7. CORPORATE GOVERNANCE PRINCIPLES COMPLIANCE REPORT	84

Dear Investors, Shareholders, Valuable Business Partners and Employees,

The first industrial revolution emerged in the 18th century with mechanical production systems using water and steam power. The Second Industrial Revolution, which started mass production with the help of electrical power, took place in the 19th century, and the Third Industrial Revolution, in which the production processes were automated with the development of Information Technologies, took place in the 20th century.

The 21st century we are in is called the era of cyber-physical production. Technologies which the generation in their fifties watched in their childhood, such as video phone, interplanetary travel, digital scanning devices that diagnose disease, electronic devices that receive voice commands, tablet computers, wireless headphones, synthetic meat, virtual reality, digital translators that can instantly translate from different languages, 3D printers have now become a part of our daily lives.

During the 30 years that Escort Teknoloji has left behind, we have been the witness and actor of the transition from the third industrial revolution to the fourth. Not only did we produce technology to bring our country forward in

the fourth industrial revolution, we also took steps to transform existing businesses with new technology. At the point we have reached today, Escort has become an important technology developer in Turkey with its 55 subsidiaries and affiliates from biotechnology to cloud solutions, from cybersecurity to online therapy, from medical technologies to payment systems.

Shortly, as Escort, we continue to take firm steps on the path we set out 30 years ago to "invent the future".

Yours Sincerely,

During the 30 years that Escort Teknoloji has left behind, we have also witnessed and been an actor in the transition from the third industrial revolution to the fourth. Not only did we produce technology to bring our country forward in the fourth industrial revolution, we also took steps to transform existing businesses with new technology."

İbrahim Özer
Chairman of The Board

Inspiration Of Turkish Technology Sector

1.3. Company History

Escort Computer Elektronik San. and Tic. Inc. mainly started its activities in 1991 with the title of Özer Elektronik and realized the first domestic PC production and sales in Turkey with the Escort brand. The company has achieved a rapid rise in a short time with the products that won great appreciation from the customers. Escort brand became the leader in

the market with the sales of 17,828 PCs in 1995. As the market leader, the company, which is proud of leaving the world's leading brands behind, continued this success in the following years.

With the achievements and gains, new investments have been made to improve activities in many areas, and as a result of these investments, many innovations and firsts have been achieved. As an example, EscortLand, which was established as Turkey's first chain of technology stores, or EscortNet, which was established as one of the first internet service providers, can be mentioned.

Playing an important role in the development of the Turkish information technologies market until the 2000s, Escort made its public offering in 2000. Today, it still continues to be traded on Borsa İstanbul (BIST) with the ESCOM code.

Between 2001 and 2004 Escort focused on its goal of becoming an international technology provider, involved in large-scale information technology projects in Turkey and abroad. In these years, it successfully completed many public projects supported by institutions such as the World Bank, European Fund, UNESCO, Islamic Development Bank and information technology projects of large-scale companies. Thus, Escort has become one of the few technology exporting companies in Turkey and has become the preferred brand of the institutions in its geography. In this period, products with up-to-date technologies were brought to consumers by applying international quality standards in the field of computer production.

Escort Teknoloji A.Ş., which has pioneered many firsts since its establishment, continues to be a source of inspiration for the Turkish technology sector with its new investments, expanding fields of activity and the excitement of the first day.

Reshaping its strategy as of 2005, Escort has focused on investing in information technology solutions that make the lives of its consumers easier, has acquired subsidiaries by investing in startups that develop information solutions for different sectors, and changed its name to Escort Teknoloji Yatırım A.Ş in 2009 in line with its new strategy. It disposed of its investments that reached the economic scale and obtained capital profit.

Where Technology Touches Life

'We continue to advance towards the future with firm steps and getting stronger on the way we set out yesterday to "invent the future".'

Escort Teknoloji Yatırım A.Ş., with its thirty years of know-how and the entrepreneurial spirit it has always brought to the fore, is Turkey's digital company with its subsidiaries and affiliates that produce a wide range of technologies from cyber security to biotechnology, from SaaS platform to battery technologies, from games to online therapy or transform existing businesses with new technologies. It makes a significant contribution to the transformation.

With the investments made in early stage technology startups with high growth potential, long years of knowledge and managerial experience are shared. It is aimed to turn the companies involved into successful businesses that make a profit by providing the capital, knowledge and experience they need, and to bring them into the country's economy.

Escort Teknoloji Yatırım A.Ş. takes place in every segment of the entrepreneurship ecosystem through Escort Teknoloji, Alesta Teknoloji Yatırım A.Ş and Geometri Melek Girişim Sermayesi Yatırım Fonu.

Escort Teknoloji Yatırım A.Ş. continues to touch the lives of consumers with technologies that will make people's lives easier by offering innovative solutions in many areas of life.

There are investments in a wide range of areas from digital products & services to healthcare solutions, renewable energy and business intelligence & corporate solutions, from consumer electronics to e-commerce & payment solutions, with direct or indirect new venture investments. With the services and solutions offered, it facilitates the lives of individuals and companies and provides efficiency.

We continue to make people's lives easier in many areas with our investments in companies that develop technology-based products, solutions and services, especially information technologies, and deliver them to consumers.

- New GES power generation plant investments (EYF, EYÇ ve Centriot A.Ş.)

2020 -2022

- Direct or indirect Escort Teknoloji Yatırım A.Ş. venture investments

1.6. Profit Distribution

Article 21 of the main agreement on profit distribution;

After deducting the amounts required to be paid and set aside by the Company in accordance with the general accounting principles such as the general expenses of the company and miscellaneous depreciation fees, and the provisions set aside for the compulsory taxes and financial liabilities to be paid by the Company's legal entity, from the income determined at the end of the accounting year, the remaining net profit appears in the annual balance sheet. The remaining amount after deduction of previous years' losses, if any, is distributed in the following order and principles:

1. General legal reserve: 5% of the annual profit is set aside as general legal reserve until it reaches 20% of the paid-in capital in accordance with Article 519 of the Turkish Commercial Code.
2. From the remainder, the first dividend is set aside at the rate and amount determined by the Capital Markets Board, over the amount to be found by adding the donation amount made during the year, if any.
3. The General Assembly is authorized to distribute the remaining part of the net profit, after deducting the amounts specified in paragraphs 1 and 2, partially or completely as the second dividend or allocate it as extraordinary reserve.

Even after reaching the general legal reserve limit; One tenth of the amount found after deducting the dividend at the rate of 5% of the paid-in capital from the portion that has been decided to be distributed to the shareholders and other persons participating in the profit is set aside as the second legal reserve in accordance with subparagraph c, paragraph 2 of Article 519 of the TCC.

Unless the reserves required to be set aside by law are set aside, unless the first dividend determined for the shareholders in the articles of association is distributed in cash and/or in the form of shares; to allocate other reserves, to transfer profits to the next year and to privileged shareholders in dividend distribution, to participation, founder and common stockholders, members of the board of directors, civil servants, employees and workers, foundations established for various purposes and such persons and/or institutions. distribution cannot be determined.

Dividends related to the shares are distributed to all existing shares as of the end of the accounting period, regardless of their issuance and acquisition dates, without applying the per diem basis.

The distribution method and time of the profit that is decided to be distributed is decided by the general assembly upon the proposal of the board of directors.

1.7. Risk Management Policies

- **Receivable Risk:** In order to keep the risk of the customers sold under control, the risk is determined according to the financial structure and guarantees of each company. Transactions are made in line with the determined limits.
- **Technological Risk:** The biggest feature of the information sector is that technological developments and price changes are experienced very frequently. For this reason, a good stock control is carried out.
- **Currency Risk:** Most of the products used in the sector are imported from abroad. When purchasing products, they are debited in foreign currency and payments are made according to these currencies. Sales policies are tried to be made over the product entry currency.

1.8. Corporate Business Model

Investing in technology-based venture companies in sectors that offer growth opportunities, the Company gains capital gains from investments at the right time, with the right exit model and by exiting the maximum value. Investments are made in companies that have a technology-based business model in the Retail, Health, Energy, Finance, Social media sectors, or companies that provide direct service to the end user. Exit from Investment is in the form of Public Offering, Sale to Strategic Partner and Sale to Financial Partner.

Public Offering: It is the preferred method when the venture reaches the required size and profitability for the public offering.

Sales to Strategic Partners: Sales made to buyers operating in the same sector as the Venture Company and providing synergies in case of purchase. The Strategic Partner may become a partial partner in the venture or may purchase all of it.

Sales to Financial Partners: Sales to large funds that invest in growing and potentially promising ventures.

The company's investments consist of 55 venture companies, of which shares are held, directly or indirectly, at different rates.

The company has increased the capital of its 100% subsidiary Alesta Teknoloji Yatırım A.Ş., which invests in early-stage technology startups, to 25 million TL in 2020, and it is planned to transform Alesta into GSYO (Venture Capital Investment Trust) and then go public.

Investments are made in advanced technology startups with high overseas sales potential through Geometri Melek Investment Consulting Inc., which is also among the subsidiaries.

Thus, Escort Teknoloji Yatırım A.Ş., Alesta Teknoloji Yatırım A.Ş. and Geometri Melek Girişim Sermayesi Yatırım Fonu are involved in every segment of the technology ecosystem.

2. Company Investments

2.1. Investment Categories

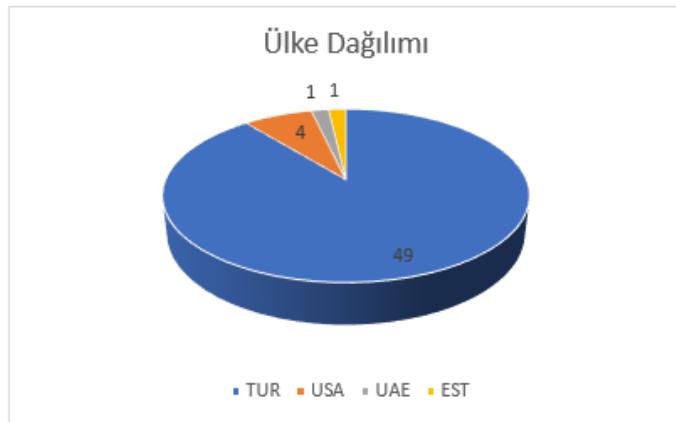

Escort Teknoloji Yatırım A.Ş. takes part in every segment of the technology ecosystem via Alesta Teknoloji Yatırım A.Ş. and Geometri Melek Girişim Sermayesi Yatırım Fonu.

