## Message from the Chairman

Dear Esteemed Stakeholders,

2023 has been a year, in which economic fluctuations and geopolitical risks were the important agenda items. The increase in costs and unemployment in almost every sector around the world negatively affected the global growth, and many central banks, including those in developed countries, tightened their monetary policies. In this period that was influential on a global scale, the practices put into effect in the economic management of our country were effective. Within the scope of the Medium Term Program, Türkiye recorded 4.5% growth in 2023.

The year 2023, which was spent struggling with economic difficulties and high inflation, started with indescribable difficult days that affected our country and especially the construction sector. The earthquake disaster that occurred on February 6, 2023 impacting 11 provinces deeply affected us as a country. As the VakifBank family, we have been working with all our strength to support the process to heal the wounds from the first day. We have determined the support we can provide to the reconstruction of the earthquake zone, together with the important actors of our sector, as the first agenda item of our agenda. In this period, which underlines that the safest address for our family should be our living spaces, homes and workplaces, our most important topic in the real estate sector has been to accelerate construction activities and provide financing resources in order to meet the needs accordingly.

At the end of 2023, our Company's asset size increased to TL 14.9 billion. In the same period, it achieved a profit for the period of TL 1.4 billion.

Vakif REIT, which continues to grow in line with its vision of becoming a reference organization that directs change in the sector with its symbolic structures, has reached the completion stage of its ongoing projects. We delivered the VakifBank Towers, which are shown as one of the symbolic buildings in the Istanbul Finance Center, to our bank. In 2023, the construction process of our Cubes Ankara and Tablo Adalar projects was completed and people started to settle within the scope of these projects.

**We left behind a successful year, during which we have been given many awards.**

In 2023, we took important steps towards becoming a company, in which our shareholders, investors, customers and employees, that is, all our stakeholders, will be happy and satisfied. Our success rate in our vision and mission indicators has gone even higher. We increased our Customer Satisfaction rate to 85.9%. We achieved to be the company that increased its corporate rating the most among those in the BIST Corporate Governance Index.

With the aim of keeping our environmental footprint at a minimum level in order to leave a more livable world to future generations, we carry out studies that take care of the protection of our natural resources at every point of our projects, from the design stage to the delivery stage, ensuring energy and resource efficiency at international standards, and taking our environmental impacts into account. We are moving forward at an accelerating speed towards the goals we have set in line with our 5-year strategic plan compatible with the United Nations Development Goals. We create applications and develop systems that will be taken as reference.

We make a difference in our industry with our financial success, digital transformation investments and the point we have reached in our corporate development journey. At the 32<sup>nd</sup> Quality Congress organized by the Turkish Quality Association (KalDer) in 2023, we were awarded the Turkey Excellence Grand Prize for our Integrated Management Model, which we established within the scope of the EFQM Model recommended to organizations as a management model by the European Quality Management Foundation. We continue making efforts with the desire to make these achievements sustainable in 2023.

We will continue to add value to our country, as we have done so far, to carry out projects in line with an approach that always considers the welfare of the world we live in, and the welfare of our next generations, and to produce permanent value for all our stakeholders, who are always with us, based on the principle of sustainable growth. On behalf of our Board of Directors and myself, I would like to thank all our stakeholders, especially our main shareholder Türkiye Vakıflar Bankası T.A.O., who believe in and support a better future with the values we produce.

Yours respectfully,

**Mikail HIDIR**  
Chairman

## Message from the General Manager

Esteemed Stakeholders,

Vakif Real Estate Investment Trust, established by VakifBank as Türkiye's first real estate investment trust company to provide solutions to the financing needs of the real estate sector, continues to develop its portfolio and improve its service quality with the vision of becoming a reference REIT that guides changes in its sector for its customers, shareholders, investors, business partners and employees.

We have left behind another year, in which we increased the level of trust and satisfaction that you, our valued stakeholders, have in our company. In this journey illuminated by the deep-rooted knowledge and experience coming from VakifBank's culture, our business model, based on trust, fair and transparent values, has guided us in the management of our activities. We present to you, our valued stakeholders, our annual report for 2023, in which our company achieved successful financial results and received awards with its corporate governance performance and integrated management model.

2023, where concerns about the global economy that started in 2022 continued, was a year where the impact of difficult economic conditions continued all over the world. Many central banks, especially those of developed countries, continued to implement tight monetary policies in order to reduce the pressure caused by problems such as high inflation, the risk of stagnation in economies resulting from inflation, and the Russia-Ukraine War. While this process led to an increase in global resource costs, it also caused a decline in the global growth rate.

Having spent 2022 with a strong performance, the Turkish economy started 2023 with similar deteriorations observed in the global economy. We all felt the anxiety and insecurity-based effects of the great earthquake disaster that occurred in February and shook our country deeply. As a player in the real estate sector, we tried to contribute to this difficult period by providing team, equipment and workforce support. This period that our country is going through has put pressure on the economy through budget balance, inflation and growth. If we look at it in terms of its effects on living habits, the need for reliable housing has increased even more.

In 2023, which we spent under the influence of all these developments, our company, which has a trust-based relationship with its stakeholders, focused on adapting to change with effective process and risk management, as well as cost management that considers the optimal income-expense balance. We aimed to grow our company and increase our corporate competencies in order to contribute to the Turkish economy and construction industry. We continued both the construction and sales activities of our real estate projects with a total construction area of 675 thousand square meters in 3 major cities with our agile management approach. As a result, we left 2023 behind as a successful year in terms of our performance indicators and financial indicators.

As of the end of 2023, the asset size of our company increased by 20,6 % compared to the previous year, reaching the level of TL14,9 billion.

## We continued to be a safe address in real estate investment.

We delivered the Leed Gold certified VakifBank Towers, located in the Istanbul Finance Center and, which have already become one of the symbol buildings of the city.

Our projects Tablo Adalar and Cubes Ankara, which are exemplary in their region and, the construction activities of which we carry out with high performance in 2023, have reached the delivery stage. Focusing on meeting the customer expectations and needs at the highest level, we have developed special payment alternatives for our projects, the sales process of which is ongoing in 2023.

In the first quarter of 2024, we started to deliver flats in Cubes Ankara, which is located in Ankara consisting of residences, home offices, offices, hotels, commercial and social facilities. We are currently managing the rental process of the commercial areas in Cubes Ankara, where we have also completed the sale of independent sections that have the characteristics of a hotel. We expect the commercial areas in Cubes Ankara, which has become the center of attraction of the city, to make a high contribution to our company's rental income performance once they become operational.

We reflect the experience brought to our company by the projects, where people started to settle, to our future projects and continue to invest. We obtained the building license for our project VSancaktepe Center in the last quarter of 2023. We aim to put our project, the construction process of which has started, on sale in 2024.

