GARNER PLC
YEAR ENDED 31 DECEMBER 2008
CHAIRMAN'S STATEMENT

For most PLC Chairmen, this is probably the most challenging Statement to write simply because although the requirement is to reflect on last year, in the meantime Garner plc (the "Company") has changed beyond recognition and the world has changed, too.

The last time we communicated was at the time of the admission document associated with the acquisition of the 'Norman Broadbent' businesses. At the risk of repeating the rationale behind the deal, we saw this as an opportunity to increase our scale and, alongside the agreement reached with the Preference Shareholders, strengthen our balance sheet. We believe history will record the decision to have proved sound although since December of last year life has been challenging.

The results for 2008 are that we made a Group profit after tax of £357,000 (2007: £402,000) based on an increased turnover of £3,274,000 (2007: £3,122,000). Group earnings per share fell to 0.88p (2007: 1.06p). It should be stressed that two factors played their part in this result. Firstly, we saw three weeks of Norman Broadbent turnover in December following the acquisition. Secondly, the Company benefited from the interest due from a VAT repayment of £191,000.

Comparing like with like, turnover from continuing operations was down to £2,683,000 (2007: £3,122,000) with an operating profit of £99,000 (2007: £609,000). Although revenues from continuing operations were down 14% compared with 2007, there has been a continued drive by the team to expand our client base. The company engaged with 21 new clients during the year across a range of sectors including media, education and retail. In addition, the introduction of the Norman Broadbent companies to the Group provides an established client base of over 250 businesses across sectors such as energy, professional services, pharmaceuticals, NHS and leadership consultancy. These new relationships combined with our proven ability to create repeat business from valued clients will provide a solid foundation to maximise future revenues.

The Group is now reporting a much stronger balance sheet than in previous years, with net assets at year end of £1,044,000 (2007: net liabilities of £1,301,000). The primary drivers of this movement were the conversion of 1,043,566 Preference Shares, recognised as a liability in 2007, into new equity plus an equity placement of 24,354,335 Ordinary Shares to fund the acquisition of Norman Broadbent. Net debt at year end reduced to £334,000 (2007: £1,183,000) representing a net cash flow of £849,000, which includes £731,000 from the equity placement.

Turning to non-financial matters, clearly a large part of 2008 was spent contemplating, negotiating and managing the process of acquiring Norman Broadbent. Combining this with running our business in light of the overall deterioration in the economy was difficult but with strong management, a good consulting team, prudent cost control and insightful leadership we performed well. I would like to offer my thanks to all those involved.

When the transaction was confirmed at the Company's general meeting in December it was worth noting that the combined business more than doubled our consultant base and placed the Group as a considerable force amongst Executive Search firms in the UK. Additionally it gave us a strong position in Interim Management, Leadership and HR Consulting. In Spain, we own 20% of the Norman Broadbent business which operates out of Madrid and Barcelona. I attend their board meetings and am proud to confirm that they have a strong market position in Spain.

At the time of the acquisition the initial strategy was to trade under both the Garner International and Norman Broadbent brands. In January 2009 the decision was made to rebrand the combined Executive Search business as Norman Broadbent, integrating within this our extremely successful human resource consulting which trades as "Garner HR". This decision was reached in view of the significant global reach of the Norman Broadbent name combined with the commercial benefits of running a solo brand.

As part of the Interim Statement for 2008 I talked of building relationships with Rhodes, a leading executive search firm in the United States. In the final analysis we withdrew from that possibility as the Norman Broadbent presence in Canada also covers North America.

It is not appropriate in these remarks to make predictions about the future and frankly, given the market, it would be foolish to do so. Suffice to say the global executive search business in the twenty five years of my acquaintance has seen nothing like these conditions before. Revenues were already falling in the second half of 2008 and trading conditions remain tough. Not surprisingly, cash management is at the very core of everything we are doing and in December we commenced a programme of cost efficiencies, strategic business planning and strong fiscal management that have established a robust integration strategy. We now have a streamlined and committed team who are fully engaged to meet the challenge ahead.

GARNER PLC
YEAR ENDED 31 DECEMBER 2008
DIRECTORS' REPORT

EMPLOYMENT OF DISABLED PERSONS

It is the Group's policy to give a full and fair consideration to the employment and promotion of disabled persons where they appear suitable, having regard to their particular aptitudes and abilities. Where existing employees become disabled it is the Group's policy to find them alternative suitable employment within the Group where possible.

