Revenue up by 24 % in the first half

Outstanding order backlog of €55.6 million (m) as of 30 June 2008

Outlook for 2008 confirmed: EBIT set to increase by 60 % and revenue by 20 %

Despite an adverse trading environment, particularly in Hungary, SW Umwelttechnik AG maintained its strong performance in the second quarter. The figures for the first half confirm our prognosis of a 60 % rise in EBIT and an increase in revenue of around 20 % for the full year. Order backlog more than doubled year on year to stand at €55.6m on 30 June 2008, supporting management's upbeat earnings expectations.

OPERATIONAL REVIEW

Revenue in EUR m

TRADING PERFORMANCE AND EARNINGS

Revenue jumped 24 % from €41.5 to €51.3m in the first six months of 2008. Despite challenging trading conditions, there were gains across our core Austrian, Hungarian and Romanian markets.

As a result of budget stabilisation measures introduced in Hungary, public sector investment remained at around a third of last year's level, while Romania has yet to make use of the EU Structural Organisational Programme (SOP) funding available to it. However we anticipate an improvement in conditions in Hungary and Romania from mid-2009 onwards.

Sharp increases in input prices in the first half – which were particularly dramatic in the case of steel and energy – resulted in additional costs which we were unable pass on to customers in full. Although staff costs were impacted by a rise in the average head count in Romania to 854 (H1 2007: 770) they fell to 18 % of total output (H1 2007: 20 %).

EBIT is normally negative in the first half due to seasonal factors. This year, however, for the first time ever, the company posted a profit for the year to 30 June of €2.4m (H1 2007: loss of €0.2m). EBITDA also improved, from €2.1m to €5.2m. The Engineering business put in a particularly encouraging performance, with earnings up year on year due to project completions.

Second quarter revenue registered a 29 % year-on-year increase to €32.8m (H1 2007: €25.5m), while EBIT more than tripled from €1.1m to €4.0m.

Net finance costs for the first half as a whole reflected our recent rapid expansion and resultant large investments abroad. Non-current assets were boosted by the strong forint, but higher borrowings due to the investment projects and higher interest rates combined to push up net finance costs to €0.7m (H1 2007: net finance income of €0.6m).

Profit on ordinary activities (POA) rose sharply from €0.4m in 2007 to €1.7m in the first half of 2008. Second-quarter performance was outstanding, with POA jumping to €5.4m from €1.8m in the comparative period.

ORDER BACKLOG

Order backlog as at 30 June 2008 amounted to €55.6m – more than double the €26.8m year-earlier figure. The Hungarian market accounted for €30.4m of the total, Romania for €15.0m and Slovakia for €6.5m. Viewed in segmental terms, the Infrastructure business sector was the main contributor to order backlog, at €37.4m, followed by Water Conservation at €13.3m and Engineering at only €4.9m.

SEGMENTAL REPORT

The segmental distribution of revenue in the first half of 2008 was as follows. Infrastructure returned revenue of €25.4m, or 49.6 % of the total (H1 2007: 56.3 %), making it the strongest of the three segments. However, thanks to the growth in Romanian sales, revenue performance in the Water Conservation sector improved significantly to €16.3m, or 31.8 % of the overall figure (H1 2007: 25.5 %). Despite a strong performance from the Engineering segment in the first six months of 2008, revenue for the period was below expectations at €9.6m (18.6 % of the total) because of the difficult conditions on the Hungarian market. We expect order bookings for municipal projects to pick up again in 2009.

Hungary remained SW Umwelttechnik's main geographical market in terms of revenue contributions, generating 60.5 % of the total (H1 2007: 65.9 %). As anticipated, Romania doubled its revenue share to 17.4 % (H1 2007: 8.5 %), while the contribution of the Austrian market held fairly steady at 17.7 % (H1 2007: 19.2 %).

ASSETS AND FINANCES

The investment program swelled non-current assets to €80.2m (H1 2007: €71.4m), and current assets edged up to €48.1m (H1 2007: €45.8m). Consequently total assets also grew, from €117.3m in the comparative period to €129.8m. Our ambitious expansion plans were reflected in an upturn in borrowings to €74.2m (H1 2007: €62.6m). Equity was €31.8m – up from €27.2m in the first half of 2007 – and the equity ratio returned to 25 % (H1 2007: 23 %).

SHARE PRICE PERFORMANCE

The fallout from troubled financial markets did not leave our share (SWUT) untouched, and the price ended the half-year 30 % down on the close on 1 January. Despite current bearish sentiment, our focus on Central and Southeastern Europe (CSE), infrastructure and environmental protection makes SW Umwelttechnik an attractive sustainable investment.

Share price

SIGNIFICANT RISKS IN THE SECOND HALF OF 2008

Due to its expansion into Southeastern Europe and the overall internationalisation of operations, SW Umwelttechnik is confronted with a number of factors that are part of the normal course of business but in some cases represent risks. The use of modern risk management methods makes it possible to quantify positive and negative deviations of performance from corporate targets and performance indicators. Identifying the variables that determine performance in good time, so as to modify them in such a way that the business opportunities they present can be exploited, is one of the central tasks of the Management Board and all of the Group's senior executives.