## We were awarded the Türkiye Excellence Grand Prize.

A strong institutional structure is required to make these achievements sustainable. The high potential of our company was revealed especially with the corporate development project we initiated in 2020. The EFQM Model developed by the European Quality Foundation became our driving force in our institutionalization journey, which can be an example for our sector. Our Integrated Strategic Plan, prepared with our perspective of "managing change and improving performance with innovative approaches", was deemed worthy of the "Türkiye Excellence Grand Prize", which is among the most prestigious awards in the business world, in 2023. In 2024, we want to win the EFQM Global Award, for which we are a candidate, with the Vakif REIT Integrated Management Model and, make our management model a registered model in international standards, as well as in Türkiye.

## We became the company that increased its score the most in the Corporate Governance Index.

The rising trend in our mission indicators for the last 3 years continued in 2023. Our Corporate Reputation score was 82.8%, our Employee Satisfaction score was 83.2% and our Customer Satisfaction rate was 85.9%. Our Corporate Governance Rating Score, which is among our vision indicators, was determined as 9.33, and Vakif REIT was the organization that increased its score the most in the BIST Corporate Governance Index compared to the previous year.

## We continued to invest in our future.

We continued to pursue our corporate social responsibility projects in line with our main goal of “the Power of Custom, the Build of the Future”. We continued our support in 2023 for the Yıldız Technical University Miniature Building Competition, which was organized with the aim of instilling a culture of sustainability in university students, who are prospective architects and engineers of the future. In this process, where we encourage students and listen to their innovative ideas and projects, we have the opportunity to renew our energy and further expand our innovative perspective.

As a member of VakifBank Finance Group, our Company has been considering the impact of its activities on society and the world since the day it was founded, with the influence of the foundation heritage in its roots. We continue to support VakifBank women's volleyball team, which has been going on for 37 years and is considered Türkiye's most successful and longest-running social responsibility project. I would like to take this opportunity to congratulate once again our team, on their achievements of being the European champion and the world's number two in the 100th anniversary of our Republic. Vakif REIT will continue to contribute to the development and sustainable growth of our country in the Century of Türkiye.

I would like to wholeheartedly thank all of our partners, who share our vision of realizing the symbolic projects of the future with the power of tradition, our investors, who trust us, our customers, who are increasing in number every day and joining our family, my valuable colleagues, who have contributed greatly to our success, and VakifBank's Senior Management and Board of Directors, who have always supported us.

Yours respectfully,

Onur İNCEHASAN

## Activities of the Board Committees in 2023

### Audit Committee

The committee responsible for auditing is formed and authorized by the Board of Directors. The committee responsible for the audit, which was established by the decision of our Company's Board of Directors, is chaired by Mr. Mustafa ŞENGÜL and its member is Mr. Rifat DEMİRBAŞ. The Committee acts under its own authority and responsibility, makes recommendations to the Board of Directors and, when necessary, prepares a report and presents its opinion to the Board of Directors. However, the final decision responsibility always belongs to the Board of Directors.

The Audit Committee reviewed the Financial Statements and Footnotes as well as the Board's Annual Reports for the accounting period of 01.01.2022-31.12.2022, 01.01.2023-31.03.2023, 01.01.2023-30.06.2023, 01.01.2023-30.09.2023 and 01.01.2023-31.12.2023, and presented a report thereon to the Board of Directors. In addition, the 4<sup>th</sup> Term Committee report for the accounting period of 2023 was also presented to the Board of Directors.

The Committee met 10 times and prepared 5 reports during this period. The Committee also reviewed the functioning of the company's internal audit system, contributed to the identification of processes open to improvement, and ensured that audit activities were carried out effectively.

## Early Detection of Risk Committee

Mr. Rifat DEMİRBAŞ is the chairman of the Early Detection of Risk Committee, which was established by our Company's Board of Directors in accordance with the Turkish Commercial Code and the capital markets legislation, for the purpose of early diagnosis of the reasons that endanger the existence, development and continuation of the company, implementation of the necessary measures and remedies for this, and management of the risk, and Mr. Tevfik ERPEK is the committee member.

During this period, the Committee made efforts to ensure early diagnosis of risk, take necessary precautions regarding risks that may endanger the existence, development and continuity of the Company, and manage the risk, and within the scope of bimonthly routine review of risk management systems, reviewed the Internal Control Reports prepared by the Internal Control Commission and presented a report thereon to the Board of Directors.

During this period, the Committee prepared 6 reports.

## Corporate Governance Committee

The Corporate Governance Committee established by the Board of Directors is chaired by Mr. Ömer DEMİR and its members are Mr. Tevfik ERPEK and Investor Relations Manager Ms. Tülay ÖZTÜRK. During this period, the Committee responsible for corporate governance made efforts to provide an agenda for the Board of Directors to ensure that the Corporate Governance Principles are developed and implemented within the Company, to make recommendations to the Board of Directors in order to improve the corporate governance practices, to oversee the procedures of the Investor Relations Unit, to make suggestions regarding the number and election of the Board Members, the functioning structure and effectiveness of the Board of Directors and its committees, taking into account the Corporate Governance Principles, and to predict such risks that may affect the Company's operations in the areas, where the company operates, and to take measures to eliminate and/or reduce the possible negative effects of these risks. In addition, the Corporate Governance Committee also assumed the duties of the Nomination Committee and the Remuneration Committee. The Committee also prepared and submitted to the Board of Directors the Corporate Compliance Report and the Sustainability Principles Compliance Report for the accounting period of 2023, and the section Investors Relations on the Annual Report for the 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup> and 4<sup>th</sup> terms in 2023. In addition, the Committee prepared the 2023 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup> and 4<sup>th</sup> Term committee reports and presented them to the Board of Directors.

The Committee met 11 times and prepared 11 reports during this period.

## Meeting of the Board of Directors

The meetings of the Board of Directors are planned and held in an efficient and productive manner. Each member of the Board of Directors is entitled to 1 vote to cast. The Board of Directors meets regularly and as planned in advance, at least once a month, and when deemed necessary, without being bound by this period and without delay. It is a principle that a member of the Board of Directors attend every meetings. The chairman of the Board of Directors talks to the General Manager to identify the agenda items of a meeting of the Board of Directors.

Our Company's Board of Directors met 75 times in 2023, adopted 198 resolutions, and the participation rate of the members was 100%.

VakıfBank has control over the Company as the controlling shareholder.

## Main Factors Affecting Business Performance

### General Economic Outlook and the Real Estate Sector

2023 was a year characterized by inflationary pressures on a global scale and the tight monetary policies adopted in response to them. Many developed and developing countries, particularly the US Federal Reserve (Fed) and the European Central Bank (ECB), raised policy rates and implemented tight monetary policies due to concerns of economic stagnation and recession. Although seen as an indirect risk factor from an economic point of view, the increasing geopolitical risks, which affect all economic processes,

continued to adversely affect the global outlook. The Russo-Ukrainian war, on the one hand, and the very unfavorable developments in the Middle East, on the other, had a negative impact on trade, mainly through commodity prices such as oil, and attracted attention as an inflationary pressure factor. Despite the decline in energy and commodity prices during the year, the inflation problem persisted.

