republic, Slovakia, Hungary, Romania, Bulgaria, Slovenia, Serbia and Russia. As regards asset classes, the portfolio focuses on office space.

CA Immo New Europe Property Fund

This project development fund has combined the development projects of CA Immo International since the start of 2007. The fund is set up under Luxembourg law in the form of a SICAR (Société d'Investissement en Capital à Risque), and the fund investment strategy is geared to property development projects in the regions of Eastern and South East Europe. 60 % of the shares in the fund are held by CA Immo International, the remaining 40 % being owned by four institutional investors in Austria and abroad. The planned term of the fund, which is managed by one of CA Immo International's subsidiaries, is a total of seven years (with options for extension). The commitment period, within which new projects can be entered into, came to an end on 31 December 2009.

The total volume originally planned for the fund was €1 billion, of which €400 m was to be made available as equity capital. As a result of changed market conditions, however, investment activities have been substantially reduced in comparison with the original plans and, in agreement with the partners, only the development projects that are already being implemented are to be continued, so that only about one-third of the maximum amount had actually been called up by 31 December 2009. Since property development was particularly badly affected by the turbulence on the property markets in Eastern and South East Europe, the original assumptions for numerous projects had to be revised again in 2009, and significant value adjustments and balance sheet provisions were made on the basis of these revisions. As of the balance sheet date, the portfolio of the fund had an approximate market value of €111.7 m. Three projects are currently being implemented. Two others (Duna Center and Sava City) were recently completed.

UBM holding

CA Immo International holds 25 % plus four shares (blocking minority) in the Vienna-based property developer UBM Realitätenentwicklung AG, which is listed on the stock exchange. With its acknowledged development expertise in the CEE region, UBM ideally complements CA Immo International and therefore the CA Immo Group. The joint "Poleczki Business Park" project in Warsaw is progressing apace. In October 2009, the topping-out ceremony took place for the first phase of construction, and completion of the building complex on the site, which covers a total area of 14 hectares, is planned for 2015. UBM is also involved in the "Airport City St. Petersburg" project in St. Petersburg, to which it is contributing both capital and, in particular, its project development know-how.

The investment in UBM generated a dividend for 2008 of €825.0 K for CA Immo International in 2009, equivalent to a return on capital employed of 3 %. The UBM Group recorded turnover of €205.9 m as at 30 September 2009, representing a drop of €28.9 m on the previous year. The result for the first nine months of 2009 was €7.1 m (2008: €14.0 m). For 2010, UBM anticipates a further reduction in turnover and result. The majority shareholder in UBM – apart from CA Immo International – is the Porr Group with a 41.27 % holding.

Pending lawsuits

The company is involved in several lawsuits arising from the ordinary course of business. Provisions were formed, depending on the likelihood of a claim being asserted.

Financial and non-financial performance indicators

At the heart of the business strategy pursued by CA Immo lies a commitment to achieving a sustained increase in enterprise value. Financial performance indicators (key figures or ratios) are an important identifier and measure of the main factors that contribute to raising enterprise value long-term, and are thus used for value management purposes. The primary such indicator is the net income generated with the money shareholders have invested (ROE – return on equity). The target is to produce a ratio higher than the imputed cost of equity (we assume a medium-term rate of around 7.5 %) and thus generate shareholder value. As a consequence of the substantial devaluation of property assets, the return on equity for 2009 is significantly below zero – the general target was not met, therefore, in the year under review. Having revised our strategy in the light of the prevailing challenging climate, we remain confident, however, of generating an adequate return on equity again in the medium term. Among the other quantitative factors used to measure and manage our shareholders' long-term yield are the change in NAV per share, the operating cash flow per share, return on capital employed (ROCE) and economic value added (EVA):

Value indicators for the CA Immo Group

		2009	2008	2007
NAV ¹⁾ /share	€	17.9	18.9	22.0
Change in NAV/share	%	-5.6	-14.1	6.1
Operating cash flow/share	€	1.42	1.32	1.07
ROE ²⁾ in %	%	-4.8	-13.4	3.3
ROCE ³⁾ in %	%	0.1	negative	5.2
EVA ⁴⁾	€m	negative	negative	2.7