RISKS AND UNCERTAINTIES

Key risks and uncertainties for the business are as follows:

- Staff retention

The Group introduced a comprehensive employee incentive scheme and EMI scheme in 2007. It experienced zero attrition of revenue generating professionals within the year

- Loss of client relationships

During the year the Group has expanded its new client base to mitigate fluctuations within the market and maintained its level of repeat contracts with significant existing clients.

- Reduction in economic activity

The acquisition of the Norman Broadbent brand has provided the Group with much greater market coverage from which to retain clients and develop new business in these difficult economic conditions.

- Performance of acquired business undertakings

To ensure that the newly formed Group operates at full potential, management are continually reviewing all aspects of the business to identify cost saving synergies as well as incentivising staff to promote cross company integration. The future profitability and cash generating ability of the acquired business is key to ensuring that the Goodwill on acquisition is not impaired and obligations to settle the deferred consideration are satisfied.

KEY PERFORMANCE INDICATORS

The most significant performance indicators for the business are maintaining revenue levels and achieving profit growth. Management KPIs are:-

- Revenue per consultant
- Employee retention
- Client retention
- Repeat contracts
- New business retention
- Net client gains

CREDITOR PAYMENT POLICY

The Company and Group do not have a standard or code which deals specifically with the payment of suppliers. The Group does, however, endeavour to comply with the terms and conditions agreed with suppliers when orders are placed. Trade creditor days of the Group at 31 December 2008, calculated in accordance with the requirements of the Companies Act 1985, were 196 days (2007: 49 days). This represents the ratio, expressed in days, between the amounts invoiced to the Group in the year by its suppliers and the amounts due, at the year end, to trade creditors falling due for payment within one year. The reason for the significant increase in creditor days this year is due to a number of invoices received from professional advisors in December 2008 for fees relating to the acquisition of the Norman Broadbent subsidiaries totalling £610,000. These exceptional costs are included within the trade creditor balance at year end. Excluding these costs, creditor days relating to the actual trading of the business for 2008 were 53 days.

DIRECTORS' REPORT

STATEMENT OF DIRECTORS' RESPONSIBILITIES

The directors are responsible for preparing the financial statements in accordance with applicable law and International Financial Reporting Standards ("IFRS") as adopted by the European Union.

Company law requires the directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the Company and Group and of the profit or loss of the Group for that period. In preparing these financial statements the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Group will continue in business.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the company and to enable them to ensure that the financial statements comply with the Companies Act 1985 and article 4 of the IAS regulations. They are also responsible for the system of internal control for safeguarding the assets of the group and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website.

AUDITORS

FW Stephens have expressed their willingness to continue in office as auditors and a resolution to reappoint them is being proposed at the forthcoming Annual General Meeting.

CORPORATE GOVERNANCE

As a company listed on the Alternative Investment Market of the London Stock Exchange, Garner plc is not required to comply with the Combined Code ("the Code") adopted by the UK Listing Authority in 1998. However, the Board of Directors has considered the effects of the Code and taken steps to comply with the Code insofar as it can be applied practically, given the size of the Group and the nature of its operations. At this stage, no action has been taken in respect of the revised code issued in June 2008.

The Audit Committee comprises all of the non-executive directors and meets as required.

The directors also acknowledge their responsibility for the Group's system of internal control of which the objectives are:

- a) Safeguarding Group assets.
- b) Ensuring proper accounting records are maintained.
- c) Ensuring that the financial information used within the business and for publication is reliable.

The key procedures that have operated during the financial year are set out below:

- a) The Board meets regularly to review all aspects of the Group's performance concentrating mainly on financial performance, business risks and development.
- b) A number of matters are reserved for the Board's specific approval including major capital expenditure, banking and dividend policy.

In establishing the systems of internal control, the directors have implemented a control environment, risk management procedures and reporting processes appropriate to the size of the Group. The system of internal control is designed to manage rather than eliminate risk. Further procedures will continue to be adopted in respect of all the Group's activities to further improve financial control.

Trading and cash flows can be unpredictable. However, after making appropriate enquiries the directors have formed a judgement that the Group has adequate resources to continue in operation for the foreseeable future. For this reason, they continue to adopt the going concern basis in preparing the financial statements.

The Remuneration Committee consists of two non-executive directors.

The remuneration of the non-executive directors is determined by the Board.

At present the committee annually reviews the level of directors' remuneration packages. Disclosure of directors' remuneration is provided in the Directors' Remuneration Report.