Despite all the negative developments, according to the IMF Economic Outlook Report, the world economy grew by 3.2 percent as a result of the economic measures taken, and growth is expected to continue at the same pace in 2024 and 2025. Overcoming regional and global challenges, the Turkish economy grew by 4.5 percent in 2023, the highest growth rate among EU countries.

The underlying trend of inflation in Turkey slowed down significantly in the last quarter of the year as monetary tightening started to take effect and the cost pressures that intensified in the third quarter were largely reflected in prices. According to data released by the Turkish Statistical Institute, consumer inflation occurred at 64.8 percent in 2023, in line with the year-end inflation expectations. The most significant contribution to consumer inflation came from the service sector, with price increases in the food, transportation and accommodation subgroups exceeding the annual average increase, while those in sectors such as housing, household goods and clothing remained below it. The producer price index, on the other hand, increased by 44.2 percent by the end of the year, and cost increases in main industrial groups such as durable consumer goods, capital goods, manufacturing and nondurable consumer goods were above the PPI average.

Macroprudential measures, particularly the increase in the policy rate, quantitative tightening to strengthen monetary transmission and the selective credit policy, are aimed at achieving a gradual improvement in domestic demand and the current account balance.

Looking at the 2023 figures of housing sales, which is one of the leading indicators of the construction and real estate sector; a total of 1 million 225 thousand houses were sold in Turkey. In 2022, the sales figure was 1 million 485 thousand units. This indicates a 17.5 percent decrease in sales compared to the previous year. According to the types of sales, the difference was observed in mortgaged sales. While 280 thousand mortgaged housing units were sold in 2022, the figure was 177 thousand in 2023 with a decrease of 36.6 percent. The decline in mortgaged sales seems to have been driven by the increase in housing loan interest rates and house prices. The decline in first-hand sales also became more pronounced in 2023 and was capped off at 379 thousand units with a decrease of 17.5 percent compared to the previous year.

Housing sales to foreigners, on the other hand, witnessed a sharp decline. In 2023, 35 thousand units were sold, down 48.1 percent compared to the previous year. The decline in foreign demand is believed to be the stabilization of the excess demand in purchases of foreign origin in the previous year.

According to the TurkStat data, the building construction cost index (December-2023) increased by 66.42 percent year-on-year. Looking at the breakdown of the index, it can be seen that material prices and labor costs increased by 52.72 percent and 111.62 percent, respectively.

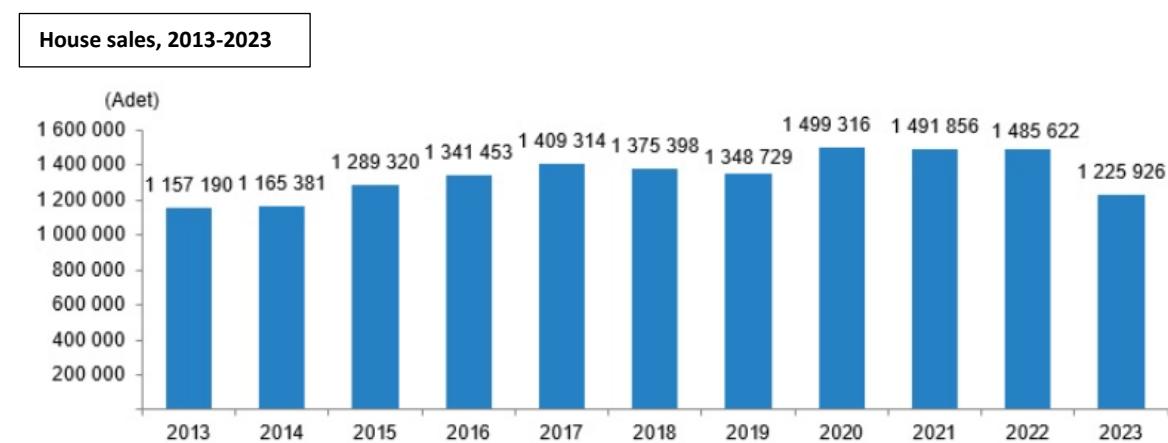

The demand for housing following the earthquake disaster of February 6th, 2023 indicates that reconstruction activities in the construction sector will increase and may push up new housing prices. Although an increase in demand is expected for the types of real estate that households consider as investment instruments for saving purposes, rising loan costs and changing conditions suggest that the demand for housing for saving purposes is likely to gradually decline in the second half of 2023.

With the impact of economic measures and monetary policies introduced to reduce inflationary pressures, financial costs have increased, encouraging savers in search of real returns to invest in instruments such as deposits. This will help stabilize prices in the real estate market.

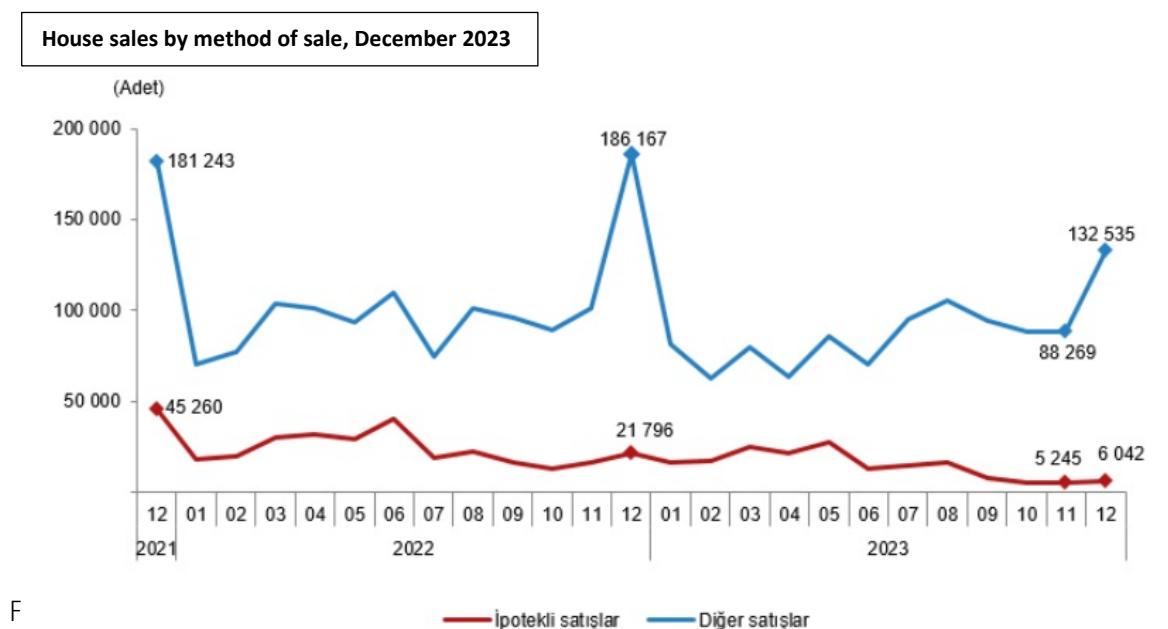

## Housing Market

According to the house sales figures announced by TurkStat, house sales in Turkey decreased by 33.4 percent in December compared to the same month of the previous year, totaling to 138 thousand 577. Istanbul had the highest share in house sales with 198 thousand 739 units sold at 16.2 percent. According to the number of sales, Istanbul was followed by Ankara with 114 thousand 432 units sold and a 9.3 percent share, and Izmir with 65 thousand 465 units sold with a 5.3 percent share.