As of 31st of March, 2023, the main direct or indirect subsidiary categories are as follows:

2.2. Investments Country Split

Country	Qty	%
TUR	49	94,23%
USA	4	7,69%
UAE	1	1,92%
EST	1	1,92%
TOTAL	52	100%

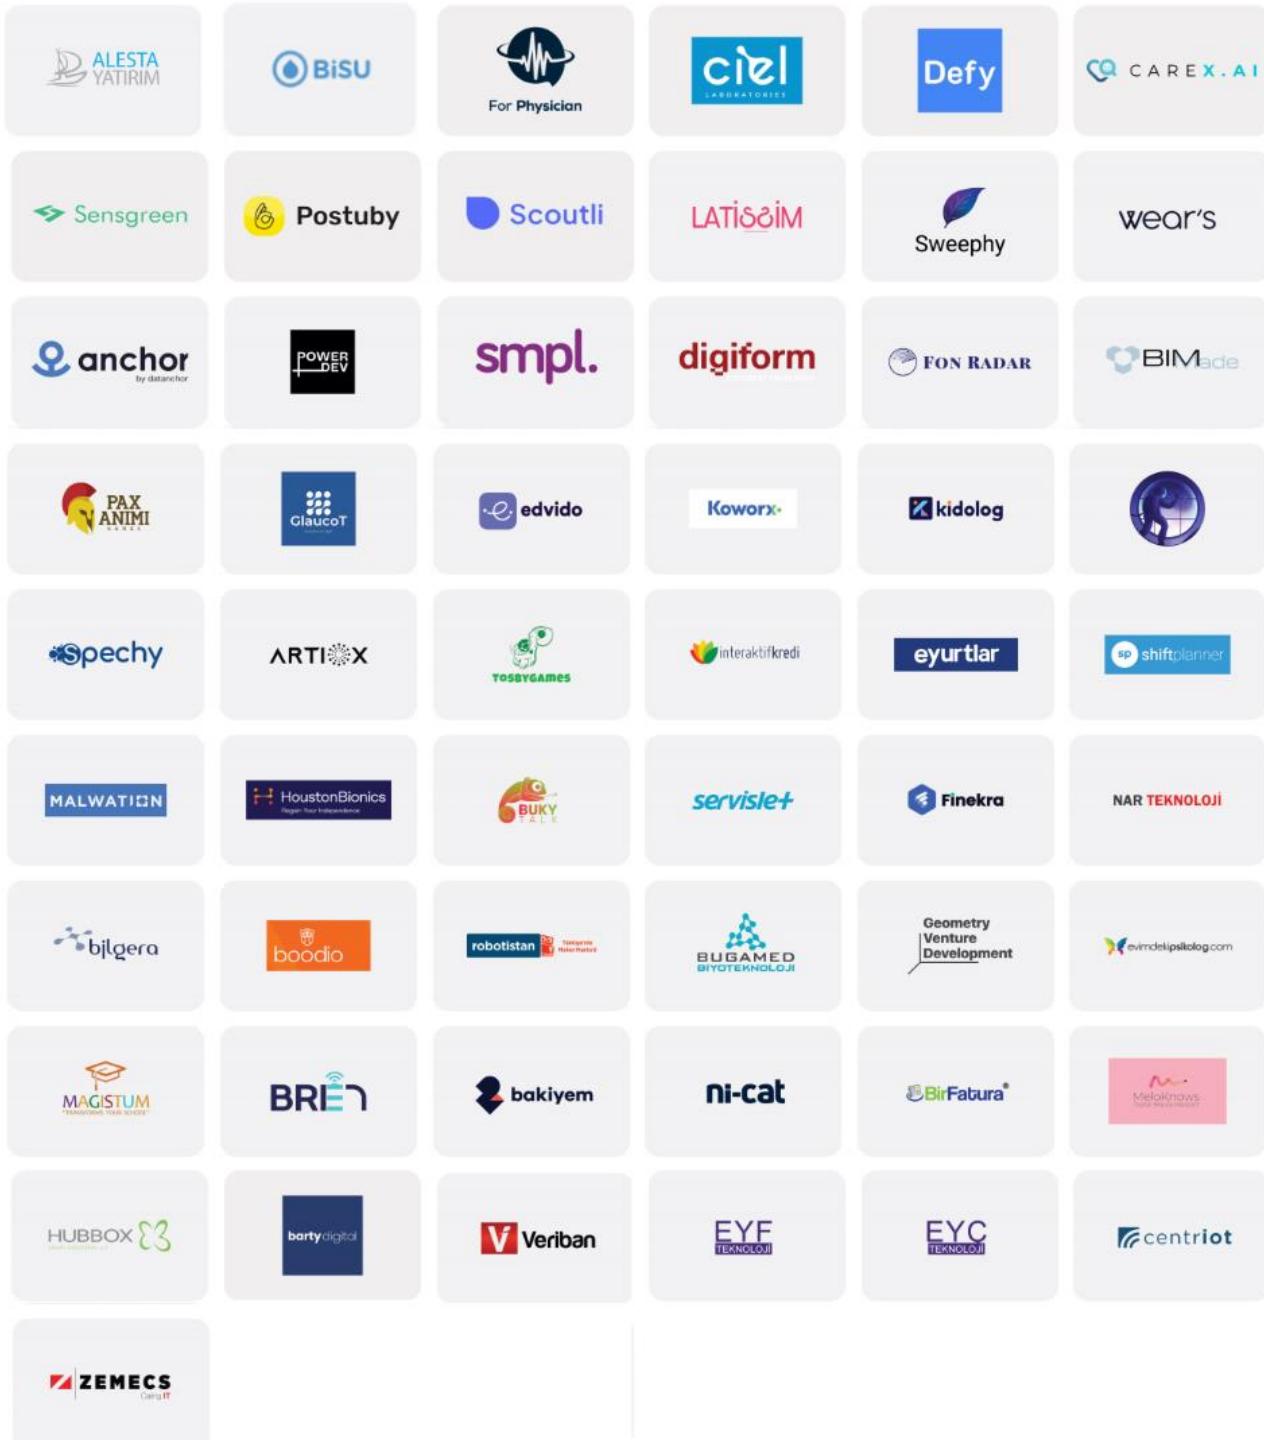

2.3. New Investments and Growth Strategy

Escort Teknoloji Yatırım A.Ş., which makes a significant contribution to Turkey's digital transformation with its venture investments that produce a wide range of technologies from cyber security to biotechnology, from SaaS platform to battery technologies, from games to online therapy, or transform existing businesses with new technologies, aims to continue supporting early stage startups with high growth potential.

It is expected that 4 Unicorns will emerge from our affiliates which achieved great success in a short time and increased their values in the next 5 years.

In case of suitable conditions occur for some of the subsidiaries and affiliates, a share sale or public offering is planned.

We Walk to the Future Together!

3 new ventures with high growth potential has been invested in the Q1-2023 period:

1. Defy Digital Yazılım Hizmetleri A.Ş.

Defy Digital Yazılım Hizmetleri A.Ş., which develops software in the field of decentralized finance technologies, has been participated by 5% based on a company valuation of TL 10 million.

3.1. Alesta Elektronik Teknoloji Yatırım A.Ş.

Alesta Elektronik Teknoloji Yatırım A.Ş.

Activity Area	: Early Stage Venture Investment
Website	: www.alestayatirim.com
Authorised Person	: İbrahim Özer
Linked-in	: https://www.linkedin.com/in/ibrahim-özer-8565a716/

Alesta Elektronik Teknoloji Yatırım A.Ş. was established at the end of December 2012, as a %100 subsidiary of Escort Teknoloji Yatırım A.Ş., in order to invest in technology companies with high growth potential. In May 2013, he received the Capital Markets Board Venture Capital Portfolio Management Authorization Certificate.

While the primary target audience is companies that have started to produce products or services, that have existing customers and aim to grow, Alesta is also interested in venture companies that even though their product or service is ready, need financing to move on to the sales and marketing process.

Alesta aims to provide its partner companies with the capital, know-how and experience they need, to become successful businesses that make a profit and to bring them into the country's economy.

Having returned its Portfolio Management Authorization Certificate in 2017 due to the contraction in the economy, Alesta both increased its capital to 25 million TL in 2020 and increased the number of businesses in its portfolio by investing in many early stage technology initiatives. As the end of 2020, venture capital investment partnership has been applied again.

At this stage, the application for transformation was notified with the letter dated 19.08.2021 of the board, which was received negatively at this stage, and the renewal of the application will be considered after the deficiencies are corrected in the upcoming period.

Alesta, which has a portfolio in wide fields of activity, was selected as the most active CVC of 2021¹ with its venture investments and became one of the most active CVCs in Q1-2022.

In the 'Turkey Fintech Guide' prepared by the Presidential Finance Office, Alesta is ranked 3rd among the main investment companies investing in Fintechs in Turkey.

3.2. Bilgera Yazılım A.Ş.

Bilgera Yazılım A.Ş.

Activity Area : Field Sales Automation

Website : www.bilgera.com.tr

Authorized Person : Umut Sevin

Linked-in : <https://www.linkedin.com/in/umutsevin>

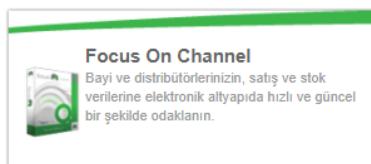

Bilgera Yazılım A.Ş was established in 2007 as a subsidiary of Escort Teknoloji A.Ş.

The main field of activity of the company is software development. The company, which has developed innovative solutions for the FMCG industry since its establishment, offers cloud-based SaaS solutions in areas such as field sales automation, channel management, store activity management, warehouse management, service management and B2B e-commerce with its platform called Repzone.

Repzone, which has offices in the most important points of the world, New York and Istanbul, is a cloud-based multi-channel B2B e-commerce platform. The cloud-based and artificial intelligence supported platform, which enables end-to-end control of field operations and customer tracking processes, adds value to its customers with its digital-oriented and innovative features.

Repzone, which has been providing business intelligence solutions with its expert staff since the day it was founded, entered the American market after being selected among the 8 companies within the scope of ITU Innogate Program after 2016. Repzone meets customer needs end-to-end with its platform designed for the needs of FMCG, retail, telecommunications, finance and many other sectors. Bilgera, which opened branches in the United States of America, focused on activities for the sale of software and services abroad, especially after 2020. Bilgera aims to serve manufacturers and customers in the FMCG sector in 40 countries, including America, Europe and the Middle East, in 2022. In case of suitable conditions occur for Bilgera, exit is planned through. public offering or share sale.

