

EANS-Adhoc: Kapsch TrafficCom wins major contract in Russia

ad-hoc disclosure transmitted by euro adhoc with the aim of a Europe-wide distribution. The issuer is solely responsible for the content of this announcement.

Vienna, December 29, 2011. Kapsch TrafficCom AG (ISIN AT000KAPSCH9), listed on the Vienna Stock Exchange in the prime market segment, reports that the Russian Highway company Avtodor published the following press release today (the following is an unauthorised excerpt in English of the Russian source text):

"PRESS RELEASE issued by The Russian Highway company Avtodor Moscow, DECEMBER 29, 2011

[The supervisory board of Avtodor has approved long-term operation contract

The supervisory board of State Company "Avtodor" has approved the long-term operation contract for repair, maintenance and toll-based operation of a segment of the M4 «Don» Highway with OOO United Toll Systems (UTS). The subject of the contract is the operation of the km 225.6 - km 633.0 segment of the M4 «Don» Highway. The 10-year contract will be structured with a 3-year extension option.

A key responsibility of UTS will be implementation of an Intelligent Transportation System (ITS) on the km 225.6 - km 633.0 section - advanced and highly efficient traffic management technologies developed based on the best Russian and international expertise and the latest achievements in IT and telecommunication technologies. A combination of traffic information support and traffic management systems, ITS will significantly enhance traffic safety and traffic control in the area, including through rapid accident response capability.

The concept of the operation contract envisioning installation of traffic control infrastructure, maintenance and operation, including toll collection per se, is new to the Russian market. Such contracts will facilitate further development of the national road network and offer users world-class toll highway service and finally ensure integration of Russian toll roads into a European toll roads system.

The 1,500 km-long M4 «Don» Federal Highway links Moscow with Novorossiysk via Voronezh, Rostov-on-Don and Krasnodar. The length of the highway toll segments is expected to total 662.9 km (40% of the highway).]"

The original release by the Russian Highway company Avtodor is available at the website of the authority under