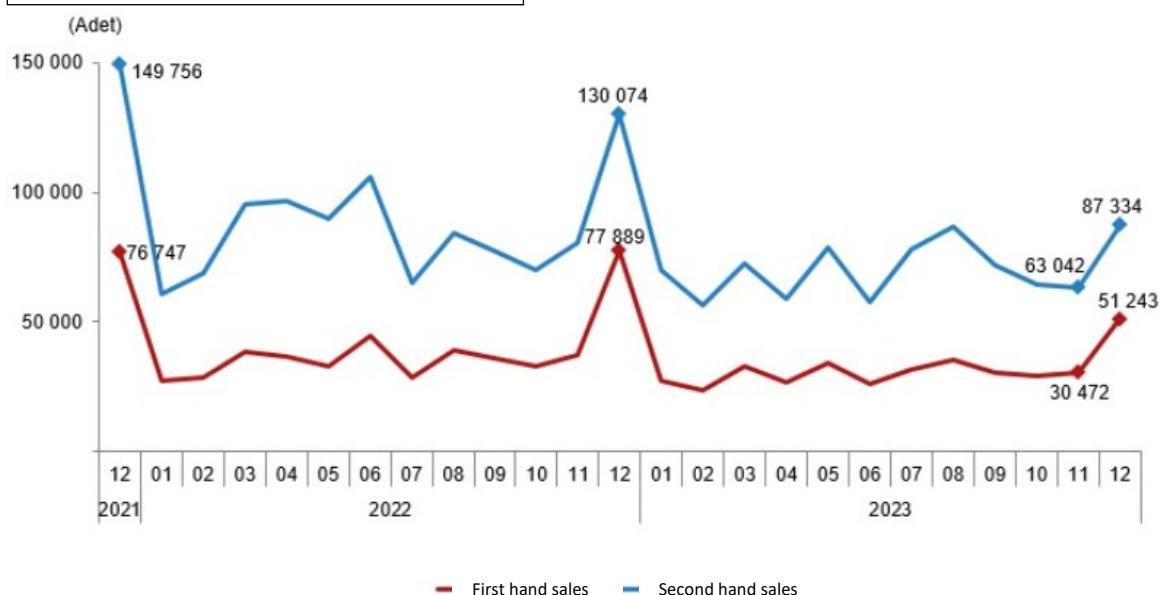

Thus, house sales decreased by 17.5 percent in the January-December period compared to the previous year and amounted to 1 million 225 thousand 926 units.

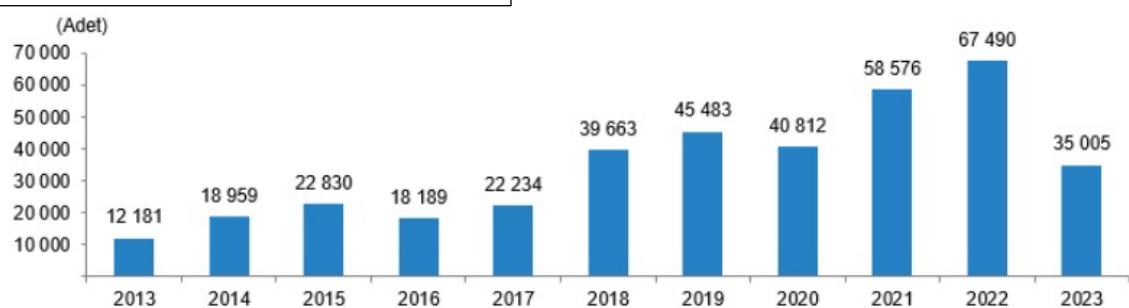

In 2023, mortgaged house sales decreased by 36.6 percent compared to the previous year with a figure of 177 thousand 748. Other house sales decreased by 13.0 percent compared to the previous year with 1 million 48 thousand 178.

compared to the same period of the previous year with 846 thousand 384.

**House sales by sale status, December 2023**

House sales to foreigners decreased by 48.1 percent in 2023 compared to the previous year with 35 thousand 5. In 2023, the share of house sales to foreigners in total house sales was 2.9 percent. In 2023, Antalya ranked first in house sales to foreigners with 12 thousand 702 units sold. Antalya was followed by Istanbul with 11 thousand 229 units sold and Mersin with 3 thousand 16 units sold.

**House sales to foreigners, 2013-2023**

## Office Market

2023 was a year of economic stagnation both in the world and in Turkey. On February 6, the earthquake disaster that shook 11 provinces in Turkey made earthquake resistance reports, soil surveys and foundation surveys for commercial properties the most important demands of occupants and investors. As a consequence of this development, the deepening difficulties in obtaining financing due to the tightening of monetary policy in the second half of the year further increased the pressure on investment demand

for the supply of office units. However, ongoing inflation and exchange rate fluctuations caused primary rental prices to continue to rise against both TL and USD. As businesses continued to return to office space and demand for Class A offices and business centers increased, occupancy reached a nine-year high. The growth measured in dollars in the Levent area was 8.6 percent compared to the same period of last year. In this case, base rent rates continued to rise in dollars due to continued demand and limited supply.

With part of the Istanbul International Finance Center opening in Q3 of the year, the total supply of the Istanbul office market increased to 7.14 million square meters. A total of 315,473 square meters were sold/leased in 2023, which is 40 percent less than in 2022. In addition, 32 percent of all lease agreements were signed in the first half and 68 percent in the second half of the year.

In 2023, despite the lack of major office building investments, investments are expected to gain momentum in the medium and long term. The vacancy of buildings not resistant against earthquakes and the transformation of offices into different buildings increase the supply deficit in the market. Demand and occupancy growth are expected to continue in the coming period, and the upward trend in first-hand rents is expected to continue.

## Logistics Market

The Turkish logistics market continued to grow in 2023, but supply pressure in the market remains high as development activities struggle to meet the larger space needs of logistics warehouse users.

According to the World Bank's Logistics Performance Index, which measures the international competitiveness of countries and the efficiency of trade and supply chains and logistics services, Turkey ranked 38th among 138 countries in the Grouped ranking, increasing its score from 3.2 in 2018 to 3.4 in 2023. Issues such as the quality of customs, trade and transportation infrastructure and the ease of handling international shipments are areas of improvement that can further increase the progress made in the short term.

In the Istanbul - Kocaeli region, which is the main logistics market area, there is a total warehouse stock of approximately 11.1 million m<sup>2</sup> and a logistics supply for commercial use of 7.3 million m<sup>2</sup> according to current data. The volume of projects under construction has been determined as approximately 480 thousand m<sup>2</sup>, almost all of which are for commercial use.