3.3. Nal Teknoloji A.Ş.

Nar Teknoloji A.Ş.

Activity Area : Optical Products and Accessories Sales
Website : www.nartas.com.tr
Authorised Person : Kamil Şenol

Established in 2010, Nar Teknoloji A.Ş. started with the distributorship of Pentax, one of the world's reputable camera and binocular manufacturers. In its first years, it was successful in the distribution of products such as tablets, projectors and computer accessories throughout the country. Afterwards, the company went through a strategic change and specialized in optical products.

Continuing on its way with Ricoh Imaging Company, which bought Pentax, Nar Teknoloji strengthened its permanence in the photography industry by starting the distributorship of the Japanese Tokina lens company for professional and advanced amateur photographers in the same year. Being the Turkey distributor of the creative British tripod brand 3 Legged Thing, Nar Teknoloji started the Turkey distributorship of SANDMARC®, which specializes in premium lenses, filters and accessories for mobile phones, and MOZA, which specializes in high-tech camera stabilizers and accessories, in 2020.

Nar Teknoloji, which is the distributor of global companies in optical products and accessories, will continue to add new product groups of distinguished global brands to its portfolio.

3.4. Geometri Melek Girişim Fonu Yatırım Sermayesi

Geometri Melek Girişim Sermayesi Yatırım Fonu

Activity Area	:	Early Stage Venture Investment
Website	:	www. https://geometryventure.dev
Authorised Person	:	Melih Efeoğlu
Linked-in	:	https://www.linkedin.com/in/melihefeoglu

It carries out its activities in the Rolling Fund model implemented in Europe and the USA, in which 52 individuals and 31 companies that consider venture capital and venture capital investments as high-budget and risky as 'Investors'.

Participating with a capital of 20K - \$50K, Geometry Melek focuses especially on health, material, finance, corporate software and technology initiatives targeting direct customers.

 Geometry
Venture
Development

Geometri, which started its activities in July 2019 as an Angel Investment Network as a incorporated Company, transformed into a Venture Capital Investment Fund in line with the approval it received from the CMB in November 2022. Continuing its Angel Investment Network, Geometri is an Angel Investment Fund that invests in early-stage technology startups at the market entry or pre-market level, together with individual-corporate investors, while continuing to receive capital. There are 83 investors in the Fund, and 14 startups have participated in investment rounds so far.

A total of four "Pitch Challenges" were held in Istanbul, Ankara and Izmir and 203 startups took part in order to facilitate and facilitate access to capital and investment for early stage technology startups operating in Turkey.

Companies Included in Geometry Melek:

Nebyan Natural | Sustainable Livestock and the Future of Natural Meat

Barty Digital | Software Development as a Service for SME's

Barakatech | NFT as a Service for Casual Game Studios

Enhencer | SaaS Platform that Boosts ad Campaign's ROAS for E-commerce and Marketplace

HoustonBionics | Home Type Medical Device for Stroke Patients to Provide Upper Extremity Mobility and Exercise Alone

Octovan | Digital Large Piece Goods Transportation Platform that Optimizes Individual and Corporate Customer Demands and Brings them together with Transporters

Room Studio | AI-Powered Visualization Platform for Real estate and E-commerce

Glaucot | Programmable Medical Device for the Treatment of Glaucoma Disease

DataAnchor | Advanced File Encryption as a Service

Sweepy | No-code Data Cleaning as a Service

My Latissim | Super BeautyAPP for Woman

Smpl | Omni-Channel Growth Platform

Scout | Data Analytics, Scouting and Team Management Platform for Esports Organizations

Postuby | Autonomous Content Creation and Sharing Platform for Social Media

Continuing to receive and realize investments simultaneously, Geometry Venture Development aims to increase the number of ventures in its portfolio to 20 and the number of investors to over 100 in 2023, with the development of its portfolio by continuing to invest in technology startups with high potential and export-oriented at an early stage.

3.5. Robotistan Elektronik Ticaret Anonim Şirketi

Robotistan Elektronik Ticaret Anonim Şirketi

Activity Area	:	Robotic Maker Market
Website	:	www.robotistan.com
Authorised Person	:	Yasir Çiçek
Linked-in	:	https://www.linkedin.com/in/yasir-cicek-717ab892

Founded in 2010, Robotistan carries out the supply, production and sales activities of electronic and robotic equipment related to STEM, Maker, Education Technologies, DIY Products and engineering. It is the distributor of many global brands in its field in Turkey and responds to the needs of the sector in this field.

Along with being the market leader in its field, it has managed to be among Turkey's 50 fastest growing technology companies in the Deloitte Technology Fast 50 list for 6 consecutive years since 2016.

In the first half of 2022, the period when the effect of the pandemic decreased, it achieved a growth of more than 40% on the basis of turnover compared to the same period of the previous year. It is aimed to achieve

much greater growth rates for the second half, with the chip crisis and logistics problems being directed towards a decrease in the recent period.

Robotistan achieved a growth of more than 300% in terms of turnover in the first half of the year, compared to the same period of the previous year, in keeping warehouses and stocks in the USA and England and increasing the trade volumes there. It did a launch for PicoBricks and managed to collect a pre-order of over \$200K. In the second half of the year, the 6-month net turnover was USD 2.025,000 and 10% of the turnover was realized through exports.

3.6. Virgül Dijital Yayıncılık ve Prodüksiyon A.Ş.

Virgül Dijital Yayıncılık ve Prodüksiyon A.Ş.

Activity Area	:	Sales of E-books and Audio Books in Digital Platform
Website	:	www.boodio.app
Authorised Person	:	Mehmet Arslantunali
Linked-in	:	https://www.linkedin.com/in/mehmetarslantunali

Boodio, the brand of Virgül Digital Publishing and Production Inc., which was founded by a team from classical publishing and young professionals born in digital, was formed by the combination of the words 'book and audio'. Its logo consists of the "owl" character, which symbolizes the transforming wise personality, artificial intelligence-supported, "blockchain-based" that offers its readers a subscription with alternative payment systems and earns by mining while reading, and that gives "Boodio Coin (BODI) to its publisher and investor". digital book platform.

While making discovering with a sense of curiosity, learning by reading and listening, sharing by writing and interpreting, accessible in all geographies at the most affordable price, it aims to establish a profitable structure with the "crypto economy" of publishers and readers.

Boodio application <https://boodio.app> brings its users together with e-books/audiobooks. Boodio, which provides services over the internet with a monthly subscription fee, aims to offer a special experience to its users with content exclusive to the platform, serialized models and academic content, apart from e-books and audiobooks. While Boodio offers its users an easy-to-use and personalized application experience where they can find all kinds of content, it also aims to be the safe gateway to the digital world for the publishing industry.

With Boodio, which has a modern interface that everyone can easily use, users can also save books according to their reading taste in their libraries, take notes, and share these notes with their loved ones on online platforms.

In addition to being an e-book and audiobook platform, Boodio is positioned as an R&D center in terms of both the future of the publishing industry and technology development, together with its investors with Boodio Blockchain and BODI Coin infrastructure.

Moving all its infrastructure to the 'blockchain' in 2022, Boodio completed its digital wallet studies and created its own unique blockchain infrastructure, which it named Bodi. By signing over 250 unique intellectual book deals, it registered the 'unique books' -NFB- brand in Turkey as its own brand in the sector and produced its digital presence with Bodi Coin.

In 2023, Virgül Digital Publishing aims to become a new center of attraction in the publishing industry with Boodio, Bodi Coin and NFB, and to open the digital asset Bodi Coin supply to digital asset investors through different exchanges, while making preparations for its UK-based company for the global market.

3.7. Epigraf Teknoloji San. Ve Tic. A.Ş.

Epigraf Teknoloji San. ve Tic. A.Ş.

Activity Area	: Omni-channel Growth Platform
Website	: www.hellosmpl.com.tr
Authorized Person:	Ebru Çiçekli
Linked – in	: https://www.linkedin.com/in/ebru-cicekli-29897510a/

Smpl. is an omnichannel growth platform that makes the lives of digital marketers and CRM Managers easier. It helps them develop growth and loyalty program solutions for their businesses.

Smpl simplifies the lives of digital marketers, Growth Hackers and CRM Managers. With website personalization, automated on-site solutions, customer journey mapping, different application scenarios, etc., Smpl contributes to businesses' growth and loyalty program development.

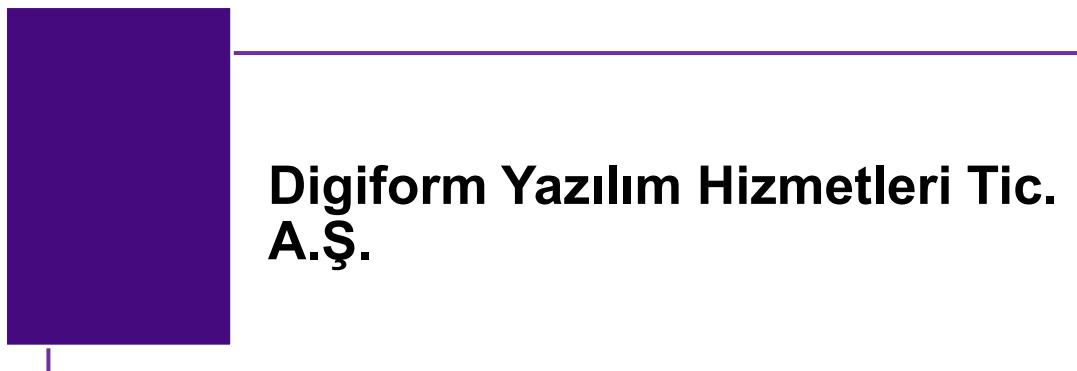

Established in 2013, Epigraf Technology carries out its activities with premium consultancy services to its customers and software developments that increase conversion rates and reduce abandonment rates. It responds to the needs of local companies in different sectors together with companies that are global in their field.

With the Smpl product released in 2018, it started to serve its customers better. In the first half of 2022, the period when the effect of the pandemic decreased, it achieved a 20% growth in turnover compared to the same period of the previous year. Its turnover for the end of 2022 is \$11.904 per month. The fact that the whole country was affected by the earthquake that took place in February 2023 caused the companies to decrease their activities, but Smpl decided to expand the sector it serves to manage the crisis.

