

JUL-SEP 2025

INTERIM REPORT - JUL-SEP 2025

SUMMARY COMMENTS

For the third quarter, Net Revenue was SEK 355.3 (465.7) million, representing FX-adjusted organic decline of 16.2 percent year-over-year. Unfavorable currency movements negatively impacted Net Revenue by SEK 34.8 million in the period. EBITDA for the quarter amounted to SEK 54.4 (73.8) million, while Adjusted EBITDA was SEK 63.2 (101.7) million, corresponding to an Adjusted EBITDA margin of 17.8 (21.8) percent. Operating cash flow came in at SEK 50.9 (35.6) million.

The third quarter was relatively quiet in terms of product and content releases, with only a few smaller new content releases compared with third quarter last year. One of the key highlights was Singularity 6's (S6) successful introduction of Animal Husbandry feature in Palia. The community reception was very positive with player engagement reaching the same peak levels achieved during the initial release on PlayStation and Xbox in Q2. The team has a robust content and feature plan for the game and is working towards establishing Palia as one of the leading cozy life-sim games in the industry. Piranha also contributed positively to the quarter with the launch of the 7th DLC for MechWarrior 5: Mercenaries, which is on trend to become the best-selling DLC for the title.

During the quarter EG7 secured a SEK 100.0 million revolving credit facility which further strengthens the group's capital structure. The strong capital structure and the release pipeline create an attractive basis for both organic and non-organic growth opportunities over the next coming years.

HIGHLIGHTS FOR THE QUARTER

- Net Revenue of SEK 355.3 (465.7) million, representing an FX-adjusted organic decline of 16.2 percent.

COMMENTS FROM THE CEO

Ji Ham, CEO

A quiet quarter

Net Revenue was SEK 355.3 (465.7) million for the third quarter, representing year-over-year decline of 16.2 percent in constant currencies. The lower level of Net Revenue compared with the third quarter last year is mainly attributable to smaller pipeline for Fireshine, lower performance for My Singing Monsters (MSM) and a large negative impact of SEK 34.8 million from currency fluctuations. Adjusted EBITDA amounted to SEK 63.2 million, compared to SEK 101.7 million last year, corresponding to a margin of 17.8 percent.

Operational cash flow increased to SEK 50.9 (35.6) million. This figure was negatively impacted by a non-recurring payment of SEK 7.9 million, adjusted for this the operational cashflow would have been improved to SEK 58.8 (35.6) million.

Portfolio highlights

In September, S6 released Animal Husbandry feature in Palia across all platforms. The launch was a solid success, resulting in increased player engagement with key metrics reaching the same peak levels seen during the initial PlayStation and Xbox release window. As a result, Palia is continuing to demonstrate growth and is on track to become the largest revenue contributor within Daybreak's live games portfolio.

On September 3rd, Piranha launched the 7th DLC for MechWarrior 5: Mercenaries. The performance for the DLC has been solid and is on trend to be the best selling DLC for the title.

During the quarter, based on continued progress, EG7 made additional milestone approvals to the co-operation with Cold Iron. Cold Iron, Daybreak and the licensor have been working closely to secure a desired high level of quality and coordinating the release timing in order to maximize the game's performance. In conjunction with this, the target release window for the game has been moved to Q3 2026. Daybreak has also agreed to fund an additional USD 6-6.5 million for the continuing development, the commercial terms for which have been adopted in accordance. The group remains confident in the potential for the new title along with progress in the game development and the IP gaining more global attention.

Seeking selective M&A growth

Our strategy is defined by a combination of prudent management of our existing portfolio, selectively investing in M&A and new project opportunities for potential acceleration in growth and ultimately constructing a high-quality portfolio of assets that could produce predictable performance and growth. We have been actively evaluating opportunities that fit our expertise and capabilities. While there have been a large number of opportunities available, we have been exercising caution and discipline in order to focus on securing opportunities that "make sense" and aligns well with our long-term strategy going forward.