In 2023, the total supply of completed logistics warehouses increased slightly, but the vacancy rate remained stable compared to the same period last year as the completed warehouses entered the market fully leased before construction. A total of 135 thousand m<sup>2</sup> of logistics warehouses were leased in 2023. Although the area of warehouse leasing transactions showed a significant increase of 137 percent compared to last year, the transactions remained 26 percent below the five-year average leasing transaction volume due to supply constraints. Due to limited supply in the Asian market in Istanbul, transactions are concentrated in European regions such as Kocaeli and Istanbul. The shares of the most active sectors in leasing were white goods with 32 percent, retail with 30 percent, e-commerce with 25 percent and 3PL with 12 percent.

Primary rents of logistics warehouses increased by 25 percent annually to \$8.75/m<sup>2</sup>/month in 2023. They increased by 108 percent in TL compared to the same period of the previous year and reached 260 TL/m<sup>2</sup>/month. The upward pressure on rental prices in the primary market is expected to continue in the coming periods.

In 2023, efforts towards a green transformation in Turkey's industrial and logistics market have gained pace. Some of the organized industrial zones have started their activities by publishing action plans for 2053 within the scope of net emissions and green development targets. On the other hand, incentives for logistics facilities to obtain green building certificates have begun to be seen in the primary market.

In the coming years, global companies are expected to make decisions to move closer to production and logistics centers (close to transportation) and shift to on-site production (relocation). In this context, it is expected that Turkey will be a focal point for foreign users with its close proximity to production corridors, offering advantages in terms of accessibility.

It is believed that the decisions made by Europe, one of Turkey's most important export markets, within the framework of the Green Deal, along with the digital transformation of last-mile logistics, guidelines on electronic exports and the expansion of the e-commerce network will lead to important structural trends in Turkey in the long term.

## Effectiveness of the Internal Control System, Risks and Assessments of the Management Body

Early Detection of Risk Committee consists of two members elected by the Company's Board of Directors from among its own members, and the chairman of the committee is an independent Board Member. It prepared 6 reports in 2023 and presented them to the Board of Directors.

The purpose of the Audit Committee is to ensure that the Company's business and transactions are carried out in an orderly, efficient and effective manner, in accordance with the management strategy and policies, within the framework of legislation and rules, and to ensure the integrity and reliability of the account and record order, the timely and accurate availability of information in the data system, errors, and to prevent and detect fraud and irregularities.

In 2023, the Audit Committee convened 4 times and 2 reports were prepared, and taking into account the Corporate Governance Principles and Standards, an environment of trust has been established that the Company's activities are carried out in line with the Company's objectives and that the financial statements and relevant laws and legislation are complied with. It has been observed that the main risks are identified, constantly observed and minimized in line with the determined targets, and existing internal control activities are evaluated frequently and continuously.

In addition, an Internal Control Committee consisting of managers covering all the respective processes was established in order to organize and manage our Company's Internal Control System effectively and efficiently.

The Internal Control is managed within the scope of "Y1.4 Enterprise Risk Management Process" and "PR-Y1-08 Enterprise Risk Management Procedure". The process was developed in accordance with the requirements of the Public Financial Management and Control Law No. 5018, COSO Internal Control Model, and ISO 31000 Risk Management standard.

In this context, the risks are determined under three groups: Strategy, Process and Project risks, and four categories for each group (strategic, operational, financial, reputation risks).

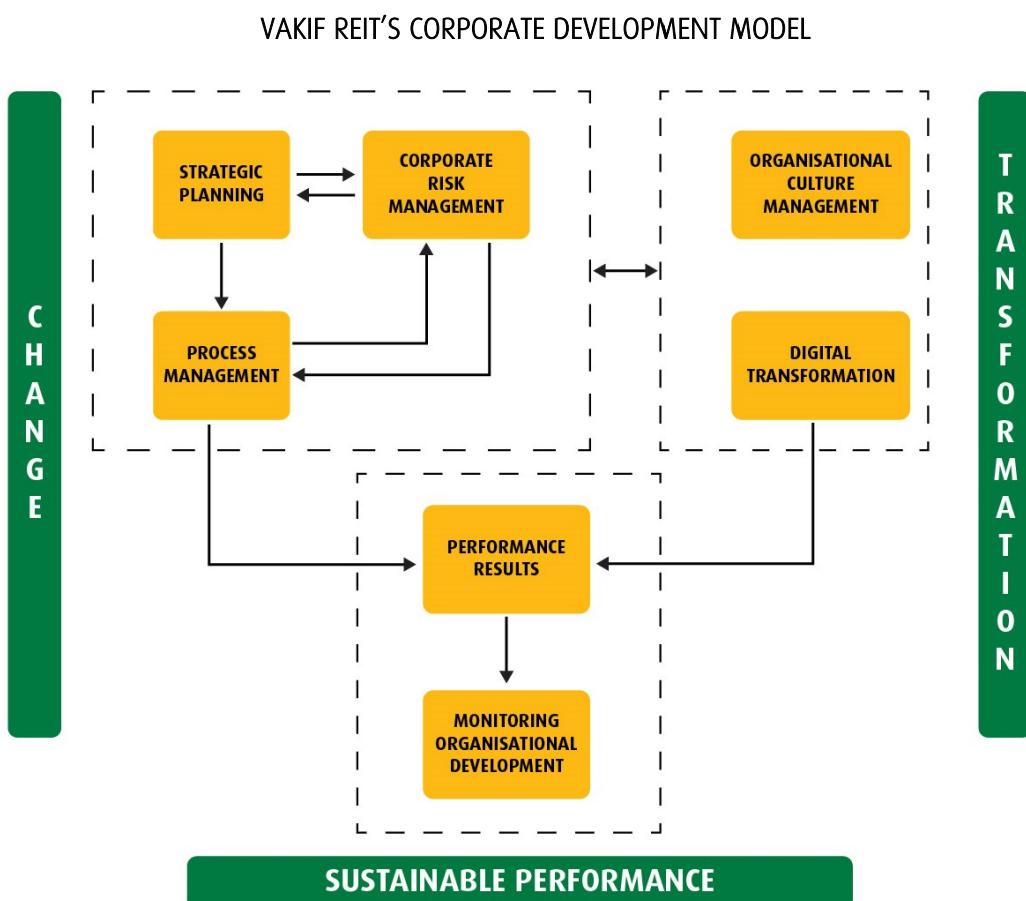

In determining each risk, internal control deficiencies are questioned in 6 aspects ( *Policy and Procedure, Documentation, Security, Assignment, Systematicity, Monitoring* ). Risks are evaluated in the aspects of Probability and Impact and are leveled as " *high, medium and low* " risks out of 25 points with a 5X5 matrix. An Internal Control Plan is created by planning risk response actions for medium and high risk levels. As of 2021, risks and actions are monitored through the Corporate Risk Management Module on Vakif REIT's Integrated Management System Platform.