With the needs brought by the 4th generation digital world, Smpl aims to grow more than the rates of 2022 until the end of the year, and its monthly turnover target for the end of 2023 is \$50,000. Studies for this; The ability of the Smpl product to serve within the applications, to get external support for app development, to start working for a new Smpl with mailing and smart learning structure, apart from the Smpl app product, to start working to gain global customers by expanding abroad, companies in Dubai, England, Australia and Asian countries and to increase the number of local companies with non-global business partnerships from 23 to 100.

As of December, Smpl has started to make improvements and plans to make the product more useful and more responsive to its customers. It is aimed to make Smpl much stronger at the end of the year so that it can meet all the needs of the digital world.

4.1. Turera Teknolojik Ürünler A.Ş.

Turera Teknolojik Ürünler A.Ş.

Activity Area	:	Passive Network Infrastructure Products
Website	:	www.zemecs.com
Authorised Person	:	Haluk Kiraç
Linked-in	:	https://www.linkedin.com/in/haluk-k%C4%B1ra%C3%A7-7b8063168/

Founded in 2013, the company has developed products and solutions for the needs of institutions in the fields of information and energy infrastructure, banking, military and industrial electronics under its registered brand Zemecs, and it has increased its product portfolio and sales significantly.

Zemecs manufactures complete passive network infrastructure products. Company portfolio includes industry-leading, high speed and density end-to-end structured cabling products, rack cabinets, field cabinets, group sockets, power distribution units, aluminum cable trunking and related accessories which enable the implementation of the data communication and electrical infrastructure needs of small, medium and large corporate networks in a way that provides the best business results.

Today, depending on the number of devices connected to the internet; In addition to the development of new applications, the rapid spread of IP-based technologies (VoIP, wireless, video conferencing, cloud computing, etc.) necessitates institutions to implement network installations with high availability and speed and increased bandwidth. A physical infrastructure that meets all these expectations is only possible with a properly designed, implemented and maintained structured cabling system. Zemecs offers expert solutions in this regard. It will continue to develop products and services in line with the changing IT infrastructure needs in the future as it is today.

In case of suitable conditions occur for TURERA, share sale or strategic partner options are targeted.

4.2. Veriban Elektronik Veri İşleme ve Saklama Hizmetleri A.Ş.

Veriban Elektronik Veri İşleme ve Saklama Hizmetleri A.Ş.

Activity Area : E-Transformation

Website : www.veriban.com.tr

Veriban has been serving as a Private Integrator since the first day of the private integrator system in e-transformation applications with its qualified human resources and technological infrastructure in order to operate only in the field of e-transformation.

Established in 2013, the company offers e-invoice and related solutions to companies in a fast, reliable and effective way with the Special Integrator status granted by the Revenue Administration. The company, which has risen to the top of the market with its high customer satisfaction, also offers the most up-to-date solutions in e-Archive and e-Ledger. Thanks to its solutions that can be integrated seamlessly with almost all ERP and Accounting programs used in the market, it provides great cost advantages to its customers.

Veriban's service quality and management standards, Business Continuity Management Certificate (ISO 22301), Information Security Standard Certificate (ISO / IEC 27001), Information Technology Service Management System Certificate (ISO / IEC 20000) and Disaster Recovery Service Certificate (ISO / IEC 24762) with international standards.

Veriban, the leading and reliable company of the e-Invoice Sector, is preferred by Turkey's leading software companies as a solution partner within the scope of integration services and as the e-invoice private integrator, it integrates e-transformation services through these software used by companies using Turkey's leading software.

4.6. Tektuş Sipariş Sistemleri Gıda San. Ve Tic. A.Ş.

Tektuş Sipariş Sistemleri Gıda San. Ve Tic. A.Ş.

Activity Area	:	Application for Water Order With One Click
Website	:	www.bisu.com.tr
Authorised Person	:	Ergin Üner
Linked-in	:	www.linkedin.com/in/ergin-uner-a118281a

Tektuş Sipariş Sistemleri (Tektuş Ordering Systems) has developed the Bisu application, which allows water to be ordered with a single click and brings the nearest dealer and the consumer together. In 2021, it launched the Bimarket application.

BiSu, which started its journey in September 2015 by serving only in Istanbul, serves more than 1 million households in 60 cities. In addition to more than 50 water brands in 60

cities, it continues on its way with BiRi, which provides fast carboy water and beverage orders until 24:00 every day of the week, and BiMarket, which meets all the needs of a house with more than 7000 kinds of products. BiSU's end-to-end delivery service, BiRi, facilitates the ordering of carboy water, and enables users to meet all their other beverage needs at much more affordable prices than market prices.

Having successfully completed a year with the fast delivery service it started with its own distribution network, BiSu targets 1000 warehouses, 10 thousand employments, deliveries in 8 big cities and a turnover of 500 million dollars by the end of the second year. With its fast delivery service, which achieved 40% growth performance every month compared to the previous month, BiSU quadrupled its Istanbul orders compared to the previous year.

For this, it offers suggestions based on users' past orders, identifies their needs and creates a personalized application experience. In the application, there are also options specially added to the user's needs, such as a reminder to drink water, an appointment order. It offers a personalized customer experience.

Donating to UNICEF on behalf of users for each water order, BISU met the daily water needs of 1 child and gave hope to a total of 22 million children.

BISU aims to increase its sales by 5 times on dollar basis in 2023. Another goal is to reach unicorn valuation. In March 2023, it received new investment at a company valuation of USD 100 million.

In case of suitable conditions occur for Tektuş, it is aimed to sell shares.

4.7. Barty Mobil Internet Servisleri ve Tic. A.Ş.

Activity Area	:	Software & Design
Website	:	www.barty.app
Authorised Person	:	Semih Kılıçgedik
Linked-in	:	https://www.linkedin.com/in/senih-kilicgedik

Developing the interpersonal (C2C) goods exchange platform that enables individuals to exchange their second-hand goods with value and quickly, Barty changed its business model and started to provide mobile and web application development services for businesses and corporates under the BartyDigital brand.

A program has been prepared to establish new venture(s) with the funds generated from here.

Completing 2022 with a turnover of 1.2 million TL, Barty brought the company to a structure that does not cause loss and can generate profit. In 2023, BartyDigital aims to increase the number of its customers in both enterprise and corporate categories and to start the first new venture. There is a turnover target of 5,000,000 TL.

4.8. BirFatura Yazılım Teknolojileri A.Ş.

BirFatura Yazılım Teknolojileri A.Ş.

Activity Area	:	E-Commerce Management
Website	:	www.birfatura.com.tr
Autorised Person	:	İbrahim Bayır

Launched in July 2016, Birfatura is a technology initiative developed for SMEs engaged in e-commerce, providing order and invoice management.

Thanks to its online platform, it provides integration with all online marketplaces and e-commerce platforms operating in Turkey. Thanks to these integrations, BirFatura aims to enable SMEs to manage all their e-commerce.

Since September 2020, it has been providing e-invoice services to its users as an e-invoice integrator licensed by the Revenue Administration under the BirInvoice Integrator.

Approximately 150 thousand orders are invoiced on a daily basis and it provides service from Ankara Bilkent Cyberpark and İncek offices with a team of 25 people. In 2021, it achieved 65% growth in the number of customers.

In the first 6 months of 2022, BirFatura has grown by 55% in its transaction volume compared to the same period of the previous year. In addition, ESMM (E Self-employment Receipt) and EMM (E Producer Receipt) services, which are among the e-transformation services, have also been added to its structure through the special permission it has received from the Revenue Administration.

It added the agreements it made with 2 new cargo companies to its registered brand Kredili Kargo.

BirFatura, which closed the year 2022 with a growth of over 100%, increased the number of its personnel by 80% and acquired a private e-invoice integrator in Ankara and incorporated it into its structure.

BirFatura continues as long as it started to become a global brand in 2022 and has completed the necessary legal procedures. It is preparing to go into operation globally in the first quarter of 2023.

4.9. Meloknows Bilgi Teknolojileri ve Reklam Hizmetleri A.Ş.

Meloknows Bilgi Teknolojileri ve Reklam Hizmetleri A.Ş.

Activity Area	:	Personel Care Digital Solutions
Website	:	www.meloknows.com
Authorised Person	:	Melis Bilgili Baki
Linked-in	:	https://www.linkedin.com/in/melisbilgilibaki

Established with the vision of being the leading company in the beauty and technology sector in Turkey and globally, Meloknows is a digital beauty assistant that enables its users to get what they want from the personal care and beauty services on the platform, wherever and whenever they want, via MeloKnows.com and MELO mobile application. The application is a marketplace platform and mobile application that offers users the opportunity to make online reservations and pay within minutes by examining the professional profiles of hairdressers and beauticians.

At the same time, the company sends the original and trial size products of the cosmetics brands it has agreements with to its users and the professionals registered in the system, making advertisements and promotions of the companies, collecting feedback on the performance of the cosmetic products it has given as gifts, and presenting the data analysis to the companies.

Melo App brings nearly 200 personal care and beauty services to tens of thousands of customers with thousands of Melo professionals in 15 cities in Turkey, mainly in Istanbul and Ankara. It brings beauty services at the location of their customers with just "one click". It is the first initiative that allows users to buy this service at home, office or hotel. It aims to be the first application that comes to mind when "beauty" is mentioned in our country and in the world, and aims to make our country the pioneer of its sector by catching global trends in the field of beauty and technology.

Meloknows Bilgi Teknolojileri ve Reklam Hizmetleri A.Ş., in which Alesta participated by 10% on 17.07.2020, received a new investment from various investors with a company valuation of 5,000,000 TL in August 2021, and our subsidiary Alesta Teknoloji Yatırım A.Ş. had participated in order to maintain its current share. This time, Meloknows received a new investment over a company valuation of TL 10,000,000 and Alesta made a new investment to increase its share to 11.9%.

4.10. Hubbox Endüstriyel Teknoloji Yazılım Danışmanlık San. A.Ş.

Hubbox Endüstriyel Teknoloji Yazılım Danışmanlık San. A.Ş.

Activity Area	Remote Control and Management of Automation Systems
Website	www.hubbox.io
Authorised Person	Mehmet Bilgi
Linked-in	https://www.linkedin.com/in/mehmetbilgi/

Developing technology with domestic and national means for remote access to machines, HUBBOX produces Connect X1 device and interoperable industrial devices and software. Providing easy and direct access to industrial devices anytime, anywhere with WAN, LAN and Wi-Fi ports, HUBBOX provides data communication with high-security SSL certificates and the most up-to-date encryption methods, and uses Google Authenticator infrastructure for two-step security 2FA in system access.