1) Net asset value: equity capital without minority interests

2) Return on equity (profit generating efficiency) = consolidated net income after minority interests / average equity (without minority interests)

3) Return on capital employed = net operating profit after tax (NOPAT) / capital employed

4) EVA (economic value added) is a registered trademark of Stern Stewart & Co; EVA = capital employed * (ROCE – WACC); WACC 2009 = 5.07 %; (WACC is the weighted average cost of debt and equity)

The key factors for CA Immo AG include the equity ratio, net debt and equity-to-fixed-assets ratio. The equity ratio reflects the portion of the company's financing that is covered by its equity. It is an important indicator when assessing a company's creditworthiness. The equity-to-fixed-assets ratio indicates the extent to which, measured in percent, equity covers the fixed assets of CA Immo AG.

Value indicators for CA Immobilien Anlagen AG

		2009	2008	2007
Equity ratio	%	65.6	59.5	68.8
Net debt ¹⁾	€m	405.8	367.5	439.7
Equity-to-fixed-assets ratio	%	74.8	61.3	85.4

1) Liabilities to banks less cash and cash equivalents

Since the financial indicators ultimately demonstrate the operational success of our property business, they are preceded by a series of performance indicators that **cannot be immediately quantified in financial terms**, which are key to measuring and managing the operating business.

- **Vacancy rate and average rent**
- Sound economic data nurture the demand for commercially used premises and invigorate both building activity and the property market. Cyclical discrepancies between supply and demand are reflected in the occupancy rate and attainable rents. Viewed over time, the vacancy rate and average rent are key indicators of a portfolio's quality and its successful management on the one hand, and of the asset managers' ability to respond timely to economic influences, on the other.
- **Location quality**
The quality of sites is a major criterion in property marketing. The accessibility of a location, determined by the infrastructure, plays a crucial role in this context. Changes in the quality of a location take place gradually and are eventually reflected not only in price, but also in the difficulty of attracting new tenants.
- **Local presence**
Local knowledge and familiarity with the territory are critical factors in the effective cultivation of very diverse regional markets. For this reason, CA Immo International maintains its own offices in Belgrade, Bucharest, Budapest and Warsaw.
- **Know-how and synergies**
The competitive edge of CA Immo International stems from the local knowledge of its operating employees and the leverage of synergies in the Group, in particular in project development and property marketing.

Staff

As of 31 December 2009, the company employed 46 people, compared to 48 in 2008. Various subsidiaries employ additional staff. The CA Immo Group's plans are generally managed centrally at head office in Vienna. Salaried staff in the areas of investor relations, corporate communications, finance and accounting, controlling, legal affairs, personnel, IT and organisation are employed by CA Immobilien Anlagen AG and perform their duties for both companies. The associated costs are divided between the companies according to need, thereby enabling synergies between the two organisations to be exploited cost-effectively. The asset, investment and holding management areas are administered separately by the respective companies. Property management, project management, accounting and facility management for the Eastern European income-producing properties are administered by local subsidiaries in Poland, Hungary, Serbia and Romania. Individual employees of CA Immo International work in a joint executive capacity for CA Immo New Europe. Together with their teams, they contribute the expertise required to manage the special fund. All the Group's activities in Germany are managed by Vivico Real Estate.

Outlook for 2010

For the time being, 2010 can be viewed with cautious optimism. The worst of the crisis, which had such an impact on 2009, is over, and growth is expected to return to positive territory. Despite the evident stabilisation of the economic climate, however, the medium-term outlook remains fraught with risk. To a considerable extent, the current upturn has been based on state support packages, and it is impossible to predict how the economy will react when these initiatives are terminated. Government debt, which has increased as a consequence of the stimulus packages, will have to be addressed in the medium term. From the viewpoint of the real estate sector, one key question that is becoming increasingly important in this respect is the future development of interest and inflation: Although forecasts vary significantly, record low interest levels and effectively non-existent inflation cannot be expected to persist in the long term.