Risks are monitored at three levels:

- Strategic risks are determined by the senior management by taking into consideration the needs and expectations of the relevant parties through SWOT, PESTEL, STAKEHOLDER and other analyzes conducted on internal and external issues within the scope of the Strategic Plan, and actions are taken accordingly.
- In addition to the Internal Control Committee, in determining the risks and opportunities for the processes; all the units evaluate their own processes, identify risks and take necessary precautions accordingly.
- And the real estate project risks are not strategic level or process risks, but are project-specific risks/opportunities that affect the project progress rates, and the necessary actions are taken within the work schedule.

The risk/opportunity management process (risk identification, evaluation and control) is evaluated by the Committee and the senior management at Management Review meetings, at the end of each year and/or whenever necessary, and the necessary measures are taken according to the evaluation results.

## Our Journey of Corporate Development

As Türkiye's first Real Estate Investment Partnership, our goal is to maximize the corporate development of our Company, befitting its experience, and make our Company the pioneer and representative of the sector in this field. For this purpose, the Corporate Development Project, which is Vakif REIT's vision project, has been initiated in order to effectively manage change and transformation. To briefly summarize the Corporate Development Project; In today's world, where change and destructive transformation are experienced, very important steps have been taken in terms of institutionalization with the change-transformation program we have implemented, and many necessary functional systems such as strategic planning, process management, corporate risk management have been established with a well-founded approach and are constantly being developed. By taking into account the factors of change in the ecosystem, our differentiation strategies that will provide competitive advantage are such strategies that cover the expectations of our five basic stakeholders and are integrated with the United Nations sustainable development goals. In this respect, Vakif REIT's Strategic Plan is a long-term "Integrated Strategic Plan", which is the first application of the sector.

On the other hand, our transformation projects have been initiated to keep up with this change. With the digital transformation, which is the first of our transformation projects, the need for digital change was determined and the necessary technological infrastructure was provided.

Another important transformation program contributing to the success of change is "Corporate Culture Management". By measuring the current corporate culture, information and motivation training organizations were provided in line with the determined cultural and social change needs, and the integration and holistic management of the Vakif REIT' health and well-being program into the Human Resources system was aimed by measuring the health of the organization. With our transformation projects, the resilience and agility of the organization is increased. To summarize our journey of corporate development over the years; with the systems that started with **the ISO 9001 Quality Management System in 2020** and are developed day by day, the understanding of sustainable development has turned into a way of life in our company. Our management system was created by adopting the EFQM Management Model, which is referenced by the EU, and with the participation in the recognition program organized by KalDer in 2021, the "**2021 Türkiye Excellence Awards - Competence in Superior Performance - 4 Stars**" certificate was received in our first year.

- In 2022, the Integrated Quality Management System was developed by obtaining documents for the ISO 27001 Information Security Management System, ISO 10002 Customer Complaints Management System and ISO 14064 Greenhouse gas inventory calculation standards, integrated with our ISO 9001 Quality Management System.
- Our Integrated Management Model, which has been continuously developed within the scope of the Corporate Development Project and reached its current maturity level, was crowned with the "**2022 Türkiye Excellence Award**" and the "**Turkish Excellence Grand Award in 2023**", which were evaluated within the scope of the EFQM Model, and in particular, our integrated management approach was recognized as a good practice.

# We are Crowned with the Grand Prize for our Corporate Excellence

## Sustainability

With the change-transformation program implemented in our company, important steps have been taken towards the corporate development and all necessary functional systems have been established accordingly. With these systems, which are developed day by day, it is aimed to transform the understanding of sustainable development into a way of life in our company.

On the other hand, digital transformation is carried out to keep up with this change and the agility and durability of the organization is increased through corporate culture studies.

While putting into practice the principles of change and transformation, we focus on the provision of sustainable development considering the needs of the next generations. Beyond the three aspects of sustainability: economic, social and environmental sustainability, we adopt the product responsibility resulting in the total four aspects of sustainability in our organization.

Our strategies were associated with the 17 Development Goals and 169 Development Aims of the United Nations Sustainability Program and the first integrated strategic plan of the sector was published. In addition, the focus is on meeting the expectations of all five basic stakeholder groups in a balanced manner and managing the experience of our stakeholders.

Our sustainability efforts are being managed through the process "Y3.3. Sustainability Management" and under the coordination of our Corporate Development and Sustainability Directorate, which was established in 2022. The process includes the sub-processes of Sustainable Building Management, Environmental Sustainability Management and Social Sustainability Management:

There are many ISO and EN standards within the scope of quality assurance systems regarding sustainable building management. In addition, many rating and certification systems for green buildings have been developed, such as the American LEED certificate, the UK BREEAM certificate and others developed by European countries. In our country, the YeS-TR Regulation has been published by our Ministry of Environment, Urbanization and Climate Change.

In this context, we attach importance to green building rating studies in order to control carbon emissions resulting from building construction works. Out of our current projects, our Istanbul International Finance Center is the first building within the IUFM Campus to receive the Leed GOLD Certificate, and we are a candidate for the Leed GOLD certificate in our project, Izmir Konak. In addition, compliance with many green building criteria such as Energy Efficiency, Natural Lighting, Healthy Indoor Environment, Responsible Production and Consumption, Reducing Water Footprint, Increasing Biodiversity, Green Parking Lots and Bicycle Parks is taken into account for our other projects without a certification target.

- Product Sustainability Product Sustainability There are many ISO and EN standards within the scope of quality assurance systems. In addition, many rating and certification systems for green buildings are developed, such as the American LEED certificate, the UK BREEAM certificate and others developed by European countries. In our country, the YeS-TR Regulation (Certificate for Buildings and Premises) has been published by our Ministry of Environment, Urbanization and Climate Change. In this context, we attach importance to green building rating studies in order to control carbon emissions resulting from building construction works. Out of our current projects; Istanbul Financial Center Project has the Leed GOLD Certificate, and our Izmir Project is a Leed GOLD Certificate candidate. In addition, compliance with many green building criteria such as Energy Efficiency, Natural Lighting, Healthy Indoor Environment, Responsible Production and Consumption, Reducing Water Footprint, Increasing Biodiversity, Green Parking Lots and Bicycle Parks is taken into account for our other projects without a certification target.
- Environmental Sustainability Management: The carbon emissions of all our projects were calculated and reported to the CDP, the world's most prestigious environmental reporting agency, and the targets were determined to reduce carbon emissions.

With the report issued within the scope of the CDP Climate Change program, a C+ level performance score was achieved in our first year.

- **Social Sustainability:** A member of VakifBank Finance Group, Vakif REIT has been considering the impact of its activities on society and the world since the day it was founded, with the influence of the foundation heritage in its roots.

In this direction, as Vakif REIT, our priority social responsibility projects cover the aspects of:

- Sustainable Cities and Communities
- Industry, Innovation and Infrastructure
- Quality Education
- Reduced Inequality

Gender Equality.