Hubbox, which was established in Yıldız Technical University Technopark in 2018 after a 5-year R&D process, launched its first product, "Hubbox Connect X1", for which it developed both software and hardware for remote access to industrial devices and data collection, and started to be used in more than 50 countries. It received various support from TUBITAK, KOSGEB, ITU Seed, YTU Incubation and TIM – TEB Venture House received various supports.

In the "Top 10 Industry 4.0 Trends and Innovations: 2020 and Beyond" research conducted by Startus Insights among 770 startups and emerging companies, Hubbox was selected as one of the two best companies worldwide, with great success in the IoT (Internet of Everything) category.

The Early Warning System, which detects the earthquake at the time of occurrence with sensors placed at various points and artificial intelligence software and gives warning seconds, sometimes minutes (depending on the distance of the earthquake source) before the tremors reach the settlements, was launched by the EDIS consortium, in which our indirect affiliate Hubbox is 25% included.

With the developed autonomous solution, the elevators can be fixed on the nearest floor before the earthquake shocks reach, electrical devices and natural gas can be turned off against fire and explosion risks, and the doors and barriers at the building exits can be opened and electronic transitions can be made easier to evacuate.

Hubbox (hubbox.io), which develops industrial remote access and data collection devices with its own technology, aims to open up to foreign markets in 2022.

4.11. Nicat Batarya Teknolojileri A.Ş.

Nicat Batarya Teknolojileri A.Ş.

Activity Area

: Battery Cathode Manufacturing

Website

: www.nicat.co

Authorised Person

: Engin Karabudak

Linked-in

: <https://www.linkedin.com/in/engin-karabudak-8343a033>

Nicat produces nickel-based cathodes for secondary batteries and artificial intelligence supported R&D and develops battery materials. It plays a leading role in new generation battery technologies with its domestic and international customers.

A MEMBER of Canadian Battery Metal Association, 2 new investors were added to Nicat in 2022. In 2022, the company exported to its USA-based customer and also commissioned its pilot factory with an annual production capacity of 3 tons. Again in 2022, the company purchased the necessary devices for battery production and established a battery test center. Thus, it has gained the competence to measure the performance of its own production cathode materials.

A scanning electron microscope (SEM) has been commissioned within the company and analyzes can be made on the morphology of the products. In addition to these, the company has started the feasibility studies of the potential factory to be established with public and private sector organizations. Proving its innovative side by receiving the "Seal of Excellence" by the European Union in 2022, Nicat's 2023 targets include exporting to potential customers based in the USA and England.

The company, which will make high-scale productions for its customers with its pilot production factory, will also develop its battery test center. European Union grant programs will be applied during the year and R&D activities will be accelerated with the income to be obtained from this. In addition, it is aimed to complete the studies of derivatives of NMC type cathode materials used in Li-ion batteries, which have higher performance than their commercial competitors. In 2023, the company will apply for various patents in order to protect its intellectual rights. With the new employments to be made during the year, the company staff will be further strengthened and the company will continue its activities without slowing down.

It has received two letters of intent from ZincFive (60 tons of nickel hydroxide per year), the only nickel-zinc company that supplies products to the end-user, and from Aspilsan, Turkey's only cell manufacturer (300 tons of NMC 622 per year), whose factory is under construction.

As we enter 2022, Ni-CAT has received national and international investments. It took its first international investment from the Singapore-based Hatcher+ company and took steps towards becoming a global company. Ni-CAT, which has signed an investor and joint working agreement with the Chicago (USA) based Sente company, has worked on working with Sente for its US operations.

4.12. BREN İleri Teknoloji Enerji Anonim Şirketi

Linked-in	: https://www.linkedin.com/in/cinar-laloglu-851649232/

Bren provides energy, maintenance and time savings to its customers by monitoring critically important mechanical components used in the industry, especially in steam technologies, with artificial intelligence-based, wireless sensors that can produce their own energy, and industrial IoT technology. This innovative technology, which aims to provide

Focusing on the industrial internet of things (IIoT), the company aims to save energy, maintenance and time to the industry. The company, which offers domestic hardware and software solutions, markets its patented products on a global scale with 15 years of R&D know-how. Bren eliminates the battery problem and replacement costs in wireless sensors by converting the temperature difference and vibrations in the areas where there are critical components that must be constantly monitored in the industry to electrical energy. Thanks to artificial intelligence-based industrial IoT and battery-free sensor technology, it provides energy, maintenance and time savings to companies.

With globally increasing energy costs making energy savings more important in all sectors, Bren continues to offer its own smart sensor technology, which produces its own energy, in a much more strategic way for its customers using steam technology. In addition to acquiring global customers, Bren offers its customers high return on investment and short payback period cooperation with its digital monitoring agreement. Bren continues to make significant contributions to both the country's economy and the environment by preventing carbon emissions.

Allowing customers to control steam technology for the first time in the world in a much more effective and systematic way, Bren developed an artificial intelligence-based software algorithm for steam production and consumption tracking instead of traditional steam meters, directly without the need for revision of high pressure and temperature lines, without stopping production. It launched the 'Bren STAR' product based on the hardware technology it can adapt to. In addition to preventing production loss of 18.2 M USD, it has become a company that has managed to control steam production, consumption and losses in an integrated and wireless manner.

In 2022, it has saved more than 5 million USD in energy and has prevented more than 9000 tons of carbon emissions since its establishment. Thanks to the advantageous and business model it provides to corporate and international companies, it significantly increased the number of its customers in 2022. The company, which aims to grow in the American, European and Asian markets and to progress with strategic partnerships, has managed to grow 5 times in 2022. It aims to both meet the increasing need and dominate the market with the new production area it has established in order to increase its monthly production capacity in 2023.

Bren received a new investment from various investors with a valuation of TL 217,653,000 in 2022, and our subsidiary Alesta Teknoloji Yatırım A.Ş. increased its share from 10% to 11% in the investment amount. Increasing its company valuation 43 times in 24 months, Bren aims to accelerate its overseas sales with the investment it has received.

Evimdeki Psikolog (Psychologist at my home), which is a digital platform that provides accessible, easy and cost-effective expert support to those who want to receive psychological counseling, has been bringing together those who want to receive psychological support and professionals in this field through audio, video and messaging methods since 2018.

Evimdekipsikolog.com is a digital platform that provides accessible, easy and cost-effective expert support to anyone who wants to receive psychological counseling while struggling with life's difficulties. He works with many experienced psychologists and psychological counselors who are licensed and trained in various fields.

Evidemki Psikolog, which has reached 200 extensions as of July 2022, has switched to flexible pricing model, foreign currency based income and bulk package sales and double therapy feature have been published.

Being the first mental health venture invested in Turkey with a valuation of 4M TL in September 2020, Evimdeki Psikolog has successfully completed its second investment round in March 2022, with an investment of 5.4M TL with a valuation of 50M TL. As Turkey's largest online therapy platform, it is on its way to becoming a platform that mental health professionals can safely choose.

Reaching 5 million user visits and 47,000 users in 2022, Evimdeki Psikolog conducted 104,000 sessions, 57,200 of these sessions were held in 2022. The session held in 2022 is more than 50% of the number of sessions held in the first 3 years. Achieving a 209% growth rate compared to January 2022 with a total

number of 8,000 sessions in December and 2.5 million GMV, the Psychologist at My Home has completed its plans to reach 1000 sessions in the UK market with "healmeup.com".

Aiming to reach 50 thousand subscribers in the Turkish market with the Community (<https://www.evimdekipikolog.com/community>) feature, Psychologist at Evidemde aims to reach 20 thousand monthly sessions in the Turkish market, to launch a monthly therapy program and to publish the mobile application.

Evimdeki Psikolog aims to complete its third investment round in April 2022.

4.16. BUGAMED Biyoteknoloji Sanayi ve Ticaret A.Ş.

BUGAMED Biyoteknoloji Sanayi ve Ticaret A.Ş.

Activity Area	:	Medical Collagen Production from Organic Wastes
Website	:	www.bugamed.com.tr
Authorised Person	:	Gamze Kara Mağden
Linked-in	:	https://www.linkedin.com/in/gamze-kara-magden

It carries out R&D studies to produce medical collagen from animal wastes with its own patented production method, together with the knowledge brought by its experiences in biotechnology, tissue engineering and materials engineering. It produces raw materials such as atecollagen, fibroin, hyaluronic acid, which are of critical importance used in the pharmaceutical, medical device and cosmetic industries.

With the seed investment it received in 2020, it established an accredited facility within the scope of EN ISO 13485 Quality Management System and EN ISO 22716: 2013 Cosmetics - Good Manufacturing Practices (GMP), and took its place among the 10 companies producing medical quality collagen in the world.

As a result of the acceleration of its sales, distribution and marketing activities in 2022, the company increased its product and market diversity and completed the year with an income amount of approximately 1.4 million TL. The enterprise aims to increase the annual sales amount approximately 5 times and to complete the year 2023 with a turnover of at least 5 M TL by multiplying the joint product development strategy, which it developed especially with corporate companies, with businesses operating in different fields. The success of the business in achieving the goals it wanted to achieve in the past years with the policies it has implemented will enable the 2023 goals to be realized in a similar way.

In addition, as of 2024, it has been developing strategies to increase its turnover in the domestic market at least twice as much as the previous year, and to become an enterprise capable of exporting by opening up to the foreign market.

BUGAMED Biotechnology aims to increase the diversity of domestic products by converting organic wastes into high-tech products by evaluating them as zero waste, to produce high value-added biomaterials in our country using tissue engineering methods, to eliminate the shortage of biotechnological raw materials, which is also an important problem in the sector, and to eliminate dependence on imported biotechnological products.

4.17. Polynom Teknoloji Bilgisayar Yazılım Danışmanlık A.Ş.

Activity Area	:	Management Of Bank Accounts From A Single Screen
Website	:	www.finekra.com
Authorised Person	:	Erhan Zengin
Linked-in	:	https://www.linkedin.com/in/erhan-zengin-1a578b54

It offers solutions to the B2B needs of companies, such as taking account movements and balances from banks and displaying them in the application, and accordingly performing bulk payment transactions, managing the check integration process, direct debiting system and dealer transactions.

