

EANS-Adhoc: Kapsch TrafficCom implements Europe's first integrated advanced traffic management system

ad-hoc disclosure transmitted by euro adhoc with the aim of a Europe-wide distribution. The issuer is solely responsible for the content of this announcement.

other/Company Information

Vienna, 18 August 2015 - Kapsch TrafficCom AG (ISIN AT000KAPSCH9), listed on the Vienna Stock Exchange in the prime market segment, has been awarded a contract by the Dutch national road authority Rijkswaterstaat and has received the intention to award a contract by the English road authority Highways England to supply the Advanced Traffic Management System DYNAC as part of the collaborative program CHARM, between the English and Dutch national roads authorities, that will modernize and consolidate traffic management on their highways.

Kapsch will deliver and install DYNAC in two traffic management centres, one in England and one in the Netherlands, with the installment set to be completed within 26 months of the start date. After the implementation in the first traffic management centres, DYNAC will be installed by a third party in all remaining traffic management centres, with the contract totaling around 60 million Euro including the provision of particular maintenance support services for a period of up to 13 years after the successful installation of the DYNAC Advanced Traffic Management System. The parties have agreed to make a joint statement upon signing of the contracts.