## Strategic Management and Goals

Starting from 2020, Vakif REIT determines its short and long-term goals with its 5-year strategic plan and annual performance program and, manages both its current and future performance in line with these goals. Vakif REIT Strategic Plan was associated with the United Nations Sustainable Development Goals (17 SDGs) and Targets (169 SDTs) at every stage, from the Current Situation analysis stage to the determination of the annual performance program, and an Integrated Strategic Plan was prepared for the first time in Türkiye. By adopting the **4P Model** (Economic, Social, Environmental and Product sustainability) beyond the generally accepted **3P Model** (Economic, Social, Environmental sustainability) defined in the United Nations Sustainability Program, it has been ensured that our Strategic Plan covers the sustainability program in four aspects.

In addition, the focus is on meeting the change and transformation strategies and the expectations of all five basic stakeholder groups in a balanced manner and managing the experience of our stakeholders. In addition, the continuity of progressive improvement towards corporate development is aimed at creating a corporate culture of "We are Vakif REIT" in line with our main purpose, managing the health and well-being of the organization, which is considered a global reference, and keeping the values alive.

Our main strategy is to continuously grow and provide value to its stakeholders with innovative and sustainable solutions, with the vision of becoming a reference organization that directs change in the sector with its symbolic structures. In order to implement this main strategy, our company has determined 7 strategies and key performance indicators (KPIs), including operational and financial targets. Our strategies and major KPIs are presented below:

- Business Development with Innovative and Concept Projects (KPI : number of business developments, real estate portfolio size, total portfolio size)
- Effective Growth with Effective Marketing and Sales (KPI: Asset Size Ranking, Asset Size Market Share)
- Effective and Efficient Management of Project Portfolio (KPI: Project progress rates (Cubes Ankara, Tablo Adalar, İzmir Konak, Sancaktepe Merkez)
- Managing Customer Experience Effectively (KPI: Customer Satisfaction Rate, Net Promoter Score)
- Managing Organizational Climate (Health) (KPI: Employee Satisfaction Rate, Employee Loyalty Rate)
- Managing Corporate Development (KPI: EFQM Self-Assessment Score, Strategy Realization Score, Digitalization Level)
- Strengthening Our Reputable Position by Effectively Managing Reputation (Corporate Reputation Rate, Net Promoter Score)

In order to achieve the targets determined by the study Strategic Planning, in the categories such as human resources, investment costs, service procurement, effectiveness, etc., the resource requirements required for the strategic activities are determined and based thereon, a 5-year financial plan and annual budget are prepared.

The 5-year Strategic Plan and financial plan, as well as the annual performance program and budget, come into force with the approval of the Board of Directors.

## Ongoing Projects

### VYENIKONAK - İZMİR KONAK MIXED PROJECT

Province	İzmir
District	Konak
Block/Parcel	8601/2
Purchase Date	19.08.2015
Appraisal Date	29.12.2023
Project Current Appraisal Value	TL 1.886.779.444

The land located in İzmir Province, Konak District, Mersinli Neighborhood, Block 8601, Parcel 1 with an area of 17,673.63 m<sup>2</sup> and located in CBD (Central Business Area) was purchased on August 19, 2015.

Aiming to create a mixed-use project on the block/parcel no. 8601/1, a main contractor tender was held under the name "İzmir Konak Mixed Project" and with the method "Revenue Sharing in Return for Land Sale", and İlk İnşaat and Kaf Teknik Business Venture with the best offer committed a Company Share Income of TL 185,100,000 based on a Company Share Income of 30% to Vakif REIT in return for the land sales. It is considered that the project to be carried out in Izmir, one of the important metropolises of the country, will be extremely beneficial in terms of both continuing the growth vision of the Company and increasing its profitability.

The TEIAS land, located in the northern neighborhood of our land, was purchased by the company on April 04, 2019, based on the unification condition in the zoning status document received from the relevant Municipality, and due to the changes arising from the "Unification and Abandonment to the Public Without Charge" transaction, it was registered with the title deed as a land of 17,703.70 m<sup>2</sup> under block no. 8601 and parcel no. 2, and then subsequently qualified as "Land" by means of demolishing the risky buildings on the parcel.

The project design studies based on the license have been completed by the contractor company and the building license was obtained on April 16, 2020. The procedures for the implementation project are in progress. The respective site construction activities were started by the Main Contractor in October 2020. In line with the needs in the region, certain arrangements were made in the license project by the main contractor and the renovation license dated December 31, 2021 was obtained accordingly.

In addition to the fact that construction implementation activities have been started as of 2021, while the project progress level is still at ~ 4.81%, it was decided to terminate the service contract based on the Board's Decision dated/13.09.2022/108 due to the contractor's failure to fulfill its obligations in the contract.

The "İzmir Konak Mixed Project Revenue Sharing in Return for Land Sale" to be realized on Block 8601, Parcel 2, Mersinli Neighborhood, Konak District, Izmir Province, which is included in the Company's portfolio, was put out to tender and the main contractor agreement was signed with Rec Uluslararası İnşaat Yatırım San. ve Tic. A.Ş. on 09.03.2023 with a 35% company share income rate over the total income in return for land sale. A building license was obtained for the project on 12.05.2023 and on 16.06.2023 Rec Uluslararası İnşaat Yatırım San. ve Tic. A.Ş. on 16.06.2023, the legal processes with the previous contractor and the legal permission processes regarding the modifications realized in the project are still ongoing.

The project to be realized in Izmir, one of the most important metropolises of the country, is expected to be extremely beneficial for the Company in terms of maintaining its growth vision and increasing its profitability.

According to the appraisal report of the real estate dated December 29, 2023, the "current status of the project" appraisal value was estimated at TL 1,886,779,444.

## IFM VAKIFBANK TOWERS

Province	İstanbul
District	Ümraniye
Block/Parcel	3328 / 12
Purchase Date	07.06.2011
Appraisal Date	29.12.2023
Appraisal Value Based on 100% Completion Rate	TL 3.951.584.210

The land plot of 8.774,05 m<sup>2</sup> located on block 3328, parcel 5 in Ümraniye District, Istanbul Province, and the land plot of 7.225,80 m<sup>2</sup> located on block 3328, parcel 12 in Ümraniye District, Istanbul Province, are located in the Istanbul International Finance Center. Parcel 5 is facing the ring road in the direction of 15 July Martyrs Bridge and parcel 12 is facing Şenol Güneş Boulevard. It was purchased by our Company in 2011.

According to the report dated December 29, 2023 by Arge Gayrimenkul Değerleme ve Danışmanlık A.Ş., which is authorized by the CMB to provide valuation services, the fair value of the Istanbul Finance Center located on block 3328, parcel 12 is TL 3,938,422,300 excluding VAT, determined according to the market and cost comparison method.

Lands located in Ümraniye were purchased with the aim of developing a mixed project consisting of office and commercial areas in the Istanbul International Finance Center, which will be the capital of finance in

the national and international arena and, will provide ease of transportation due to its proximity to the city's business center-dense districts.