The application, formerly called Paratic, continues on its way as Finekra with its renewed name and colors. Finekra is a new generation banking application that integrates with banks and your accounting program, automates your processes, and can be accessed via web and mobile.

Finekra is also able to manage many solutions such as bank account movements, payment, collection, current accounts, reporting on a single platform; 95% capture of who owns the money transfer, accounting transfer, payment, automatic reporting, a different login structure from the banking structure. Instant management user-based authorization solutions are also offered.

4.18. Servislet Yazılım A.Ş.

Servislet Yazılım A.Ş.

Activity Area	: Marketplace in the field of after-sales service in the automotive industry
Website	: www.servislet.com
Authorised Person	: Gökmen Bolayır
Linked-in	: https://www.linkedin.com/in/gokmenbolayir

Offering a marketplace in the field of after-sales services in the automotive industry, Servislet provides convenience to vehicle owners with the appointment module integrated into Servislet.com, while facilitating the appointment and sales processes of service points.

As of the end of 2022, Servislet has grown by 220% compared to 2021. If this trend continues, it plans to grow 4 times by the end of 2023 on the marketplace side. Online vehicle maintenance sales will start as of March 2023 with the Euromaster, Autoking and Speedy brands; All pricing, related panels and contracts have been completed.

Servislet, which received project approval for the completion of online sales processes and dealer digitalization processes through the Turkish corporate website with the Continental brand, undertakes the technological infrastructure of one of the three countries globally for Continental. Their goal is to be a technology supplier for more than one country in the Continental global, as they have done with the Michelin brand.

In addition, Servislet Dali introduced its new name Servislet Pro SAAS products to the market. Servislet Pro is a tire dealer operating system that includes tire CRM and e-commerce modules, which represents a first in the tire industry in the world. Having signed its first agreement with Michelin Turkey, Servislet continues its negotiations with Michelin Global and other tire brands on different countries. As a Services Pro customer, Continental is expected to integrate into the agreement with 300 dealers.

The popularity and reach of the 'Tirelet' brand in the Greek market is increasing day by day. With the agreement with the Michelin Group, commission rates were reduced, an annual SAAS-based working model was adopted, and the annual operating and maintenance fee was included in the income. In addition, any additional improvements made are billed additionally. Based on this model, it transforms global expansion into a technology-only licensing model without an operation.

In the last quarter of 2022, Servislet introduced Karmen, products with our artificial intelligence-based image processing technology. While continuing its existing insurance partnerships, it also gained new customers on the shared vehicle economy side. With a very rapid acceleration especially in the car rental and shared vehicle sectors, their target is to reach a sales volume of 1 Million USD by the end of the year with Karmen.

Linked in	https://www.linkedin.com/in/abdulkadiroduncu https://www.linkedin.com/in/veyselozkapici/ https://www.linkedin.com/in/alperen-acemo%C4%9Flu-3656a5169/

It carries out the R&D, production and marketing of the innovative medical device developed by itself for use in the treatment of glaucoma.

Designed to reduce neuroinflammation, GlaucoT, one of the first smart wearable medical devices developed in the world for neuroprotective glaucoma treatment device, provides gamma rhythm stimulation by applying flickering light to the eye in a certain frequency range, without requiring any medication or surgical operation, and aims to improve the quality of life of people suffering from the related disorder.

Working on safe, effective and affordable eye care solutions by associating technological and scientific research with the needs of patients, GlaucoT has filed a patent application for wearable and portable glasses developed with its own technology to simply measure the intraocular pressure, which can be measured with expensive devices in hospitals, in the home environment.

GlaucoT, which has been selected as one of the most distinguished health technology initiatives in Europe by the European Institute of Innovation and Technology (EIT), is currently working on clinical studies of the wearable medical device it has developed for use in the treatment of glaucoma, with the approval of the Turkish Medicines and Medical Devices Agency. His clinical studies continue at the Faculty of Medicine and Ege University Faculty of Medicine.

Related studies aim at facilitating GlaucoT to improve the lives of glaucoma patients by enabling CE certification and commercialization.

There are 80 million glaucoma patients in the world, and the target group of GlaucoT covers 90% of glaucoma patients. The industry, which has a market volume of 7 million dollars, is expected to increase its volume up to 10.2 billion dollars in 2027. North America and Europe constitute the largest part of the market. Therefore, GlaucoT's market target is prioritized in these regions.

Pax Animi operates in the field of mobile/web-based game design, development and marketing and develops games for mobile platforms.

Pax Animi Games, a game studio that develops games for mobile and computer, aims to be a global value in its sector. R&D studies to increase game production quality and capacity plans to form the keystones of the company by accelerating

Pax Animi, which increased its capital in 2021, aims to grow by recruiting new teammates who have adopted the company culture and have high vision and knowledge.

Pax Animi, which accelerated its R&D activities in order to increase the quality and capacity of game production, doubled its production capacity as of the end of 2022 and managed to double its monthly turnover. By completing a total of 45 game prototypes for the year, it has come a long way by increasing its potential to make hit games. Pax Animi, which continues its work by increasing our visual and technical infrastructure quality as well as obtaining new know-how from every game produced, continues to grow by further developing its relations with its existing publishers in this year, when the publisher agreements of many game studios, where the game industry fluctuated, were terminated.

In 2023, it aims to increase the know-how and value of the company by adding to the knowledge gained as a company in previous years and by employing new experienced personnel to the team, and to produce hit games in parallel with the increase in production capacity, technical infrastructure quality and know-how.

4.34. Den İnşaat Gayrimenkul Teknoloji ve Enerji A.Ş.

Den İnşaat Gayrimenkul Teknoloji ve Enerji A.Ş.

Activity Area : Library Service Consisting of Digital Twins of Building Sector Materials

Web : www.bimmade.com.tr

Authorised Person : Serdar Birden

Linked-in : <https://www.linkedin.com/in/serdarbirden>

BIMMADE is Turkey's first digital product/BIM (Building Information Modeling) library.

BIMMade offers Smart Products for Easy Design. It provides industry professionals with digital product information and design alternatives to keep them productive, while providing manufacturers the opportunity to understand and analyze industry needs.

It creates BIM smart objects, which are the 3D digital twins of the products produced for the construction industry, at world standards, hosts them on the cloud platform, provides free and unlimited access for architects and engineers to use in their projects, enables manufacturers to be preferred during the project phase, while providing them with a special control panel for downloading data and market data. provides analysis.

By the end of 2022, BIMMade plans to continue making our platform available to construction industry manufacturers, with more intense contact with the sales and digital marketing team we have created, and has updated the current platform's name as BIMMade Library.

Starting to work with the leading manufacturers of Turkey and the world, BIMMade has implemented the Add-on software for the BIMMadde Library, which will enable it to be included in the most common design software and enable end users to access the library directly from the program they design. It has implemented a B2B application, which they call BIMMade Reality, targeting decoration and furniture manufacturers, allowing end users to see the products of the manufacturers in their homes with Augmented Reality technology.

Aiming to increase its business development activities in 2023, BIMMade has started preparations for an integrated solution with BIM in the topics of Environment and Energy, one of the most important agendas of our age. They are planning to develop a new product that can also use the BIM library data that they have created and continues in buildings, and that will offer the opportunity to perform an integrated "Environmental Impact and Energy Analysis" with the BIM-based LCA (Life Cycle Assessment) method. It aims to apply for the TÜBİTAK 1507 R&D Start support program call to be opened in 2023.

4.35. Fon Radar Bilişim Teknolojileri San. Ve Tic. A.Ş.

Fon Radar Bilişim Teknolojileri San. ve Tic. A.Ş.

Activity Area	:	Online Marketplace Platform Bringing Businesses and Financial Institutions together
Web	:	www.fonradar.com.tr
Authorised People	:	Okan Ünlüçerçi, Elif Özdemir Ünlüçerçi

<https://linkedin.com/in/okan-ünlüçerçi-a7768741>

Linked-in : <https://linkedin.com/in/elif-ozdemir-ünlüçerçi-b597a31>

Fonradar (www.fonradar.com), an online marketplace platform that brings businesses and institutions, aims to help businesses discount their forward receivables and access capital. Fon Radar offers products for discounting forward receivables to help businesses manage cash flow.

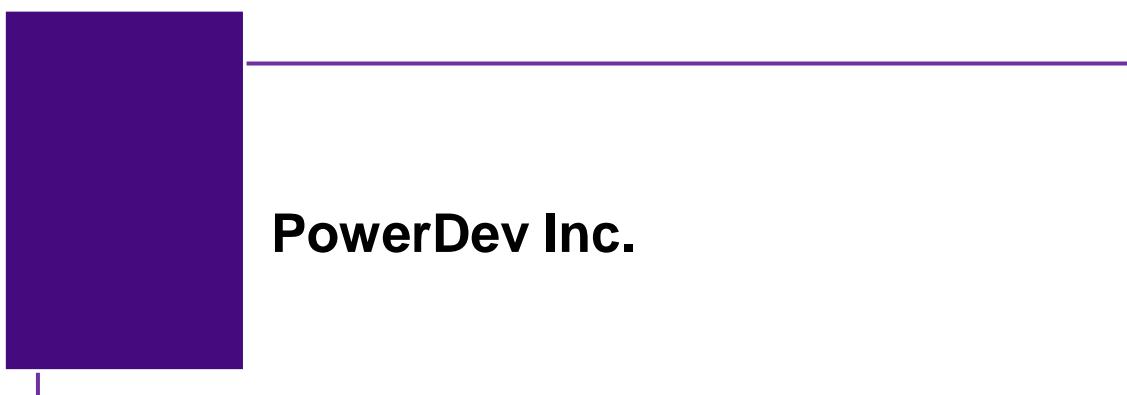

Fon Radar has completed 2022 with two important collaborations. In the 2nd quarter of 2022, DenizBank was accepted to Neohub, the acceleration program, and started to develop its supplier financing product within the program. For this product, it has been decided to establish a new company in partnership with Deniz Financial Services Group and Fund Radar, a letter of intent has been signed on the subject, and company contracts are in progress. The Supplier Financing product will be moved to the UAE region after Turkey.

Another product that Fon Radar worked on in 2022 was Single Invoice Cover.

Trade Receivables Insurance is a traditional product and protects a company's entire portfolio of receivables against the risk of non-payment. Since the insurance premium is calculated as a percentage of the total amount of this portfolio, it is difficult for small businesses to cover the cost. With Single Invoice Cover, which was developed as a new product in Turkey within the framework of cooperation with Allianz Trade, SMEs will be able to protect an invoice of their choice against the risk of non-payment and have these low-risk receivables discounted at the best interest rates. Fund Radar started its development by signing a Confidentiality Agreement with Allianz Trade in December 2022.