AIM COMPLIANCE COMMITTEE

In accordance with AIM Rule 31 the Group is required to have in place sufficient procedures, resources and controls to enable its compliance with the AIM Rules; seek advice from its nominated adviser ("Nomad") regarding its compliance with the AIM Rules whenever appropriate and take that advice into account; provide the Group's Nomad with any information it requests in order for the Nomad to carry out its responsibilities under the AIM Rules for Companies and the AIM Rules for Nominated Advisers; ensure that each of the Group's directors accepts full responsibility, collectively and individually, for compliance with the AIM Rules; and ensure that each director discloses without delay all information which the Group needs in order to comply with AIM Rule 17 (Disclosure of Miscellaneous Information) insofar as that information is known to the director or could with reasonable diligence be ascertained by the director.

In order to ensure that these observations are being discharged, the Board has established a committee of the Board (the "AIM Committee"), chaired by Richard Robinson, a non-executive director of the Group. The AIM committee consists of all non-executive directors, plus the Group Chief Executive Officer.

Having reviewed relevant Board papers, and met with the Group's Executive Board and the Nomad to ensure that such is the case, the AIM Committee is satisfied that the Group's obligations under AIM Rule 31 have been satisfied during the period under review.

NOTES TO THE FINANCIAL STATEMENTS

1. ACCOUNTING POLICIES

The principle accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to both years presented unless otherwise stated.

(a) Basis of preparation

The consolidated financial statements of Garner plc have been prepared in accordance with International Financial Reporting Standards as adopted by the European Union (IFRS as adopted by the EU), IFRIC interpretations and the Companies Act 1985 applicable to Companies reported under IFRS. The consolidated financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and liabilities (including derivative instruments) at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in note (d).

The accounts have been prepared on a going concern basis. The Group remains dependant on the continuing support of its bankers who have confirmed their intention to extend the existing facilities through to 30 July 2010.

(b) Basis of consolidation

The consolidated income statement and balance sheet include the financial statements of the Company and its subsidiary undertakings made up to 31 December 2008. The results of subsidiaries acquired are included in the consolidated income statement from the date control passed. Intra-Group sales and profits are eliminated fully on consolidation.

On acquisition of a subsidiary, all of the subsidiary's assets and liabilities that exist at the date of acquisition are recorded at their fair values reflecting their condition at that date.

(c) Goodwill

Goodwill arising on acquisition of subsidiaries is included in the balance sheet of the consolidated accounts as an asset at cost less impairment.

For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units expected to benefit from the synergies of the combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently where there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognised for goodwill is not reversed in a subsequent period.

(d) Critical accounting judgements and estimates

Impairment of goodwill – determining whether the goodwill is impaired requires estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the entity to estimate the future profitability expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value.

Share Options – the fair value of options granted during the year was determined using the trinomial valuation model. The significant inputs into the model were share price at grant date, expected price, expected option life and risk free rate.

GARNER PLC
YEAR ENDED 31 DECEMBER 2008

1. ACCOUNTING POLICIES (continued)

(e) Property, plant and equipment

The cost of property, plant and equipment is their purchase cost, together with any incidental costs of acquisition.

Depreciation is calculated so as to write off the cost of the assets, less their estimated residual values, over the expected useful economic lives of the assets concerned. The principal annual rates used for this purpose are:

Fixtures and Fittings	- 25% - 33% per annum on cost
Land & Buildings - Leasehold	- over 5 years straight line

(f) Foreign exchange

Transactions denominated in foreign currency are translated into the functional currency at the rates ruling at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are retranslated at the rates ruling at that date. These translation differences are dealt with in the income statement.

(g) Leases

Costs in respect of operating leases are charged on a straight-line basis over the lease term.

(h) Deferred taxation

UK corporation tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

Deferred tax is provided in full on timing differences that result in an obligation at the balance sheet date to pay more tax, or a right to pay less tax, at a future date, at rates expected to apply when they crystallise based on current rates and laws. Timing differences arise from the inclusion of items of income and expenditure in taxation computations in periods different to those in which they are included in the financial statements. Deferred tax is not provided on timing differences arising from the revaluation of fixed assets where there is no binding contract to dispose of those assets. Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.

(i) Investments

Fixed asset investments are stated at cost less provision for any impairment in value.

(j) Revenue Recognition

Revenue comprises the fair value of the sale of services, net of value-added tax, rebates and discounts. Revenue is recognised on the percentage completion basis, using pre-specified milestones to trigger invoices.

(k) Pensions

The Group operates a number of defined contribution funded pension schemes for the benefit of certain employees. The costs of the pension schemes are charged to the income statement as incurred.

