

MPCES signs agreement to sell projects in Guatemala and El Salvador, will call General Meeting to seek shareholder approval

Amsterdam/Oslo – 7 November 2025 – MPC Energy Solutions (“MPCES”, “Company”) announced that it has signed an agreement to sell two solar projects with a combined total capacity of 87.4 MWp. The sale relates to the Company’s projects Santa Rosa & Villa Sol (El Salvador) and San Patricio (Guatemala). Santa Rosa & Villa Sol (21.3 MWp) has been operational since early 2023. San Patricio (66.1 MWp) has completed construction but has not yet started operations.

The agreement signed between MPCES and the buyer, an energy group based in Panama with energy sector investments across Latin America, is subject to customary closing conditions and local regulatory approvals. In addition, MPCES will call a General Meeting to seek shareholder approval for the transaction, as required by Dutch law. The General Meeting is expected to be held during the month of December 2025. MPCES will inform its shareholders about the details in a separate notification in the coming days.

MPCES expects to collect around USD 27 million from the sale (equity value). Minor closing adjustments to the purchase price could be made. Closing is expected to happen in the second quarter of 2026.

The Company intends to distribute a substantial portion of the sales proceeds and existing free cash reserves to its shareholders after the transaction is concluded, while retaining sufficient reserves to meet future obligations.

The Company’s remaining projects Los Girasoles (12.3 MWp, Colombia), Los Santos (15.8 MWp, Mexico) and La Perla (under development in El Salvador) are not part of the transaction.