4.36. PowerDev Inc.

PowerDev Inc.

Activity Area	:	Energy Market SaaS Data Analysis Platform
Web	:	www.power.dev
Authorised Person	:	Mustafa Koroğlu
Linked-in	:	https://www.linkedin.com/in/mustafa23/

PowerDev combines the energy market big data it collects from multiple sources and presents it to users through its SaaS data analysis tool. PowerDev is a technology initiative focused on machine learning-based Battery Modeling and trillions of lines of historical and real-time Energy Big Data into decision-making processes.

Headquartered in Delaware, USA, PowerDev's team reports to the company in Istanbul, Turkey. PowerDev, with the support of the investment it received at the beginning of 2022, has achieved a significant part of its 2022 goals. PowerDev, which was established to provide insight and forecasting tools in the fields of energy project development, battery investment and energy trading, by providing real-time data flow from over one hundred thousand energy points, It targets producer and consumer companies and energy trading companies that want to use batteries for profit maximization and cost reduction.

All the modules targeted in the product development roadmap, except the Pro-trader module, were completed and prepared for the market, and the first version of the Hydrogen modeling module was developed. Project Siting, Battery Siting, Battery Dispatch Optimum Modeling, Hydrogen Electrolyzer Modeling modules have started to be offered to customers as SaaS.

It continues to work with accelerators such as PowerDev, Creative Destruction Lab, Energy Stream, Garanti BBVA Business.

For a more sustainable environment; PowerDev, which works on energy efficiency improvements, sustainable resource use and reducing negative environmental effects, is one of the initiatives in the field of "Clean Energy (Cleantech)".

In the second half of 2022, PowerDev aims to improve its organizational processes, introduce its products to customers, complete the product modules on the roadmap, and be ready financially, accountingly and legally before the big investment tour it will launch in 2023."

PowerDev aims to finalize the investment tour it started in North America in 2023, complete the development of the product modules in its roadmap, open an office in North America and recruit a talented sales and technical team.

PowerDev completed the design of CRM processes, creation of contact lists and automation processes in 2022. It aims to develop and perfect its after-sales processes in 2023. While advancing the sales process with more than a hundred customers, it turned 2 of them into paying customers. In 2023, it aims at least 30 paying customers with the help of the resources it will receive in the investment tour.

PowerDev plans to attend the following events in 2023:

- The Energy Expo, Ağustos 22-24, Miami, FL
- Utility Scale Solar & Wind North America 2023, Haziran Dallas, TX
- Clean Power 2023, Mayıs 22-25, New Orleans, LA
- Energy Storage Summit USA, Mart 21- 22, 2023, Austin, TX
- RE + Solar & Storage, Eylül 11-14, Las Vegas, NV
- Solar & Storage Finance USA, Kasım 7-8, 2023, New York, NY

4.37. Datanchor, Inc.

Datanchor, Inc.

Activity Area : Data Security

Web : www.anchormydata.com

Authroised Person : Emre Köksal

Linked-in : <https://www.linkedin.com/in/c-emre-koksal-316167a7/>

It is a data security company founded in the USA by Turkish Professor Emre Köksal, who was awarded the "Columbus Inventor of the Year" award in 2019.

Datanchor, Inc, ([https://anchormydata.com](http://anchormydata.com)) provides the opportunity to monitor all activities on the files by preventing the unauthorized circulation and access of the files belonging to the organizations with its patented technology.

While data security is generally provided by network security, the field of cyber attacks is all networks and harms the entire organization. Therefore, data security must also be ensured separately. At this point, Datanchor makes data security compatible and affordable.

Continuing to work with its patented technology, Datanchor realized its first product in 2020 and its first customer trials and sales in 2021. Datanchor; Platforms such as Dropbox, Egnyte, Onedrive; Applications such as Autocad, Adobe Acrobat, MS Office and Windows 10-11, Server, IOS and Android operating systems are working.

The target market size of the company is 167.5 billion dollars. Customer needs of target markets are compliance, cloud-powered security, and ransomware/doxware.

The company's services such as access control, data revocation, management and ease of implementation and direct support in the fields of production, construction and engineering give it a sustainable competitive advantage. None of the three direct competitor companies has an open API and does not offer a see-try-get service.

While it has a total of eight new distributors, key customers it has acquired include Microvast, CMI Group, AIT and Natica.

Datanchor aims to generate \$1M annual revenue.

4.38. Wears Yazılım Danışmanlık İthalat İhracat San ve Tic A.Ş.

Wears Yazılım Danışmanlık İth. İhr. San ve Tic. A.Ş.

Platform where users can try fashion products on them virtually

Activity Area

Web : www.wears.com.tr

Authorised Person : Yasin Metin Pınar

Linked-in : <https://www.linkedin.com/in/yasinmetinpinar>

Founded in 2022, Wear's is a technology company that enables users to try fashion products on themselves virtually instantly with the technologies it has developed, and offers various technologies to companies in the fashion sector.

Wear's, on its way with the slogan of "You Are the Model of Products", provides users with purchasing service through the Wear's platform after creating their avatars and seeing the products on themselves.

The technology company, which offers solutions to reduce the return rates of the brands it works with, while contributing to the nature and reducing the carbon footprint of the fashion industry, aims to be the leader in the field of virtual product experience in Turkey and Europe. During the year, partnerships were established with Big Commerce and various major agencies, and degrees were received in various competitions.

In 2022, while continuing to develop the virtual product experience technology, which is the main product of Wear's, it has developed body suggestion technologies as a side product. With these products, it has signed an agreement with Özdilek, its first customer, and continues to negotiate with companies whose agreements are about to expire.

Wear's will launch a new product, the Switch Model, in 2023. With the Switch Model product, fashion brands, manufacturers and retailers will take photo shoots on professional mannequins, and a professional photograph will be printed on the Switch Model panel in minutes with approximately 70 professional ready-made mannequins. In this way, it is aimed to minimize as much as possible the part that fashion brands allocate to shootings, both material and temporal.

In addition, Wear's aims to close its investment round in 2023.

4.39. Sweeypy OÜ

Sweeypy OÜ

7. Committees

COMMITTEES

Audit Committee and Working Principles

Our company's Audit Committee members are Adem Özay and Çağrı Çelik, who are also independent members of the Board of Directors. Adem Özay is the Chairman of the Audit Committee.

Audit Committee Regulation

Aim

Supervision and audit by the Board of Directors within the framework of the regulations, provisions and principles contained in the Capital Markets Legislation and the Corporate Governance Principles of the Capital Markets Board.

It has been prepared to explain the formation and working structure of the Audit Committee, which it will elect from among its members to assist it in the performance of its activities.

Authority and Scope

The audit committee is formed and authorized by the Board of Directors. The Committee acts under its own authority and responsibility, makes recommendations to the Board of Directors and, when necessary, prepares a report and presents its opinion to the Board of Directors. However, the final decision responsibility always belongs to the Board of Directors.

Organisation

The audit committee consists of at least 2 members. In case the committee consists of two members, both of them are independent board members; If there are more than two members, the majority of the members

are composed of the members of the board of directors who do not directly assume an executive function, such as the general manager or the executive board member.

Audit committee meets at least 4 times a year, at least once every three months. The audit committee puts all its work in writing and keeps a record. It submits reports containing information about its work and meeting results to the Board of Directors.

Duties and Responsibilities

Financial Statements and Public Disclosure

- Examines the compliance of the periodic financial statements and footnotes to be disclosed to the public with current legislation and international accounting standards.
- Together with the independent audit firm, it examines the accounting policies, international accounting standards that will significantly affect the financial statements, and the legislative changes that will significantly affect the activities of the company.
- The audit committee reviews the annual report to be disclosed to the public and checks whether the information contained therein is correct and consistent with the information held by the committee.

Corporate Governance Committee and Working Principles

The chairman of the committee is Çağrı Çelik, Independent Board Member.

The working principles of the Corporate Governance Committee are as follows:

Corporate Governance Committee Regulation

Aim

Within the framework of the regulations, provisions and principles contained in the Capital Markets Legislation and the Corporate Governance Principles of the Capital Markets Board, the Corporate Governance Committee to be elected by the Board of Directors from among its members and relevant departments in order to monitor the compliance of the Company with the corporate governance principles and to make improvements in this regard when necessary. It has been prepared to explain the composition and working structure of the Management Committee.

Authority and Scope

Corporate governance committee:

- To develop and implement the Corporate Governance Principles within the Company,
- Making recommendations to the board of directors to improve corporate governance practices,
- Overseeing the work of the Investor Relations unit,
- The number and election of the Members of the Board of Directors, taking into account the Corporate Governance Principles; To make suggestions regarding the functioning and effectiveness of the Board of Directors and its affiliated committees,

- To set the agenda for the Board of Directors on foreseeing the risks that may affect the activities of the company in the areas where the company operates and taking measures to eliminate and/or reduce the possible negative effects of these risks,
- To determine the remuneration principles and criteria for the members of the Board of Directors and senior executives, taking into account the long-term goals of the company, to create a human resources and remuneration policy to cover all the employees of the Company, and to follow the implementation of these principles,
- To submit suggestions to the Board of Directors regarding the remuneration to be given to the Members of the Board of Directors and senior executives within the framework of the remuneration policy,
- It is formed and authorized by the Board of Directors in order to make the annual corporate governance evaluation and submit the Corporate Governance Principles Compliance Statement to the Board of Directors for approval. The Committee acts under its own authority and responsibility, makes recommendations to the Board of Directors and, when necessary, prepares a report and presents its opinion to the Board of Directors. However, the final decision responsibility always belongs to the Board of Directors.

Organisation

The duties, working principles and the members of the Committee are determined by the Board of Directors and disclosed to the public. The committee responsible for Corporate Governance consists of at least 2 members. The chairman of the committee is elected among the independent members of the board of directors. The Chief Executive Officer and the General Manager are not included in the committee. If the committee consists of two members, both of them, and if it has more than two members, the majority of its members are the members of the Board of Directors who do not directly assume an executive function. Corporate Governance Committee; It convenes as required by the CMB principles and as often as its work requires, upon the invitation of the Committee Chairman. The Company's risk management systems are reviewed at least once a year at committee meetings. The Committee submits the necessary information about its work and the reports containing the meeting results to the Board of Directors. Although the committee is not on the committee, it may invite any manager it deems necessary within the framework of its work to its meetings and take their opinions.