(l) Share Option Schemes

For equity-settled share-based payment transactions the group, in accordance with IFRS2, measures their value, and the corresponding increase in equity, indirectly, by reference to the fair value of the equity instruments granted. The fair value of those equity instruments is measured at grant date, using the trinomial method. The expense is apportioned over the vesting period of the financial instrument and is based on the numbers which are expected to vest and the fair value of those financial instruments at the date of grant. If the equity instruments granted vest immediately, the expense is recognised in full.

In accordance with IAS 33, earnings per ordinary share of 0.88p (2007: 1.06p) have been calculated by dividing the profit on ordinary activities after taxation and non-equity dividends of £357,000 (2007: £402,000) by 40,600,981 (2007: 37,968,937), being the weighted average number of ordinary shares in issue and ranking for dividend during the period. There were no preference shares at 31 December 2008 (2007: nil) available for conversion. The share options granted through the EMI scheme and the issued warrants have been used to calculate the diluted earnings per ordinary share of 0.81p (2007: 1.01p).

In line with International Financial Reporting Standards, goodwill has not been amortised from the transition date, but has instead been subject to an impairment review by the directors of the group.

As set out in accounting policy note 1 on page 16, the directors test the goodwill for impairment annually. The recoverable amount of the Group's cash generating units is calculated on the present value of their respective expected future cash flows, applying a weighted average cost of capital in line with businesses in the same sector. Post tax future cash flows are derived from approved budgets for the 2009 financial year. Management believe the forecasts are reasonably achievable.

By applying these tests the directors have concluded that goodwill is not impaired.

19. FINANCIAL INSTRUMENTS

Derivatives and other financial instruments

The Group's financial instruments comprise borrowings, some cash and liquid resources and various items such as trade receivables and trade payables that arise directly from its operations. The main purpose of these financial instruments is to raise finance for the Group's operations.

The Group has not entered into any derivative transactions in the year. The Group does not trade in financial instruments.

The Group has taken advantage of the exemptions available under International Accounting Standard 22 not to provide numerical disclosures in relation to short-term receivables and payables.

The main risks arising from the Group's financial instruments are interest rate risk, liquidity risk and currency risk. The Board reviews and agrees policies for managing each of these risks and they are summarised below.

Interest rate risk

The Group finances operations through bank borrowings and finance leases. At the year-end all of the Group's bank borrowings were at floating rates of interest. It is the Group's policy to have all borrowings at a floating rate of interest and this policy is reviewed periodically to ensure it is appropriate.

Liquidity risk

The Group's policy is to retain a balance between short-term flexibility, achieved through overdraft facilities, and longer term planning through longer-term instalment debt. At the year-end, 43% of bank borrowings were overdrafts.

The maturity profile of the Group's financial liabilities is provided on the following page.

Currency risk

The Group's policy is not to hedge transactions, and to buy and sell currency at spot rate where applicable. Each company has assets and liabilities in its native currency only.

Financial assets:

£643,000 (2007: £56,000) of cash at bank and in hand is held in the Group, all denominated in Sterling. All financial assets attract interest at floating rates, and are based on national bank offering rates.

20. ACQUISITIONS OF SUBSIDIARIES (continued)

The principle reasons for the acquisition were to increase the client base within the UK and to extend the Group's presence abroad. The Norman Broadbent brand is widely recognised and it has a strong executive search practice in a number of sectors, which does not compete with existing business. The acquired companies have operations in the UK, USA, Canada and Dubai in addition to holding an interest in an associate business in Spain. The company agreed an aggregate purchase price of £5,414,000 for 100% of issued share capital, based on net assets of the three BNB subsidiaries at 30th September 2008. The acquisition was completed on 3rd December 2008.

Consideration:

The company has agreed to pay an aggregate purchase price before professional and advisory costs of £5,414,000 to acquire the three subsidiaries. This consideration is payable as follows:

- £200,000 was paid in cash on acquisition date
- Payments equivalent to royalty income receivable by BNB Overseas Holdings Limited during the year, net of tax is paid directly to the vendor.
- Quarterly payments over a period of up to 60 months from 30th September 2008, based on a proportion of actual revenues as against projected revenues of the Enlarged Group.

In the event that the total amounts paid by the company to the vendor during the 30 month period from 30th September 2008 is less than £2,800,000 then the company must pay the full amount of the shortfall at that time. If the total amount paid during the period of 60 months from 30th September 2008 is less than £5,414,000 then the company must pay the shortfall at that time.