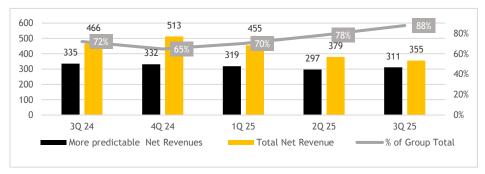

Positioned well for continued execution

We remain confident in our strategy and plans for growth. We have a solid foundation, resulting from our base of more predictable revenues and healthy balance sheet with ample liquidity. While the market landscape remains challenging for mid- to lower market players, our solid financial profile provides the group with a favorable position to approach growth opportunities whether through M&A or project investments.

BUSINESS OVERVIEW

A leading global live service game developer and operator

Combining titles from Daybreak, Big Blue Bubble, and Piranha, EG7 currently operates ten long-lifecycle IPs, primarily live service games. Together with Fireshine's back catalogue, this portfolio serves as a key differentiator for the Group, providing a stable foundation of more predictable revenues and cash flows. Our predictable revenue includes all live service titles and back catalogue titles. Titles are transferred to the back catalogue following the first new year after release. Net Revenue from this portfolio amounted to SEK 311.0 million in Q3, representing 88.0 percent of the Group's total Net Revenue.

Iconic world-class brands

EG7 is home to some of the most iconic IPs, both first- and third-party brands. First-party brands are IPs exclusively owned and managed by EG7, while third-party brands are owned by external parties, with EG7 entrusted to develop and operate games based on these IPs.

- Key first-party brands include:
 - EverQuest, considered to be one of the three most iconic fantasy MMO brands in the world together with World of Warcraft and Ultima Online.
 - H1Z1, the very first battle royale game that was credited as one of the inspirations for Fortnite, with over 40 million life-to-date (LTD) registrations.
 - My Singing Monsters, which has over 185 million (LTD) registrations on mobile and PC, reached top 10 in over 100 countries in the App Store games category and the No. 1 spot in more than 15 countries 10 years after its release.
 - Palia, a cozy community/life simulation game, with over 9 million LTD registrations.
- Top tier global third-party brands:
 - DC Comics from Warner Bros, with continuing pipeline of content from blockbuster feature films and TV shows.
 - o The Lord of the Rings, arguably the most iconic classic fantasy IP in the world.
 - Dungeons & Dragons, the legendary fantasy IP with a passionate fan base worldwide.
 - Magic: The Gathering Online, the world's number one trading card game from Wizards of the Coast.

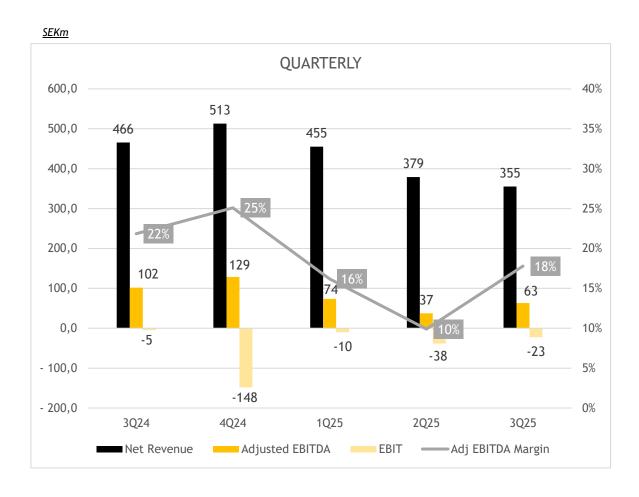

These brands differentiate our portfolio of games from competitors and provide great opportunities to leverage them further toward continuing content development and new future products.

