
4Energy Invest presents its Annual Report 2011

4Energy Invest, the renewable energy company focused on valorizing biomass into energy, announces today that its Annual Report 2011 is now available on the Company's website www.4energyinvest.com under the heading "Investors/Financial Reports".

The Annual Report 2011 has been prepared in English and has been translated into Dutch. Both the English and the Dutch versions are available on the company's website.

A paper copy of this Annual Report 2011 can be obtained at no cost upon simple request to info@4energyinvest.com or at the registered office of the company.

This press release is made available in English, Dutch and French through our corporate website www.4energyinvest.com

About 4Energy Invest

4Energy Invest is a Belgian based renewable energy company that was set up with a view to create and manage a portfolio of small to midsized locally embedded projects that valorize biomass, directly or indirectly, into energy.

4Energy Invest (through its fully owned subsidiary Renogen) has two cogeneration projects, located in Amel (Wallonia, Belgium), that are fully operational.

4Energy Invest (through its fully owned subsidiary Renogen) has constructed a large scale torrefaction unit to produce BioCoal or torrefied wood pellets with minimum CO₂ footprint in Amel (Wallonia, Belgium). 4Energy Invest has temporarily operated the Bio-Coal installation at 40% of its design capacity and produced a sufficient quantity of Bio-Coal as to enable a European utility to execute a large scale co-firing test during the last quarter of 2011. 4Energy Invest identified during its operation at 40% capacity that additional investments are needed to operate the Amel installation at a higher capacity factor. 4Energy Invest concluded that it needs to enter into a strategic partnership with a third party for Bio-Coal to be able to finance and implement the additional investments that are required.

4Energy Invest (through its fully owned subsidiary 4HamCogen) has taken into commercial operation a 9.5 MW biomass fired cogeneration project in Ham (Flanders, Belgium).

4Energy Invest has put on hold its roll-out strategy to build additional Bio-Coal production capacity until a strategic partner for Bio-Coal has been found. In addition, it does no longer pursue the implementation of its Bio-Coal projects in Ham (Belgium) and in Reisbach (Germany) but may in collaboration with a possible strategic partner give priority to projects in countries where more abundant biomass resources are available and where the long term supply of biomass can be secured at competitive prices.

4Energy Invest is listed on Euronext Brussels under symbol ENIN.
