The Disclosure Department Philippine
Stock Exchange Bonifacio Global City,
Taguig City

Dear Gentlemen/Ladies:

In response to the Honorable Exchange's request for updates regarding the offshore mining operations of JDVC Resources Corporation (JDVC), Apollo Global Capital, Inc. (APL) provides the following updates:

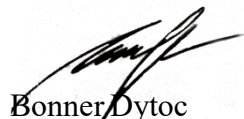

APL is cautiously optimistic to report that following recent downward volatility in global oil prices to more financially tolerable levels, JDVC is in full active discussions with its offshore mining service provider.

The stabilization of fuel costs has allowed both parties to re-evaluate the project's economic viability favorably. Consequently, the service provider has issued a new tentative timeline to JDVC, targeting mobilization and the commencement of offshore mining operations within this 3rd quarter.

Furthermore, we are moving forward with active discussions on other matters, specifically the initiation of preliminary exploration for the Masbate 2145 gold project.

We trust this clarifies the matters raised.

Thank you.

Bonner Dytoc
President