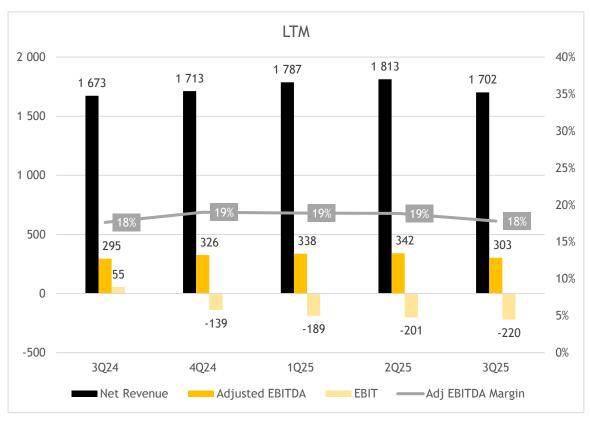

Stable foundation and risk-controlled growth

Our portfolio of franchise and live-service games is special within the gaming industry, combining steady performance with ongoing content releases for our titles. These games, anchored by strong iconic game-titles and loyal player bases, create a stable and predictable business model. Unlike traditional one-off releases, this approach ensures continuous player engagement and more predictable revenue while lowering the overall risk.

In addition, we've been successful in adding new games over time, expanding our portfolio while maintaining prudent low-risk M&A activities within our circle of competence. This strategy not only diversifies our offerings but also strengthens our position within the market, creating a stable foundation for sustainable growth with reduced long-term volatility.

DAYBREAK

For Q3, Daybreak's Net Revenue came in at SEK 180.3 (212.3) million, corresponding to a decrease of 15.1 percent. The decline is attributable to challenging comparable figures following the successful 25th anniversary campaigns for EverQuest in 2024 and SEK 17.7 million unfavorable currency movements. The organic decline in local currencies was 6.7 percent. Adjusted EBITDA was SEK 35.0 (52.1) million, representing a margin of 19.4 (24.5) percent.

The performance in Daybreak's portfolio has a strong correlation with the investment cycle per title. Daybreak performed in-line with expectations for the period, where Gross Revenue (total bookings) actually grew in local currency compared with third quarter last year. The Lord of the Rings Online had its pre-sale launch of the annual expansion pack "Kingdoms of Harald" in September, to be fully released in December. DC Universe Online delivered stable performance with the latest update "Raging Night" launching in September. EverQuest performed at a lower level compared to last year due to a combination of unfavorable comparisons against the strong 25th anniversary performance in 2024 and the negative impact from an unauthorized derivative version of EverQuest. Daybreak has had progress in its initiated legal action, with the issuance of a preliminary injunction requiring the defendants to shut down the infringing game during the pendency of the lawsuit. The lawsuit remains active and Daybreak will continue its legal efforts in this regard. Dungeons & Dragons Online launched its new server in July and published the expansion of "Lamordia" in August, which both had a positive impact on player activity. Magic the Gathering Online had a softer quarter where the most recent cardset release did not reach the expected performance. Following the major content release on May 13th, Palia has continued to deliver improving results with a growing number of players - now with over 9 million lifetime user registrations. The latest seasonal update with "Animal Husbandry" feature was launched on September 11th, resulting in solid engagement from its player base with engagement metrics reaching peak levels from the console release update.

During the quarter, based on continued progress, EG7 made additional milestone approvals to the co-operation with Cold Iron. Cold Iron, Daybreak and the licensor have been working closely to secure a desired high level of quality and coordinating the release timing in order to maximize the game's performance. In conjunction with this, the target release window for the game has been moved to Q3 2026. Daybreak has also agreed to fund an additional USD 6-6.5 million for the continuing development, the commercial terms for which have been adopted in accordance. The group remains confident in the potential for the new title along with progress in the game development and the IP gaining more global attention.

BIG BLUE BUBBLE

Big Blue Bubble delivered Net Revenue of SEK 55.1 (83.9) million, corresponding to a 34.3 percent decline. Currency fluctuations negatively impacted Net Revenue by SEK 6.1 million. Adjusted EBITDA amounted to SEK 25.2 (42.0) million, representing 45.6 percent margin. Due to lower than expected new user acquisition, Big Blue Bubble delivered under expectations. The team is analyzing mitigating actions to increase the new customer intake going forward.

