

Embla Medical hf: Initiating New Share Buyback Program

Announcement no. 61/2025

23 December 2025

Reykjavik, Iceland/Copenhagen, Denmark, December 23, 2025. Embla Medical (Nasdaq Copenhagen: EMBLA), a leading global provider of innovative mobility solutions, today announced that the Company has decided to initiate a new share buyback program (the "Program") on Monday, 5 January 2026.

The Program will be carried out in accordance with Regulation No. 596/2014 of the European Parliament and of the Council on market abuse ("MAR"), and the Commission's delegated regulation 2016/1052. The purpose of the Program is to reduce the Company's share capital and adjust the capital structure by distributing capital to shareholders in line with the Company's Capital Structure and Capital Allocation Policy.

The Company may purchase up to 2,000,000 shares under the Program, corresponding to 0.46% of the current share capital. The total consideration for shares purchased under the Program shall not exceed USD 10 million. The daily purchase shall not exceed 25% of the average volume in the 20 trading days before the purchase on the regulated market where the transaction is carried out. The purchase price shall not be higher than the price of the last independent trade or the highest current independent bid, whichever is higher on the regulated market where the transaction is carried out.

The Program will be managed by Nordea, which shall make its trading decisions independently and without influence by the Company with regards to the timing of the purchases. The Company's purchases under the Program shall be disclosed in accordance with laws and regulations. The Program will end no later than 31 December 2026, but the Company is entitled to discontinue the Program at any time. The Program has been initiated according to an authorization granted by the Annual General Meeting on 12 March 2025 to initiate share buyback programs.

The Company also reserves the right to buy back shares in block trades outside the Program with the aim of maintaining a healthy balance sheet with a target range of 2-3x NIBD/EBITDA. Such transactions will only be made outside "black-out periods", i.e., not within 30 days prior to publication of the Company's quarterly financial results, and when no insider information is available. Such transactions will be announced immediately after they have been carried out.

According to an authorization granted by the Annual General Meeting on 13 March 2024, the Company can purchase own shares of up to 10% of the Company's share capital as it is each time. The authorization states that the purchase price shall not be higher than the price of the last independent trade or the highest current independent bid, whichever is higher on the regulated market where the transaction is carried out. The authorization is valid until 13 September 2026.