Research, development and environmental considerations

In every operating unit of CA Immo, research and development is geared to the pragmatic requirements of everyday business activities. The main external emphasis is on close market observation and the analysis of regional differences as regards the economic situation, location management, legal affairs and taxation; information acquired through continuous contact with analysts; and systematic analyses performed in consultation with shareholders and sales staff. In addition, CA Immo focuses its research and development activity on the sustainable development of real estate. Quality-based project development is one of the cornerstones of the company: aside from site selection, architecture and quality of fixtures and fittings, the emphasis is on sustainability and energy efficiency in the construction work itself. By analysing market needs and testing these for compatibility with technical feasibility and economic efficiency, the company aims to secure the value of properties for the long term and meet the constantly shifting requirements of users as precisely as possible. In its capacity as a project developer, CA Immo makes use of environmentally sustainable materials and energy-saving technologies wherever possible.

Supplementary report

No major events apart from those recorded in the annual financial statements have taken place since the balance sheet date.

Vienna, 2 March 2010

Report on the Financial Statements

We have audited the accompanying financial statements, including the accounting system, of

**CA Immobilien Anlagen Aktiengesellschaft,
Vienna,**

for the **fiscal year from 1 January 2009 to 31 December 2009**. These financial statements comprise the balance sheet as of 31 December 2009, the income statement for the fiscal year ended 31 December 2009, and the notes.

Management's Responsibility for the Financial Statements and for the Accounting System

The Company's management is responsible for the accounting system and for the preparation and fair presentation of these financial statements in accordance with Austrian Generally Accepted Accounting Principles. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditors' Responsibility and Description of Type and Scope of the statutory audit

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with laws and regulations applicable in Austria and Austrian Standards on Auditing. Those standards require that we comply with professional guidelines and that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

Our audit did not give rise to any objections. In our opinion, which is based on the results of our audit, the financial statements comply with legal requirements and give a true and fair view of the financial position of the Company as of 31 December 2009 and of its financial performance for the year from 1 January 2009 to 31 December 2009 in accordance with Austrian Generally Accepted Accounting Principles.

Report on Other Legal Requirements (Management Report)

Pursuant to statutory provisions, the management report is to be audited as to whether it is consistent with the financial statements and as to whether the other disclosures are not misleading with respect to the Company's position. The auditor's report also has to contain a statement as to whether the management report is consistent with the financial statements and whether the disclosures pursuant to Section 243a UGB (Austrian Commercial Code) are appropriate.

In our opinion, the management report is consistent with the financial statements. The disclosures pursuant to Section 243a UGB (Austrian Commercial Code) are appropriate.

Publication of the financial statements together with our auditor's opinion may only be made if the financial statements and the management report are identical with the audited version. The Auditor's Report only refers to the complete German version of the consolidated financial statements and the management report. Section 281 paragraph 2 UGB (Austrian Commercial Code) applies.

DECLARATION OF THE MANAGING BOARD DUE TO SECTION 82 (4) OF THE AUSTRIAN STOCK EXCHANGE ACT

The managing board confirms to the best of their knowledge that the financial statements of CA Immobilien Anlagen Aktiengesellschaft, which were prepared in accordance with the applicable accounting standards, give a true and fair view of the assets, liabilities, financial position and profit or loss of the CA Immobilien Anlagen Aktiengesellschaft and that the management report gives a true and fair view of the development and performance of the business and position of the company, together with a description of the principal risks and uncertainties the CA Immobilien Anlagen Aktiengesellschaft faces.

DISCLAIMER

This Annual Financial Report contains statements and forecasts which refer to the future development of CA Immobilien Anlagen AG and their companies. The forecasts represent assessments and targets which the Company has formulated on the basis of any and all information available to the Company at present. Should the assumptions on which the forecasts have been based fail to occur, the targets not be met or the risks set out in the risk management report materialise, then the actual results may deviate from the results currently anticipated. This Annual Financial Report does not constitute an invitation to buy or sell the shares of CA Immobilien Anlagen AG.