PIRANHA

Net Revenue for the quarter came in at SEK 30.3 (15.7) million, representing 92.6 percent growth year-over-year. Currency fluctuations reduced Net Revenue by SEK 3.0 million. Adjusted EBITDA amounted to SEK 10.0 (2.7) million, representing 33.0 percent margin. September 3rd, Piranha launched the 7th DLC for MechWarrior Mercenaries, Shadow of Kerensky. This turned out to be the best selling DLC for that game title in the first 30 days since inception in 2019.

FIRESHINE

Revenue volatility is a natural part of Fireshines business model and follows the release pipeline. Fireshines Net Revenue came in at SEK 59.0 (109.7) million, representing 46.2 percent decline year-over-year. The decline is mainly explained by lower revenue from digital releases following the Core Keeper 1.0 digital release in the third quarter last year, which contributed SEK 53.6 million (4.0 MGBP) in Net Revenue. Currency fluctuations impacted Net Revenue negatively by SEK 4.9 million. Adjusted EBITDA came in at SEK 1.0 (15.9) million, resulting in a 1.7 percent margin.

PETROL

For Q3, Petrol's Net Revenue came in at SEK 30.4 (35.3) million, representing a 13.9 percent decline year-on-year of which SEK -3.0 million is explained by currency fluctuations. Adjusted EBITDA was SEK 1.6 (0.3) million, resulting in a 5.1 percent margin. The cost-saving measures implemented earlier in the year continue to contribute positively to the improved result. In response to ongoing market volatility, Petrol has successfully expanded its client base beyond the gaming industry, including partnerships with Western Digital and Honda of America. This strategic shift has already yielded results, and management remains confident that the business will stabilize and return to a consistent performance aligned with pre-downturn levels.

Valuation Hierarchy

The levels in the valuation hierarchy are defined as follows:

- Level 1 Listed prices (unadjusted) in active markets for identical assets and liabilities.
- Level 2 Observable input data for the asset or liability other than quoted prices included in level 1. either directly (i.e., price quotations) or indirectly (i.e., derived from price quotations).
- Level 3 Input data for the asset or liability that is not based on observable market data (i.e., non-observable input data).
- No items are valued at level 1 or 2.

Contingent consideration

The contingent consideration is reported at fair value according to level 3 in the valuation hierarchy. The fair value is calculated using a valuation model that discounts the present value of expected payments of cash flows with a risk-adjusted discount rate. Expected cash flows are determined based on probable scenarios based on expected financial outcomes and future financial forecasts. The most significant input factor used in the valuation at fair value is a risk-adjusted discount factor of 13.9 percent.

The end-of-period contingent consideration of SEK 155.9 million is split between Daybreak and Singularity 6, amounting to SEK 121.6 million for Daybreak and SEK 34.4 million for Singularity 6. There is an according to applicable accounting rules not recognized value for EG7s shareholders as of today amounting to SEK 119.2 million, that should be identified in relation to the recognized earnout to the sellers of Daybreak, the net remaining earnout to the sellers of Daybreak after such a theoretical recognition is SEK 2.4 million. For further details see note 7.

Current receivables and liabilities

For current receivables and liabilities, such as accounts receivable and accounts payable, the reported value is considered to be a good approximation of the fair value.

- 1) Cold Iron Studios LLC is owned by Jason Epstein, Chairman of the Board, and Ji Ham, CEO.
- 2) The total estimated remaining amount to the sellers of Daybreak by end of September 2025 amounted to SEK 121.6 million, of which SEK 87.3 million refers to Jason Epstein and SEK 11.7 million to Ji Ham. It refers to acquisition related tax saving benefits from the Daybreak acquisition where the SPA stated that the seller, including Jason Epstein and Ji Ham, and the buyer receive half each from the accumulated tax savings deriving from the acquisition. This amount will be fully settled in 2036 which also means that the tax payments in Daybreak will increase at that point.