The SW Umwelttechnik Group's risk management methods are described in detail in the 2007 annual report (see pages 58–61).

As of 30 June 2008 there were no recognisable risks likely to arise during the rest of the year that posed a threat to the Group's survival, either individually or in combination with other risks.

OUTLOOK

Our expectation of 20 % revenue growth is based on the current order backlog of €55.6m, leadership of the Hungarian market and expanding market shares in Romania. The main reasons for forecasting a disproportionate increase in EBIT, by some 60 %, are the positive earnings contribution from the Romanian operations and the improved performance of the Engineering sector.

➤ Hungary

Industrial and commercial demand in Hungary is seen picking up slightly in the second half of 2008. However, municipal investment looks set to remain well below year earlier levels as a result of the public expenditure cuts. A big increase in local authority spending is expected from mid-2009 onwards, with the Water Conservation sector the main beneficiary.

➤ Romania

Demand from the Romanian industrial and commercial sectors is still booming, and municipal investment is set to grow noticeably in the second half of this year – though sharp increases are not expected before mid-2009. The second development phase at the Bucharest works, which will create capacity for the Water Conservation business, will begin towards the end of this year and is scheduled for completion in the summer of 2009. Construction of a third plant in Targu Mures in central Transylvania is due to start in the second half of next year.

➤ Austria

Revenue from the Austrian market rose in 2008 on the back of product innovations, and the trading environment is expected to remain positive in the market segments we serve.

➤ CSE

We are confident that the past year's strong trading performance in Slovakia will continue. Moves to export to Bulgaria, Moldova and Serbia from Hungary and Romania are under way. We are also preparing to purchase land in these target countries in order to build new factories.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS FOR THE FIRST QUARTER OF 2008

The consolidated interim financial statements for the three months ending 30 June 2008 have been prepared in accordance with the International Financial Reporting Standards (IFRS) adopted by the EU.

In accordance with IAS 34, this abridged interim report does not contain all the information and disclosures that are mandatory for an annual report. This report should therefore be read together with the consolidated financial statements of SW Umwelttechnik Stoiser & Wolschner AG for the year ended 31 December 2007.

SCOPE OF CONSOLIDATION

The scope of consolidation compared to 31 December 2007 was changed as followed. UT Immobilienverwaltungsgesellschaft m. b. H., domiciled in Germany, was deconsolidated on 1 January 2008; this is a discontinued operation and SW Umwelttechnik Csepe Kft. Was deconsolidated on 30 June 2008.

ACCOUNTING AND MEASUREMENT METHODS

The same accounting and measurement methods as those applied in the financial year ended 31 December 2007 continued to be used.

FOREIGN CURRENCY TRANSLATION

The Group's functional currency is the euro, and those of the foreign subsidiaries are the respective local currencies.

The annual financial statements of foreign subsidiaries and joint ventures have hence been translated as follows, using the modified closing rate method, in accordance with IAS 21:

- ✔ Assets and liabilities at the closing rate at the balance sheet date
- ✔ Income and expenses at the average rate for the year
- ✔ Equity items at the exchange rate at the date of the transaction

The following exchange rates have been applied:

Currency		Rate at balance sheet date		Rate for period	
		30 June 2008	30 June 2007	1H 2008	1H 2007
HUF / EUR	Hungarian forint	235.4	246.2	252.2	250.6
RON / EUR	Romanian lei	3.64	3.13	3.69	3.32

Currency		Rate at balance sheet date		Rate for period	
		31 March 2008	31 March 2007	Q1 2008	Q1 2007

No financial instruments additional to those disclosed in the 2007 annual report were used during the period under review.

REPURCHASE OF OWN SHARES

In the first half of 2008 the Group repurchased 3,200 own shares at an average price of 83.3 € per share, for an amount totalling 266,708 €.

EVENTS AFTER THE BALANCE SHEET DATE

There were no post balance sheet events either affecting the present interim financial statements or otherwise of material importance.

SEASONAL BUSINESS

Due to weather conditions there are seasonal fluctuations in product deliveries and project completions, as construction activity is limited during the winter months. Because of this, the second and third quarters are normally stronger than the first and fourth-quarter revenue.

OTHER COMMITMENTS, LITIGATION AND CONTINGENT LIABILITIES

There were no changes in other commitments, litigation and contingent liabilities as compared to those disclosed in the 2007 annual report.

RELATED PARTY DISCLOSURES

There were no material differences in business relationships with related parties as compared with those disclosed in the 2007 annual report.

DECLARATION OF THE MANAGEMENT BOARD

To the best of our knowledge this abridged, unaudited interim report for the three months ending 30 June 2008, drawn up in accordance with International Financial Reporting Standards (IFRS), gives a true and fair view of the Group's assets, finances and earnings).

Klagenfurt, 27 August 2008

Bernd Hans Wolschner
member of the Management Board

Klaus Einfalt