The concept project studies have been completed to carry out the "T. Vakıflar Bankası T.A.O. Head Office Service Building and Facilities Project" on a land of 8,774.05 m<sup>2</sup> located in Istanbul province, Ümraniye district, Küçükbakkalköy neighborhood, registered under block no. 3328, parcel no. 5 and a land of 7,225.80 m<sup>2</sup> located in Istanbul province, Ümraniye district, Küçükbakkalköy neighborhood, under block no. 3328, parcel no. 12 within the Istanbul International Finance Center, and this project has been approved under the Ministry of Environment and Urbanization Aesthetics Board Decision dated 22.05.2014. Following the approval, license projects were completed and prepared, and the construction licenses for both parcels were obtained from the Municipality of Ümraniye on June 22, 2015.

Due to the metro construction adjacent to the relevant parcels, which is being carried out within the scope of the Istanbul International Finance Center project, it was necessary to add 3 additional basement floors in both parcels of the project, and thus the excavation and shoring works, which started in 2016, were completed in 2017. Following the completion of the tender process for the main contractor of the T. Vakıflar Bankası T.A.O. Headquarters Service Building and Facilities Project, which will be constructed by our Company in the Istanbul International Finance Center, a contract was signed with REC Uluslararası İnşaat Yatırım San. ve Tic. A.Ş. for the construction of the T. Vakıflar Bankası T.A.O. Headquarters Service Building and Facilities Project.

At the meeting of the Company's Board of Directors dated 15.11.2018, it was decided to sell a total of 22,900 m<sup>2</sup> of area in the 52-storey block of the "T. Vakıflar Bankası T.A.O. Head Office Service Building and Facilities Project" as included in the portfolio of our Company, which is planned to be used as our Bank's Head Office Service Building, to T. Vakıflar Bankası T.A.O., and a "Real Estate Sales Promise Agreement" was signed with T. Vakıflar Bankası T.A.O. on 23.11.2018.

At the meeting of the Company's Board of Directors dated 26.10.2020, it was decided to sell a total of 28,001.20 m<sup>2</sup> of area in the 52-storey block of the "T. Vakıflar Bankası T.A.O. Head Office Service Building and Facilities Project" as included in the portfolio of our Company, which is planned to be used as Bank's Head Office Service Building, to T. Vakıflar Bankası T.A.O.

At the meeting of the Company's Board of Directors dated 06.01.2021, it has been decided to realize the sale of 4.785,68 m<sup>2</sup> area located in the 52-storey block planned to be used as Vakıflar Bank Head Office service building.

At the meeting of the Company's Board of Directors dated 07.04.2022, it was decided to sell the 25,718.12 m<sup>2</sup> area located in the 52-storey block planned to be used as Vakıflar Bank Head Office service building. In order to comply with the revision made in the Master Work Program of the Istanbul International Finance

Center Project, additional protocols were signed with the contractor company, project management company and professional supervision services company.

The provisional acceptance process of the project, which is planned to be completed in 2023, has started and the Contractor company continues to complete the deficiencies related to the manufacturing. The testing and commissioning process continues.

## Measures, if any, planned to improve the financial structure of the company

During this period, Vakif REIT strived to maintain its strong and stable financial structure and continued its sustainable growth. In accordance with the decision taken at the Company's Board of Directors Meeting dated March 16, 2023, to increase the Company's capital from TL 1,145,000,000 TL to TL 2,950,000,000, with 50% paid and 107.64% as bonus, an application was made on March 21, 2023 to the Capital Markets Board for the public offering of the shares representing the increased capital amount. An application was made on 10.04.2023 to the Capital Markets Board for the approval of the prospectus prepared for the public offering of the shares representing the increased capital amount due to the increase of the issued capital of TL 1,145,000,000 by 50% to TL 1,717,500,000, all in cash, within the registered capital ceiling of TL 1,750,000,000 based on the power granted by the article 7 of the articles of association of the Company concerning the discussion of the bonus capital increase after the approval by the General Assembly, and this application was approved at the meeting no. 31/339 on June 8, 2023, and announced on the Capital Markets Bulletin, issue no. 2023/32. In this context, the prospectus for the shares to be issued was also approved with the Board's letter no E-12233903-340.05.05-38543 on June 12, 2023. The new share purchase rights issued were used for a period of 15 days between 13.06.2023 and 27.06.2023 in accordance with the principles specified in the prospectus, and as a result of the fact that the Group B shares with a nominal value of TL 1,055,213.84 corresponding to the right to get new shares not used in due time are offered for sale at the price determined in the Primary Market at Istanbul Stock Exchange, with the price of each share with a nominal value of TL 1 not being less than TL 1, through Vakif Yatırım Menkul Değerler A.Ş. for 2 business days between 05 July 2023, all of the relevant shares were sold and the average price for these transactions was TL 3.03 per share with a nominal value of TL 1.

As a result of the sale of the Group A privileged shares with a nominal value of TL 7,974,236.85, which are not in circulation and not traded on the Stock Exchange, by the book building method at the headquarters of Vakif Yatırım Menkul Değerler A.Ş. for 2 business days between 04-05 July 2023, all the Group A privileged shares was sold to T. Vakıflar Bankası T.A.O., which submitted a single request, at a price of TL 3.03 per share.

As a result of the transactions, a total cash inflow of TL 590,827,078 was provided to our Company, and an emission premium of TL 18,326,968.39 was obtained from this transaction. The issuance of shares with a nominal value of TL 572,500,000, which were increased in cash, was completed within the framework of the conditions specified in the prospectus and their prices were paid in cash and in full. An application was made to the Trade Registry Office for registration to increase the paid-in capital of the company to TL 1,717,500,000.

Our Company's Board of Directors, at its meeting dated March 16, 2023 on the same date, decided to increase the Registered Capital Ceiling from TL 1,750,000,000 to TL 5,000,000,000 and, increase the capital to TL 2,950,000,000 – the amount of TL 788,106,823 from the 2022 period profit and the amount of TL 444,393,177 from the internal resources –, and the process was completed by obtaining the necessary approvals from the Capital Markets Board.

(\*) Pursuant to subparagraph (b) of the first paragraph of Article 24 of the Capital Markets Board Communiqué on Real Estate Investment Trusts No. III-48.1, the Company has notified the Capital Markets Board of the planned expenditure amounts for the projects whose cost payments are made in return for certain progress payments or in installments. The cash surpluses corresponding to these expenditures were utilized through the assets mentioned in subparagraph (k) of the first paragraph of Article 22 and presented under the main account item "Part of Money and Capital Market Instruments Held for 3-Year Real Estate Payments" in the Control of Compliance with Portfolio Restrictions table. In addition, as a result of the Company's application to the Capital Markets Board on March 8, 2016, at the meeting of the Board Decision Making Body dated March 23, 2016 and numbered 10/305, it was decided that the cash amounts invested in time deposits/participation accounts would not be considered within the scope of the 10% issuer limit stated in subparagraph (l) of the first paragraph of Article 22 of the Communiqué, so the cash surpluses subject to these expenditures were not included in the calculation. Considering these issues, as of December 31, 2023 and December 31, 2022, there is no non-compliance within the scope of the maximum limit in terms of Article 24/(b) of Communiqué III-48.1 and Article 22/(l) of Communiqué III-48.1.