The outstanding liability for contingent consideration reflected in the above chart relating to tax saving benefit is a bit misleading in the way that it only reflects a liability and not the corresponding larger tax saving asset that according to IFRS shall not be reflected in the accounting. However, that asset was originally USD 57 million to be netted from any future tax payments over 15 years ending December 31st 2036. As of today, that asset amounts to USD 48.2 million or SEK 453.7 million and half of that potential value belongs, over the full period when and if it occurs, according to the original share purchase agreement to the sellers of Daybreak including the related parties listed above. This means that the hidden value for EG7s shareholders as of today at net present value is SEK 119.2 million.

For further details on related party transactions, please see the Annual report 2024.

DEFINITIONS

ALTERNATIVE PERFORMANCE MEASURES

Guidelines regarding alternative performance measures for companies with securities listed on a regulated market within the EU have been issued by ESMA (The European Securities and Markets Authority). The interim report refers to a number of undefined measures in accordance with IFRS that are used to help both investors and management to analyze the company's operations. Because not all companies calculate financial measures in the same way, these are not always comparable with measures used by other companies. These financial measures should therefore not be regarded as compensation for measures defined in accordance with IFRS. Below we describe the various measures not defined in accordance with IFRS that have been used as a complement to the financial information reported in accordance with IFRS and how these measures are used. For reconciliation of alternative key ratios, see Adjustment bridge page 26.

The reason why we use the alternative KPIs listed under Definitions is because they visualize operational performance in such a way that a reasonable investor potentially would consider some or all of them in a decision to trade shares in Enad Global 7 AB.

Average number of employees: The average number of employees during the period.

Cash conversion: Operational cashflow divided by proforma EBITDA over the last twelve months.

EBITDA: Earnings before interest, tax, depreciation and amortization of tangible and intangible non-current assets.

Adjusted EBITDA: EBITDA adjusted for items considered to be non-recurring and one-time in nature for comparability between periods. Referring to Adjustment bridge for a detailed view of non-recurring items.

EBITDA margin (%): EBITDA as a percentage of Net Revenue.

EBITA: Operating profit before depreciation of intangible assets.

EBITA margin (%): EBITA as a percentage of Net Revenue.

Adjusted EBIT: EBIT adjusted for items considered to be non-recurring and one-time in nature for comparability between periods. Referring to Adjustment bridge for a detailed view of non-recurring items.

EBIT margin (%): Operating profit as a percentage of Net Revenue.

Adjusted Net profit: Profit after tax for the period adjusted for items considered to be non-recurring and one-time in nature for comparability between periods. Referring to Adjustment bridge for a detailed view of non-recurring items.

Adjusted Earnings per share: Adjusted net profit for the period divided by the total number of shares outstanding.

Equity ratio: Equity as a percentage of total assets.

Net cash: Interest-bearing assets and cash and cash equivalents less interest-bearing liabilities.

Net debt: Interest-bearing liabilities less interest-bearing assets and cash and cash equivalents.

Net Revenue growth: Increase in Net Revenue from the same period the previous year as a percentage.

Organic growth: Net Revenue increase from comparable period last year divided by the Net Revenue for the comparable period last year. Including all newly acquired businesses contributing with Revenue last year but excluding newly acquired businesses contributing with Revenues this year.

Organic growth in local currency: Organic growth excluding the translation impact of changed currency exchange rates. The current period is recalculated with the average exchange rate for the comparison period.

More predictable revenue base: Our more predictable revenue includes all live service titles, and back catalogue titles, titles are transferred to the back catalogue following the first new year after release.

Total Leverage: Cash debt (including remaining purchase consideration in cash and for the avoidance of doubt excluding any remaining purchase considerations to be settled in company shares) divided by proforma EBITDA.

OTHER DEFINITIONS

Earnings per share: Net profit for the period divided by the total number of shares outstanding.

Operating profit (EBIT): Earnings before financial items and tax.

Net profit: Profit after tax for the period.

Gross Revenue: Sales or customer bookings during a given period

Net Revenue: Revenue from sales after applying applicable accounting revenue recognition rules,

less discounts and after elimination of any related party transactions.

Number of shares: Total number of shares outstanding.
