

BankNordik revises its 2023 net profit guidance upwards

16.6.2023 08:00:01 CEST | BankNordik | Inside information

Announcement no. 8/2023

BankNordik is revising its guidance for the net profit for 2023 from the earlier announced estimate of DKK 210-240m to be in the range DKK 235-265m.

The adjustment is driven by an improved outlook in core operations due to rising policy and market rates and by the customers' resilience in the face of inflationary pressures, which has led to lower than expected impairment levels.

The bank will publish the Half-Year financial results on 3 August 2023, where the financial guidance and adjusted financial targets will be explained in further detail.