If any shortfall payment due in respect of the period of 30 months from 30th September 2008 is not paid in accordance with the Acquisition Agreement then the vendor will have the right to acquire all intellectual property rights relating to the Norman Broadbent name and brand for £1.

Professional & advisory costs:

The group incurred costs directly attributable to the acquisition of £590,000 which have been included within goodwill. These costs included fees payable to professional advisors and also an allocation of staff costs and administrative expenditure that the directors believe is a true reflection of the work carried out to complete the acquisition.

IFRS 3 Considerations:

IFRS 3 requires that any separately identifiable intangibles, the cost of which can be accurately measured, should be disclosed independently from residual goodwill on acquisition. The residual goodwill represents the future economic benefits arising from other assets acquired in the business combination that are not individually identified and separately recognised.

To determine the gross consideration payable for the Norman Broadbent subsidiaries, the directors assessed the future profit/cash generating potential of the group. The key assets to drive this were deemed to be:

- a globally recognised and respected search brand;
- a team of consultants with knowledge, experience and strong client relationships across a diverse range of markets;
- a well established and efficient administrative and support infrastructure.

The directors believe that it is not possible to separate and accurately measure the above assets independently as they are all linked and contribute wholly to the cash generating ability of the group. As such the balance has been recognised as residual goodwill on the balance sheet.

21. RELATED PARTY TRANSACTIONS

In previous years A C Garner has made various loans to the Group to assist in working capital requirements. At 31 December 2008 the balances on these loans were £100,000 (2007: £66,000). These loans are non-interest bearing and at the Balance Sheet date none of these loans had any agreed repayment terms.

In addition, A C Garner has guaranteed £200,000 of bank loans and overdraft.

In relation to the acquisition of BNB Recruitment Consultancy Limited, Bancomm Limited and BNB Recruitment Overseas Holdings Limited in December 2008, A C Garner has personally guaranteed the payment of up to £500,000 of the consideration due to the vendor in respect of the purchase price. The guarantee reduces on a pound-for-pound basis as purchase consideration received by the vendor exceeds £1,000,000.

22. ENTERPRISE MANAGEMENT INCENTIVE SHARE OPTION SCHEME

The measurement requirements of IFRS2 have been implemented in respect of share-options that were granted after 7 November 2002. The expense recognised for share based payments made during the year is shown in the following table;

Total expenses arising from equity settled share-based transactions:	2008	2007
	£000	£000
Garner plc Executive Share Option Scheme	24	-
St Helens Options	18	-

The share-based payment plans are described below:

Garner plc Executive Share Option Scheme

In accordance with the Executive Share Option Scheme, approved share options over Ordinary Shares of 1.0p each are granted to eligible employees who devote at least 25 hours per week, or if less at least 75% of their working time to the performance of duties or employment with the company.

The exercise price of the options is equal to the market price of the shares at the date of grant. The options may be exercised on the first, second and third anniversary of the date of the grant in equal amounts.

If the option holder ceases employment for any reason, the option may not be exercised, unless the Board permits. The approved options will be forfeited where they remain unexercised, at the end of their respective contractual lives of eight, nine or ten years.

There have been no cancellations or modifications to this plan since 19 December 2007 when the options were granted.

St Helens Options

On 7th November 2008, the company granted to St Helen's Capital an option to subscribe for 798,762 Ordinary Shares of 1.0p each at an exercise price of 5.625p each, the market price of the shares at the date of grant. The option may be exercised in whole but not in part, at any time up to 31 March 2011. The fair value of share options granted is estimated at the date of grant using a trinomial pricing model, taking into account all the terms and conditions upon which the options were granted.

The total number of options outstanding and exercisable under share arrangements as at 31st December 2008 was as follows:

	Options Outstanding		Options Exercisable	
	Number of shares	Weighted avg. remaining life (yrs)	Weighted avg. exercise price (p)	Number exercisable

Inputs to the trinomial Valuation Model

The fair value of share options and warrants granted is estimated at the time of grant using a trinomial pricing model, taking into account all the terms and conditions upon which the derivatives were granted.

The following table lists the inputs to the trinomial model in 2008 & 2007:

	2008	2007
Expected dividend yield	0%	0%
Expected volatility	85%	70%
Contractual life of the derivative	3 years	8-10 years
Weighted avg. risk free interest rate	3.99%	4.73%
Weighted avg. fair value	5.625%	5.625%

The expected volatility was estimated by reference to the historical volatility of the company's share price.

The risk free rate of return is estimated as the yield on zero coupon UK government bonds of a term consistent with the contractual life of the options granted.