Duties and Responsibilities

Compliance with Corporate Governance Principles

- The Committee ensures that the importance and benefits of Corporate Governance Principles are established and adopted within the company. Evaluates whether an efficient and effective "corporate management culture" is established in the company. The Committee makes recommendations to the Board of Directors on the healthy functioning of the infrastructure for management practices aimed at increasing the company's performance, their understanding and adoption by the employees and their support by the management.
- The Committee performs other activities that can be considered within the scope of corporate governance requested by the Board of Directors.
- Within the scope of corporate governance principles, it identifies issues that will benefit the Company and shareholders and that have not been implemented yet, and submits proposals to the Board of Directors for the implementation of the aforementioned issues.

- The Committee evaluates and determines whether the Corporate Governance Principles are applied, if not, the reason, and the conflicts of interest that arise due to not fully complying with these principles. It makes recommendations to the Board of Directors to improve practices.

Administrative Control

The Committee receives the opinions of the management and related parties on the plans to identify areas that may pose managerial risks and to remedy the deficiencies.

The committee examines the important complaints received by the partnership regarding the management, ensures that they are resolved and ensures that the notifications of the employees on these issues are conveyed to the management within the framework of confidentiality.

Public Disclosures

- The Committee reviews the activity report and web page to be disclosed to the public, and reviews whether the information contained therein is correct and consistent.
- The Committee develops recommendations to ensure that public disclosures are made in accordance with the Company's disclosure policy within the framework of the Capital Markets Legislation.

Compliance With Internal Regulations

- The Committee ensures that internal regulations are in writing and available to all employees.
- The Committee evaluates whether the internal regulations and acceptable behavior patterns (Ethical Rules) are conveyed to the employees by the Company Management through an appropriate communication method.
- The Committee evaluates the work done by the Company's management in monitoring compliance with internal regulations.
- The Committee oversees compliance with internal regulations that prevent conflicts of interest between members of the board of directors, managers and other employees and the misuse of trade secret information.

Determination of Candidates to be Elected to the Board of Directors

- The Committee works on establishing a transparent system for identifying suitable candidates for the Board of Directors and Senior Management, and developing policies and strategies in this regard.

Investor Relations

The Investor Relations Unit was established to monitor all relations between partners and investors and to ensure that their right to information requirements are fully met.

- Investor Relations Unit;

- a. Fulfils the information requests of shareholders and investors within the framework of legislation, articles of association, corporate governance principles and disclosure policy;
- b. Legislation, articles of association, corporate governance principles and disclosure policy organizes periodic investor information meetings in the country and abroad or participates in the meetings held.
- c. It does the necessary work to make the website an active communication platform for domestic and foreign investors,
- d. Summarizes and monitors the realization of the process of public disclosure in accordance with the legislation,
- e. Ensures that the records of the shareholders are kept in a healthy, secure and up-to-date manner,
- f. Ensures that the annual reports are prepared in accordance with the legislation and CMB Corporate Governance Principles,
- g. Follows the duly held of the General Assembly meetings,
- h. Prepares the documents to be presented to the shareholders at the General Assembly meetings,
- i. It does the necessary work in order to keep the meeting minutes duly.

Risk Management

- The Corporate Governance Committee not only monitors the management of operational and financial risks by the relevant departments within the Company, but also conducts studies on other possible risks and directs the relevant Department Managers and Internal Control activities. It gives warnings when necessary in order to define, measure, analyze, monitor and report the risks faced by the company, and to reduce the risks that are controllable and uncontrollable.
- Based on the risk management strategies, the Committee determines the risk management policy and implementation procedures in line with the opinions of the Board of Directors, ensures its implementation and compliance.
- By participating in the design, selection, implementation and pre-approval of risk measurement models, which are a fundamental tool in the risk management process, it regularly reviews the models, performs scenario analyzes and makes necessary changes.
- Requests information, opinions and reports from the relevant units when deemed necessary in order to ensure the effective performance of the risk monitoring function.
- It reviews the risks disclosed in the company's financial statements and annual activity reports prepared in accordance with the financial reporting standards accepted by the Capital Markets Board.

Other Responsibilities

- The Committee follows the developments in the literature on corporate governance and investigates their impact on the Company's management.
- The Committee performs other activities that can be considered within the scope of corporate governance requested by the Board of Directors.

- If deemed necessary, the Committee may initiate special investigations and appoint experts as consultants to assist it in these investigations.
- The Committee develops recommendations on the number of board members and managers.

8. Corporate Governance

Principles Compliance Report

8.1. Statement of Compliance with Corporate Governance Principles

Our company complies with and implements the Corporate Governance Principles published by the Capital Markets Board in the operating period of Q1-2023. These principles have been adopted by the Company's management as a principle. Some of the principles have been implemented immediately, and work continues to address the deficiencies.

PART I SHAREHOLDERS

8.2. Shareholder Relations Unit

An Investor Relations Unit has been established in our company to conduct relations with shareholders. As of 26.07.2019, Ayşe Güldoğan has been appointed as the Investor Relations Manager.

Name & Surname	E -mail address	Telephone No
Ayşe Güldoğan	ayse.guldogan@escort.com.tr	+90-212-340 60 00

During the period, the Investor Relations Unit carried out information activities aimed at shareholders and brokerage house analysts, and answered questions asked by telephone or e-mail for this purpose. Information on all applications made to the relevant unit is given.

8.3. Use of Shareholders' Right to Obtain Information

During the period, the shareholders did not request information in writing, but requested information by telephone. All of the posed questions have been answered. In our company, no discrimination is made between the shareholders in the exercise of the shareholders' right to obtain information.

In the articles of association, the request for the appointment of a special auditor is not regulated separately as an individual right. In order to ensure the right of the shareholders to receive information, it has been adopted as a principle for the minority shareholders to convey the issues they suspect and want to be examined to the Audit Committee and to examine the issue through this channel as a principle, and it has been decided to amend the working principles of the Audit Committee in this direction. There was no request for the appointment of a special auditor during the activity period.

8.4. General Assembly Information

Ordinary general assembly meeting for 2020 was held at the company headquarters on 20.05.2021. Article 6 of the Company's Articles of Association was amended and the amendment text regarding the authorization of the Board of Directors to increase the issued capital by issuing new shares, to limit the rights to purchase new shares and to take decisions restricting the rights of the privileged shareholders was discussed and approved by the General Assembly.

8.5. Voting Rights and Minority Rights

Generally, there is no privilege to vote. However, the conditions for election of the Board of Directors are as follows.

Business and management of the company, 3 (three) members to be elected by the General Assembly according to the relevant articles of the Turkish Commercial Code from among the Group A privileged shareholders or the candidates nominated by them, and 2 (two) independent members to be elected within the scope of the Capital Markets Board regulations, a total of 5 (five) members. consists of members.

8.6. Dividend Policy and Dividend Distribution Time

According to article 24 of the company's articles of association, which regulates the "Detection and Distribution of Profit"; "After deducting the amounts required to be paid and set aside by the Company in accordance with the general accounting principles such as the company's general expenses and miscellaneous depreciation fees, and the provisions set aside for the compulsory taxes and financial liabilities to be paid by the Company's legal entity, from the revenues determined at the end of the accounting year, the net amount shown in the annual balance sheet. The remaining amount after deducting the previous year's losses, if any, from the profit is distributed in the following order and principles:

1. General legal reserve: 5% of the annual profit is set aside as general legal reserve until it reaches 20% of the paid-in capital in accordance with Article 519 of the Turkish Commercial Code.
2. From the remainder, the first dividend is set aside at the rate and amount determined by the Capital Markets Board, over the amount to be found by adding the donation amount made during the year, if any.
3. After deducting the amounts specified in paragraphs 1 and 2 from the net profit, the General Assembly is authorized to distribute partially or completely as the second dividend or allocate it as extraordinary reserve.

Even after reaching the general legal reserve limit; One tenth of the amount found after deducting the dividend at the rate of 5% of the paid-in capital from the portion that has been decided to be distributed to the shareholders and other persons participating in the profit is set aside as the second legal reserve in accordance with subparagraph c, paragraph 2 of Article 519 of the TCC.

Unless the reserves required to be set aside by law are set aside, unless the first dividend determined for the shareholders in the articles of association is distributed in cash and/or in the form of shares; to allocate other reserves, to transfer profits to the next year and to privileged shareholders in dividend distribution, to participation, founder and common stockholders, members of the board of directors, civil servants, employees and workers, foundations established for various purposes and such persons and/or institutions distribution cannot be determined.

Dividends related to the shares are distributed to all existing shares as of the end of the accounting period, regardless of their issue and acquisition dates, without applying the per diem basis.

The distribution method and time of the profit that is decided to be distributed is decided by the general assembly upon the proposal of the board of directors on this matter.

8.7. Transfer of Shares

Our company's articles of association do not contain provisions restricting the transfer of shares.

PART II – PUBLIC DISCLOSURE AND TRANSPARENCY

Every year, managers prepare a strategic business plan and present it to the board of directors. Prepared strategic business plan, expense and income budgets are evaluated by the Executive Board, which meets regularly every month.

8.20. Risk Management and Internal Control Mechanism

Risk management has an important place in the continuous activities of our company. The basic starting point of risk management is to define and monitor all risks that our company is facing or likely to encounter. Our managers have aimed to make the risk management remedial and development practices applicable throughout the company.

The current and potential risks of our company are basically classified as follows:

1- Risk of Receivables: In order to keep the risk of the customers sold under control, the risk is determined according to the financial structure and guarantees of each company. Transactions are made in line with the determined limits.

2- Technological Risk: The biggest feature of the information sector is that technological developments and price changes are experienced very frequently. With a good stock control, this risk is avoided.

3- Currency Risk: Most of the products used in the sector are imported from abroad. When purchasing products, they are debited in foreign currency and payments are made according to these currencies. Companies that do not make their sales policies based on the product entry currency are faced with the risk of loss in exchange rate increases.

4- Changes in import regimes: Changes made by governments in import regimes from time to time affect imports positively as well as negatively.

A Risk Management and Internal Control commission has been established within the company for the risks listed above, as well as for the controls of all assets and liabilities of the company. Regular reports are made to the Chairman of the Board of Directors.

8.21. Powers and Responsibilities of the Members of the Board of Directors and Managers
